

## **Starchild 401**

### [Chapter 401: Clutch Goal](#)

Amongst all the top 10 chess players, apparently, Black Mage wasn't the strongest. His wisdom was far inferior to Norn the God of Wisdom and his attack power was far inferior to Orfina the Ruby Dragon.

However, he was the only 4 star points chess player who could withstand Orfina's attack.

His style of playing Star Go was "weird".

No one knew what the layout of his chess pieces was and how he would launch his attack, because they didn't exist from the beginning.

He was good at the layout of the middle chess pieces, dragging everything on the chessboard into the realm of chaos. Even Orfina was cheated by his tricks more than once.

Black Mage believed that even Norn fell into his trap, he wouldn't have any chance to escape.

Unfortunately, Norn never fell into his trap. Norn's style was too stable, and his computing power was strong. When coming to direct confrontation, he had no chance to win.

However, Norn the God of Wisdom was just an exception. Even if it was Duck Rome, once he failed to stop him, Black Mage would drag the entire layout of the chess pieces into chaos.

Once he created confusion, muddying the waters, he had a thousand methods to kill his enemy!

The star map he made in the real world was called "Sea of Chaos", there were thousands of small meteorites moving around in the "sea". By observing the chaotic meteorites, he learned his own road of stars.

He didn't think that he would fail this time.

At the 60th rounds, his chess pieces had been indented with his opponent's chess pieces together, and this was the situation he wanted to see on the chessboard.

Even if it was Norn the God of Wisdom, he would have headaches facing this situation.

"Chaos" was the truth of the world in his eyes!

"Pa!" In the eyes of Black Mage, he had seen the trace of countless stars being destroyed. It was his "ko", his invisible killing method.

After putting down 7 more chess pieces, Black Mage's proud "ko" finally formed.

It was a hexagram taking a black chess piece as the core, it was Black Mage's strongest attack, Black Death Hexagram.

The star map was covered with the air of death, the hexagram on the chessboard stood for the end of all things.

“Revive, the undead...” Behind Black Mage’s cold cloak, a shadow with a black sickle and a white bone mask appeared, staring at a corner of the chessboard.

The game is over. Once the Black Death Hexagram appeared, even Black Mage himself couldn’t stop it.

A long abyss appeared and divided Cyber Elf Alpha’s chess pieces into two parts.

“One... two... three... four...” In the face of Black Mage’s strongest attack, Cyber Elf Alpha leisurely put down a chess piece.

“What?” Black Mage was surprised.

One, two, three, four! Four hexagrams with different colours surrounded his black hexagram!

Green hexagram stood for the power of wind.

Yellow hexagram stood for the power of earth.

Red hexagram stood for the power of fire.

Blue hexagram stood for the power of sea.

The four hexagrams surrounded his black hexagram. To be precise, the reason that the four hexagrams could form was because of his black hexagram!

“Four elements, Elf Phenomenon...” Cyber Elf Alpha waved her hands, Black Mage’s black hexagram was swallowed by her four hexagrams. Over 60% of his chess pieces turned into ashes too at the same time.

Black Mage was defeated!

When had she found my purpose?

Before the 50th rounds, even he himself didn’t know where his Black Death Hexagram would form!

This was the reason why it was called the “Sea of Chaos”, because even he himself didn’t know what his next plan was.

Most people would be defeated before opportunity appeared. Because he was good at catching the chance, he could reach 4 star points.

He never expected that he would be defeated by his opponent by using his style!

She predicted his moves and used his trap to set a big trap, how strong her computing power was!

Her computing power was far stronger than him, her Star Go Strength was much better than his!

Maybe even when the plan of setting the Black Death Hexagram just appeared in his brains, his failure was already doomed.

He had been defeated 30 rounds ago!

“How can it be true... how can your computing power be so strong...” Black Mage looked at the chessboard in shock and disbelief.

From 30 rounds ago, she had predicted this future, this meant that her computing power was hundreds of times stronger than his!

As a legend ranked mage who dominated ten god’s domains, Black Mage’s mental strength was far above the average, but now, Cyber Elf Alpha computing power was hundreds of times stronger than his?

She herself was stronger than hundreds of legend ranked beings?

No, it’s impossible. Even to Norn, the God of Wisdom, it was impossible to reach this degree!

#### [Chapter 402: Terrible Alpha](#)

“There is something wrong! Even if you are a god, your computing power can’t be so strong, not to mention a legend ranked elf. What are you?” Black Mage instinctively realized that there was a secret behind it.

The nature of Star Go was a battle of computing power, which was also called deduction ability.

If the gap between two chess players’ computing powers was too wide, the result was already doomed.

Most hero ranked beings weren't entitled to enter the Starry Sky Chessboard, because their computing powers were too weak.

Unless the bloodline of the hero ranked being was about computing power, it wasn't possible for them to find the suitable places to put down their chess players in the changing star map.

Legend ranked mental power was the basis to play Star Go.

Only after reaching this level, was it possible to play Star Go. Even so, a lot of legend ranked beings couldn't even pass the entrance test, the Nine Chess Pieces Go.

Why was Norn the strongest chess player? Apart from his stable style, his computing power was specially optimized by his godhood, this was his biggest advantage.

Perhaps Orfina the Ruby Dragon's computing power was stronger than Norn's, however, the God of Wisdom had optimized his computing power, which meant that he could release 120% of his true power, so he was the only 6 star points chess player.

However, compared to Cyber Elf Alpha, their computing powers were just a joke.

Even overlapped Orfina and Norn's competing powers together, their computing power was just 1% of the computing power Cyber Elf Alpha had shown!

In the Western God's Domain, the Mechanus God's Domain, Alpha was still sitting in the God Crystal. The mental antennas on her forehead shook, requiring for higher computing power.

The alchemists and engineers cheered.

