

## Starchild 291

### Chapter 291: The Battle God and the Guardian

When the last two girls of the Starwing Knights accepted Yun Xi's proposal, two different roads appeared in front of Yun Xi.

"This is..." Looking at the infinite sea of blood under his feet, and the nine snake tails in the sea, Yun Xi had a feeling that he just touched something very incredible.

The road on his left was from the north pole. Hua Yue was standing there with a sacred but familiar figure behind her.

In front of Hua Yue, there was a sword inserted into the ground, turning the area around her into a paradise of ice and snow.

A huge gate stood tall and upright behind her, emitting an inviolable "Aura of Holiness".

On the handle of the sword, the sealed compass was slowly opening a crack. A trace of an old and cold aura came from the compass, giving Yun Xi a feeling of divinity and dignity.

The road on his right was from the south pole of the world.

Xiao Cao was standing there with an unknown, mysterious woman behind her. The woman was wearing strange, exotic clothes with fetters on her naked feet.

Behind them, there was an endless desert spreading to the end of the world.

Countless sand gravels dropped from the sword that was floating in front of Xiao Cao and returned to the sandglass following some unknown rules, like the legendary “Sands of Time”, which stood for the passing of everything in the universe.

It was hot and mysterious, perfect and strong. This was Yun Xi’s feeling about this road.

However, both of them had already exceeded the limit of Yun Xi’s imagination, and this only meant a single truth: they were two living legends standing at the top of all god’s domains, just like Hydra and Shaya Longnis!

Through the seeds between in Hua Yue’s body and Xiao Cao’s body, Yun Xi found that they had become the “threads” of the two legend ranked beings, so that they could cast their sights into this world. When Yun Xi signed the marriage contract with Hua Yue and Xiao Cao, he also obtained a few of their properties they projected onto Hua Yue and Xiao Cao’s bodies.

Although their powers they lent to Yun Xi wasn’t complete, but to Yun Xi, they perfectly made up for his weaknesses: legend ranked mental strength that could be stuffed into the endless sea of blood and let him control Hydra’s power easier!

Nah, whatever.

Since I have done this , let me carry it through to the end!

In the face of Shaya Longnis’ powerful pressure, Yun Xi didn’t have time to consider the consequences.

Even if a cat was willing to lend him power, he wouldn't refuse it now. Not to mention the powers from two legend ranked beings. Even if accepting their powers would bring some unknown result, he wouldn't hesitate to use them!

I won't let you destroy it! This is their homeland, the world they love!

Since they chose me and believe in me, I must do something for this world.

This wasn't for the stars' quests. After all, Yun Xi had accomplished all the quests. He just wanted to do something for this world.

Probably it's because this world was too real. Yun Xi couldn't turn a blind eye toward this world like what he did in the previous two worlds.

No matter whether they were the people in the first village, or the girls he met later, regardless of the Starwing Knights girls, this world still brought him too many things.

His first experience to propose to unknown girls, his first experience to stand on the stage of the public, his first experience to talk and play with the unknown races in the sea... the more he knew about this world, the stronger the love he had towards it, till he was unable to extricate himself from it.

Perhaps "the Expansion Plan of One Million Girls" was just Yun Que's method, but during the process, he really felt the blessing and expectation of this world.

When one million girls chose him and put the transparent rings on their fingers, Yun Xi understood that they had become his responsibility.

Perhaps this was what the stars wanted to teach him.

You can marry one million girls, correspondingly, you will also need to undertake the responsibility for your choice.

Thinking and imagining what you can do and what you will do.

After becoming the Water God's Apostle and putting on the White Emperor Mask, Yun Xi finally became this world's hope.

Now, it's time to repay the world and honour his commitment!

"I said I will marry you all after this battle is finished. Even if everyone thinks that this world's misfortune can't be changed, I will change it with my hands!"

Yun Xi stretched out his hands and grasped the threads from Hua Yue and Xiao Cao.

The next moment, two distinct rules were linked to Yun Xi's body through the threads on Hua Yue and Xiao Cao's bodies.

One of the rules was cold, like a Referee Blade that was lifting in the air.

The other rule was as hot and furious as a sandstorm in the endless desert.

They must be legend ranked, otherwise, it wouldn't be possible to watch this battle in this manner.

They silently looked at Shaya Longnis and Hydra through Hua Yue and Xiao Cao's eyes, and did nothing when Yun Xi obtained their powers. Yun Xi's body trembled violently due to the powers from the three legend ranked beings. If the stars didn't secretly help him, both his body and soul would've been destroyed.

"He he, ha ha ha ha!" Shaya Longnis laughed. She laughed at her food and the world that was doomed to be destroyed by her.

Suddenly, change appeared. Even she didn't expect this.

At present, there were three Sky Swords on this battlefield. Even throughout the entire history of Sky Sword God's Domain, it was a rare scene.

The guardian of the door was the oldest and most mysterious Sky Sword. No one had witnessed her true power alive.

Casina, the Battle God was the sixth Sky Sword. Although she was a Sky Sword, she rarely used her sword.

"Are you looking for trouble here? If so, let me defeat you all!" Shaya Longnis yelled!

“Guardian of the Door, I didn’t see you before. Don’t you always stay in the crack amongst the worlds? Why do you come here now?!”

“Boom!” Nine crimson snake tails went crazy behind Yun Xi.

For the first time, Yun Xi released the real power of the legend rank!

Chapter 292: Fierce Fighting

Cold, it’s cold!

Yun Xi felt as if his soul had been frozen and all the things in this world had paused. Like he was in an absolute zero environment, even the molecular trajectories were frozen.

The “absolute zero” was one of the godlike properties of the cold silver longsword. The people who were hit by this sword, could never move again.

Hot, it’s hot!

Yun Xi felt as if the blood all over his body had been dried up. He could feel no moisture from the ground, but only the hot wind from far away and the gravel that went rolling by in the air beside his ears. Time itself seemed to be slowed down like the sands in an hourglass.

“Arrrghhh!” Endless blood was flowing and roaring. The Water God, Hydra’s power was boiling!

This time, Yun Xi finally obtained the “mental strength” to control Hydra’s power. Although the power wasn’t his own, the superposition of two Sky Sword’s mental strengths finally let him realize the real strength of Hydra’s power of blood. The blood in Hydra’s body was sufficient to stain an entire world in blood, it was a formidable giant that was thousands of times bigger than the three headed golden dragon Shaya Longnis had eaten.

