

Star of Space 59

Chapter 59 Better than just sitting at home all day

Mrs. Lin Lu looked at her granddaughter and couldn't believe where she had the confidence to earn enough money to buy a bullock cart?

She knew the price of the buffalo. Even if Yecheng was the poorest province with the cheapest prices for everything, a big buffalo still cost four or five taels of silver, right?

The third child can make the trolley by himself.

But four or five taels of silver...for their current home, that is a sky-high price. How can they afford it?

"Sister Sang Sang, are the medicinal materials we dug very valuable?" Lin Changyi and Lin Caiqing both looked at Lin Caisang without blinking and asked with their eyes shining brightly.

If this is the case, then they must go to the mountains every day to dig medicinal materials and earn more money to buy a lot of delicious food for their families.

"The medicinal materials are somewhat valuable, but it is not easy to find the medicinal materials in the mountains."

Lin Caisang smiled faintly at them, then turned to look at Lin Laogan and Lin Lu.

"Father, mother, and Sangsang have told me that if our family has an ox cart, I will make some small things at home, such as benches, and pull the ox cart to various villages and towns to sell them. It is better than sitting idle every day. I can't make any money at home."

Lin Baiyi said.

"This... is a solution."

Lin Laogong nodded, thinking it was a good idea.

"It's just this buffalo..."

"Grandpa, don't worry about the buffalo. We still have dozens of kilograms of medicinal materials at home, and they are all good quality. Once they are dried and sold in the drug store, you should be able to buy a buffalo.

Lin Caisang said.

"If it's not enough, I will go to the mountains a few more times and hunt more prey to sell in the town. It will definitely be possible." Lin Changhong continued what his sister said.

"Grandpa, Grandma, we can go digging for medicine with Sister Sangsang to make money." Lin Changyi also said.

"Haha, I'm still sensible."

Lin Caisang smiled and raised his hand to touch Lin Changyi's head.

"Grandpa, what I mean is that there are not many medicinal materials in the mountains, and there is no need for the three of us to go together. Changyi and Qing'er will be at home from now on, helping the third uncle to dig out the medicinal materials. Let the eldest brother follow me. Let's go together."

"This, Changhong..."

Lin Laogong looked at Lin Changhong and asked his opinion.

"Grandpa, what Sangsang means is also what I mean." Lin Changhong saw this and immediately said.

"The mountain is a mountain after all. Just because it has been safe these days does not mean that it will always be safe. There are still wild beasts. If Sangsang is alone, I can still run with her, but if I take Qing'er and Changyi with me, I will I don't have that ability anymore."

"Yes, yes, old man, Changhong is right." Mrs. Lin Lu responded repeatedly when she heard her grandson's words.

"You don't know. A few days ago, Sang Sang and the others entered the mountain. I have never let go of my mind. I have been thinking about whether there will be any danger in the mountain. In the future, if Changhong follows Sang Sang, I can do it too. not worried."

What she said was the most truthful thing. When men go into the mountains to collect bird's nests, the women in the family will be frightened, let alone her family Sangsang.

To put it bluntly, there are no jackals, tigers or leopards on the mountain.

That boy Mo Lian didn't hunt a wild boar in the mountains yesterday. The wild boar was so big. If he met Sangsang and the others who were digging for medicine, they would be doomed, wouldn't they?

Therefore, let Changhong follow.

"Then let's do this, let Chang Yi and Qing Yatou help at home."

Lin Laogeng was saved alive, and the matter was settled. From now on, the only people going up the mountain were Lin Caisang and Lin Changhong.