“Launch the 11th and 12th Planet Quantum Computer!”

“Cooling! Cooling! Ensure the absolute advantage of Alpha’s projection!”

“We will earn every game!”

“The Ruby Dragon and the God of Wisdom are just old-fashioned antiques! The future belongs to Cyber Elf Alpha!”

“Ha ha, I guess these 3 star points and 4 star points chess players are going to collapse. Our Alpha just opened 12 Planet Computers! We just used 10% of our true power!”

“Even the God of Wisdom is nothing in the face of our Alpha! Our Alpha has infinite computing power!”

Laughter burst from the alchemists and engineers.

After thousands of years from obtaining the God Crystal, building all the supporting facilities, ten generations of people had been born and passed away.

Now, only several elf engineers were the original planners who designed Alpha.

Today, the crystallization of countless people's wisdom finally blossomed and yielded fruit.

Black Mage wasn't wrong. As the newborn cyber god, Alpha could increase her computing power by adding more and more additional computing elements. She was the only god who had the god ability, "Infinite Computing Power".

Even Norn the God of Wisdom couldn't defeat her when coming to computing power.

All the elites in the Mechanus God's Domain believed that Alpha would be the only victor of all the games of the Starry Sky Chessboard from now on.

This was the beginning of a brand new era! This was the first announcement of the rise of the Mechanus God's Domain!

The era of Alpha was coming!

Black Mage stayed where he was for a long while after being defeated.

Am I defeated? Has my ambition of achieving 60 successive victories already failed?

Who am I? Where am I? What just happened? Just like all the chess players who met Alpha before, Black Mage started to wonder about the meaning of his life.

Suddenly, a star light flashed and a new name appeared in the front of Black Mage.

“A Cloud in the Sky”, Black Mage remembered that it was the code name of another newbie.

Oh, he has achieved 10 successive victories and obtained 1 star point. As a newbie, he did really well.

From the aura of his projection, he should be at the legend rank. After all, his exuberant vitality couldn't be fake.

However, after meeting the “monster”, Cyber Elf Alpha, Black Mage suddenly felt that the newbie was quite pleasing to the eye.

I can't win against that “monster”, but it will be quite easy to maltreat other newbies! Looking at the 1 star point newbie, “A Cloud in the Sky”, Black Mahe sneered.

Come on, newbie, let me enjoy the game!

“Pa!” After the routine to decide who went first, Yun Xi was on the offensive. He directly put the first chess piece onto tengen.

“Hey, hey...” Black Mage sneered, grinding his teeth.

How dare you give up your upper hand advantage? You are bringing about your own destruction!

[Chapter 403: It's Impossible!](#)

Cyber Elf Alpha's computing power was hundreds of times stronger than any legend ranked beings. Black Mage didn't believe that there would be another "monster" this time!

Therefore, when he saw Yun Xi put his first chess piece onto tengen, he forced a ferocious smile.

Do you really think that you are a monster like Cyber Elf Alpha? Newbie, I will teach you what a cruel world the Starry Sky Chessboard is!

"Pa!" "Pa!" "Pa!" Both of them put down their chess pieces quickly, and Black Mage smoothly brought the situation on the chessboard into chaos.

Very well, I will win!

Black Mage carefully observed the style of "A Cloud in the Sky", and he confirmed that his style of playing Star Go wasn't like Alpha's strange style at all.

His moves have shown that he is totally a newbie!

How did he successfully pass the entrance test? He is totally a beginner of Star Go! How did he achieve 10 victories in a row before?

Black Mage didn't find any trap on the chessboard and any strange moves of Yun Xi's chess pieces.

After being defeated by Cyber Elf Alpha, he needed such a game to rebuild his self confidence!

“Pa!” The 53rd round, Black Mage successfully summoned the Black Death Hexagram again.

The shadow of black cloak appeared behind Black Mage again. He sneered as cold as a god of death.

When his Black Death Hexagram launched, one fifth of Yun Xi’s chess pieces were eaten.

“Ha ha ha!” Black Mage laughed in a creepy tone.

The newbie has been recorded on the list of the God of Death! He already has no chance to reverse the situation!

Even Orfina the Ruby Dragon was defeated by Black Mage’s Black Death Hexagram once, how can this newbie escape from it?

Cyber Elf Alpha could win, because she had predicted the appearance of his Black Death Hexagram by using her terrible computing power. She summoned four hexagrams by using the power of his hexagram itself.

Unless this newbie’s computing power was also hundreds of times stronger than his, otherwise, it wasn’t possible to reproduce what Cyber Elf Alpha did before!

The deduction, prediction, tricks and plans in his game with Alpha was massive. If they wrote their calculation procedures on papers, Black Mage’s calculation could cover the surface of a land and Cyber Elf Alpha’s calculation could cover the entire surface of a world!

After learning from the game with Alpha, Black Mage became more careful.

Even though his opponent was just a newbie, he wouldn't give him any chance. Only "a thorough victory" could help him restore confidence.

"Hmm, it's time now." Looking at the "ko" Black Mage made, Yun Xi nodded.

Black Mage was probably the strongest chess player he had ever met. From the beginning, Black Mage was preparing for the appearance of the "ko".

This was Black Mage's style, Chaotic Trap, which he created after playing Star Go thousands of times in the "Sea of Chaos" he built in the real world.

Cyber Elf Alpha's style was building on the Planet Quadrant Computers and all kinds of affiliated satellites.

"Black Death Hexagram" was Black Mage's road of victory.

"Infinite Computing Power" was Cyber Elf Alpha's absolute advantage of winning.

Black Mage dragged his opponent into the sea of chaos, then defeated his opponent by using his rich experience.

Cyber Elf Alpha analyzed her opponent's advantage and made up her own disadvantage by her overwhelming computing power.

Their styles seemed to be different, but the nature was the same. Most chess players followed the same rule.

