

Star of Space 299

Chapter 299 Special Mission

"I just want her to rest.

Thinking of Sangsang, Lu Qiubo sighed again.

"Didn't I ask Chang Hong to hunt pheasants in the mountains yesterday? I stewed one for her today. But that girl, the older she gets, the more she has her own ideas, and she hides in the room to eat."

In the past few months, she felt that she almost no longer knew her granddaughter, and her idea was to come one after another.

"She was hiding in her room to eat. Who might have eaten the chicken later? I think she thought she was too fat and wanted to lose weight," she said.

"Probably he was injured by that boy from the Zhou family." Lin Laogan said.

Thinking of the Zhou family, he felt unhappy. Although Liu Yushui, his granddaughter, he despised, she was still the son of the old Lin family. How could he keep up with being bullied by the Zhou family?

"Just reduce it. Our parents are so handsome, but Sangsang can be so ugly. When Sangsang looks better, we will regret that boy from the Zhou family to death!"

he said.

"Um."

Lu Qiubo also nodded heavily.

She also felt that the entire Zhou family was nothing. Old Master Zhou looked like a master, and everyone outside was talking about how he was upright and upright. Didn't he teach such a bastard grandson?

Now that Liu Yushui's belly is getting bigger day by day, the family members don't even fart.

Just as she was thinking about the Zhou family, she heard her old man talking again.

"But it's all about weight loss. We can't let Sangsang get into trouble with her weight loss. There's nothing to replenish her health at home. Later, you ask Baiyi to go to town and buy some supplements."

"Sure." Lu Qiubo responded.

...

In the golden bead space.

Lin Caisang was busy planting medicinal materials and taking care of ice silkworm cocoons. She had no idea that the first two elders of the family had almost decided on Lin Caisang's marriage and had to go to town to buy supplements for her.

"Why is there another mission?"

When he looked up, he saw many more words appearing on the jade mirror. Lin Caisang was far away and could not see clearly what words were densely written on it, so he put down the ice silk cocoon in his hand and walked over to check.

When she reached the jade mirror, she was stunned.

"Special mission, what kind of mission is that?"

Aren't there only three types of tasks: high-level, intermediate and low-level? Why is there another special-level task?

'Special missions, with the highest points, can be used for three high-level missions, which are rare missions. '

I saw a line of words displayed in the jade mirror, and after a while, it turned into densely packed words of special tasks.

"I haven't seen what the princess looks like."

Lin Caisang touched his chin, looked at the words on the jade mirror, and muttered.

It read that the target of this mission was the eldest princess of the Liang Kingdom, the emperor's biological sister, who had been poisoned by a poison that was difficult to cure, and none of the imperial doctors in the palace could cure her.

The emperor loved his sister very much, and posted the imperial list with a stroke of his pen. Whoever could save the life of the eldest princess would get a gold medal from him, plus ten thousand taels of gold, and ten thousand acres of fertile land.

"This is a huge fortune, Brother Yujing. It's rare that you can understand this task so clearly."

The tasks she had taken before, not to mention the bounties and silver rewards, even the name of the person she wanted to save, could not have been mentioned to her. This time, her brother Yujing was able to bring the eldest princess' The inquiries were so detailed that they almost dug out eighteen generations of their ancestors.
