

Starchild 411

[Chapter 411: Alpha's Doub](#)

At the same time, on the other battlefield of the Starry Sky Chessboard.

The hourglasses of both sides had run out by one third. The two chess players were having a tight competition.

“Cyber Elf Alpha, you... aren't just a newbie...”

Norn the God of Wisdom looked at the chessboard and murmured.

“I'm... the strongest Cyber Elf...” For the first time, Cyber Elf Alpha didn't achieve absolute advantage from the beginning. She looked at the chessboard in confusion and requested for additional computing power for her true body in the Mechanus God's Domain.

The game with Norn was tougher than she had expected.

In the Mechanus God's Domain, countless alchemists and engineers were busy at work, like ants.

Surrounding the God Crystal, over ten thousand people were working for Alpha.

There were similar scenes also happening in other places in the interplanetary network which was specially built for Alpha.

In order to increase Alpha's computing power, the people of the Mechanus God's Domain built hundreds of Planet Quadrant Computers. In order to transmit data at the fastest speed, they built many more special communication satellites.

With the support of the hundreds of Planet Quadrant Computers, Cyber Elf Alpha could be invincible on the Starry Sky Chessboard, crushing her opponents using her overwhelming computing power.

However, she finally met the strongest opponent, who wasn't inferior to her in the game at all.

The number one Star Go player, Norn the God of Wisdom.

Even though Alpha's computing power was hundreds of times stronger than any common legend ranked being, she couldn't take the advantage within the first 50 rounds. It was really out of her expectations.

The computing power she used now was already far beyond the computing power she used when playing with Black Mage. Now, she had to request more support of computing power.

Cyber Elf Alpha's requirement was equal to Oracle to the engineers in the Mechanus God's Domain. She was the miracle they created with their hands.

Her order overrode all rules!

"Cyber Elf Alpha applies for more computing power!"

“The first set, second set and third set of Planet Quadrant Computers are overheating! Be quick, inject more coolant liquid!”

“Launch the 15th and 16th Planet Quadrant Computers!”

“Move! Move! Move! Bring 50 communication satellites online! Our primary goal is to increase Alpha’s computing power!”

“No wonder he is the God of Wisdom, our Alpha is getting serious.”

“Humph, it’s not surprising since he is the strongest Star Go player.”

“However, our Alpha will be the final winner! Victory belongs to us!”

One creator of metal after another was launched on one planet after another. They were connected to the ley lines of the planets and started their synchronous computation for Alpha.

At the orbits amongst planets, beautiful rhombic metal satellites reflected cold blue lights, transmitting the results of the computation to the God Crystal.

All the links of the entire process stood for the highest achievement of the Mechanus God’s Domain.

Most engineers were just mortal. However, by using these Planet Quadrant Computers and the God Crystal, they finally created the exclusive god of the Mechanus God’s Domain.

Everyone believed that the era of Alpha was coming. The newborn Cyber God would defeat the old gods in intelligence, becoming the avatar of wisdom in the endless god's domain.

"Tok! Tok! Tok!" After increasing the computing power again, the metal antennas on Alpha's head rang.

In her pupils that were covered by star lights, countless data flashed through like a waterfall.

Input the coordinates and orbits of the stars.

Set ten thousand equations for the next 3 rounds, putting ten trillion computing power into use for each of the equations.

Set thirty thousand equations to calculate the possible locations the God of Wisdom would put down his chess pieces, putting a hundred trillion computing power into use for each of the equations.

Start to overclock the 1st, 2nd, and 3rd Planet Quadrant Computers.

Merge the 14th, 15th and 16th into the Quadrant Computing Network. Increase 15% of the total computing power.

This was Alpha's style of battle. No matter who her opponent was, she could crush them by increasing her computing power infinitely.

Even if it was the legend of Star Go, Norn the God of Wisdom!

Even before the design data of Cyber Elf Alpha was finished, all the information of Norn had been recorded in the Quadrant Computers of the Mechanus God's Domain and was studied countless times.

From thousands of years ago, the Mechanus God's Domain had been prepared for this duel, the game which stood for the highest wisdom in the endless god's domains!

Norn's level was forever the highest amongst all the Star Go players that had been recorded.

Code name: the God of Wisdom.

Real identity: the God of Wisdom of the Western God's Domain, the Sorcerer Supreme of the Sorcerer God's Domain, the Supreme Magister of the Mage God's Domain. In some god's domains, people called him "the God of Medicine" or "the Guardian of Agriculture".

Origin: unknown.

Homeland: unknown.

Appearance: most of the time, his appearance is a one-eyed old man with a Caduceus. Occasionally, he would appear using the face of a young man.

He was the strongest Star Go player and one of the top three mages. He once defeated three Supreme Magisters alone.

Throughout the history of the Starry Sky Chessboard, his winning percentage was the highest.

No matter who his opponent was, his winning percentage was always over 50%. It was really amazing.

Now, Cyber Elf Alpha noticed something incongruous from Norn.

[Chapter 412: The Truth of Norn](#)

Winning probability: 51%.

Draw probability: 28%.

Failure probability: 21%

This was what Alpha calculated from the game with Norn the God of Wisdom.

In the face of Norn the God of Wisdom on the Starry Sky Chessboard, 51% of winning probability was unprecedented, however, it was abnormal to Cyber Elf Alpha.