No matter what the style was, the basic was computing power.

Every chess player of Star Go was a real mathematician that had overwhelming, godlike computing power.

Till today, an unknown newbie broke into this world.

"Pa!" Yun Xi put down his chess piece.

"The wind rises."

This chess piece stood for "connection". After being put down, one third of the area on the chessboard became the Sanctuary of Wind.

"What?!" Black Mage opened his mouth wide.

How can this be possible? No, the Sanctuary of Wind, it not even possible for that to appear in that area! Moreover, it has occupied one third of the area of the chessboard!

Compared to Yun Xi's Sanctuary of Wind, his Black Death Hexagram was too small. They aren't at the same level!

Where am I? Who is playing with me? What happened?

Oh, right, when did he build the Sanctuary of Wind? That area doesn't meet any of the requirements for establishing the Sanctuary of Wind!

[Chapter 404: 1+1](#)

"Hiss!"

The green Sanctuary of Wind was three times larger than the Black Death Hexagram, it easily blew off the dark air on the star map. The shadow of the god of death behind Black Mage cried and was deported from the chessboard immediately.

In the face of the Sanctuary of Wind, Black Mage's Black Death Hexagram turned into ashes in the blink of an eye.

Impossible! Impossible! Impossible!

Black Mage gazed at the chessboard. He repeated Yun Xi's moves over a thousand times in his heart, but still couldn't find how this situation formed.

This star map biased toward dark type, this was also the reason why he was so confident.

What happened?

How did the Sanctuary of Wind form?

Am I really defeated?

What the hell was happening?!

Black Mage had played Star Go many years, and he was defeated by many people many times. He accepted to be defeated by Orfina the Ruby Dragon, Norn the God of Wisdom and even Cyber Elf Alpha, however, he couldn't accept what happened this time!

The game with Cyber Elf Alpha made him wonder what the meaning of his life was, this game with Yun Xi made him wonder if he really knew how to play Star Go.

He understood how Cyber Elf Alpha defeated him, it was because of her overwhelming computing power.

However, he didn't understand how he was defeated by "A Cloud in the Sky" at all!

There wasn't any battle, competition, or trick, everything went smoothly just like he thought, then he suddenly found that he had lost.

Weird. It's too weird!

Black Mage never met such a style and such an opponent before.

This was Yun Xi's style of play Star Go, this was his unique genre of Star Go!

Yun Xi only put down his chess pieces by following his feelings. He didn't need to calculate at all.

Black Mage could calculate the change that would happen in the next 30 rounds, calculating 1 teraflop per second.

Cyber Elf Alpha was more terrible. She could easily calculate all the changes that would happen in the next 100 rounds, calculating 1 petaflop per second.

As for Yun Xi's computing power... he still felt headaches when seeing the mathematical books such as "Nine Chapters on Mathematical Art" and "Geometrical Principle".

Why could Yun Xi win? The reason was simple.

When Black Mage tried to set his proud Black Death Hexagram in the chaotic area, Yun Xi had seen the hidden Sanctuary of Wind on the chessboard.

Yes, Black Mage was right, the Sanctuary of Wind wouldn't be formed within 50 rounds, till after the 54th round, the trace of the hidden Sanctuary of Wind would appear.

From the chess piece he put on tengen, Yun Xi sensed the aura of the Sanctuary of Wind!

From the beginning, he was disposing the Sanctuary of Wind. His instinct told him that the Sanctuary of Wind was the biggest “ko” that could be formed on this star map.

When Black Mage’s Black Death Hexagram formed, Yun Xi’s Sanctuary of Wind was waiting for him to activate 30 rounds ago. He was just bored waiting for the coming of the wind.

Actually, Black Mage was already defeated 30 rounds ago. He already couldn’t stop Yun Xi’s Sanctuary of Wind from forming at that time.

To Yun Xi, it was as simple as “1+1”. In his heart, Star Go was really easy that even a monkey could understand its rules.

If Black Mage knew Yun Xi’s thought, he would definitely spit blood in anger!

You can read the star map and naturally understand that the embryonic form of the Sanctuary of Wind would form after 50 rounds? You can see the orbits of stars by using your naked eyes?

Oh dammit, if I can do it, why do I need to increase my computing power?

The orbits of stars followed countless rules of the world, every second and minute the changes that happened to a star was astronomical!

Only legend ranked beings could withstand the overwhelming calculation to predict the orbit of stars.

Even gods couldn't see the traces of the star map with their eyes. It had nothing to do with computing power. It was simply impossible!

His style... was already beyond "legend"!

If Black Mage's computing power was 100, Cyber Elf Alpha's computing power would be 10,000 or more, Yun Xi's computing power would be only 1 or less. However, he could win, because they were not comparing the same thing.

In the eyes of the Black Mage, he saw countless computing formulas when he looked at the stars.

In the eyes of Yun Xi, he only saw a beautiful star map formed by stars, and he naturally knew how to make it become more beautiful by moving the stars.

In Black Mage's mind, Starry Sky Chessboard was a stage of showing wisdom, a competition of computing power.

In Yun Xi's mind, it was a matter of nature, because he just tried to arrange the patterns on a picture to make it become beautiful.

This was the reason why Black Mage froze after seeing Yun Xi's Sanctuary of Wind. Till his time ran out, he didn't put down a chess piece.

Because the "thread" in his mind had broken.

## [Chapter 405: Identity Is Exposed?](#)

“Isn’t he a strange man?” Yun Xi remembered the chess player called Black Mage, who gave up playing after seeing Yun Xi’s Sanctuary of Wind.

After 11 games, Yun Xi gradually learned to conjecture the strength of his opponent from the star points above their heads.

So far, Black Mage was the strongest, because he had 4 star points, his moves were skillful and his tricks were also very interesting.