Even a Sky Sword didn’t have the ability to stain a world, therefore, Shaya Longnis didn’t go on the same road as Hydra, moreover, she didn’t have the patience to spend thousands of years to become a god.

However, Hydra had accomplished it. Originally, she was just a fantasy creature. After swallowing this dying world, she finally became a real god.

Her power was absolutely not inferior to Shaya’s power, however, in order to absorb this world, she was exhausted at this point.

Everything was for this moment.

If Hydra was at the peak of her power, she wouldn’t fear Shaya Longnis. The reason why Yun Xi was suppressed by Shaya was because he hadn’t really gained the key to control Hydra’s power. Now, two keys had appeared in his hands.

The first key granted him the absolute control of his own body, so that he could control Hydra’s power of blood. This key was from the Sky Sword who was known as the “Battle God”. Amongst all Sky Swords, even Shaya Longnis was more like a Sky Sword than her. Her sword “The Sands of Time” was a strong weapon that could even twist time, but she never used this sword in battles. She was called the “Battle God”, because she created a martial arts called “Battle God Genre” and defeated countless strong beings using this martial arts. She obtained this title after becoming the champion of “Tournament of Fighters from All God’s Domains”.

Throughout the history of the “Tournament of Fighters from All God’s Domains”, no one could win ten consecutive championships like her. She was hailed as “the Invincible Glory of Battle God Genre”!

Her sword “The Sands of Time” was a heritage of the desert tribe she was born in, and she herself was a strong swordswoman, but she never battled with her sword.

A long time ago, she had become a legend in a lot of god’s domains: Casina the Battle God, the sixth Sky Sword who had left Sky Sword God’s Domain.

To Yun Xi, nothing could be better than the Battle God’s mental strength since he needed its help to control the boiling power of blood in his body. After all, “Battle God Genre” was one of the best martial arts in the way of controlling the human body. Even dragons would be untenable in front of the Battle God!

“Hu! Ha!” Yun Xi’s let out a solid breath, instantly locking on Shaya Longnis’ location.

In his eyes, the web that was made of countless green braids wasn’t as unexceptionable as what he thought before. He slowly raised his right hand and hit the ground, like a fish tail that was slapping the water.

In the blink of an eye, the web of green braids was forcibly opened a crack. Looking at the green braids scattered in the air, Shaya Longnis showed a strange smile under her mask.

“Ha ha ha, come on, come on! No matter how you attack my web, it won’t work!”

Indeed, Yun Xi’s attack just opened a small crack on Shaya Longnis’ web. Instantly, a lot of green threads proliferated and covered the crack.

Shaya Longnis wouldn't be defeated in this way. No matter how strong an attack she was suffering, she could always adjust her body to neutralize the attack.

Once her body remembered the attack, the attack wouldn't be able to cause any damage to her again. This was her property as the strongest slime.

No one knew how many forms and abilities she had obtained.

Her Sky Sword was a veritable "unknown object", because its name was "Unknown". It could change itself to a variety of different forms, and this was still far from reaching the end of its growing.

"It's impolite not to reciprocate. Take this!" Holding the half formed Sky Sword in her hand, Shaya Longnis showed a cruel smile on her face.

A projection of a three headed golden dragon appeared above the sword as the sword blade turned into three dragon heads.

"Fire, my Golden Dragon Roaring Cannon!" After Shaya Longnis turned her sword "Unknown" into its "Dragon Sword Form", it immediately fired a Dragonrend Shock Wave toward Yun Xi!

"Ta!" Yun Xi leisurely drew back a step and clenched his right fist. When his breath and footstep synchronized, he let out a scorching breath into the air. A crimson whale leaping out of the blood sea behind him!

The secret skill of Battle God Genre, Demon Whale Bombards!

Of course, it wasn't a skill of Yun Xi himself. It was a secret skill created by Casina, imitating the biological behavior of a super monster called "Sand Sea Demon Whale". When she was still in her homeland, she often observed the "Sand Sea Demon Whale" who inhabited the desert and liked to hide in the sand and leap out of the sand when its prey passed by.

Because the power Yun Xi used was Hydra's power of blood, the demon whale he imitated had a blood colored skin.

Chapter 293: The Battle God's Martial Arts

The "Golden Dragon Roaring Cannon" and the "Demon Whale Bombards" smashed together in the sky. Two legend ranked powers exploded in the air, forming a mushroom cloud that was over ten thousand metres tall.

The enormous shock wave spread out from the place the two powers smashed together and exploded, spreading to the edge of the world.

The entire world was trembling under this abuse. Inevitably, the earth's crust collapsed in a large scale. If it wasn't for the four World Towers still working, the Water God's world would have been destroyed.

Compared to the legend ranks, the small worlds like the Water God's world was too fragile.

"Heh-heh-heh!"

"Interesting, interesting!"

"Again!" Shaya Longnis laughed morbidly. The three dragon heads rotated faster in her hand, brewing a stronger dragon roaring.

After three seconds, it would be able to fire another cannon burst again.

“Ta!” It was a footstep that echoed beside Shaya’s ears, which sounded very clear and steady.

“Gee?” When Shaya Longnis realized that something was wrong, Yun Xi had rushed in front of her.

Wait, aren’t his snake tails still being trapped in the web?!

When this idea just popped out of Shaya’s mind, Yun Xi’s hands had grasped her head.

“Bang!” Like a heavy hammer, hammered into meat, Yun Xi’s head slammed into Shaya’s head heavily.

Shaya’s head whipped back under this heavy blow. A clear breaking sound came from her neck!

Speaking of sword skills, perhaps Casina the Battle God wasn’t as good as other Sky Swords. But when it referred to close combat, she was undoubtedly number one!

After all, she won the title “Battle God” with her fists! She won this title after her countless victories at the “Tournament of Fighters from All God’s Domains”.

Shaya Longnis was the strongest slime. She had the potential to swallow all beings in the universe.

Her way to grow was to swallow everything and keep evolving.

Because she was so strong, she never learned humanities martial arts. So she hadn't really experienced the horrors of martial arts, especially when it was one of the strongest, "Battle God Genre"!

She just exposed her weaknesses for an instant, which wasn't even longer than one second, Casina's will in Yun Xi's body had caught it and gave up his strongest weapon, Hydra's snake tails without hesitation.

The next moment, Yun Xi had appeared in front of Shaya Longnis, face to face!

At such a close range, Casina had the confidence to even beat a god to death!