Her computing power was hundreds of times stronger than Norn's, and she had put every chess piece onto the most suitable place on the chessboard. How can Norn the God of Wisdom have any chance to reverse the situation?

Which part is wrong? Is there a flaw in my equations?

Start self-scan.

Cyber Elf Alpha ordered, then the engineers of the Mechanus God's Domain started to get busy with work again.

One Planet Quadrant Computer after another started to self-scan with loud roars.

Every second Cyber Elf Alpha spent on the Starry Sky Chessboard, the resource she consumed could make a small country go bankrupt.

This was the necessary price to launch Cyber Elf Alpha, it was the feature of this newborn cyber god.

At the same time, in the Caduceus of Loren the God of Wisdom, three small light points were looking at the huge Starry Sky Chessboard gloomily.

This was a secret no one knew, Norn the God of Wisdom wasn't "one person". To be precise, the one-eyed old man and the young man were both the real Norn's disguises.

The real Norn was a trinitarian god, it was the avatar of three goddesses who revived after the Twilight of the Gods.

The first goddess was "Urd", the big sister of the three goddesses. Her name represented "past" and "death", she was the most exalted one of the three.

Urd had short silver hair and brown skin, because her mother was a giant, the queen of the giant kingdom.

The second goddess was "Verthandi", the middle sister of the three goddesses. Her name represented "present" and "fate".

Verthandi had soft black long hair and snow white skin. She was a standard god in the era of the Twilight of the Gods.

The third goddess was "Skuld", the younger sister of the three goddesses. Her name represented "future", and she was the most optimistic one of the Norns.

Skuld had golden braids and a cute face. Her properties were average, because her bloodline was from giant and god both.

They were the descendants of Ymir, the natural goddesses who were bred by Yggdrasil.

Norn wasn't just one person, but Norns, this was the reason why Norn was the strongest mage, because his power was from three goddesses.

Why could Norn stand firmly and fight steadily on the Starry Sky Chessboard? Because Norns could observe their opponent from past, present, and future at the same time, so they could design the most perfect countermeasure.

Even Orfina couldn't defeat Norn, because her strategy was totally undisguised in the eyes of the three goddesses.

However, Norn the God of Wisdom faced their biggest challenge today.

Cyber Elf Alpha's computing power was too strong. Even Norns felt the strain in the face of Alpha.

Even though they could predict what Alpha would do after 5 rounds, they didn't understand the meaning of Alpha's moves.

They could see her chess pieces, but couldn't understand the implication behind them!

It was really a long-lost experience for the Norns, it was an unknown state they tasted before when they faced the existences that were beyond the legend rank!

In the entire Western God's Domain, only one person could let Norns have this feeling.

Ionia, the god above all gods, the master of the entire Western God's Domain!

Of course, Cyber Elf Alpha couldn't have touched the realm of the god above all gods, however, her computing power was also beyond the limit of Norns.

Cyber Elf Alpha's doubt was also the three goddesses' doubt.

Something was incongruous!

At the 100th round, Cyber Elf Alpha finally found the most suitable method by increasing her computing power.

The Sea of Chaos, the unique skill of Black Mage.

The more chaotic the situation on the chessboard, the higher computing power the chess players needed to put into use.

Norn the God of Wisdom didn't make any mistake, however, "he" was still defeated.

Although the three goddesses could predict the following 5 rounds of the game, however, they didn't understand Alpha's line of thought, which caused them to waste too much time.

And this was the turning point to determine the last winner.

Till the 130th round, Norn's chess pieces on the chessboard were just slightly less than Alpha's. The situation was still uncertain.

At this time, the fatal problem appeared.

Norn had almost run out of time.

Star Go actually had a time limit. Because Norn spent much more time in thinking than Cyber Elf Alpha, his time was first to run out.

The 150th round, Norn finally conceded.

Norn had only about 10 seconds. The three goddesses knew that they couldn't win within 10 seconds.

By using her strong computing power, Cyber Elf Alpha finally defeated the strongest chess player, ascending the throne of the Starry Sky Chessboard!

[Chapter 413: The Prediction of the God of Wisdom](#)

In the Caduceus stood for wisdom, the three goddesses touched the marks stood for "concede" at the same time.

Urd, Verdandi, and Skuld all agreed that they had been defeated.

Standing in the balance of victory, the weight of Cyber Elf Alpha was far heavier than their weight.

They could find no way to reverse the situation within 10 seconds!

"We lost." Urd had not reconciled and knocked on the chessboard. She knew they had been defeated.

"It's too bad that we have run out of time." Verdandi sighed. If there was no time limit, she thought that they could strive for a draw.

The computing power of Cyber Elf Alpha was too strong!

“Whoa! It’s really a crushing defeat!” The younger sister, Skuld looked at the chessboard with her eyes opened wide. Although they were defeated before, they didn’t face any crushing defeat like this time.

Even though they could predict the future, they couldn’t find any solution, because Alpha’s style was far beyond their understanding.

The newborn cyber god of the Mechanus God’s Domain finally proved her strength this time!

“Well, according to the routine, let’s predict.”

“She deserves us to predict for her.”

“I want to know what her future is.”

No matter whether it was in the real world or on the Starry Sky Chessboard, once they lost, they would predict for their opponents, observing their fates in the endless god’s domains.

“She was born in an ancient ruin, she is a child that had been abandoned by the era.”

“She will become the king above all kings, defeat all the glories from the old time and put on the crown with a star mark.”

“She is the brightest new star in this era, she will become an immortal legend.”

