

Star of Space 886

Chapter 886 Plant some radishes, greens, etc.

With Lin Caisang's ability to deal with them today, if he gets another Yamolian, will he be able to deal with it in the future? Regardless of whether Lin Caisang will be a member of their Zhou family in the future, Ya Mo Lian must be won over first!

"Okay, father." The man responded.

...

After leaving the examination room, Lin Caisang did not go to Shaohua City, but went directly into the Jinzhu space and continued to make her clothes.

"Sister-in-law, your hands and feet are so fast. This is more than half done." Sui Ziyou walked over, looked at the half-finished product in Lin Caisang's hand, and said.

"Well, that's almost it." Lin Caisang nodded.

What she made was not just a coat that was worn on the outside, but a lining, the kind that required a belt.

However, what surprised her was that she had thought that the white spider silk would be almost used up, but she didn't expect that after more than half of it was done, not even a ball was used.

But she really saw that this white spider silk was really much thinner than ice silk, so it was naturally used less.

As for the ice silk, more than half of it was used and fell off.

"Ziyou, are you ready with all the things I asked you to prepare?" She asked Sui Ziyou while moving her hands.

"It's been prepared a long time ago." Sui Ziyou said immediately.

Lin Caisang asked her to prepare medicinal materials. Of course, apart from medicinal materials, there was nothing else in the medicine garden space. Of course, she only prepared medicinal materials.

was nothing
else in the
medicine
garden
space.

"Sister-in-law, I think the things I have prepared here are definitely not enough. I have to buy some more to prepare."

Thinking about it, she said to Lin Caisang.

"Um?"

Lin Caisang was confused and looked up at her.

"Sister-in-law, neither you nor Brother Mo have ever gone up to Baibind Mountain. You don't know if there is food up there, or if there is food, it's all poisonous. I don't know how long it will take you to come back down. I think, no matter what, you should prepare more food."

Sui Ziyou put forward his own opinions.

Hearing this, Lin Caisang was silent for a moment and nodded.

"Well, you're right. We should prepare more. It's okay. I'll buy some more rapeseeds to plant later."

Sui Ziyou: "..."

Rapeseed? Where should I plant it? Isn't it said that vegetables cannot be grown in the medicinal garden space?

"Sister-in-law, didn't you say that the medicine garden space can't..."

"I didn't say medicine garden, I said pasture." Lin Caisang interrupted her.

"The rabbits I raised before must have given birth to baby rabbits, right? There are also other vegetarian animals. Now that we have raised them, it is of course possible to grow some vegetables for them to eat. These pasture spaces are allowed. I Have read the rules."

She has read through all the rules of the pasture space. As long as it is needed for raising animals, she can grow it.

For example: if rabbits are raised in the pasture space, you can plant some radishes, vegetables, etc.; if fish and shrimp are raised in the pasture space, you can plant some aquatic plants for the fish to eat.

Anyway, she just wants to seize every loophole in the ranch space and do what she wants to do.

"Of course, I will buy some cows, sheep and pigs later. These are more cost-effective to raise. Not only can they produce milk, but they can also be killed and eaten. Kill two birds with one stone." Of course, it was impossible for her to let pigs produce milk.

Because she didn't dare to drink.

"Do you think there is anything else that needs to be added?" she asked Sui Ziyou.

"I think, sister-in-law, whether you buy pigs or cattle or sheep, you must first buy some chickens, ducks and geese. These are easy to kill and convenient to make into dishes. The most important thing is that they can lay eggs."