However, in Yun Xi’s mind, Maha Mystery’s Star Go Strength was slightly stronger than Black Mage.

“My opponents will be stronger and stronger. 4 star points chess player is already so strong, how about 7 star points chess player or even 9 star points chess player? Their Star Go Strength must be as strong as a monster!” Yun Xi clenched his fists. Star Go was really easy, and Teacher Casina thought that he could achieve 100 successive victories easily, however, he wasn’t going to let down his guard.

Referred to the game of Go in the mortal world, he himself should be just a beginner, a 4 star points chess player should be an average player, a 6 star points chess player should be a real expert, and a 9 star points chess player should be a high mountain that wasn’t possible to climb now.

He shouldn’t meet 8 star points or 9 star points players too early. The strongest opponent was the 4 star points chess player, Black Mage, perhaps it was the protection mechanism of the Starry Sky Chessboard to newbies.

If he only needed to play with other newbies, he was confident to achieve 100 victories in a row!

“Master, is Star Go interesting?” Looking at Yun Xi’s face, even Mei’er could see his confidence.

“Yes, it’s interesting! It’s an easy and interesting game, I can’t wait for the next turn!”

“The star maps are beautiful, when I put down chess pieces, I felt as if I was touching the real stars. It’s fantastic!”

“Thank you, Teacher Casina. Thank you for recommending me to the Starry Sky Chessboard!”

Mei’er looked around and murmured, “Master, this game isn’t as simple as you think.”

“But, it doesn’t matter, as long as you enjoy it!”

At the same time, Cyber Elf Alpha defeated another 4 star points chess player.

“No, impossible... what happened?” The 4 star points chess player, “Maple Teeth” supported his hands on the chessboard and gazed at his remaining chess pieces fixedly.

He was really shocked by Cyber Elf Alpha’s computing power!

“What are you?” Everyone who had played with Alpha had this doubt in their minds.

The gap of computing power couldn't be so wide amongst legend ranked beings. Everyone was shocked by Alpha's overwhelming computing power.

After defeating "Maple Teeth", Cyber Elf Alpha had achieved 40 victories in a row.

When other people had only played a dozen turns, Cyber Elf Alpha had achieved 40 successive victories and obtained 4 star points.

Her computing power was far beyond anyone's imagination.

From the beginning, none of them could take any advantages in the face of her, most chess players were defeated by her within 50 rounds. Black Mage was a rare exception that could set and launch his "ko".

In some sense, Black Mage's "Sea of Chaos" was the only Star Go Style that made a few troubles to Alpha. In order to find the rules amongst the chaos Black Mage created on the chessboard, she had to increase her computing power tenfold.

When playing with Black Mage, Cyber Elf Alpha had rarely requested support, asking for increasing the number of planet computers.

After defeating Black Mage, the next 9 turns of game didn't make any trouble for Alpha.

Now, there were only two opponents that were still blocking her way from becoming the strongest Star Go player.

The well-known strongest attack, Orfina the Ruby Dragon.

The well-known strongest defense, Norn the God of Wisdom, the only 6 star points chess player.

They didn't make Alpha wait too long.

As the biggest black horse, Cyber Elf Alpha finally met Norn the God of Wisdom at her 41st turn of the game!

When the list appeared, it instantly attracted the eyes of all the legend ranked beings who were looking at the Starry Sky Chessboard.

The biggest black horse, the supernova star of Star Go, Cyber Elf Alpha.

The strongest chess player, the number one wise man in the endless god's domains, Norn the God of Wisdom.

Who is the strongest? Who will be the new king of Star Go? Countless people looked at the "tower", waiting for the result.

Cyber Elf Alpha played 40 rounds and achieved 40 victories in a row.

Norn the God of Wisdom played 27 rounds and achieved 27 successive victories.

No matter who was the final winner, everyone was sure that this turn of the game would become a masterpiece throughout the ages. Many people were waiting for the record of this Star Go game after they decided who was the winner.

At the same time, Yun Xi just started his 15th turn of the game.

“Hum? This smell... Hey, Casina, is it you?!” Orfina the Ruby Dragon looked at “A Cloud in the Sky” in surprise.

Even though the figure of “A Cloud in the Sky” was covered with starlights, however, Casina was Orfina’s best friend! How could she mistake the unique smell of her best friend?

“No, I’m not Casina the Battle God!”

Yun Xi retorted guiltily. He was just a fake, he didn’t want to expose his identity now!

“Humph, liar. How will I mistake your smell? Don’t forget the past we slept in the same bed!”

Orfina licked her lips, remembering Casina’s alluring body scent, slender legs, warm lips, and the aroma of the wine.

#### [Chapter 406: Different Tengen](#)

A Dragon was a kind of long-lived creature.

Orfina was a rare “starlight” dragon, the ruby that Yasha the Dragon God bred in person, the starlight dragon princess.

Although she was still small, due to her elegant, beautiful dragon body and rare starlight type, she was the pride of the dragon race since the first day of her birth. She and Mumu Salabert the White Holy Dragon were called the twin stars of the dragon race.

Casina the Battle God was Orfina's best friend, they once formed an adventure team, adventuring together.

Casina was the striker, defeating their enemies using her excellent martial arts; Orfina was the defender, eliminating their enemies using her special gem magic.

They were the best friends who told each other their secrets, and the confidantes who once slept on the same bed. To Orfina, Casina was special in her heart.

Casina's character was careless, and this was the point that Orfina liked.

Because of their long life, most dragons had no interest in any humans. After all, apart from legend ranked humans, even the lives of hero ranked humans were short in their eyes. Maybe they just went to sleep, then after they woke up, their human friends had died.

Just like most dragons, Orfina also liked to sleep, however, she had a special avatar. When her true body slept in the Emerald Dream, she could use her avatar to travel around the world.

Meeting with Casina was her happiest occasion within the last one thousand years.

