

Star of Space 355

Chapter 355 Legendary Medicinal Materials

"Brother Mo Lian, are we buying too much?"

She couldn't help but ask Ya Molian, who only left her a silhouette in front of her.

"The female shopkeeper said that these fabrics are enough to make more than a dozen clothes. Do we really need to buy so many?"

Especially the price of these cloths can really frighten her into dropping a piece of flesh. They are made of gold and are not that expensive.

"not much."

Ya Molian replied calmly.

He didn't think there was enough. If he didn't have all the fabrics in this cloth shop, he would buy more.

"We'll look elsewhere.

Lin Caisang: "..."

Want to visit other places?

She obviously came to Jian'an City to earn money, but not to spend a lot of money. According to his method, she earned a total of 10,000 gold, how many can he spend?

Well, I have to admit that anyway, she didn't have to spend any money on the things he bought, and her money was still hers.

But is it really okay for them to spend so much money?

Didn't he see how weird the female shopkeeper looked at them?

"Can you not go? Where else are you going?" She followed Ya Molian's footsteps and left Buzhuang.

...

After wandering around the streets of Jian'an for almost an hour, Lin Caisang felt that his legs were almost too thin, and then he was escorted by Ya Molian back to the outside of the eldest princess's house.

In fact, it can't be said that it was just a stroll, but Ya Molian took her to the streets of Jian'an City and bought her more things than she could count, such as men's jade crowns, women's hairpins, as long as Ya Mo Lian buys everything she likes.

She felt that she was completely redundant. Her neighbor didn't need any advice from her as a bystander.

At this moment, Ya Molian's hands were full of things, and she was ready to find a place to sit and wait for Lin Caisang to come back.

In the eldest princess's mansion, Lin Caisang looked at the prescription in the eldest prince's hand, which she had given him before. His expression was not very good.

"Girl, you are finally back."

Seeing Lin Caisang coming back, the prince hurriedly greeted him.

"What's wrong, but are there any medicinal materials in this that can't be found in the palace?" Lin Caisang asked.

"Um."

The great prince responded immediately.

"Others are fine. In the past thousand years, there was an imperial doctor in Beijue who said he could find it. My father asked him to leave the palace immediately to look for it. There are other medicinal materials that can be found in the palace, but this 'Tian Yin Pearl' and 'Diyin Pearl', I have asked all over the Taiyuan Hospital, but no one knows what these two medicinal materials are."

He was almost going crazy with anxiety. Seeing that the antidote was about to be in front of him, he was stumped by these two medicinal materials. He was so anxious.

"The 'Tian Yang Pearl' and the 'Di Yin Pearl' actually grow on the same plant. It's just that the 'Tian Yang Pearl' is exposed to the scorching sun, while the 'Di Yin Pearl' grows under the root system of the plant. It's buried deep and difficult to find."

Lin Caisang explained.

"Then this plant is..." the great prince asked.

"Extreme Hell Ginseng." Lin Caisang said.

The Great Prince: "!!!"

When the prince heard the words 'Jijioginseng', his head was full of black lines.

"Girl, isn't this 'Ultimate Hell Ginseng' a legendary medicinal material? Does it really exist in this world?"

He had also heard of the name 'Jijioginseng', but everyone who knew the name thought that this medicinal material was just legendary and could not exist in reality.
