

Star of Space 761

Chapter 761 Deal with it as soon as possible

Because she had concentrated her mental energy for too long, when she came outside, she almost lost her balance and fell forward. Fortunately, the prince behind her noticed her in time and helped her.

"Miss Lin, what's wrong with you?"

"It's okay, I'm just a little dizzy. You'll be fine after a rest." Lin Caisang shook his head.

"Miss Lin, how is Xiao'er? Is there any serious problem?" The emperor saw them coming out and hurriedly came forward and asked.

The eldest princess also came over, nervously looking at Lin Caisang's somewhat pale face, and she was even more worried about her daughter.

"Miss Lin, are you okay? Why do you look so bad?" she asked worriedly.

"fine."

Lin Caisang first replied to the eldest princess, and then looked at the emperor.

"Your Majesty, the Second Prince's legs and right hand were hit by stones and the bones were broken. However, I have fixed them for him. As long as he does not move during this period, there will be no serious problems. He will be able to behave like a normal person in the future."

"Huh, that's good."

When the emperor heard her words, he let out a heavy breath.

"Trauma can be treated, but he must have been poisoned by miasma in this mountain before. Because Vladivostok was not treated in time, he became dizzy and rolled down the hillside, injuring his internal organs."

Lin Caisang said again.

"What?!"

The three emperors were all shocked after hearing her words.

"Miss Lin, do you have a way to cure me?"

"This internal injury cannot be cured immediately with any medicine. It can only be treated slowly with warm and tonic medicine. There is no rush." Lin Caisang said.

This second prince, according to the past, she should treat him like this, and save him from wanting to cause trouble all day long, making everyone in Jian'an City uneasy.

But now that she saw that he was so seriously injured and had to rest in his house for several years, she felt sympathy for him.

"Then... how long does this conditioning take?" the eldest princess asked.

"As short as two years, as long as... ten years." Lin Caisang replied.

"Also, the Second Prince must not be allowed to come into contact with anything like poison in the future. The reason why he inhaled the miasma in this forest may have a lot to do with his curiosity."

Otherwise, why didn't others inhale the miasma, but he was the only one who almost died from the poison of the miasma?

"Okay, okay, I understand."

The emperor nodded repeatedly. He had been opposed to his son playing drugs early on, but his mother and aunt had indulged him, and his eldest son also secretly helped him. Although he was the emperor, after all, he is also a father.

"besides....."

As he spoke, Lin Caisang looked up at the forest on the hillside opposite him.

"It's best to seal that forest, otherwise, people will be poisoned in the future."

"Don't worry, Miss Lin. Tomorrow the king will order people to seal off this forest, and this pile of rocks will be dealt with as soon as possible." The eldest prince accepted Lin Caisang's words and promised.

This damn place that harmed his brother, how could he let it continue to exist like this? It must be rectified. As for this miasma, he heard that the miasma also has a source. As long as the source is destroyed, it will never happen again. There won't be any miasma anymore.

"Um."

Lin Caisang nodded.

"That's good. I will write two prescriptions for the Second Prince later. Your Majesty, please order someone to get the medicine and boil it. When the Second Prince wakes up, let him take it. This pain of broken bones is very unbearable. , What's more, the second prince's injury was not the same."

"well."

The great prince responded repeatedly.
