

Star of Space 581

Chapter 581 Don't blame me for pouring cold water on you

"Putting it at a high place can save a lot of effort. When the time comes, we can build a sluice and just open the sluice when water is needed. There is no need for everyone to carry buckets of water every day.

Lin Caisang explained.

"During drought, the weather is already hot. It's not a problem for every family to go out to fetch water. It is also very likely to cause heatstroke due to overheating. You see, I have drawn ditches here. These ditches can lead to every household. When the gate is opened and water is released, the water will flow directly into these ditches.

In this way, everyone doesn't have to be so tired when using water, and can save a lot of energy to do other things, isn't it great? "

When there is a drought in Ye County, it is the time when the men in their village go to the mountains to collect bird's nests and look for wild products to sell in the town for money. This must be taken into account.

"Furthermore, every time the clan chooses a fixed time to open the floodgates and release water, everyone doesn't have to think it's unfair that someone's household has too little water. Everyone is the same, and there will be no troublemakers."

There should be no trouble.

"Building such a gate... doesn't cost a lot?" Ya Molian stared at her and asked silently.

"The gate on Menghuang Mountain cost more than two hundred taels of silver. The two tribes can just build two more gates like this. In addition to the money for buying the mountain land, if it is divided equally among each household... I give a rough estimate. After a while, half a tael of silver per acre of land is enough."

Lin Caisang said.

Yamolian: "..."

Half a tael of silver per mu, and the families in their village with a lot of land could get six or seven taels of silver.

"Sang'er, don't blame me for pouring cold water on you. It's definitely impossible for someone like my adoptive father to pay six taels of silver just to grow some rice." And there are many people like Yatu in Yacun. .

"Then I can't control it. It's up to the two clan leaders to find a solution." Lin Caisang shrugged.

She can't be responsible for everything. It's already good that she can draw these pictures. Is it possible that she still wants to give her all the money she should pay? She is not taken advantage of!

"That's true. Just leave the matter to them then." Ya Molian also nodded.

"Actually, I have also thought of this. If those people don't pay the money, it is not impossible. When there is no water, it will be enough for them to drink a pot." Lin Caisang said again.

"Anyway, if you pay the money, you can use the water. If you don't pay the money, you can continue to dry. Everyone is sharp-eyed, and they will not let those who want to take advantage of it just because of a moment of softness." ,right?"

"You."

Ya Molian looked at her helplessly.

"Why don't you say that those who paid the money will not let their own interests be harmed?"

"Haha, they all mean the same thing." Lin Caisang smiled.

This is the truth. My family has paid money and dug a pond to have water. Why should you, a person who didn't pay money, use the water? Isn't this spending my family's money and cutting off my family's flesh?

No one can overcome this hurdle.

Even if someone can get over this hurdle, there are so many families in the village, there must be people who can't.

"When those people want to use water, they can continue to pay money, right?" she said.

"Speaking of which, the roads in our village should be repaired, and the school is in dilapidated condition and should be renovated. I hope some people don't pay."

"I've bought all the maids. I'll take you over tomorrow to have a look." Ya Molian said suddenly.
