

Star of Space 888

Chapter 888 Don't ask if you shouldn't ask

"Master, please hold your hands for a moment. This customer wants to order something, so come over and take a look first.

The woman waved to the shirtless man and asked him to come over.

The man glanced at Lin Caisang next to the woman, wiped the sweat on his face, dipped the iron piece in his hand into the pool, put it back into the iron melting furnace, put on a single coat and left come over.

"Girl, what do you want to build?" he asked.

Lin Caisang reached into his small satchel, took out the drawing paper he had drawn in the Golden Pearl Space, spread it out and handed it to the man.

"You can take a look at this first. If you can't build it, I won't force it.

"this....."

The man suddenly took the drawing away from Lin Caisang's hand, took it into his own hand, and looked at it carefully.

He slowly looked over the papers one by one. While looking at the drawings, he raised his head from time to time and glanced at Lin Caisang.

"Girl, pardon me, your drawing is really weird. I'm afraid it doesn't sound like it's iron. Is there anything else that needs to be bought? Girl, did you draw this drawing yourself?"

he asks.

"You don't have to worry about other things. If you can do it, I will give it to you directly." Lin Caisang said.

With just one glance, she could see that the blacksmith was very interested in her drawings, but being interested did not mean that he could build it. She still had to ask clearly about this.

"Give me five days, I should be able to make it." The blacksmith said.

Judging from the drawings the little girl gave him, this thing is so sophisticated that it doesn't look like an iron weapon but more like a hidden weapon.

However, even if it was a hidden weapon, he could make it for her once she got here, but it would take some time. In the past five days, he had been talking too tightly.

"good."

Lin Caisang didn't waste any time and nodded directly.

As long as it can be built, it will be fine. As for how many days it will take...

The reason why she didn't go to Shaohua City to build this thing was because it was convenient in Ye County. Even if she went to Baibind Mountain later, she could get here directly from the Golden Pearl Space and take the thing away.

"One more thing, I don't want a second one of the things I build to appear again. Boss, can you do it?" She looked at the blacksmith steadily and asked.

"Of course this can be guaranteed," the blacksmith said.

"Don't worry, girl, there are many people who order things from me. I have always been strict and will not mess up my business. As long as you leave my shop, no one will know that your things are Made here by me."

"Um."

Lin Caisang nodded with confidence.

After paying the deposit and handing the white spider silk to the blacksmith, she turned and left.

"Master, what did this little girl ask you to make? You didn't even pay back the price. You are so generous." After Lin Caisang left, the woman asked the man.

The man just glanced at her, took a box, put the white spider silk that Lin Caisang gave him, locked it up, and then looked up at the woman.

"Don't ask if you shouldn't ask, and don't tell anyone what happened today when you go out, do you understand?" he warned.

"Master, what are you saying? When did I say anything to people outside? My mouth is much stricter than yours." The woman was not happy that her man said that to her, so she said something back.
