

Star of Space 670

Chapter 670 If there is one, there will be two

Even if the two principals are not here, the Lin family has bought all the things that need to be bought, and Ya Molian seems to have left it to Ya Enxi and the others to prepare all the dishes that will be used on the engagement day. .

"Grandpa Patriarch, you came here with Uncle Jin, but what's the matter?"

She asked Patriarch Lin, and naturally she already knew why they came here this time. It was just for the crops in the village, which were almost withered.

This year, there is another severe drought. The drought situation is more serious than last year. If there is no water, I am afraid that the harvest will not be 30%. And with this 30%, after excluding the taxes that need to be paid, how much will be left? , not to mention filling your stomach, maybe for most of the year, everyone has to chew tree bark!

"this....."

Listening to Lin Caisang's questions, Patriarch Lin really didn't know what to say.

He also knew that the second season of rice was planted on Lin Caisang's barren mountain, which needed water, and other crops also needed water. Asking her to give the water from her place to everyone, he didn't know what she could do. Can't be willing.

"Sangsang, look, it's a bit annoying for a group of us to stand here. Why don't we go in first?" he suggested.

Water use was a big deal, so we had to sit down and talk about it slowly, and we had to carefully discuss how to use the water, otherwise, he would feel so scared for Lin Caisang!

"Yes, OK. 69shux.Com" Lin Caisang nodded.

Just like that, a group of people followed Lin Caisang and Ya Molian into the Lin family's yard.

Naturally, it was impossible to enter the main hall, and there were too many people to squeeze in. Lin Baiyi and the children moved all the stools and chairs that could be moved to the yard. It was not cold anyway, it was very hot, so he sat in the yard. Chatted.

"Nephew Jin, what do you mean, you want to fetch water from the barren hills of my house for everyone to use?" Lin Laogan took a puff of dry cigarette and stared at Uncle Jin with his sharp eyes. asked.

"Yes, Uncle Geng, because there is a severe drought this year, there is really no other way in the village, so I thought of Sangsang. I didn't know you..." Uncle Jin hurriedly said with a smile.

"This still depends on Sangsang."

Lin Laogan interrupted him and glanced at his granddaughter.

"Sangsang, the second season of rice has not been planted for a long time. It is when water is needed. If we use the water for everyone, can it be done? I think there will be one or two droughts today. Where's the moon?"

Hearing this, Lin Caisang was silent for a moment, lowered his head and thought carefully.

Naturally, there is no problem on her side. Some of the water in the Golden Pearl Space can also be diverted and used, and the twenty-acre pond is not meant to be used up.

However, facing Patriarch Lin and Uncle Jin, she naturally couldn't let go of this all at once.

Although most of the people in the village are good people, there are also those who are greedy and eager to take all the water for themselves when they see that there is water to irrigate their crops.

If there is one such person, there will be a second one, and then there will be an endless stream of such people, which will definitely be a big trouble.

"Sangsang, what do you mean?"

Seeing that Lin Caisang was still reluctant to speak, Patriarch Lin didn't know what she was thinking. After hesitating for a while, he asked aloud.

"Grandpa, the clan leader, Uncle Jin, and several clan elders from the Ya clan."
