

Star of Space 510

Chapter 510 Is it worth being grateful?

'Yes. Jade Mirror replied.

"Then let me ask you, I want to raise both carnivores and herbivores in the pasture space. How can I ensure that they can survive in a balanced way? Is there any way to separate and breed them separately?"

Lin Caisang asked immediately.

'have. '

A word appeared in the jade mirror.

"It's good to have it, what should I do?" Lin Caisang breathed a sigh of relief.

It would be great if there was a way to prevent the carnivores from chewing up the herbivores until no bones were left. Then she looked at the empty pasture space and lay there crying.

'Use points to exchange for ranch layout. Each different layout requires different point redemption.' Yu Jing replied.

Lin Caisang: "..."

Why do everything require points? She really doubted whether she needed to transform into ten avatars to complete tasks, otherwise this increase in points would not be enough! !

He raised his hands and wiped his face.

"Points, points again. How many points do I have now? Are they enough to be divided into three patterns? Or if you have any good opinions about the animals in my current ranch space, you can also put forward them."

'Dear master, Yu Jing suggests that you open a separate layout for the two white foxes, and then open a large layout for the carnivores. As for the others, there is no need to open a layout, they can be raised directly in the pasture space.'

Jade said to give her advice.

"Are the points enough?" Lin Caisang asked him.

She naturally knows how to separate the pattern. The key is her points, are they enough?

'You still have a lot of gratitude points. It's no problem to open two layouts. ' Three lines of characters appeared in the jade mirror.

"Gratitude value? What is that thing?"

Lin Caisang was confused. Why was there another gratitude value? Wasn't it points? Could it be that the points are also called gratitude points, and are they the gratitude of the patients she treated to her?

No, because if the gratitude value is the same as the points, then Yujing will definitely 'say' the points directly. How could it become the gratitude value again?

"What's the difference between gratitude points and points?" she asked Yujing.

'Points are obtained by treating diseases and saving people after receiving tasks, while gratitude points are obtained by treating diseases and saving lives without receiving tasks. You have treated many patients before, and they are very grateful to you. The gratitude points in the Golden Pearl Space will be Increase. '

Jade Mirror answered her question.

"Can it still be like this?" Lin Caisang was excited.

Every time she goes on a mission, if she encounters a patient who can be treated, she will definitely come to the rescue. It turns out that saving someone like this can actually get gratitude points, which makes it easier for her to do many things in the ranch space.

'Yes. '

Two words appeared in the jade mirror. After they disappeared quickly, a few lines of words appeared again.

'Gratitude points can not only be divided into different patterns, but every time you upgrade the Golden Pearl Space, if you want more things to appear at the next level, you also need the support of gratitude points. '

"You mean, the accelerated version of the medicine peak in the medicine garden only appeared because of spending gratitude points?" Lin Caisang revealed the truth.

In other words, if she hadn't always saved a few people casually, the accelerated version of Yaofeng would not have existed at all. In other words, the gratitude of others to her could be replaced by Jinzhu Space. Her reward!

Damn, this thing is awesome!