She clearly remembered Casina's height, weight and even the size of her breasts, so she would never mistake her with anyone else.

The mysterious person whose code name was "A Cloud in the Sky" was undoubtedly her best friend, Casina!

The immortal Battle God, whose hobby was dancing, the holder of the Sands of Time, Casina the Sky Sword!

"No, you got the wrong person!" Yun Xi shook his head and firmly denied.

Even if the "ruby princess" was really Teacher Casina's best friend, he wouldn't admit it!

It's a secret!

"Ho ho, why are you still pretending..." Orfina smiled and covered her mouth. Yes, this is her, Casina's special character! What a liar!

"Yes, I don't make mistakes. If I'm wrong, it's the fault of the world!"

"I'm not wrong! If everyone thinks that I'm wrong, I will correct the view of everyone!"

"If the world doesn't accept me, then I will change the world!"

This was Casina, the sixth Sky Sword, the legend who ruled the Battle God's Championship Contest!

But, when did she start to play Star Go?

Orfina remembered that she taught Casina the rules of Star Go before, but she had no interest in it and even fell asleep when she listened to her lessons. She didn't even remember the basic rules of Star Go!

Orfina felt sorry for her, because Star Go was her favorite game, the stage she could challenge almost all the sophists in the endless god's domains.

Her code name "Ruby Princess" was well-known by almost all Star Go players. After all, apart from Norn the God of Wisdom, everyone was defeated by her more than once.

"Black Mage" thought that his "Sea of Chaos" could restrain her attack, what idiotic nonsense that was!

When she played with Black Mage, she knew all the tricks he was playing. However, she still chose to face the tricks with her strongest attack, breaking all the obstacles in front of her.

"I will break all obstacles. No matter who my opponent is, god or demon, it doesn't matter!"

"I look forward to the battle, I'm eager for the battle, only the battle can let my blood burn."

"March forward courageously is forever the style of my chess pieces!"

Orfina looked at her opponent with curiosity after confirming that it was Casina.

She didn't remember if Casina played Star Go before, but there was already 1 star point above her head, which meant that Casina had achieved 10 victories in a row, becoming one of the top 100 Star Go players.

Is she really the Casina I know?

The invisible Battle God started to play Star Go?

Orfina felt strange. It wasn't Casina's style at all!

"You go first, I give up." As Casina's "predecessor" of Star Go, Orfina gave up the guessing odd and even game and let Casina play first.

Is it fine? Looking at the 5 star points above the Ruby Princess' head, Yun Xi wondered. She was undoubtedly the strongest opponent he had ever met after coming to the Starry Sky Chessboard.

Referred to the game of Go in the real world, 5 star points meant that she was an expert of Star Go, and Yun Xi could feel the strong sense of self-confidence from the Ruby Princess.

Her atmosphere was far stronger than Black Mage, which could only be cultivated after countless victories.

The game started, a fiery-red star map appeared on the chessboard.

Yun Xi was slightly surprised.

“What a beautiful star map!” Orfina praised looking at the star map.

Interpreting the secrets of stars using a star map, it was an overwhelming masterpiece to Orfina the Ruby Dragon!

“The fire is burning. The sun comes up in the east, there is a tree called Fuso...” Yun Xi’s hand subconsciously picked up a chess piece and put it onto the center of the chessboard.

“Tengen?” Orfina felt both funny and annoyed.

“Casina, I remember when I taught you the rules of Star Go, I told you that you shouldn’t put your first chess piece onto tengen.”

“Putting your first chess piece onto tengen is equal to giving up your upper hand advantage, it’s common sense!”

“If you put down your first chess piece there, you will need to calculate the situation on the entire chessboard from the beginning. It isn’t a wise choice.”

Yun Xi looked up at the “Ruby Princess” in confusion.

Why? The most terrible “ko” is lurking in this position.

It was a shadow with a pair of fiery-red wings, flying above the thirty-three heavens. It was the absolute dominator of this star map!

#### [Chapter 407: Orfina's Feeling](#)

“This star map is a fire type, it's possible to breed a fire type fantastic creature.”

“I think it's a Rathalos, an ultimate fire dragon that can defeat all creatures on this starfield.”

“You chose the red chess piece, it was a wise decision, but you put it on the wrong place.”

Orfina the Ruby Dragon put down a chess piece on a corner of the chessboard.

If she put her chess piece in the center of the chessboard too, the depletion of her computing power would be hundreds of times more than the computing power she would use if she put her chess piece on the corner. Therefore, unless she was teaching other people the rules of Star Go, she would never put the first chess piece in the center of the chessboard.

What's the most important element when playing Star Go?

Computing power. Essentially, Star Go was a game to complete the computing powers of the chess players.

Calculating the nature of the star map, the moves of the chess pieces and the changes that would happen as time went by.

Every move on the chessboard would be determined after countless calculation. This was the essential gap between Star Go and other board games.

Just like the changes of stars in the real world, even Orfina had the power of starlight, she was not quite sure that she could calculate all the changes that would happen on the chessboard.

However, she naturally understood the natures of the star map and chess pieces, plus her excellent computing power, this was her trump card to be the only 5 star points chess player who was only slightly inferior to Norn the God of Wisdom.

Maybe there were some people whose computing power was stronger than her, but her understanding about star maps was the best.

For instance, when Orfina first saw this star map, the method of how to form the Sanctuary of Fire on the chessboard immediately appeared in her mind.

She even predicted the ultimate form of the Sanctuary of Fire, a Rathalos, one of the overlord fantastic creatures in the void!

Just like what Black Mage did, using Black Death Hexagram to summon the shadow of the God of Death, the strong Sanctuary of Fire could achieve the same thing. It was the skill that only high star points Star Go players could master, the phenomenon after deeply exploring the rules of stars.