Undoubtedly, it was their prediction for Cyber Elf Alpha, and their affirmation to her power.

The three goddesses had seen a new star rising in the endless god’s domains.

She stood for a brand new road, a huge revolution.

The Starry Sky Chessboard was the first place she announced her coming!

“Will she become our enemy?” Urd looked at Skuld. In fact, amongst the three sisters, only the younger sister, Skuld could see the future.

No, it wasn’t an accurate prediction like Ouroboros’s Divine, but a vague trend. They could only judge if one was their “enemy” or “friend”, if they were lucky, they could catch a slice of the scene of the future.

“If possible, I don’t want to be her enemy. It’d better if we can be friends.” Verdandi looked at Skuld with a gentle look, waiting for her answer.

“Cyber Elf Alpha, prediction, trend...” Skuld closed her eyes and did her duty.

“She won’t be our enemy.”

Urd let out a sigh of relief. Verdandi smiled.

“She will be our friend.”

Urd shrugged her shoulders, and Verdandi covered her mouth with joy.

“She will be our sister...” Skuld felt strange about the future she just saw. Could Cyber Elf Alpha have any relationship with them?

“Hum?” Urd was surprised. In the entire god’s domains, only a few people knew their true identities. How would she become their new sister?

“Really?” Verdandi was overjoyed. If they could get help from Cyber Elf Alpha, her strong computing power could help them solve a lot of problems.

Even though they were the God of Wisdom, they would also face a lot of troubles sometimes.

“She will sleep on the same bed with us...” Skuld suddenly stopped. She blushed and shook her head.

No, I can’t keep predicting!

The scene I predicted just now is too embarrassing!

“Oh, doesn’t it mean she will become a real sister of us?” Urd imagined the scene that they slept on the same bed with the little Alpha. She was satisfied.

“Oh, it’s really lucky if we can have such a cute new sister!” Verdandi said in a happy tone. They could feel Alpha’s aura as a newborn god, so they had vaguely guessed her true identity.

“Sisters...” Looking at Urd and Verdandi, Skuld wanted to say something, but finally closed her mouth.

In the scene of future she saw, they hugged together and wore nothing!

Sister Urd and Sister Verdandi seemed very happy in the scene.

She and Alpha also looked very joyful in the scene, they hugged each other and their snow-white toes even tangled together.

How can I tell them this future I saw!

When Norn conceded, in the Mechanus God’s Domain.

“We win!”

“It’s Alpha’s victory!”

“We made it!”

No matter whether they were young or old, no matter whether they were goblins, humans or elves, the alchemists and engineers all cheered at this moment.

At this second, they were the happiest people in the world.

In the God Crystal, the newborn Cyber god opened her eyes, looking at the world she just knew with curiosity and happiness.

“Hello, world.”

[Chapter 414: Successive Victories](#)

“Casina!” Orfina’s eyes swam in tears, looking at Yun Xi.

“Casina!” Orfina wagged her tail, looking at Yun Xi.

“Casina!” Orfina gazed at Yun Xi with a look that even the cruelest man wouldn’t turn a cold shoulder to.

Yun Xi sighed and looked at Orfina, who was looking at him like a puppy who just lost her master. He really didn’t know the relationship between the “Ruby Princess” and his teacher Casina!

What should I say now? Should I comfort her?

“Whoa, my Casina can’t be so strong!” Orfina cried and just let the last golden gravel in the hourglass drop to the bottom.

She had even prepared the dialogue of proposing after she won! She was just one step away from victory!

But she lost! She was defeated both on the chessboard and in the world of loving!

Who can explain this whole thing to me?

The golden red mythical bird just waved its wings, the fire demon dragon I summoned was burned to ashes. Where was it from?!

“Well... I’m not Casina...” Yun Xi persisted his claim. After all, he was indeed not Casina.

“No! I know you are Casina!” Orfina ground her teeth. Orfina clenched her fists. Orfina raised her tail!

She wouldn’t mistake her lover’s figure, and smell!

She even firmly remembered the lengths of Casina’s fingers and the widths of Casina’s feet, how could she mistake her identity?!

“...” Yun Xi was speechless while the sweat was pouring down his face.

Fortunately, when Orfina's time ran out, the Starry Sky Chessboard had automatically judged that she had lost.

"Casina!"

"I will defeat you the next time!"

"I will say it after I win!"

Realizing that the game was over, Orfina wiped her tears away and announced.

Yes, this was her stage, her favorite battlefield.

Casina liked the Battle God's Championship Contest, she liked the Starry Sky Chessboard too.

Therefore, she planned to propose to Casina after she defeated Casina in the game.

The entire competition hadn't finished, she still had a chance to meet Casina in this round robin tournament!

She wouldn't be careless at that time. She would get revenge, she would prove herself!

Casina, wait for me. I will come back soon!

After firmly remembering Casina's appearance in her heart, Orfina finally disappeared from the chessboard.

Yun Xi let out a sigh of relief.

"I'm really tired." This was the most tiring game Yun Xi had ever played!

The golden red bird opened its wings on the star map, then turned into countless light points and disappeared.

Before its figure completely disappeared, it also glanced at Yun Xi with a strange look.

However, Yun Xi didn't notice it.

"Something isn't right." Mei'er found the problem behind it.

When the golden mythical bird was summoned, she felt that the stele of the heavens had the sign of being activated.

Something just leaked out from the stele of the heavens.