"Ka!" Shaya's neck emitted an awful sound and was twisted to a strange angle.

"Peng!" Yun Xi didn't stop. His knee plunged into Shaya's belly without mercy, the terrible strength even caused a big bulge on Shaya's back. The sounds of broken bones echoed in the air constantly.

Even so, Shaya Longnis didn't lose her consciousness. From the moment she took control of the spider queen's body, the life code of this body had been totally changed.

As the strongest slime, her body didn't have any crucial point that could be struck a deadly blow. Precisely, she wouldn't die as long as there were still slimes in the universe.

However, “she won’t die” didn’t mean “she won’t feel any pain”. “Pain” was also a kind of perception to the universe. She wouldn’t give it up to be a bored, walking corpse like existence.

Therefore, Yun Xi’s attack really let Shaya feel pain!

Besides, this was just a start.

After the Head Buttings and the Knee Strikes, without any rest, Yun Xi’s spin kick precisely kicked Shaya in her head.

“Ka la!” The fragments of the mask flew in the air. Half of Shaya’s beautiful face was swollen.

After the right spin kick, Yun Xi immediately launched a left spin kick. Once Casina got close to her enemy, she had the confidence to defeat anyone!

After three serial spin kicks, Yun Xi’s legs locked around Shaya’s neck, then twisted brutally.

This time, even Shaya’s non human body couldn’t withstand it. Half of her body was broken off, spraying a great amount of blood to the sky.

“How dare you...” Shaya Longnis was really annoyed. She liked this human girl’s form very much. After obtaining this human form, she had never been beaten so badly.

Although her head wasn’t her crucial point, neither her heart, she wouldn’t die due to this, but still, to “lose face” and to be beaten so badly by a mortal?!

No, I need to strike back! I need to counterattack!

“Transforming!” Green braids returned to Shaya’s body and started a new round of simulating.

Since my human form couldn’t fight back under Casina’s martial arts, then how about I become a monster? I can beat him down with my monster form!

Firstly, I will strengthen the defense of my body.

Dark scales appeared on Shaya’s body. They were the real black dragon’s scales that could even neutralize tabooed magics.

A red tail with sword shaped barbs appeared on her back. It was a tail from a red dragon she had swallowed.

As for her head, it was protected by a golden dragon’s horn. Apparently, it was from the three headed golden dragon.

It was Shaya’s “Close Combat Form, Demon Dragon Avatar”! It was a body that combined with a lot of dragons’ advantages.

After abandoning dragons’ clumpy bodies and only leaving dragons’ defense power, it was the best combination that had been optimized many times by Shaya.

“Roar!” After transforming into this form, Shaya Longnis immediately used the natural ability of this form: Rage of the Dragons!

The shock wave of roaring contained the powers from three dragons. The rage of the dragons was shaking the Water God’s world.

“Boom!” Yun Xi didn’t dodge the roaring but walked back in the fierce shock wave. Like a fish swam against the stream, as Shaya’s stared unbelieving at Yun Xi, he walked to her and grasped her neck again.

“Bang!”

Chapter 294: Deadly Combos

Shaya Longnis never learned human martial arts. To her who could even swallow dragons, fighting with her arms and legs was too ridiculous.

Two hands couldn’t parry four arms. Even if one’s fist could break a mountain, how could it be stronger than the three headed golden dragons roar?

Because a human’s body structure had natural deficiencies, they invented the so-called “martial arts” to cover their shortcomings. Naturally, Shaya Longnis didn’t think that she needed to pay attention to this combat method.

Rather than spending time studying martial arts, she preferred to eat more strong beings to absorb their abilities.

Regardless of her Sky Sword “Unknown”, as long as she kept growing, she would eventually become an ultimate creature that could swallow gods.

As the strongest slime with an immortal body, she never thought that she needed to learn martial arts.

Till this moment, in front of Casina’s fighting art, Shaya finally realized that she knew too little about martial arts.

“Bang!” Like a falling star dropping on the earth, Yun Xi’s fists punched Shaya’s head at an incredible speed and frequency.

Each of his punches would cause 99 different shock waves, straightly broke the black dragon scales on Shaya’s skin and shook the internal parts of her body.

“Ga!” For a moment, Shaya Longnis’ mind blanked.

What?

Where am I?

What am I doing?

Who is this masked man in front of me?

“Boom!” Yun Xi’s strength turned into shock waves and exploded inside Shaya’s body.

I’m being beaten by this man?

I lost a small part of my memory due to the man’s attack?

You did well, Casina the Battle God!

“Bang!” A wide crack appeared on Shaya’s dragon shaped shell. This armour, which could even block tabooed magics, was finally broken by Yun Xi’s fists.

Using wisdom, humans developed their combat skills by simulating wild animals and monsters’ behaviors. This was the origin of martial arts.

Temper one’s body to the limit, then exceed the limit!

Shaya Longnis never got touched with this realm, so she didn’t understand the gap between Casina the Battle God and the fighters she had defeated before.

Casina’s attack had already exceeded human limits. Her fist could even punch a giant dragon to death!

Even though Shaya had put on the super dragon scale armour, it wouldn’t work in front of Casina!

“A Hundred Demon Whales... Bombard!” After breaking Shaya’s defense, Yun Xi took a deep breath. A giant demon whale projection appeared behind him.

Hydra’s power of blood let him have infinite strength. No matter how strong attack Yun Xi had released, he wouldn’t be exhausted now, which was really good news to Casina, since she liked to defeat her enemy with continuous attacks.

Shaya Longnis was constantly increasing her physique, trying to neutralize Casina’s attack in this manner, and Yun Xi was also getting used to Casina’s mental strength.

“A Hundred Demon Whales Bombard!” was the instantiation of the Battle God’s will, which was a secret skill that was a hundred times stronger than “Demon Whale Bombards”.

The original “Demon Whale Bombards” was just a simulation of the real Sand Sea Demon Whale. “A Hundred Demon Whales Bombard!” was the reproduction of the real Overlord Demon Whale’s attack, reproducing the incredibly powerful monster’s attack using a human’s body.

A Sand Sea Demon Whale was thousands of times bigger than the green hippo. When it leapt out of the sand, its huge body could even cover the sky.

The power of this attack was equal to a hundred whales’ power. If converting it to green hippo, then the attack was equal to a million green hippos’ strength!

Yun Xi had confidence in this attack’s power. Even if it was a real meteorite, it would be totally shattered under this attack!