I will win! After predicting the figure of the Rathalos, Orfina had seen the road of victory.

“Pa!”

“Pa!”

“Pa!”

“Pa!”

Orfina put down her chess pieces quickly. Even in the face of her best friend, Casina, she wasn't going to play match-fixing.

She knew Casina was obsessed with winning, so was she. Casina would turn into an invincible battle god in the Battle God's Championship Contest, smashing countless legend ranked warriors' self-confidence, she did the same thing in the Starry Sky Chessboard.

Her purpose of playing Star Go was to pursue the thrill of victory.

Therefore, no matter who her opponent was, she would defeat her opponent using the most fierce attacks!

“Casina, it's unexpected to see you here. I remember I didn't tell you the reason why I like to play Star Go.” Orfina had confirmed that she would win this game within 10 rounds. She showed a smile of confidence on her face.

“I have a younger sister, her name is Mumu Salabert, which means the purest white light.”

Yun Xi's hand suddenly trembled, almost putting down his chess piece at the wrong place.

Mumu Salabert? Oh, it's really a familiar name. Isn't she the dragon who broke into White Lotus Sword Domain and slept in the Water God's World?

She was the first legend ranked being Yun Xi had ever seen.

So, the White Holy Dragon, Mumu Salabert is the young sister of the "Ruby Princess"? In this case, the real identity of the "Ruby Princess" must be a dragon in the Dragon God's Domain.

"She is a naive but kind child. She knows nothing about the cruel world, as innocent as white paper."

"From the bottom of her heart, she believes that her father likes her, he just had to leave her for some reason. She believed that as long as she keeps looking for her father, she would find him someday and obtain his love again."

Hum? Why do I feel that I have heard some similar words before?

"Unfortunately, I know it's impossible."

"That bastard, he abandoned his wife and child and left nothing to them. How does he deserve their love and trust?"

“We can’t change the past, but we can protect the present and create an ideal future.”

“Every man is bad in nature! Poor Mumu, she hasn’t known that her father is a bastard. Her mom is just one of that man’s victims.”

“Tell me, Casina, do you think such a father still deserves his daughter’s love?” Orfina asked.

“Well... she’d better give up looking for him...” Yun Xi answered honestly, and suddenly felt a chill down his back.

From the description of that man... why did it... sound like my past life?

It must be a coincidence!

“Yes, it is nonsense that women are not as outstanding as men! We don’t need to rely on men! We are women, but we can create our bright future with our hands!”

“Star Go is my battlefield. I will overcome all opponents here, proving that I’m the king of the Starry Sky Chessboard!”

Orfina the Ruby Dragon looked at Casina with longing.

Oh, my favorite soul mate!

Your romantic spirit, your innocence, your wayward character, your strong strength, they are all so attractive!

You are the invincible Battle God, the most beautiful dancer, and now, you even start to play Star Go!  
You are the most perfect lover in my dream!

Casina the Battle God, my light, my hope, my precious!

I swear to the great stars! After I win, I will immediately ask her to marry me!

It must be the arrangement of fate to let me meet her at this time, this place, this stage!

This stage of the greatest wisdom in the endless god's domains is our wedding scene!

This time, I must win!

[Chapter 408: The Golden Red Ligh](#)

Orfina's wonderful future was already close enough to touch!

They were both at the legend rank and had great talents, and now, they even started to like the same game. From the bottom of her heart, Orfina thought that Casina was the other half of her life.

When she was still a child who longed for her father just like her younger sister, Mumu Salabert, she asked what the feeling was to fall in love.

“Love is an impulse from the bottom of your heart. When you look at your lover, you will naturally realize that he is the right person.”

“No matter how many opponents I will have, I will be the final winner.”

“No matter how much I will pay, I will let him become my possession.”

“Never give up, never fall back, even if the entire world is against me, I will be honest to my heart.”

“If you meet such a person one day, just do what you want.”

“We dragons never concede!”

When Orfina was bigger, she knew what the terrible mistake her father had made was. She felt confused.

“Mom, my father is so indecisive and frivolous, why do you like him?”

The great dragon god opened her black wings, covering countless stars. She answered her confused little daughter, “So what?”

“Hum? But... isn't love a resonance between two lovers?”

“Yes, I’m also doing my best, but I still can’t kill those ‘three’...” The dragon god swung her tail, knapping three newborn stars.

“Why don’t they just quit without affectation? I’m the only one who loves him in this world!”

“If I caught him at that time... I shouldn’t be deceived by him and agree for him to build these star bridges!”

“Liar!”

Orfina’s great mom’s answer really shocked her young heart. For the first time, she realized that her mom wasn’t omnipotent, at least, her father once deceived her mom.

After that, Orfina started to study the star bridges and towers. Relying on her familiarity to stars, she finally came to the Starry Sky Chessboard.

When she first saw the star map on the Starry Sky Chessboard, her heart was captured. She believed that this was her holy land, her battlefield.

In this world, she could show herself, proving the value of her life.

Just like the Battle God’s Championship Contest was Casina’s highest stage, this was her highest stage too.

At this time, at this place, she would defeat Casina and obtain the highest glory in this mystery world, just like what Casina obtained in the Battle God's Championship Contest!

It would be the best celebration after proposing!

Therefore, I will do my best.

Calculating! Calculating! Calculating! I will win after 7 rounds! Orfina gave her whole attention to the golden red chessboard.

Her chess pieces and Casina's had captured all the main points on the chessboard, however, her chess pieces had dominated most of the areas on the chessboard. Casina's chess pieces were divided into two corners, looking like a pair of wings that had been torn open.

Anyone who knew the basic rules of Star Go could see that Orfina had occupied the absolute advantage.

"Casina, don't concede quickly, I have something to say after this game." Orfina took a deep breath with a serious look.

"Hum? Concede?" Yun Xi looked at the chessboard in confusion. Everything just went smooth, the pair of wings were already going to form. Is there something I don't see?