"I saw nothing! I saw nothing! I saw nothing!" Mei'er sensed a fatal danger.

Compared to her, the thing leaked out from the stele of the heavens was a real “disaster”!

Master, what did you put into the stele of the heavens in your past life?!

When the result of the game between Orfina and Yun Xi was published, a lot of engineers in the Mechanus God’s Domain stopped cheering.

“Orfina was defeated?”

“Who did it?”

“A Cloud in the Sky? Who is this newbie? I didn’t hear anything about this name before.”

“Record of the game... Black Mage, Orfina... this newbie is strong!”

“He won’t be a problem. Our Alpha is invincible. Resistance is futile!”

“Hail to our Alpha!”

In the God Crystal, countless data were flowing through Alpha’s pupils. She was observing the record of “A Cloud in the Sky”.

She wouldn't rest too long. Soon after, she would put herself into another game, proving herself on this battlefield of wisdom!

...

Victory! Victory! Victory! Cyber Elf Alpha kept winning!

42 victories in a row, 43 victories in a row, 44 victories in a row... when most Star Go players had only played 5 turns, she had achieved 60 successive victories, which only Norn the God of Wisdom had achieved before!

After Norn the God of Wisdom, the second 6 star points chess player was just born, and this wasn't the end of her victory!

Compared to her, Yun Xi was leisurely playing with one chess player after another.

"The level of everyone isn't high..." After observing all the chess players he had met, he found a surprising fact that Orfina was already the strongest chess player. After the game with Orfina, he only met several 4 star points chess player, but none of them had 5 star points.

Most chess players had only 3 star points and even only 2 star points. Their Star Go Strengths weren't even stronger than Maha Mystery.

No wonder that Teacher Casina had confidence in me! They are just a group of rookies!

When Cyber Elf Alpha achieved 60 successive victories, Yun Xi just obtained 2 star points. His rank also ascended into the list of top 100.

When Yun Xi thought that he could achieve his goal easily, the strongest opponent finally appeared.

“The God of Wisdom?” Yun Xi looked at the code name of his opponent and the 6 star points above the opponent’s head in surprise.

It’s an elite... no, the strongest Star Go player I have ever met!

[Chapter 415: Tengen Again!](#)

The true identities of Norn the God of Wisdom were the three goddesses and they were observing Yun Xi in the Caduceus.

After being defeated by Cyber Elf Alpha, they achieved successive victories easily as usual. Till now, their record was 37 victories and 1 failure. Norn was still one of the overlords on the Starry Sky Chessboard.

“27 victories in a row?” Urd surprisingly looked at this newbie’s code name, “A Cloud in the Sky”.

“It’s tough, are the newbies this time all very strong?” Verdandi frowned, remembering the two newbies they met before.

Cyber Elf Alpha’s computing power was incredibly strong, and the game with the sacred monk, Maha Mystery also consumed a lot of their energies.

If only considering computing power, Maha Mystery wasn't inferior to the three goddesses.

The newbies this time are all monsters!

"I don't want to be a crow mouth, but sisters, I have a bad feeling this time," Skuld said after she observed the future, which greatly increased Yun Xi's level of danger again.

After being defeated by Cyber Elf Alpha and having an arduous game with Maha Mystery, the three goddesses stepped up their vigilance toward all the newbies.

Moreover, this newbie had achieved 27 victories in a row!

Before the game started, the three goddesses had launched their abilities, observing "A Cloud in the Sky" from past, present and future together.

"He has defeated Maha Mystery, Black Mage, and Orfina." Urd the Goddess of Past said.

"His journey is still ongoing. He will dance like an invincible battle god." Verdandi the Goddess of Present said.

"His heart is as wide as the world. No matter how many ships he has stepped foot on, he will keep going." Skuld the Goddess of Future said.

The three goddesses looked surprised at the same time.

“He defeated Orfina?”

Orfina the Ruby Dragon’s computing power and understanding about Star Go was far stronger than their avatar, Norn the God of Wisdom. If she could be more careful when playing, even though the three goddesses could predict the future, they wouldn’t be able to defeat Orfina easily.

Orfina was actually the strongest Star Go player, the three goddesses could defeat her simply because they had the cheat-like predictive power.

Apart from Norn the God of Wisdom and Black Mage, no one was sure that they could withstand Orfina’s fierce attack.

“Was she tricked?” Most of the time, Orfina didn’t pay too much attention to her opponent’s tricks and was tricked easily. If she would be more careful, she wouldn’t have only have obtained 5 star points.

In the minds of the three goddesses, Orfina was the only one who had the chance to obtain 6 star points or higher achievement.

If she optimized her attack and defence on the chessboard to her best, it was even possible for her to obtain 8 star points!

“Oh, Orfina’s character is still imprudent. If she stopped being so reckless, she would’ve achieved 6 star points a thousand years ago.” Verdandi had imagined the game happened between “A Cloud in the Sky” and the “Ruby Princess” just now. She must’ve fallen into his traps easily before!

“We won’t lose this time.” Skuld waved her fists and looked at their opponent with a fierce look on her face.

“Skuld is right. We won’t make the same mistake again.” Urd touched her silver hair and said in an excited tone.

“For the sake of Skuld, we will win!” Verdandi also stretched out her hand to her younger sister.

“Yes, we will crush him in this game! I can’t wait for it to happen!” Skuld said.

The three sisters held each other’s hands together tightly.

...

