

Star of Space 305

Chapter 305 Are you short of money?

On days like this, officials feel that the common people are having a good time.

However, God knows how miserable the people are. It is difficult for them to survive. Do they still have to pay for land and dig ponds? Would they rather use that money to buy food?

Hearing this, Ya Molian's eyes flashed.

"Do you dig the pond at a high place like you do so that water can be diverted to the fields during drought?" he asked.

When she saw the drawing in Lin Changhong's hand, Ya Molian was shocked. Such a mountain pond structure, diversion mouth, and ditches connected to the diversion mouth.

He saw it all and was shocked in his heart.

"Yeah, isn't it convenient for me to look like that?" Lin Caisang asked him and answered without thinking.

"If the climate changes, we can directly use the wind-powered waterwheel built by Sifang to divert the water from the pond to the fields. There is no need to use the small waterwheel used by manpower."

In this way, any problem can be solved.

"Um."

Ya Molian nodded and responded.

"very good."

...

Exiled quickly, he bought all the medicinal materials Lin Caisang needed.

"Palace Master, these medicinal materials..."

"let it go."

Yamolian didn't give him a chance to speak, and directly motioned for him to put down the medicinal materials and go out.

Ban Jue could only open his mouth, glanced at Lin Caisang who was studying hard on the table full of medicinal materials, said nothing and turned around to go out.

In fact, as long as the person is favored by the palace master, no matter whether the medicinal materials she needs are poisonous or not, or whether they can kill people, the palace master is following behind to clean up the mess for Miss Lin, right?

Lin Caisang took out the wrapped medicinal materials in the bamboo basket he brought in detail, and then placed each medicinal material according to the feeling in his hands.

"Xiao Sangzi, why do you need so many medicinal materials? The patient you want to treat is very difficult to treat?" Yamolian looked at the medicinal materials on the table and smelled the unpleasant smell of the medicine mixed together and asked her.

"no."

Lin Caisang was very careful with his hands and did not look up at him.

"I don't even know what disease that person has. These medicinal materials are not prepared for her."

Until now, she only knew that the eldest princess had been poisoned, but after all, Jinzhu Space was her special treatment target. If she didn't even have the ability to treat her, then Jinzhu Space would definitely not let her treat her.

Therefore, she is not worried at all that the eldest princess's poison is difficult to cure. The poison that can penetrate the eyes of Jinzhu Space must be within her power.

"I just want to get some skin-beautifying lotion, skin-nourishing powder and so on. I mean, girls like these things the most. It's not easy to go out for a long time. I don't have to make more money, otherwise the wallet around my waist will be flat sooner or later. Go down."

she whispered.

Ya Molian on the side: "..."

Did he lack food and drink for this girl, or did he fail to give this girl the things she wanted in time? Why did he find that she was obsessed with money and couldn't get it out?

"Are you short of money?"

Didn't I earn a thousand taels of gold last time and didn't spend it anywhere?

"It's missing."

Lin Caisang nodded heavily, but still didn't look back.

"Who is not short of money these days? As the saying goes, money can make the world go round. How good is this? Besides, even if I am not short of money now, it does not mean that I will not be short of money in the future. What if? Are you in a hurry to use money but can't get it? You're going to die?"