"Yes, I'm sorry because I will let you face a crushing defeat, but, keep your chin up! As a rookie, you are doing well."

“I didn’t suspect that you would also play Star Go someday.” Orfina said honestly, praising “Casina”, the most perfect dream lover in her heart.

Gender won’t be a problem.

Race won’t be a problem.

As long as we love each other, it’s enough!

Casina and I can pass through all tests and couple up happily!

We can drink and chat, and do this thing and that thing every day. This was heaven in Orfina’s heart.

Now, she was only 6 rounds away from heaven.

In fact, Casina was still too naive in Orfina’s heart. Her Star Go Strength was just at the beginner level. When she put her first chess piece onto tengen, her failure was already doomed.

“Well... it’s easy to understand.” Yun Xi glanced at the chessboard again, making sure that he didn’t make any mistake.

“Pa!”

“Pa!”

“Pa!”

“Pa!”

“Pa!”

Every sound of putting down the chess pieces was the sweet countdown leading to heaven.

The fifth round from the end of the game, the figure of Rathalos had vaguely appeared. The fierce dragon was going to wake up.

The fourth round from the end of the game, hum? Something isn't right. But it doesn't matter, my victory is already mine.

The third round from the end of the game, victory is close at hand.

Orfina started to prepare the words she would say after a while.

“I love you. We must've been lovers in our past lives, so we can meet each other in this life.”

“You and your Sands of Time are the forever colors in my mind.”

“You are the brightest star in the Battle God’s Championship Contest, and I will pick off the crown of the Starry Sky Chessboard, presenting it to you.”

“In my eyes, you are so bright and beautiful today. My honey, my gem, you are my unique flower in the world.”

The second round from the end of the game, Orfina put down the chess piece which stood for her hope and future.

“Casina, marry me.”

1 round. After 1 round, I can win and marry you!

“Ok, it’s over...” Yun Xi put down his chess piece in the center of Orfina’s chess pieces, in the place where the heart of the fierce fire dragon was.

The next second, a gorgeous figure with a pair of golden red wings shot up from the chessboard, flying above the entire star map with infinite golden red flames!

#### [Chapter 409: Sun Bird](#)

It was a crimson fire dragon, an overlord fantastic creature in the fire starfield.

There were a big red gem and two small red gems, on its forehead, which stood for the source power of fire. A stocky red horn covered its head like a big cutter wheel, wrapped around by countless red and black flames.

On its huge red wings and under its strong lower limbs, there were thick exoskeletons protecting its body. The fierce red scales on its body were vivid, far clearer than the shadow of the God of Death Black Mage just summoned.

Its dragon eyes looked like a pair of lava pools, endless evil auras were boiling inside of them, announcing the dragon's identity.

Its scales sparkled like the crystals of fire with vague black lines on them, which stood for the road of power it had chosen.

It was once a pureblooded crimson dragon, the lord of fire, but it wallowed in degeneration, indulging in wanton massacres in the mortal world.

Because it was a pureblooded crimson dragon, after being infected by demon air, it became a fire demon dragon that was much stronger than any real crimson dragon.

It wasn't being lured by the abyss, but degenerated into the deepest side of hell of its own free will.

It proactively accepted the aura of destruction and tyranny, turning into the avatar of greed and madness, Rathalos.

Since its projection was summoned by Orfina's Sanctuary of Fire, appearing on the unknown star map, it meant that the fire demon dragon had controlled a trace of rules of the immortal, leaving its projection in the history of the endless god's domains.

Orfina believed that once she successfully summoned this fire demon dragon, Rathalos, the victory would be right in her hands.

Till she saw the golden red phantom.

Yes, the figure with a pair of golden red wings was just a phantom, to be precise, it was just a vague “concept”.

From the outline of its body, it should be a golden red bird, however, Orfina never saw such an ornate, bright golden, mythical bird.

The mythical bird was surrounded by endless spirits of fire, and it had three legs.

There was nothing around the bird apart from the infinite flames.

Looking at it, Orfina confirmed that it was the strongest, most beautiful fantastic creature she had ever seen.

The sun-like three-legged mythical bird wasn't recorded in the books of dragons, it was a new, unknown, ultimate fantastic creature.

It stood for the source of life, the highest mystery that could never be touched and studied.

Its golden red wings could cover the entire world, flying above the thirty-three heavens.

It raised its head, looking around, and any place that it was looking at, started to burn. Even the rock under the ground started to boil, becoming a sea of lava.

Above the boiling sea of lava, countless spirits of fire flew to it, danced and sang around it.

Golden spirits of light were born and turned around it, waiting for its orders.

The fire demon dragon, Rathalos just formed on the chessboard and hadn't announced its appearance with an earsplitting roar, it had been surrounded by endless flames. Its body was theoretically immune in the face of any fire, but now, it was ignited and turned into golden red particles, disappearing in the air.

The golden red mythical bird just waved its wings, countless golden lights had pierced through the body of the fire demon dragon like the sharpest swords, turning it into ashes.

All the areas on the star map were covered by endless solar storms, one black point after another appeared and exploded in the golden red world of fire.

There were "sun spots", generating from the strongest light and heat.

Sunlights could breed new lives, they could also destroy everything and burn everything.

As the fire of the sun dropped onto the ground, all lives would melt, only the spirits of fire and light could dance around the mythical bird above the thirty-three heavens.

It was an ultimate fantastic creature that no mortal could touch. It had superpowers, and was also surrounded by infinite loneliness.

It was a “god” that would be born in the future called “Immemorial Era”, it was the ultimate fantastic creature that would cause the havoc called “Ten Suns Cover the Sky”.

What Orfina saw was the “sun”, the strongest sun walker in the future.

