

Star of Space 671

Chapter 671 How to use it

Lin Caisang came to his senses after he shouted, looked at them, and nodded to them one by one.

"Originally, water use is a big deal, and I shouldn't refuse it, but you have also seen that there are so many crops grown on my barren mountain, not to mention rice, but also sorghum. Just a few days ago, Cut a batch down.

You must have heard that I didn't ask anyone to dig up the poles, because as long as the heads of sorghum are cut off and raised, a few more forked heads will grow while the weather is not cold. Grow a batch of sorghum.

There are other crops grown there, and all of these require water. "

When Chief Ya and Uncle Li Zhengjin heard her words, their expressions suddenly turned bad.

It's not that Lin Caisang is unkind, after all, everyone's heart will be towards themselves first, and then they will think of others. If Lin Caisang is really unwilling to take out the water to share with everyone, then there is nothing they can do.

"So Sang-sang, what do you mean..."

"Uncle Jin, please listen to me first."

Before Uncle Li Zhengjin could ask anything, Lin Caisang raised his hand and interrupted him.

"When I say this, I don't mean that I won't provide water to everyone for my own crops. After all, my family has already harvested a crop of rice. No matter how dry the day is, I can still have enough food and clothing to survive hunger. But everyone in the village is different, their crops haven't been harvested yet."

"Yes, yes." Patriarch Lin nodded repeatedly.

I thought to myself that if a little girl like Lin Caisang could think of this, she really deserves to be from the Lin family. She is a good child.

"Grandpa Patriarch, I just want to say that the water on my barren mountain can be used, but it must be used in a certain way." Lin Caisang continued.

"How to use it?"

These words confused this large group of people.

What else can we use water for? Naturally, we can use it as we want. We can irrigate the crop fields and feed the crops.

"Sangsang, tell me." Uncle Li Zhengjin said.

"Every household in the village is short of water now. To be honest, the river at the far end of our village is almost bottoming out. In a few days, we won't be able to carry any water." Lin Caisang continued.

"In this way, the water on our Menghuang Mountain has become a 'life-saving fairy water' in everyone's eyes. Let's compare our hearts. Uncle Jin, Grandpa, the patriarch, if you don't act upright and become the patriarch, will you be in trouble? I was thinking, how about getting some more water for my house?"

"this....."

Not to mention Uncle Jin and Chief Lin, even the other elders of the Lin and Ya clans looked embarrassed.

When they are in this position, they all want to prepare more water for themselves or irrigate the land better, let alone others?

"Expect yourself to others, everyone probably thinks so, right?"

When Lin Caisang saw the expressions on their faces, he knew that they had already thought of what they were going to say, right?

"There is water, but there is only so much water, just sitting there. If it runs out today, what should we do tomorrow? Or maybe everyone is rushing to use it like crazy from the beginning, waiting for me to drink it on the deserted mountain. The water in the pond is all used up, what should we do with the crops?

This is what I just said, how to use this water. "

"Yep."

Uncle Li Zhengjin nodded repeatedly, feeling that what Lin Caisang said made sense.
