

Star of Space 801

Chapter 801 Everyone is very excited

"No, no, girl, think of other ways, think of other ways, don't you have a second way?" Su Yang was stunned for a while, then came back to his senses and said quickly.

He only has such a son. If he can no longer be a human being, what's the use of keeping him?

"Is the Imperial Master sure you don't want to use this antidote?"

When Lin Caisang heard what he said, he calmly asked Su Yang without mentioning the second method first.

"You know, after taking this antidote medicine, it only takes half an hour to detoxify, and the pain only lasts for half an hour, but other methods... I am afraid that the pain the young master will have to endure will take ten days in total. It's been half a month."

she said.

Hearing this, Suyang gritted his teeth and took a deep breath.

"Take it hard, girl, what is the other way? Can you tell me about it?" he asked.

Anyway, he can't just watch their Su family die. Su Ri must have heirs, there is no doubt about this!

"The other method is troublesome. It requires a lot of medicinal materials, boiling them in a bucket, and then letting them cool for a while. Then, put Mr. Ling into the bucket and keep them warm over a warm fire for eight hours.

But it can't be detoxified in one day. You need to let Mr. Ling take a medicated bath every seven days. I can't estimate how many times it will take.

Although this method is troublesome, it is the mildest method of treating poison and can ensure that the master's body is not harmed. "

"Okay, let's use this method."

Almost immediately, Su Yang made the decision without even thinking about it.

What he wants is that there is no harm to his body, his son can still have heirs, and their solemnity can be passed down, that is the best.

"Now that the Imperial Master has made up his mind, I will first write down all the medicinal materials needed for you so that you can order people to prepare them. Also, the medicinal materials needed each time are not necessarily the same. I hope the Imperial Master will not question my treatment methods."

Lin Caisang said.

After all, she had offended this person before and beat him until his face was now black and blue. She had to be careful about this insidious villain, right?

"Okay, okay." Suyang responded.

"Let's get started today." Lin Caisang nodded, preparing to teach Su Ri a lesson today, letting him know what it means to harm others and ultimately harm yourself.

As a result, during the day, not only the people in the Imperial Prefect's Mansion, but also the wailing and cursing sounds of the Imperial Preceptor's Mansion could be heard on the street. Curing poison is not just about soaking in warm water for a few hours. Simple.

The poison and the antidote collide together, and every piece of flesh in the body will feel like being pricked by needles. The pain is so painful that Suri doubts his life!

"Can that little girl really cure Mr. Su's illness?"

On the street, word had spread about Lin Caisang treating Su Ri's poison. Everyone was very excited when they heard Su Ri's screams. Some people secretly went outside the wall of the Imperial Prefect's Mansion to listen. Then he cursed at the wall a few more times.

But also because Su Ri's poison would be cured, many people couldn't help but curse Lin Caisang while being excited.

A good doctor, a famous doctor, who can't be cured, why do you want to treat people like Su Ri? Don't you want to cure Su Ri and let him come back to harm others?

...

"Leader."

"Did you find out anything?"