Long before Shaya Longnis made any reaction, her body had been punched through by Yun Xi's fist.

"Boom!" Following closely, the afterwinds tore her body into pieces. The enormous afterwinds of the punch even tore open the green web and ripped a crack in the sky.

"Hiss! Ha!" Yun Xi took a deep breath, then drew back his fist and stretched out himself.

"The warm-up exercise ends." Yun Xi smiled, then closed his eyes and started the countdown.

"Zi! Zi! Zi!" Countless mucus flew and gathered together in the air. Shaya's body turned into small green balls, flying back from all directions.

"I have to admit that I can't defeat you in close combat." Rarely, Shaya Longnis admitted her imperfection.

Casina's consecutive attacks really taught her a lesson. For the first time, she realized that she underestimated human martial arts.

Indeed, none of the fighters she met in the past could fight against her, which naturally made her think that martial arts was just a stupid combat method.

No matter how strong a human's fists and legs are, how can a human be stronger than a dragon?

She could even swallow a giant dragon. Naturally, she didn't think that she needed to pay attention to martial arts.

But now, she realized that she was wrong.

"Close combat arts" could release different powers when it was used by different people.

At least, Casina's fist could make her feel painful. Shaya's 15 years old body didn't stand any chance in front of the Battle God.

"Therefore, I need to grow up again! Since 15 years old isn't enough, then, I will be forever 16 years old!" Shaya Longnis smiled with pleasure.

How many years have passed since the last time I used this form?

Casina the Battle God, you are stronger than I had guessed.

Therefore, in the name of Shaya Longnis, the tenth Sky Sword, I will show you my stronger form!

Chapter 295: Adaptation and Evolution

Soft green lights spread into the air, countless green lights floated up and down around Shaya Longnis, like a fantastic dream.

In the green lights, Shaya's body became a little more mature. Her legs were apparently longer than before, her white small feet also became more delicate and cuter. Nine green braids fell onto her shoulders, which were corresponding to Yun Xi's nine crimson snake tails.

The biggest change was the sword in her hand.

Originally, the green Sky Sword was just half formed, now it became one third longer than before. Similar to Casina's Sky Sword, Shaya's Sky Sword also didn't look like a sword.

In fact, Shaya's Sky Sword was a living creature. Apart from simulating the creatures Shaya had eaten, it also had an important function.

"Record the attack power."

"Record the attack frequency."

"Record all the details."

The twisted Sky Sword, "Unknown", proliferated a lot of green threads and wrapped the threads on Shaya's slim body, transporting the information of Casina's attack into her body.

This was one of Shaya's strongest and toughest ability. No matter what kind of attack she was facing, the green threads could always record and save the information of the attack in the sword, then help her adjust her body by analyzing the attack. After this process, the attack wouldn't be able to cause any damage to her body again!

To Shaya, she never feared to face any attack she had never seen or heard of before. Once she endured the first attack, the attack wouldn't be effective again!

"Oh, so this is how it worked." After abstracting the scene of how Yun Xi's fist punched through her body from the green threads, Shaya thought that she had understood Casina's attack.

No matter how strong her defense was, it would be meaningless to Casina. Casina's punch contained terrible penetrating and shocking force. Even though her black dragon scale could invalidate tabooed magics, it wouldn't be able to block Casina's punch.

"Her fist is even more terrible than the tabooed magic 'Meteor Shower'!" After reading her death record, Shaya Longnis exclaimed and started to weave a type of brand new threads.

This time, she gave up on strengthening the defense of her body. Instead, she made her body become more flexible and resilient. In this case, the attack she withstood would quickly spread to her whole body but not explode at one point.

Just like Shaya herself, her Sky Sword could also learn and evolve itself!

"Very well, let the second round start!" Shaya hid her body in the new armour she just wove.

Compared to the ferocious "Demon Dragon Avatar", this combat form was softer, but could withstand Casina's stormy consecutive attacks by one hundred percent!

After being covered in the green branches and leaves that could rapidly repair themselves, she looked like a faceless tree man, which could undoubtedly make any people cry in fear if they saw her empty face.

“...” Yun Xi smiled. He slightly moved his arms and legs.

It seemed that Casina’s will was very happy. Yun Xi could feel the pleasure that was rising in his heart.

Shaya Longnis is an interesting enemy.

After all, it’s not easy to find a being that can withstand my high frequency continuous attack!

Hey, hey, are you saying that she is a qualified punching sandbag?

Well, very good.

Let me continue the attack!

“I won’t be defeated twice by the same attack!” Shaya Longnis had confidence in her new body.

After all, she was the strongest slime that could evolve into an ultimate creature!

The Battle God was doomed to be just a stumbling block on the road of her life!

“Peng!” Yun Xi’s fist punched at Shaya’s body the second time.

However, the feeling of the punch was different this time. Yun Xi felt as if he was punching on a soft thread, most of his power was absorbed.

This was Shaya's "adaptation"!

"Hu!" Shaya struck back. Her fist was as fast and accurate as Yun Xi's fist. This was also one of her abilities.

She didn't pay attention to martial arts just because she didn't think it was necessary in the past. After being beaten badly by Yun Xi, she quickly adjusted her mood and started to learn this technique.

She could record and absorb the abilities of the beings she had eaten. With this cheat like ability, she could learn everything easily. Moreover, her physique was far better than mankind's physical endowment, so her fist was even faster and heavier than Yun Xi's fist!

However, she still lacked something.

After all, martial arts was a technique that was inherited from generation to generation and was still constantly developing.

Shaya Longnis could replicate her enemy's attack 100%, but she didn't have the experience to use her "martial arts" at the right time, which was the so-called "sense of battle".

"Sense of battle" couldn't be learned from analyzing the data of battle. It could only be firmly remembered by the body after countless life-and-death battles.

Yun Xi didn't even look at Shaya's fist. He just hit her with his shoulder and swayed his body, then had discharged Shaya's fist.

The next moment, his uppercut straightly hit on Shaya's chin!

"Ga la!" A look of surprise came over Shaya's face. She found that she had bit through her tongue.

Why? Didn't I record the strength and frequency of his attack?

Why was the strength and frequency of his punch totally different from before?!

Before Shaya figured it out, Yun Xi had already kicked her waist. Like cutting a gob of butter with a hot knife, Yun Xi's kick tore her body into two pieces.

Chapter 296: Rigidity and Flexibility

What's wrong?

