

Star of Space 315

Chapter 315 Let's go

Zeng Yulang didn't speak, just nodded.

In fact, he still didn't believe that a little girl who looked so tiny could remove scars that many doctors were unable to do anything about. Why did he think it was like a fantasy?

"By the way, let me ask you something. Where are the imperial lists usually posted?" Lin Caisang asked again.

She still didn't know where to go to reveal the imperial list to rescue the eldest princess. Since there was someone ready to ask, she just asked.

"It's at the entrance of the palace. There's still a long way to go from here. Girl, go out and turn right, and then..." Old man Zeng was only thinking about the scar removal cream in his hand. He didn't think about Lin Caisang's question about the emperor's list at all. What to do, just point out a way for her.

He didn't come back to his senses until Lin Caisang thanked them and turned to leave.

"What is this girl asking Huang Bang for? Could it be..."

Thinking of that possibility, his eyes suddenly lit up, he squeezed the medicine box in his hand tighter, and looked at his son in disbelief.

"Yu Lang, isn't that girl here for the imperial examination? Is she also here to treat the eldest princess' illness?"

If that's the case, then they have found a treasure. Those who have the strength to reveal the emperor's list, even if they cannot cure the eldest princess's disease in the end, their medical skills will not be much worse.

It's a pity that all those doctors are self-righteous. How can they come to treat a small family like theirs? They can't even invite them.

"The eldest princess's illness is difficult to cure, right?" Zeng Yulang frowned and whispered.

If it is easy to cure, then the imperial list will not be posted for so long. It has been posted again and again, and it has been repeated countless times. Who can really cure the eldest princess's disease?

not a single one.

That girl looked so young, but she dared to expose the emperor's list and cure the eldest princess's illness. She was really bold.

"Don't worry about other people, Yulang, try this scar removal ointment quickly, maybe it will really work." Old man Zeng didn't care about other people, he just wanted to see the effect of this ointment.

If the effect is good, he will have to prepare money.

"Um."

Zeng Yulang also nodded, took the medicine box into his hands, turned around and went back to his room.

...

After Old Man Zeng's guidance, Lin Caisang quickly arrived outside the palace and saw the imperial list guarded by two guards. There were also several gray-haired doctors who were hesitating whether to reveal the list and try it.

"cough."

Lin Caisang coughed lightly, straightened his clothes, and walked over slowly.

Several doctors saw a little girl approaching and looked at her in unison. Even the guards guarding the imperial list focused on her.

"Little girl, this is not a place for you children to play. Go ahead." A kind-hearted doctor said to Lin Caisang.

Behind the palace, even if it's not inside the palace, it is a place where someone's head may fall to the ground at any time. Why is a little girl so bold to come to this place?

And looking at the little girl's clothes, she doesn't look like she's from Jian'an. Could it be that she came to Jian'an for the first time and ran here with her family on her back out of curiosity?

Lin Caisang glanced sideways and glanced at him, "Grandpa, I'm here for something."

"Um?"

The old doctor was stunned by what she said, and he didn't understand what she meant.

"Little girl, you..."

He was about to offer some words of advice, but when he saw Lin Caisang's next actions, he was speechless and could not utter a single word.
