

Star of Space 343

Chapter 343 The damage is too great

"The so-called life of ordinary people means that even if the poison in the eldest princess's body is cured in the future, she will only be able to live a mediocre life. Her body has been hollowed out, and her internal organs have been damaged to the point where she cannot withstand any stimulation, let alone the big ones. As a supplement, even if you eat a piece of pork, you have to cut it into minced meat and boil it together in porridge before you can eat it.

The rice should not be too hard, which is harmful to the intestines and stomach; it is best to cook the vegetables until they become a mess in the mouth; don't think about those bird's nests and ginseng, you will never touch them in this life;

The water must be warm, not too hot or too cold, and it cannot be tea, only boiled water. If the climate is slightly hotter, you may die from the heat, and if the climate is slightly colder, you may freeze to death, which is not acceptable. "

As Lin Caisang said something, the faces of the emperor, the eldest prince, and the second prince turned darker, while the cold sweat on the foreheads of the imperial doctors flowed down.

"Old gentlemen, is my explanation still correct?"

"This this....."

The eldest prince opened his mouth and didn't know how to make any sound.

"Father, is living like this a life? It would be better to die happily. These imperial doctors are really vicious, and my aunt is so dangerous, but they have never mentioned a word in front of you. Damn it!"

The Second Prince roared and kicked out the imperial doctor who was kneeling at the front.

"This is called ordinary people's life. If this is ordinary people's life, why don't you live it?"

He roared angrily at the trembling imperial doctors.

"Second Prince, why are you so anxious? I haven't finished speaking yet." Lin Caisang glanced at the Second Prince with a faint smile.

"What I just said is basically impossible to happen, so you don't need to be angry."

"ah?"

The second prince was stunned by what she said.

"What do you mean?"

"What I just said has a primary condition, and that is that the poison in the eldest princess's body has been dragged away by a few old gentlemen. Only after someone can detoxify the eldest princess can such a life happen."

Lin Caisang explained slowly.

"However, when I look at these old gentlemen, they don't look like they can detoxify the eldest princess. Therefore, it is impossible for them to harm the eldest princess to such a miserable state. The most they can do is to let the eldest princess enter her body. The poison cannot be cured, and it is just a matter of death.

Of course, the prescription in the emperor's hand is what I use to relieve the excessive depletion in the eldest princess's body. After taking this medicine, and taking the antidote after seven days, the eldest princess's life will be better in the future. At that time, a few more warming prescriptions will be prescribed to make up for the lost vitality. "

Her eyes returned to the prescription in the emperor's hand again and she said.

"Father..."

The eldest prince looked at his father and asked for his opinion.

As long as his father nodded, he immediately asked Aunt Bai to bring the medicine to his aunt.

"Medication."

The emperor did not hesitate anymore and gave instructions directly to the prince.

"Yes, Father."

The eldest prince accepted the order and turned to look at Aunt Bai who had been waiting not far away. Aunt Bai immediately turned around, glanced at Lin Caisang gratefully, and went to the small kitchen to get the warm medicine that had been prepared.

"Your Majesty, although this girl's words are correct, although 'Thousand Tendon Roots' can neutralize the medicinal properties of 'Yue Sui', it is far less poisonous than the poison in 'Thousand Tendon Roots' and will cause too much harm to the human body."