What happened?

Why was her attack's frequency and effect so different from the data I just recorded?

“Demon Whale Bombards” was the reproduction of the sand sea overlord’s majesty, but this kick was as cold as a sharp knife.

After abandoning the dragon scale armour and transforming her body into the flexible new structure, her body was as fragile as a frozen bean curd under this different attack.

A spider’s web could withstand nearly all prey’s struggle, even if the prey was ten times heavier than the spider. However, the web would be cut open easily by scissors. In a similar manner, Yun Xi’s attack broke Shaya’s defense easily.

Casina’s martial arts wasn’t as simple as Shaya has thought!

“Demon Whale Bombards” could crash the enemy who had hard shell and soft internal parts. When it was an enemy who had flexible body, Casina would change her attack to “God Wind Feet”, which contained strong tear strength.

Her feet could cut open a wound on the enemy’s body like a knife, then tear open the body as long as it was still made of flesh and blood.

Casina, the Battle God had met a lot of enemies from different god’s domains, but she was still the winner of all the championships. No matter whether it was the giant whose defense was even stronger than a dragon, or the elemental spirit who theoretically couldn’t be hurt by a physical attack, none of them could defeat her.

After so many victories, the “Tournament of Fighters from all God’s Domains” even changed its name to “Battle God’s Championship Contest”. She finally became a living legend!

Shaya Longnis' Adaptation Changes were just some jokes in the face of Casina's omnipotent martial arts.

When Shaya used the martial arts she wasn't familiar with, she had become more "full of flaws" in Casina's eyes.

Shaya's green body emitted out a painful groan. She changed her physique again, created dozens of terrifying meatballs and detonated them.

Since I can't parry your attacks, I'll give up dodging them!

Attack against attack.

Answer blows with blows.

An eye for an eye!

Let the world turn into hell! Let flesh and blood fly in all directions!

Yun Xi smiled again. Looking at Shaya, Casina's will saw through Shaya's immature character again.

"All Range Attack" seemed to be powerful, but when the goal was just a small human and not an army nor a giant dragon, 99% of the power would be wasted hitting the air.

If Shaya was beating a weaker being, her “All Range Attack” would be effective, but in the eyes of the current Yun Xi, who had Hydra’s physical power and Casina’s mental strength, it was undoubtedly a waste.

Yun Xi didn’t even need to draw back nor to defend himself, he just took a deep breath.

The world paused at this moment.

No, wasn’t something really happening? It wasn’t possible. It was just because Yun Xi concentrated his attention on one point. When he stopped to think other things, one instant had become an eternity in his mind.

This was the supreme realm of all swordsmen and fighters. This was Casina’s realm!

Yun Xi’s thinking was thousands of times faster than usual. He divided one second into 1000 milliseconds, then used one millisecond to observe the environment around him.

Shaya’s body was turning into countless meatballs and detonating in the air, covering all the areas around her.

If there is no gap, I will create a gap myself!

Even if it seemed that the meatballs were detonating at the same time, there were still rules to follow.

Look for rules, find the rules and then destroy the rules!

Get to the root of the matter, the ultimate goal of all martial arts was so simple.

Using one's strongest part to attack the enemy's weakest part.

Overlaying, shocking, piercing... all skills of using strength were for this goal.

The human body was far weaker than a dragon's body and elemental creature's body, but human beings had wisdom, so they could inherit and develop martial arts from generation to generation, finally making it become a technique that could shake all of the god's domains.

Shaya Longnis thought that she could imitate Yun Xi's attack by reproducing his attacks frequency, speed and route. She was totally wrong.

In some sense, she wasn't fighting against an individual but the crystal of wisdom of all mankind.

One millisecond later, Yun Xi had stridden across the field of detonated meatballs and stood in front of Shaya again.

His fingers closed together like a sharp knife, his arm waved in the air like a nimble water bird dancing on the surface of the water.

It was another new style which was totally different to "Demon Whale Bombards". If "Demon Whale Bombards" was the acme of "rigidness", then "the Dance of the Water Bird" was the acme of "flexibleness".

The fist of rigidness could make the skies fall and the earth open up.

The fist of flexibleness was as gentle and gorgeous as a white crane spreading its wings.

The attack of “the Dance of the Water Bird” wasn’t world-shaking like “Demon Whale Bombards”. Yun Xi’s fingers softly scraped through Shaya’s neck, like a man that was stroking his lover’s neck, the next moment, Shaya’s head dropped to the ground.

“Arrghhh!” Shaya’s mind fell into a mess. Compared to the attack before, this attack was even more weird. She even preferred to call it “a disaster”!

A large series of erroneous data appeared in her Sky Sword, it even made the Sky Sword crash.

Recording the data... error!

Analyzing the goal’s property.. error!

Changing the form.. failed!

Rebooting...

Recording again...

Shaya Longnis...

Opening the Multiple Evolving Mode!

"It's over." Yun Xi looked at Shaya with disappointment.

As a Sky Sword, Shaya Longnis had too many weaknesses. She had the potential to be a new "Decide Sky Sword", but before she actually did it, "potential" was just "potential".

At present, Shaya Longnis was still too immature.

"I will kill you! I will eat you using the most brutal way! I will eat your every part, from your fingers to your toes!" Shaya cried.

Even when Hydra stole her most valuable treasure, she didn't cry!

Chapter 297: Destroy the World? Save the World!

For the first time, Shaya Longnis exposed a vulnerable side of her mind after descending into the Water God's world.

She cried and trembled like a fragile flower swaying in the midst of a raging storm.

It was incredible, but what was really happening.

As the strongest slime, Shaya Longnis was cruel, because she could keep calm even when she was swallowing millions of lives; Shaya Longnis was also naive, because she ate her lover simply because she had given up on herself.

Probably there was no other Sky Sword that would have such an extreme emotion like Shaya Longnis.

She was gentle, she was cruel, she was warm hearted, she was bloodthirsty. However, there were all a part of her, the Child of the Slime Race, the Sky Sword who had the potential to be the slime race's god.

If she was a mortal, it was too unwise to expose her feeble side in front of others. It was undoubtedly exposing her weakest point to her enemies.

However, it wouldn't have an impact on Shaya Longnis.

The more insane she became, the stronger the power she would obtain. Like an unknown chaos that could swallow all things in the universe, her body was emitting a creepy aura in the air.

"Gu!"

"Gu!"

"Gu!"