At the same time, Yun Xi said to Mei’er.

“Mei’er, we need to get serious!” Looking at the 6 star points above his opponent’s head, Yun Xi also got excited.

It’s a 6 star point chess player! 6 star points! The strongest opponent before I can face the more terrible 7 star points, 8 star points and even 9 star points opponents!

I must be careful and shake myself up this time.

“Oh!” Mei’er answered casually, kicking the air with her small feet.

What was that just now? What was it?

The stele of the heavens had been closed after master chose me. What was leaked from it just now?

She just took a glance at it, and instantly shook in fear.

Master, what did you seal in that road in your past life?

In the routine to decide who goes first, Yun Xi won, he was on the offensive.

He immediately put his first chess piece at the familiar place, tengen.

When he put down his chess piece, the three goddesses froze.

“Tengen?” Urd exclaimed in surprise.

“Tengen!” Verdandi looked at the chess piece and suddenly felt nervous.

“Why is it tengen again?” Skuld cried out in alarm.

The style of this person... is the same as that “Cyber Elf Alpha”!

Is it a new trend to put the first chess piece onto tengen? Why don't we know?

Did we stay in the mystery place to research the legacy of twilight too long?

[Chapter 416: Mimic Go](#)

Tengen was the center of the Starry Sky Chessboard and the only immovable point on the entire star map.

At the same time, it was also the place that could cause the biggest change.

Why didn't everyone choose to put their first chess pieces onto tengen? Because it required a huge amount of computation to calculate the changes it could bring.

Just like the center of the universe, tengen was the start point and the catch point of all changes.

Theoretically, tengen should be a place contested by all strategies, but no one could withstand the computational cost to launch a war around tengen. Therefore, people subconsciously avoided putting their chess pieces around tengen to avoid wasting too much effort at the beginning of the game.

Even high star points chess players wouldn't be sure that they wouldn't make any mistakes if they launched a battle around tengen on the chessboard. If they made any mistakes in their calculations, it would be possible for them to be defeated by low star points chess players.

If they put their chess pieces on the corners, the computational cost would be greatly reduced. Both of the chess players could show their true Star Go strength easily around the corners.

Golden corner, silver edge, and straw center were the terms of Star Go that even newbies knew. They were considered the invaluable advice of Star Go.

The battle around the corners was called a “formalized series of moves”, it was the crystallization of wisdom of countless Star Go players.

The stronger a chess player was, the more careful he would use his computing power. “Formalized series of moves” was the best method to save the player’s computing power.

Including Norn the God of Wisdom and Orfina the Ruby Dragon who were also used to starting from the corners. Even Black Mage didn’t dare put his first chess piece onto tengen but set his traps around the corners.

Unless a player’s computing power was overwhelming, or the player was teaching the other side how to play, no one would do this.

“Did he put his chess piece onto the wrong place?” Urd looked at the chess piece. Black lights rose from her silver hair.

“No. Cyber Elf Alpha also did the same thing. There must be a reason.” Verdandi shook her head with a serious look.

“I’d hate to put the first chess piece onto tengen.” Skuld pouted.

Black Mage's "Sea of Chaos" and Orfina's fierce attack were strong, but they were still in the territory the three goddesses were familiar with.

The real terror was forever "unknown", just like Cyber Elf Alpha's incredible computing power, and the inexplicable "tengen".

Cyber Elf Alpha's computing power was hundreds of times stronger than any common legend ranked being, however, what was the dependence of "A Cloud in the Sky"? He put his first chess pieces onto tengen without hesitation, as if he had repeated this move countless times.

This was also where all the doubt came from for all the Star Go players who met Alpha and Yun Xi before.

The meaning of "putting the first chess piece onto tengen" would undoubtedly become a heated debate amongst all Star Go players.

"Tengen is wrong." Urd chose to trust the rule summarized by the public.

"It's not a wise option." Verdandi was also sure to everyone, that it was inadvisable to put the first chess piece onto tengen, apart from Cyber Elf Alpha.

"How dare he do this? Let's occupy the corners as soon as we can!" Skuld was unhappy.

Maybe Cyber Elf Alpha did gain some unknown advantage because she put her first chess piece onto tengen. However, she didn't defeat Norn the God of Wisdom within 130 rounds. The three goddesses confirmed that "putting the first chess piece onto tengen" wasn't the main reason they were defeated. They just ran out of time!

Since “A Cloud in the Sky” defeated Orfina, he must be good at playing tricks on the chessboard. This may be one of his tricks. So, we will defeat him using the most straightforward strategy!

We will let him realize, if his computing power isn't as strong as Cyber Elf Alpha, he was doing a stupid option!

“Hum?” Looking at the move of the God of Wisdom, Yun Xi was slightly surprised, because Norn the God of Wisdom just put his chess piece onto the second most stable point on the star map!

In Yun Xi's eyes, it was the second best choice on the chessboard. The God of Wisdom just did the most suitable option!

Undoubtedly, Norn the God of Wisdom was the most excellent opponent Yun Xi had ever faced.

After 10 rounds, there were a lot of chess pieces on the chessboard. The three goddesses kept choosing the most stable points and didn't leave any loophole for Yun Xi.

On the other side, Yun Xi also put down his chess pieces with pleasure.

No wonder that Norn the God of Wisdom

is a 6 star points chess player! Only the “Ruby Princess” is not inferior to him.

