

Star of Space 679

Chapter 679: Don't you feel bad?

"Sang Sang, there is one more thing. How many wolves are there on your Menghuang Mountain? Since everyone has to go to the mountain to fetch water, what about the wolves..." Chief Lin looked at Lin Caisang and asked hesitantly. ㄅㄇ

When Lin picked mulberry and raised wolves, he didn't say anything. He also felt that the head of the Lin family, Mr. Lin, was disabled. His eldest son, Lin Baizhong, had also lost news. Liu Baixiao, let alone Liu Baixiao, was not living up to expectations. Only Lin Baiyi was at home.

However, a family property as big as Menghuang Mountain belongs to Lin Caisang alone. There is no powerful beast to take care of it, so it is indeed easy to be bullied.

but now.....

"It doesn't matter."

Lin Caisang spoke quickly and handed a few pieces of paper in his hand back to Uncle Li Zhengjin.

"Grandpa Patriarch, Uncle Jin, if you want water, you don't have to go to Menghuang Mountain. You should have known before that I have dug several ponds of almost an acre on the mountainside and at the foot of Menghuang Mountain. In the future, if you want to use water, You can fetch water from the pond at the foot of the mountain."

"this....."

Patriarch Lin and Li Zheng looked at each other again, and they both looked at Lin Caisang at the same time.

"Sangsang, I'm afraid the pond at the foot of the mountain won't be able to carry water for a few days, right? There's a lot of land in our village that needs water."

Uncle Li Zhengjin said to her.

"Won't."

Lin Caisang shook his head. m

"Uncle Jin, please feel free to carry water from the foot of the mountain. I guarantee you that the water in the pond will not be used up."

she said.

"this....."

Uncle Li Zhengjin couldn't understand her words.

"Uncle Jin, my sister said she wouldn't run out, so she definitely won't run out." Lin Changhong stood up and spoke to Uncle Jin.

"My sister built a gate in the pond on Menghuang Mountain. If the water in the pond at the foot of the mountain runs out, the water can be discharged directly from the mountain. It is very convenient. Moreover, it saves everyone from walking. The strength of the mountain road is gone.

Moreover, although the road was flat, it had to be walked from top to bottom. Two buckets were enough to be swung on the shoulders for several times. If one really carried water from the mountain down to his own field, he would probably only have half a bucket of water left. "

It was only now that he figured out why his sister built such a big gate and several windmills on the mountain. It turned out that they were all useful.

"That's it, then it's done."

Li Zheng nodded. Although he didn't understand Lin Changhong's words, as long as there was water, he could do anything.

...

The water issue was settled in this way. Patriarch Lin and Uncle Li Zhengjin took care of everything, which saved Lin Caisang a lot of trouble. But even so, Lin Caisang still told his eldest brother and other people in the family, Go and see more when you have nothing to do.

"Sister Sangsang, you have quite a lot of money from selling water. Wouldn't you feel bad if you just use it like this?" Lin Caiqing watched Lin Caisang spend the money that he had not received yet, and he didn't feel at all. , couldn't help but ask.

That's a lot of money. There are so many people in their village, and each family earns one penny a day. In a month, it's a lot of money.

"What do I feel bad about?" Lin Caisang raised his head and asked her in a funny tone.

"Are you really not feeling sad at all?"

When Lin Caiqing saw her asking this, he knew that she really didn't feel bad anymore, but he still couldn't help but ask again.

"You said you were engaged to Brother Mo Lian and had a banquet tomorrow. The money spent was much better. If the money had not been spent, it should have been able to make up for the cost of the banquet, right? It was just spent like this. What a pity. ah."