It could never descend into the mortal world and could only live above the thirty-three heavens, otherwise, its light and heat would burn the entire world into ashes.

During this era, it hadn't been born yet, but its “concept” had formed, and it had a “name”.

The Starry Sky Chessboard caught a fragment of the future and predicted its birth, then Yun Xi found its existence from the star map and summoned it by using Orfina's Sanctuary of Fire.

Darkness had been expelled from the star map, the entire chessboard was covered with beautiful golden red lights.

On the vast star map, no other colors were still existing. It wasn't the Disaster of Sky and Earth, but a new “ultimate ko” Orfina hadn't seen before but really existed.

Most stars were crushed and disappeared in the endless explosions of sunspots. Only a few stars whose orbits were far away from the sunspots dodged the disaster, following around the newborn golden red light in the center of the world.

After destroying most things on the star map, the golden mythical bird finally folded its wings, rested on its sun and looked at the “past” through the chessboard.

The golden red bird should just be a “ko” on the star map, it couldn’t really be an existing life, however, Orfina saw “wisdom” from the eyes of the mysterious golden red bird and “mystery” which was as great as her mother.

#### [Chapter 410: The Thread of Fate](#)

“What... what is this fantastic creature?”

Orfina looked at the golden red figure who burned her fire demon dragon into ashes and swallowed the entire Sanctuary of Fire. She was really shocked.

It was just a vague outline, its true body didn’t even really appear on the chessboard, it had dominated the entire star map. Its absolute power made Orfina feel helpless.

Does this fire-type fantastic creature really exist in the history of the endless god’s domains?

No, it can’t be a simple fire-type fantastic creature. From the body of the golden red mythical bird, Orfina sensed the power of stars, which was similar to her power but was far stronger than her power even if she transferred into her Ruby Dragon form.

Her true body could turn into a gem star under the aegis of her great mother, Yasha the Dragon God. The weight of the gem star was 59.6 ten quintillion. Even if she simply moved her body in the void, her body would cause gravitational tidal effects on other stars nearby her.

The gem star was her core, the source of her legend ranked power.

She herself was the most terrible war machine in the Dragon God's Domain, a moving natural disaster.

She and another Dragon God's Apostle, Thanatos the Lair of Dragon were the ultimate forces of the dragon race.

Her true body was too big, so she was sleeping in the Emerald Dream most of the time. If she wanted to go outside, she would use this human form avatar she was using now.

She never imagined that there would be any fantastic creature that was bigger than her true body and more beautiful!

Even if it did nothing, it deserved to be worshipped by all creatures.

It was the sun, the flame above the thirty-three heavens, the god ruling the world.

People must kneel down in front of it, praise and believe in it, creating countless poems and tales for it.

The land that was shone by its golden red light, the legend of it would be eulogized forever.

In the future, it had countless names, because it was so distinguished, so beautiful, so holy. Anyone who saw its appearance would think it was the avatar of immortality.

“I... I don’t know...” Yun Xi was dumbfounded too. Looking at the mythical bird who was pecking its feathers, he had a feeling that he just summoned a very strong fantastic creature.

What a miracle, the Starry Sky Chessboard! I haven’t even reached the hero rank, but can actually summon this unknown beautiful bird by using the Sanctuary of Fire.

Yes, it was all due to the Starry Sky Chessboard. Yun Xi didn’t think that he had any relationship with it, after all, it looked like a bird that only exists in fairy tales.

However, he suddenly felt that something was wrong.

Did it just look at me?

Oh, again! It’s staring at me!

Wait, isn’t it just a projection? How can it have a sense of itself?

No fear! Don’t panic! I’m not using my own body but Teacher Casina’s avatar!

...

Outside of the Starry Sky Chessboard, on the peak of the Eastern God’s Domain, in the world of countless fantastic creatures’ homeland, all living beings suddenly had a feeling that something was going to happen.

In the sky, countless golden red lines spread around the sun, as if something terrible was going to be born from it.

In the north sea, the ancient giant creature, “Kun” leaped from the water in the form of a whale, then flew to the sky in the form of a roc. However, its feathers were burned by roasting about halfway, it was scared and immediately dived into the sea.

A group of Suparnas flew to the sun from the Western God’s Domain, however, they couldn’t withstand the temperature of the golden red particles around the sun, shouted and wrangled.

Only the feather snake who didn’t have a physical body could get close to the super being who hadn’t born, hovering around it.

In the east, the green dragon looked at the terrible scene and became lost in thought.

In the west, the white tiger looked up at the figure in the sky, itching for a try.

In the south, the princess Rosefinch chattered with its family dependants, flying to the sun.

In the north, countless ancient words emerged out from the old turtle’s black shell.

“West Queen, is it she?”

The master of the Kunlun God's Domain, the mother of all fantastic creatures, West Queen answered, "Yes, this child is going to wake up."

"Her name is Golden Sun Crow. She will be the most beautiful star in the future, the origin of the Immemorial Era."

...

As if time itself stopped when Yun Xi summoned the golden bird.

For the first time, Orfina started to wonder if she was really the favorite of stars.

Where am I? What am I doing? Who is my opponent?

Is this Casina a fake? In my memory, Casina can't be so strong!

Casina is the invincible Battle God in the mystery word "the Battle God's Championship Contest", however, how can she be so strong in this mystery world "the Starry Sky Chessboard"? They are two distinct worlds!

"..." Yun Xi was confused too. He knew it was just a projection on the chessboard, however, he had a feeling that it was looking at him. Although its era hadn't started and it hadn't been born, they had had an unknown relationship.

"Oh, this is really not good..." Mei'er had the same feeling.

Amongst the three roads Yun Xi chose before, a road which had been closed suddenly had the sign of being activated.

“Beyond the beginning of obscurity, at the first second of being born of the world, a being named Primordial was born. Here is the place where the stele of the heavens fell asleep...”