More and more green meatballs exploded behind Shaya Longnis, then they slowly opened their eyes.

“Eat!”

“Eat!”

“Eat!”

Their voices sounded like the whisper of evil itself. Shaya Longnis was the aggregation of the entire slime race’s will. The sound formed by her will was the sound of the entire slime race.

For the first time, Casina’s will seriously looked at Shaya through Yun Xi’s eyes.

“Hu!”

“Ha!”

Yun Xi’s feet stood on the ground firmly, even though the ground itself was going to collapse at any time.

His left hand pressed down, which looked as if he was going to touch his toe, and his right hand raised high in the air.

His one hand touched the heaven and the other hand touched the earth, this posture was called “Unity of Heaven and Man”, it was a martial arts’ starting position, which was so strong that even Casina wouldn’t use it casually.

In the face of the countless “unknown twisted creatures” behind Shaya Longnis, even Casina, the Battle God had to get serious.

“Arrghhh!” Shaya Longnis held her shoulders, avoiding looking at anything in this world.

“The things I don’t like!”

“The things that make me feel painful!”

“I don’t care if it is human, the world, or something else!”

“Die! Die! Die! Annihilate them all!”

The unknown green twisted creatures loyally responded to Shaya’s wish. They heard and would execute the order from the Child of the Slime Race, the tenth Sky Sword.

“Destroy this world!”

“Eliminate mankind!”

“Let everything in this world come to an end!”

“Ring out the Bell of Blessing for the great Shaya Longnis!”

Along with the weird whispers, the green meatballs exploded one after another. However, they were not detonating themselves this time, but blossoming beautiful, delicate flowers from their bodies.

The green flowers gestated one seed after another, blowing in the wind.

These seeds floated in the air like scattered dandelions. Shaya Longnis started to sow these seemingly delicate seeds to the sky.

When these seeds dropped on the ground, took root and sprouted, they would finally cover the entire world, transforming it into “something else”.

It would be “Shaya’s Garden”. Apart from Shaya herself, no living being would be allowed to live in her garden.

If Shaya hated a world, or liked it very much, she would want to occupy it, turning everything into her own treasure.

This would also be the world’s end. After being eroded by Shaya, all beings in this world would only become Shaya’s food.

Hydra, the Water God had seen this end, so she wished that Yun Xi could do something to change this future.

Can Yun Xi change it?

With the power he has obtained, can Yun Xi reverse this coming misfortune?

Looking at this scene, both Yun Xi and Casina were shocked.

They weren't something as simple as the detonated meatballs before. It was a real power that was twisting, changing and swallowing the rules of this world!

This was Shaya Longnis' true nature!

As if "desperation" itself just slithered out of Pandora's box, there was no "hope" leaving the box of the deepest nightmare.

The countless blooming flowers were doomed to bring ruin upon this world.

No!

I will change it!

Even if no one thought that this world could be saved, I will save it!

Yun Xi shouted out in his heart!

Yes, this is the will, this is the spirit.

In the name of Casina, the Battle God, I will help you create miracles!

Casina's will jumped with joy in his mind.

Again, the time stopped. Looking at the infinite petals flying to the sky, Yun Xi's left arm raised up and his right arm drew a circle in the air.

Battle God Genre Anti-god Martial Arts: the Magnificence of Sky Dance!

A soft light appeared in Yun Xi's hand. It was the light of the heavens and the sky's will, it was the light that would gestate "hope".

The next moment, Yun Xi leapt into the air like a phoenix raised from the ashes of fire.

Nothing could be used to describe how nimble Yun Xi was. Like a bird flying in the air, Yun Xi leapt to Shaya Longnis from the sky.

Yun Xi's left arm caught Shaya Longnis' right arm. Without the slightest killing intention, he brought her to the peak point of the Water God's world's sky, then put his right hand on Shaya's chest.

"What?!" Shaya Longnis opened her eyes wide, looking at Yun Xi's right palm in surprise.

Unlike the violent attacks before, this time, Yun Xi's right palm gently put on her small breasts.

As if they were standing in the center of a invisible giant vortex, all the green flowers in the air were attracted, flying to Yun Xi and Shaya Longnis.

"Sorry, I will 'drain your body'." With a strange smile, Yun Xi put both of his hands on Shaya's breasts.

Unity of Heaven and Man.

Reflowing!

"Arrghhh!" Shaya Longnis breathed strange sounds from her mouth. She felt that all her strength was being drained out of her body and flowing into Yun Xi's palms.

Chapter 298: The Magnificence of Sky Dance

Can a human body fight against a godlike terrifying presence?

It wasn't possible even in theory.

A brief life can burn brightly, but even if a human burned his life out, his self sacrifice wouldn't be sufficient to let him obtain an earth shaking power, which was innate to dragons and elemental giants. After all, mankind was just a lower-middle level race throughout all god's domains.

Therefore, humans had to develop various martial arts, trying to find a way to fight against the incredible super beings in the universe.

However, most of their attempts were useless.

No matter how much effect they had made, even if they burned out their lives, it was still too difficult to cross the gap between mankind and other races.

Like what Shaya Longnis and most strong beings thought, martial arts was just a method used to offset humanities natural weakness. It couldn't let a human suddenly become as strong as a dragon.

However, even if the probability was negligible, it still existed. Countless humans lived in countless god's domains, there were always some people who could master the martial arts that could even threaten gods and demons!

They were the legends above legends.

Casina, the Battle God was one of them, she was the Sky Sword that had the power to challenge gods and demons!

As the Child of the Slime Race, even though Shaya Longnis was not mature yet, her power was still sufficient to destroy a small world if she willed.

If Yun Xi wanted to fight against Shaya Longnis, he must have power at the same rank with Shaya's power.

This moment, Casina's will was possessing Yun Xi's body, helping him expose this power!

Controlling Yun Xi's hands pressing on Shaya's breasts, Casina used her secret skill which could only take effect on strong beings, "The Magnificence Of Sky Dance".

Infinite energy flowed backwards to Shaya from all directions. They were the tokens of Shaya's will, the seeds that would destroy this world.

Too much! Too much! It can't go on! My body is going to explode! After obtaining Hydra's power of blood, this was the first time that Yun Xi felt his body was going to overload.

This was a martial arts Yun Xi couldn't understand. Casina subdued Shaya's body and extracted Shaya's energy, using Shaya's energy to suppress Shaya herself.

It's really a godlike martial arts! This was the only idea in Yun Xi's brains at this moment.