Moreover, compared to the Ruby Princess, the God of Wisdom was more cautious. Every move of his chess pieces was nearly perfect in Yun Xi's eyes.

However, Yun Xi felt strange as he kept playing.

Is Norn the God of Wisdom imitating my style?

Is it a Mimic Go?

[Chapter 417: The Fate that was Captured](#)

Mimic Go was a special style of Star Go.

In general, it was totally imitating the other side's style, putting one's chess piece on the corresponding reverse place on the chessboard. In this case, no matter how strong one's opponent was, the chess player could always draw with his opponent.

Of course, it wasn't perfect. Its fatal flaw was "tengen".

Tengen was unique, there was no reverse place for tengen on the chessboard, therefore, once one side put his chess piece onto tengen, the other side couldn't imitate his moves any more.

Unlike the game of Go, Star Go's map was a changing star map, each star map was different. The possibility of the appearance of the Mimic Go was nearly zero, unless both sides of the game had the same understanding about the star map and the orbits of stars. The two Star Go players must be familiar with each other.

"Something is wrong. What is happening?" Urd looked at the chessboard with vigilance.

“I don’t know. Just now, we lost control of our rhythm.” Verdandi’s fingers trembled and almost put the chess piece onto the wrong place.

“It’s strange. Why can’t we control our hands?” Skuld almost become frantic.

For awhile now, no, from the beginning, their moves became strange.

Isn’t it a matter of nature to put the first chess piece onto one of the corners?

The second and third chess pieces also needed to occupy the advantage ground. This was the rule recognized by countless Star Go players.

They wouldn’t be deceived by any tricks, they wouldn’t be affected by any opponent’s style. They would always put their chess pieces onto the most stable and safest places, because it was the best option.

Just like the web weaved by fate, they gained advantages and defeated their opponents step by step. This strategy never failed.

Apart from the game with Alpha, they lost because they ran out of time, they’ve never lost to anyone from the beginning of the game!

Even Orfina couldn’t break their shield using her most fierce attack.

However, it suddenly lost efficacy now.

The style of "A Cloud in the Sky" was as simple as any newbie, he didn't even know how to set any traps in his chess pieces. However, his moves brought the three goddesses into a mysterious world.

They could observe him from past, present, and future. This ability had helped them achieved countless victories and became the only 6 star points chess player, but now, it suddenly became their weakness in front of Yun Xi.

In the face of Yun Xi's style, their resistance was weaker than anyone because of their cheat-like ability!

Looking at Yun Xi's chess pieces, they felt as if they were looking at the most gorgeous, most shocking web of fate that was being weaved in front of their eyes.

They couldn't resist or change the web of fate, because every step of Yun Xi's chess pieces stood for the most perfect, most fantastic mystery in the star map.

It had nothing to do with computing power. It was a power that was beyond description.

Yun Xi's chess pieces weaved a web called fate, which was so tempting to the three goddesses that they had no chance to escape.

They were not imitating Yun Xi's style, but were attracted by Yun Xi's chess pieces. They couldn't help but involuntarily respond to the call of fate.

The three goddesses of Fate could see past, present, and future at the same time, because they were using the power of fate. In the face of this stronger fate, they were as feeble as newborn infants.

It wasn't a Handicap Game neither a Teaching Game, they were connecting with each other from a realm in their souls.

"He is strong... who is he?" Urd was the first who couldn't withstand the strong pleasant sensation from her soul. She put her hands on her shoulders and shivered with joy.

"We are... being attracted... what's this feeling?" Verdandi blushed. Her neck was upturned and her breathing was becoming heavy and hot.

"Whoa! Skuld is becoming a bad child." Even Skuld couldn't escape the shudder of the pleasant sensation. Her face turned red and her eyes became watery, her legs put together tightly.

Above the head of their avatar, the one-eyed old man, a pink heart almost popped out.

"Pa!" Yun Xi put down another chess piece. It was the first time he felt so joyful when playing.

He could feel distinct auras from Norn the God of Wisdom every time he put down a chess piece.

Sometimes, the aura was as hot as fire, dangerous and alluring.

Sometimes, the aura was as soft as water and as fresh as a hanging garden.

Sometimes, the aura was as vibrant as a rabbit in the wild in the spring.

Oh, this 6 star points chess player is really special. Norn the God of Wisdom is just one person, but he showed three different styles when playing! In every sense, it was a unique experience to Yun Xi.

[Chapter 418: The Fateful Three Chess Pieces](#)

“Pa!” Yun Xi put down his 57th chess piece.

“Ah!” Urd emitted a sound that contained both pain and pleasure. Her body shivered, controlling the avatar of the one-eyed old man to respond to Yun Xi’s move.

“Pa!” Yun Xi put down his 58th chess piece.

“Ooo!” Verdandi ground her teeth, trying her best to keep elegant when putting down her chess piece.

“Pa!” Yun Xi put down his 59th chess piece.

“No! No! Don’t come over to me!” Skuld really cried. Her hands couldn’t help but, uncontrollably they followed the route of Yun Xi’s chess pieces.

It was not a game, they were just the dolls dancing as they followed Yun Xi’s moves.

As for Yun Xi, he still knew nothing about this.

In his eyes, he only saw the God of Wisdom striking back at his chess pieces using the most suitable copying style.

Finally, he found a chess player whose understanding of Star Go was at the same level as him.

“Awesome... he is strong... Mei'er, do you see it? This is the 6 star points!” Yun Xi praised.

