

Star of Space 923

Chapter 923 Even if it doesn't work, it has to work

Sonny would never know this unless his mother appeared in front of them again.

"perhaps....."

Lin Caisang lowered her head and thought, remembering the box that Lu Qiubo gave her before, which contained a lot of jewelry.

"Grandma gave me things that my mother left for me before. Those things are very valuable. Even in the palaces of Liang and Wei, I'm afraid I can't even find a few of them. Could it be...

Forget it, no matter who my mother is, the most important thing now is to think about how to get Prince Lin back. "

Now that we are on Baibind Mountain, it is better not to think about the actual things for now. No matter how much we think about it, it will only increase our worries.

"The stork is difficult to deal with, but there are no ways to deal with it. Maybe we can give it a try." She said to him.

"How to try?" Ya Molian asked.

...

After resting for a while in the cave, everyone was ready. Everyone held several long pieces of sharpened bamboo in their hands.

"Girl, is this really possible?"

Commander Mo was holding several long pieces of bamboo in his hand, but he still felt that it was unrealistic.

He couldn't cut off the long thorns on the stork with a knife before. Now, could he kill the stork with almost no fatal holes with just a few long bamboo slices?

Exiled Jue also said before that they combined the strength of several people and killed a fierce stork after a long time.

"No, it's okay, as long as you don't use the bamboo slices as a knife to chop." Lin Caisang glanced at him and said.

It is useless to chop, you can only use thorns, and stab those long thorns. As long as the bamboo piece is long enough, you can pierce it into the body of the fierce stork, because I learned from Jin Zhuling that the fierce stork Although the thorns on the body are extremely hard, their skin is still soft.

"Wouldn't it be better to use a sword?"

Jiang Zuo couldn't help but say something.

What he received in exchange was a dismissive look and a slap on his face.

"The long sword is sharp, but it is too hard. If it touches the long thorn on the stork, it can no longer be stabbed in. The more it is used, the harder it will bounce back."

Ban Jue said.

This is what they learned from experience when they killed a fierce stork before.

"And when we killed the stork before, we discovered one thing. We can't stab the stork directly on the face, because its face is very flexible, and the two tusks are movable, so you can block them wherever you want to sweep them. You can attack.

Therefore, if you want to kill the fierce stork, you can only start with the body. "

Having said this, he pulled out his long sword with a 'swish'. Under the background of the firelight, everyone could see the gaps on the sword, one by one, densely packed.

"Look, this is the sword I used after fighting a fierce stork. It's useless at all."

Yes, with so many gapped swords, if put in the hands of ordinary people, they wouldn't even be able to cut off a piece of flesh, right?

"Such a hard long thorn."

Everyone looked at the sword and couldn't help but gasped.

"It's different when the girl uses bamboo slices. Firstly, the toughness of bamboo is better than wood and will not break easily. Secondly, when the bamboo slices encounter the long thorns on Meng Zhong's body, as long as we have enough strength in our hands, it can be stabbed. After piercing it, it will be pierced into the body of the stork and it will not bounce back.

Girl, am I right? "

"Um."

Lin Caisang nodded.