Humans couldn't fight against gods and demons with their fragile bodies.

If so, how about to suppress gods and demons by extracting their own energies?

Absorbing their infinite energies with both hands, then attack them using their own powers!

At this moment, both of Yun Xi's hands were the channels to absorb Shaya's energy.

He could feel what a great amount of energy Shaya had through her body.

How many slimes are living in all god's domains?

The Water God's world was just a small world, but after half a month, millions of slimes had reproduced in this world. Judging from this angle, how many slimes were living in the countless god's domains outside of here?

Including Shaya Longnis herself, no one could figure it out.

She didn't know how many slimes were living in the universe, but she knew that she was the strongest slime, she was the aggregation of the slime race's will, she had infinite potential!

"Ga!" Sweat streamed down Yun Xi's face.

This time, even Casina underestimated Shaya.

The energy in Shaya's body and the energy that was continually pouring into Shaya's body from nowhere, far exceeded Casina's imagination. Shaya's energy was far more than the energies from the god blood creatures and demigods Casina had defeated before.

The energy Casina had extracted even caused an "energy tide" phenomenon around Yun Xi's body. For the first time, Yun Xi understood the meaning of the idiom, "ride a tiger and find it hard to get off".

Countless green flowers dropped down from the sky. These green flowers, which would destroy the Water God's world, had all returned to Shaya's body.

During this process, the green slime gem bracelet on Yun Xi's arm blossomed, turning into a little green flower.

"Arrghhh!"

It was just a little and delicate green flower, but when it blossomed, Shaya cried and flew into a shameful rage, as if Yun Xi just saw her deepest secret.

"This is..." After blossoming, the green flower immediately broke away from Yun Xi's arm and flew to Shaya's body, becoming a part of her breasts, where was right now covered by Yun Xi's palms.

Hum? The bracelet was a part of Shaya's body?

Oh, I remember it. These slimes were a kind of medium Shaya used to descend into this world.

Compared to the spider queen's body that was possessed by Shaya now, Yun Xi was more familiar with this part of Shaya's body.

At first, he had almost lost control of "The Magnificence Of Sky Dance", but the familiar handfeel made Yun Xi quickly refresh himself again. He could control the energy he extracted from Shaya's body quickly and effectively flowing back to Shaya's body now.

Synchronizing the energy circuit!

Absorb! Absorb! Absorb!

Once Yun Xi found the breakthrough point, the next would be easy. Using the green flower on Shaya's chest as the touch point, his energy mixed with Shaya's energy returned to the deepest side of Shaya's body.

The powers that could destroy a world were all being tamped into Yun Xi's body and Shaya's body.

"En... Arr..." Shaya Longnis was still being subdued by Casina's martial arts. Her mind had dropped into a total mess, but her body still struggled subconsciously.

Her face blushed and her skin was covered with a layer of pink. Her whole body was limp due to the touching that was too wonderful for words at this moment.

Chapter 299: Judgement

The amount is too incredible!

Putting his hands on Shaya Longnis' breasts, Yun Xi was playing the "Sky Style" of "The Magnificence Of Sky Dance". Big drops of sweat dropped to the ground from Yun Xi's face.

Even in Casina's memory, she had never seen anyone who had such a great amount of energy. The strongest enemy she had seen before didn't even have one tenth of Shaya's energy.

The life force Shaya showed now was even hundreds of times more than the life force from all the beings in this world, and this was still far from reaching her limit.

If Yun Xi didn't find the green flower as the breakthrough point, even Casina's "The Magnificence Of Sky Dance" couldn't suppress Shaya's massive life force.

Fortunately, a green flower was blooming on Shaya's chest. Like driving in a light carriage on a familiar road, Yun Xi easily broke through Shaya's defense through the little flower.

Depending on the familiar handfeel, Yun Xi's hands expertly kneaded Shaya's breasts, absorbed her energy and used her energy to suppress herself. This was the most important part of "The Magnificence Of Sky Dance", the starting position "Sky Style". Most of Casina's enemies couldn't even survive this starting position, they would be sealed and fall into infinity.

However, Shaya had too much energy. Even the "Sky Style" couldn't absorb so much energy.

Yun Xi had no choice and had to play the second stage of "The Magnificence Of Sky Dance", the "Earth Style".

When the energy on Yun Xi's hands had reached an incredible amount, that was enough to blow out the entire Water God's world if Yun Xi lost his control, Yun Xi used the "Earth Style" without hesitation.

“Arrrghhh!” The infinite energy tide around Yun Xi started to turn into a giant light pillar. It was the sign that his energy and Shaya’s energy had mixed up.

The next moment, they dropped from the sky to the earth together.

“Boom!” The sea was separated by the strong shock wave, a gully appeared several kilometres wide, thousands of kilometres long.

The bedrock of the Water God’s world groaned under this super impact, infinite energy columns raised to the sky and formed the embryonic form of an incredible hurricane.

“I will absorb all your energy!” Yun Xi ground his teeth and stared at Shaya.

Success or failure will hinge on his next action!

Nine crimson snake tails stood upright behind Yun Xi, turned into nine channels and transferred Shaya’s energy to the entire world, regurgitation-feeding the dying world in this manner.

Countless flowers blossomed in the dying world. They were not the flowers Shaya released to destroy it world, but real flowers that could breed new lives to make this world become more beautiful.

The “Sky Style” absorbed Shaya’s energy, and the “Earth Style” used the energy to generate flowers, which could heal an entire world.

This was Casina's godlike martial arts, "The Magnificence Of Sky Dance"!

"En... ah..." Shaya's body twitched. Her face showed an abnormal red color under her mask and her green braids feebly flapped down.

The massive energy spread through the entire Water God's world and broke through the barrier between this world and the void. With the help of Casina's will, Yun Xi did the same thing the White Holy Dragon had done before.

The infinite stars shown themselves in the sky, the soft light of the stars shone on Yun Xi's body and let him feel a long lost warmth.

Oh, it's finished. Yun Xi looked at Shaya Longnis, who was lying on the ground limply. It seemed that she didn't even have the strength to move a finger again.

I have won!

After absorbing and releasing so much energy, even Casina got tired. Her will also started to fade away from Yun Xi's body.

Casina's martial arts is really powerful!

However, Yun Xi still felt that something was wrong.

Why did the lights of these stars look so real and familiar? Have I ever seen such a starry sky in the Water God's world before?