He felt that they were connected on the chessboard.

He didn't need to say anything, as long as he put down his chess piece, the God of Wisdom would respond to him following the orbits of stars.

For the first time, he realized that Star Go could be played in this manner.

“No... stop!” Looking at the chessboard, Urd felt as if it was swallowing her intellect, making her indulge in the pleasant sensation.

Sweat broke out all over her body, spreading an alluring smell into the air.

Slowly, her breathing became heavy. As her chest rose and fell, her mind became blank. She couldn't think or remember anything, an instinctive impulse was urging her to do something.

As for what the thing was... it was too embarrassing to say!

For the first time, she saw such a terrible attack method on the chessboard. She had no strength to resist it.

What was it? The game on the chessboard could even affect their true bodies?!

No, stop, stop!

“No... I can’t stop. It’s bad. Sisters, Urd, Skuld! Wake up!” Verdandi tried hard to ignore the strong pleasant sensation in her body, trying to awaken Urd and Skuld.

Unfortunately, she was hardly able to save herself.

“Skuld isn’t innocent anymore, I will become a bad child!” Theoretically, Skuld had the strongest resistance to this allure, but she could also barely withstand it. Her watery eyes looked around blankly, and her toes trembled, curled and loosened from time to time.

“Pa!”

“Pa!”

“Pa!”

Yun Xi continuously put down three chess pieces. He felt they were the most smooth three steps he had ever played.

To the three goddesses, these three chess pieces became the final blow to their bodies.

“Pa!”

The first chess piece broke Urd’s fragile mental defense.

“Whoa!” Her body bent down, almost slumping on the chessboard.

“Pa!” The second chess piece broke Verdandi’s last defense.

Her smooth long hair flopped over her shoulders, and in her clenched fist, the nails almost broke the skin in her palms. Her body shivered and announced her failure.

Silence was the last resistance she could make.

“Pa!”

The third chess piece announced the degeneration of the last line of defense, Skuld.

“Whoaa! I’m broken! I’m broken!” Skuld didn’t know how to hide her true emotion. She felt confused about the strange reaction of her body.

Her teeth tightly bit her braid, and her pupils became lost in the shudder of her body.

As the only goddess who could observe the future, her soul was far more sensitive than her sisters, which meant that she felt the strongest stimulation from the soul.

Her heart was still too innocent, so she couldn’t indulge herself in it like Urd, and didn’t know how to hide her true feelings in silence like Verdandi. She had no resistance to the pleasant sensations from the deepest side of her soul.

After putting down the three chess pieces, Yun Xi was surprised for a moment, because he felt three distinct auras from the God of Wisdom.

This was the first time he felt three auras from one person at the same time.

[Chapter 419: The Inevitable Conclusion](#)

The first aura was passionate and bold, just like scorching lava. It contained the feeling of tyranny and a trace of dark sense.

The second aura was warm and soft, as intoxicating as the fragrance from the new flowers under the sun.

The third aura was vibrant and curious, it was afraid, but also wanted to get close.

No, they were not just three distinct auras, they were approaching him!

The phenomena reflected onto the chessboard, making the situation on the star map became more chaotic. Yun Xi felt as if Norn's chess pieces had vanished. They all became a part of his chess pieces!

He is strong! No wonder that Norn the God of Wisdom had 6 star points!

Yun Xi was lost in wonder. He started to imagine how strong the 7 star points, 8 star points, and 9 star points chess players were.

However, the Starry Sky Chessboard seemed to have a newbie protection mechanism, otherwise, he wouldn't meet so many 1 star point, 2 star points and 3 star points chess players. If this mechanism still worked, he still stood a chance to obtain 100 victories in a row.

Even if I can't achieve it this time, I will figure it out the next time. Maybe this is what Teacher Casina wanted to teach me. Don't be complacent after winning, don't be discouraged after being defeated. Even though Star Go is just a simple game, I must be serious.

Well, from the situation on the chessboard, I have the upper hand. Tengen is the key. If I didn't put my first chess piece onto tengen, the Mimic Go would be really difficult to deal with.

If I didn't win the game of guessing odd and even, maybe I would've lost this time.

"Pa!" Yun Xi thought and put down another chess piece.

"Ah!" Urd shook with an incredible look on her face. Only she herself knew if it was shyness or relief.

“...” Verdandi ground her teeth and lowered her head. She didn’t want to let anyone see her emotions this moment.

“Whoa! Evildoer! Villain!” Only Skuld hadn’t conceded. She was still trying to resist.

Amongst the three goddesses, she was the most aggressive one with a winning mentality.

Just like newborn calves are not afraid of tigers, she was also afraid of nothing.

Urd gave up resistance. Her eyes blankly stared into the air, letting the wave of pain and joy sweep across her soul.

Verdandi couldn’t speak anything, although she still tried to support Skuld, she had no strength to move.

In fact, the truth that she still maintained silence facing the shock in her soul had proved that she had a kind, upright and pure heart.

Silence itself was the last support she could offer her younger sister, Skuld.

“I do not concede! I do not concede! I do not concede!” Although she was crying and her hands uncontrollably put the chess pieces onto the chessboard, she still didn’t give up.

Even if the world had been covered by darkness, she still tried to be the last light to protect her sisters.

“Pa!” Yun Xi’s 60th chess piece pushed into the souls of the three goddesses, although he himself didn’t know it.

