

Star of Space 961

Chapter 961 Make an Antidote

She was just talking, okay? Could it be that Qianhuan Continent really aroused the interest of her brother Mo Lian?

"That place may not be a good place for us, Brother Melian." She reminded him.

"Um."

Yamollian nodded.

He naturally knew that the place was not a good place, but there was always a vague feeling in his heart that sooner or later he would have something to do with Qianhuan Continent, not now, but also in the future.

"If you really get to that point, then you can come with me, okay?"

Lin Caisang: "..."

What is good and bad?

"Is it possible that you still want to leave me and go alone?"

She rolled her eyes at him angrily and said something to him.

"Ah."

Ya Molian raised her hand again and touched her head.

"I won't tell you this anymore. Here, drink some warm milk. I added some vegetable juice to it. All the food along the way is meat, which is not good for your health. You have to eat some vegetarian dishes."

She handed her water bag in front of him and said.

She can't control so much others, but her brother Mo Lian has poison in his body. If he doesn't take good care of his body, it will definitely not work. She naturally has to take care of him.

"As soon as I get out of here, I will study this antidote pill and I will definitely make an antidote for you," she said.

"good."

Yamollian nodded.

"Sonny..."

"ah!"

Suddenly, a scream reached their ears, interrupting their words.

The two of them turned their heads and saw two guards running over from a short distance away. As they ran, they looked back, as if something was chasing them.

When everyone saw this, they stopped taking a break and directly took out their weapons and prepared to fight.

However, until the two guards ran in front of them, they did not see any magical beasts following them.

"What's going on? What happened?"

A prince grabbed one of the guards and asked nervously while holding his collar.

"River of Blood, there is a bloody river over there." The guard was trembling all over and said with trembling lips.

Although the blood river was not a real river, it was only as wide as one of their palms, but the blood flowing there was so much blood flowing down, how many people must have died.

It's scary to look at.

"River of blood?"

Lin Caisang and Ya Molian looked at each other and walked towards the direction where the two guards were running.

Ban Jue and the others also followed them, and everyone followed them to the other side. When they saw it, it turned out to be a river of blood flowing downwards. People were sweating all over their bodies when they saw it, and they felt like something was pulling them under their feet. Similar.

"Why is there a river of blood here?"

Commander Mo swallowed nervously and looked at the bright red blood flowing down, his whole body felt bad.

Before, he only looked at the blood river from a distance, and since entering Baibind Mountain, he has never seen this so-called blood river again. He thought it was just an illusion.

After all, everything on Baibind Mountain seems so unrealistic, just like in illusion, and it is normal to have an illusory river of blood.

However, now he was up close, looking at the river of blood in front of him, and even more, he could still smell the strong smell of blood in the air. He covered his mouth and nose, feeling really sick and panicking. .