The next moment, a cold will suddenly descended and took over the control of Yun Xi's body.

"It's over."

"The tenth Sky Sword, Shaya Longnis, you shouldn't break into White Lotus Sword Domain and release the seeds of disaster without permission."

"You shall be judged."

A silver cold longsword appeared on Yun Xi's hand and pierced through Shaya Longnis' body without mercy.

"Humph. Don't think it's over. I will be back!"

As her heart was being pierced through by the silver longsword, Shaya opened her eyes and glared at Yun Xi harshly, then her body started to shrink.

Sixteen years old, fifteen, fourteen, Shaya's terrifying aura was quickly disappearing.

Thirteen, twelve, eleven, as if time was flowing backwards, Shaya's body noticeably became smaller and smaller.

It was the ability of the silver longsword. Looking at Shaya's body shrinking, Yun Xi vaguely saw a part of the rules this sword could dominate. Even a strong being like Shaya couldn't withstand it.

"Hydra, remember, no matter where you run to, you can never hide from me! I will take back the treasure you stole from me!"

"And remember, my thing is always my thing!" For some reason, Shaya stared at Yun Xi when she said it.

Chapter 300: The Truth of This World

"Shaya, you know as a lady fantasy creature, I won't return anything I have eaten. After all, we are not kids anymore, are we?"

Hydra looked at Shaya Longnis with a pleasant mood.

He really changed it!

My most beautiful, excellent bride defeated the strongest enemy on the stage called "The End of the World"! He had changed this world's doomed fate!

Oh, what a perfect ending!

He deserves to be my bride. Even though it will make Shaya Longnis regard me as a lifetime enemy, it's still a sure-fire business!

Everything has been solved, the next is to enjoy the honey days with my cute bride!

"The Water God, Hydra, deranged the rules of White Lotus Sword Domain, caused the tenth Sky Sword's irrational behavior, and protected the intruder from another god's domain."

"Even though you are a god, you have still sinned."

"You shall be judged."

Yun Xi looked at Hydra's happy face with a straight face, pouring cold water on her.

"Gee? ...Oh! No, wait!" Hydra was dumbfounded. She forgot that the Guardian of the Door was still possessing Yun Xi's body.

A cold light reflected on the silver longsword. It cut through Hydra's necks accurately. Seven of nine Hydra's heads dropped to the ground. Infinite blood squirted from Hydra's necks, even though she was a god, she still cried with pain.

"Whoa!"

"Puff! Puff!"

Being accompanied by some unknown sounds, Hydra's huge body toppled down to the ground.

"The intruder from another god's domain, the White Holy Dragon, you have sinned and shall be judged."

The Guardian of the Door controlled Yun Xi's body, brandishing the silver longsword again.

A painful dragon's cry came from the void. Apparently, even the Mist Demon couldn't protect Mumu from suffering this attack.

Yun Xi finally understood how the White Holy Dragon was hurt. It was too incredible a power. It was the power from the Guardian of the Door, the great will that was taking over his body and Hua Yue's body.

"The rulings are over." After the three attacks, the oldest Sky Sword's will faded away and returned back to the "door".

Now, there was no "legend ranked power" that was still living in White Lotus Sword Domain. All the labile factors that may break the balance in this sword domain have been cleansed.

The Guardian of the Door wouldn't intervene other things, because all things had returned to balance.

The lights of stars shone on Yun Xi's body, which meant that this trial had finished.

However, Yun Xi surprisingly found that he didn't return to the palace of the stars but was still standing on the ground of the Water God's world.

"Is it over?" After 15 minutes, Yun Xi finally realized that the trial had finished.

However, the scene around him didn't change at all.

He was still standing on the island in the center of his world. Under his feet, there were innumerable blooming flowers extending to the end of the world.

"It's finally over." Yun Que walked to Yun Xi from a distance. She was still carrying the black longbow, smiling toward Yun Xi. "You did it!"

"Oh, I also didn't expect that I could do this! Thank you for your help!" Yun Xi looked around with a lot of questions in his head.

Why didn't I return to the palace of the stars?

Haven't I accomplished all the quests?

"Where will you go? You are a hero ranked Baker and the Water God's favorite, countless forces will be happy to open their doors wide for you." Yun Que looked at Yun Xi with a mixed mood.

If she didn't witness it with her own eyes, she wouldn't believe that "Yun Hai" could defeat the tenth Sky Sword.

Although “Yun Hai” wasn’t using his own power, but anyway, he had stepped into that realm and defeated a legend ranked strong being. This experience was sufficient to bring him a bright future!

“Where will I go...?” Yun Xi looked at the bright stars in the sky in confusion. He couldn’t stop the perspiration from pouring down his face.

Hey, hey, the great stars, what’s the situation now?

Why did the real starry sky appear in the Water God’s world?

“Yun Que... where are we?” After hesitating for a while, Yun Xi questioned Yun Que with a fluke mind.

“Where... where else can we be? Of course we are in the central area of White Lotus Sword Domain, the Storm Eye. Don’t you know we were in the Water God’s world? Now, this world just begins to dock with the real world.” Yun Que looked at Yun Xi curiously.

Due to some reason, we were involved in the Water God’s world, then the battle between you and Shaya Longnis broke the barrier between this world and the real world, so that it exposed itself in White Lotus Sword Domain. Do I really need to explain such an obvious truth to you?

The Water God was this world itself. This world located in the center of the Storm Eye. From the beginning, Water God’s huge body was the nature of this world.

Now, due to the attack from the Guardian of the Door, the Water God had to sleep again, and this world gradually restored its true appearance and started to dock with reality.

Probably the Water God's world was the main reason why the space in the Storm Eye was so unstable.

"Cough... you mean... this is a real world? Not just a dream?" Yun Xi touched his White Emperor Mask and clearly felt that the Water God's power had become very weak.

However, it just became weak, but didn't disappear.

Hydra just slept again but didn't die, so her god power still existed in the White Emperor Mask.

Yun Xi could even call his one million brides' figures to appear again if he wanted.

"Yes, the Water God's world was a real world from the beginning. It was hiding in the center of the Storm Eye."

"We were chosen by Water God to be its Apostles and other people were chosen by the Sky Sword to be her Apostles."

"Now, we have won the battle, so we have no reason to fight with other people again."

Yun Xi didn't know what facial expression was under his mask, he knew it must be very bad.

Wait, so the trial wasn't just a dream.

What does it mean?

It means that I really, really...

Married a million girls!