“Whoa! Scoundrel! Don’t bully my sisters!” Skuld stretched out her hands, trying to stop the evil soul shock.

Unfortunately, in the face of the “ko” of the entire star map, her resistance was negligible.

The result of the war had been doomed from the moment the three goddesses cheated on the chessboard using their abilities.

They could see the threads of fate, they would be tangled by the web made of the threads of fate. It was the rule of the balance of all things.

Skuld’s resistance finally failed at the 64th round. The stronger she resisted, the heavier the punishment would become.

On the chessboard, her last move became the last straw that broke the camel’s back.

“Hum?” Yun Xi suddenly realized that he had won.

The chess pieces of Norn the God of Wisdom suddenly collapsed into itself as if an invisible hand just wiped them off from the chessboard.

Yun Xi didn't even form any "ko" such as the Sanctuary of Wind or the Sanctuary of Fire, he had won.

Originally, the God of Wisdom was the strongest opponent he had seen, but he was defeated so quickly and inexplicably.

"I will never play Star Go with this person!" Finally, Urd woke up from the shock in her soul. She pressed the button that stood for conceding.

"..." Verdandi still kept silent, because she was afraid that once she opened her mouth, she would groan uncontrollably.

"We lose! Bad person! He is bullying my sisters! He is our enemy!" Skuld cried.

It was a crushing defeat that was even worse than the game with Cyber Elf Alpha. At the least, Alpha didn't really defeat them. They just ran out of time.

Maybe they didn't just lose the game, but lost more things than could be described by words.

Chapter 420

"Did I win?"

Yun Xi looked at the chessboard in surprise.

Suddenly, the God of Wisdom made a fatal mistake on the chessboard. The game was suddenly ended even before he realized it.

I'm lucky. Was it really a mistake? Yun Xi looked up at the God of Wisdom, the only 6 star points chess player he had ever met.

"Let's prophesy for him. I have a bad feeling." Urd struggled. She had to admit that this opponent wasn't inferior to Cyber Elf Alpha.

They lost to Alpha because of her strong, incredible computing power.

However, they didn't know the reason why they were defeated by this person at all. The style of his chess pieces was uncanny!

His chess pieces were like the instantiation of fate itself. As Norns, the Sisters of Fate, they had no resistance to it.

"I agree..." Verdandi whispered. The entire game just now was too weird.

She sensed the smell of fate too.

"I don't want to prophesy for him. It must show the worst result." As the one goddess who could see the future, Skuld vented her spleen.

"Skuld, we can't resist the future, no matter how ridiculous it is."

“Let’s begin to prophesy. At least, we can see the probability of the future from it.”

“Let’s do it.”

As their big sister, Urd represented “past”, she understood the meaning of future deeper than anyone.

Countless heroes and geniuses failed because of a negligible thing in their lives.

They thought that they were the masters of their fate, but all of them fell in the pool of blood named “fate”, only very few people could rein in on the brink of the precipice and avoid the imminent disasters.

If a man wanted to change his fate, he must know what fate was first. The madcap who thought that they were strong enough could never really get rid of their fates. Disappearing in the river of time grudgingly was their doomed fates.

“Skuld...” Verdandi finally recovered. She looked at her younger sister with a gentle look.

“I know! I know! Hum, I can not be reconciled!” Skuld pouted, but she had to admit that her sisters were right.

However, she really had a presentiment about the result of the prophecy.

“She walked in the old desert, coming from the end of the horizon,” Urd said.

“Her light will shine on the star river, because she is the invincible god of battle,” Verdandi said.

“She will become a god in the future, the seat is waiting for her coming.” Skuld said.

This prophecy was different with the prophecy before. It sounded as if it wasn't saying the same person.

“Skuld, say it.” Urd and Verdandi realized the problem, and they waited for Skuld's answer after she saw the future.

It was the thread of fate, made by combining all the probabilities from past, present, and future. It was the exclusive prophecy of the Sisters of Fate.

“A Cloud in the Sky... start the prophecy...” Skuld said unwillingly.

“She won't be our enemy.”

Listening to this, Urd let out a sigh of relief and Verdandi smiled. At the least, the worst situation wouldn't happen.

“She will be our friend.”

Urd and Verdandi were happy about this prophecy, then they froze at the same time.

Why did it sound familiar?

“She will be our sister...” Speaking of this, Skuld was also alarmed and panicky. The entire process sounded similar to the prophecy before.

As it was already their doomed fate.

“Sister?” Urd repeated it incredulously. How could it be?

What is the real identity of “A Cloud in the Sky”? She couldn’t be a god!

“Sister?” Verdandi also thought in confusion. She didn’t understand it at all.

“She will sleep on the same bed with us, we will...” Skuld paused again.

She froze with a blank, dull countenance.

Why did I see that scene again?

What is that bed? It looks like a gorgeous bed made of golden sands, which is so big that it can let ten people lie on it.

Urd, Verdandi, she, and Cyber Elf Alpha are all on the bed.

Compared to the prophecy before, this time, this scene was clearer. Apart from them, she saw another person, who should be "A Cloud in the Sky". Her brown skin looked similar to Sister Urd's skin, and she had a pair of slender legs.

One, two, three, four, five, six.

Wait, where did the sixth person come from?

Can it be...

No! I don't want this hell like future! Why did sisters and I look as if we have already been accustomed to it?

No! It's fake! The prophecy failed! It must point to the wrong future!

I don't want it! I don't want it!

How can I tell sisters it?!
