

Star of Space 395

Chapter 395 I won't give you another cent

After a long while, she raised her head and stared at Lin Caihe like an eagle.

"Since you want to compete with me in everything, I go to the mountains to collect herbs to earn money, why don't you compete with me? I can make dried fruits and open a shop, why don't you compete with me? I can make my family members greet each other, why don't you? Compete with me? You always compete with me for food, drink, food, and spending money, but you never compete with me for work. Do you call this comparing with me? "

"Sangsang, why are you telling her this?"

Lin Changhong rolled his eyes at Lin Caihe angrily and spoke to his sister.

"What she most wants to compare with you is how delicious you are and how lazy you are to cook. Unfortunately, you can't compare to her in this regard.

After listening to Lin Changhong's words, everyone in the hall looked at Lin Caihe and shook their heads.

"Hey, I thought you should realize your mistake after being locked up for these days, but I didn't expect..." Lu Qiubo came back from the kitchen and sighed at Lin Caihe.

She was in the kitchen just now and listened clearly to what Lin Caihe said. She couldn't help but wonder, how could this calculating granddaughter belong to her family?

It's good to be able to scheme, but Lin Caihe's scheme even involves his own parents.

"What are you all looking at me doing? I'm not wrong!"

Lin Caihe saw everyone looking at him, and his eyes broke his heart, and he was even more dissatisfied with Lin Caisang.

"Lin Caisang, do you think I don't want to compete with you? But why don't you teach me how to pick herbs or how to make dried fruits? This is all your fault. You are too selfish and hide everything. Are you willing to teach me, aren't you just afraid that I will be better than you, and grandpa and grandma will love me and stop loving you?"

Lin Caisang: "..."

With Lin Caihe's appearance, how dare she teach her how to pick herbs? Don't go back and sell any tree roots as medicinal materials just to make money.

None of this mattered, she even doubted that if she really taught Lin Caihe how to learn medicine, she would secretly get some poisonous medicinal materials and poison the whole family to death.

She wouldn't take such a risk.

"Also, isn't it your duty to be filial to your family? Grandpa and grandma give you delicious food every day."

Seeing that Lin Caisang just looked at her without speaking, Lin Caihe became even more excited. He pointed at her nose and began to speak out all his inner thoughts.

"My parents are the same. They only have eyes for you. If you don't be filial to them, who will be filial to them, me? Why should I be nice to them? Do they ever see me in their eyes? In addition to forcing me to work every day, they also What have you done? Nothing. In this family, I am the cow and the donkey who work every day, unlike you who are treated like a treasure by them."

Lin Caisang: "..."

She looked at her grandpa, grandma, uncle and aunt, her face full of helplessness.

No matter how eloquent she is, how can she make sense with someone who only cares about herself?

"Okay, I won't argue with you here."

She raised her hand, not wanting to argue with Lin Caihe anymore, because she couldn't argue with Lin Caihe in a hurry.

"In a word, you can't even expect to get a single copper from the money I earn. Also, in order to prepare a dowry for you, I gave your eldest brother ten taels of silver. I will get back as much as I can later, not even a penny. I won't give you any more money."

"you--"

After hearing her words, Lin Caihe's eyes almost popped out.
