

Star of Space 507

Chapter 507 He also eats meat

Even he, who had been taken to Jian'an City several times by her, couldn't help but secretly twitch his lips when he saw her doing this.

Every time he went to Jian'an City, he followed the agreement he made with Sonny for the first time and went there with his eyes closed. He really didn't know what kind of secret his Sonny was hiding.

But judging from how she made the white fox disappear just now, he thought, even if he caught a white tiger for her, she could make it disappear for him immediately, right?

"Uh, cough."

Lin Caisang coughed twice to express his embarrassment.

"That's not the case. Let me tell you this, Brother Mo Lian, since I took over the mission of the eldest princess, my...what, I have been upgraded. Originally I could only grow medicinal materials, but now I can breed animals. So I thought, if I come here to catch some animals and raise them, then I won't have to go through so much trouble if I want to eat meat. I can just catch one and eat it. That would be great.

she explained.

In fact, she also wants to raise more horses, cows, sheep, chickens and ducks, which are of course essential.

"I see."

Although she didn't understand it very well, it was what she said.

"Sonny, will it be good to raise medicinal herbs with animals?"

All the good medicinal materials that were planted later were destroyed by the animals that just came in, right? That's really called losing more than you gain.

"No, how could it be?

Lin Caisang immediately shook her head. Her pasture space and medicine garden space were not on the same plane. Of course, she couldn't explain this to Ya Molian.

"Anyway, those animals and medicinal materials are not close to each other. Before you came just now, I also caught several rabbits and quails, and there are also some birds. Anyway, they can't eat the medicinal materials I grow."

Ya Molian nodded, indicating that she understood.

"Sonny, white foxes are carnivores."

Although he understood, he still had to remind her.

"Even if you want to catch a civet and keep it, civets... also eat meat."

Lin Caisang: "!!!"

She had forgotten this. She had just upgraded the ranch space and was busy all the time. She had no time to read the ranch space rules. She really hadn't thought about this.

And if she raises carnivorous animals, she has to feed them meat, which is quite troublesome.

I have to go back and take a closer look at the ranch rules to see what exactly I should do to take care of the ranch space without making myself too busy.

"I forgot about it, but it doesn't matter. It's just a white fox. We don't want to catch too many. We can just catch some herbivores first. As for the carnivores, I will do some more research and see if there is any way to separate them separately. "

Ya Molian was speechless after hearing her words, and shook her head with a smile.

"why are you laughing?"

Lin Caisang looked at him, extremely puzzled, and asked.

Is she right? Since she can't have both, she should raise one first. What a simple truth.

"Sang'er, I've been in and out of the inner forest many times, and this is the first time I've seen a white fox." Ya Molian explained why she was laughing.

Is this girl thinking that the white fox is just picking up a bunch of vegetables and radishes from anywhere? Not too many, even if she wanted to catch more, she still had to be lucky enough to get it.

But I have to say that this girl is really lucky. She can encounter a white fox just by entering the inner forest.

"Really!"
