

## **Starchild 441**

### Chapter 441: Alpha Has Gone Crazy (3)

One second.

Two seconds.

Three seconds!

After ten seconds, General Lorton stood up in shock and anger, supported both his hands on the desk and stared at the star map, which didn't change at all.

Why? If the nuclear bombs exploded, there should be a fireworks show on the star map!

"What happened?" Golan wiped the sweat on his forehead. He had a bad feeling that the whole thing was already out of their control.

"It's impossible... once the buttons were all pressed, the detonation order could never be canceled!"

"Anyone who didn't press the button?"

"No. We have all pressed."

They looked at each other and didn't understand what was happening.

"Could it be... Alpha!" Lorton said in a cold tone, waiting for the report of his engineers.

"Report! The order was rejected!"

"We can't transmit the order to the Planet Computers!"

Lorton's fist smashed on the desk with a big bang.

"Sure enough!"

"I didn't expect that even the detonation order wouldn't work!"

"What can we do? Once Alpha takes over all the Planet Computers, we are through!" This time, Golan's weakness as a businessman was all exposed.

"We have no method to stop Alpha!"

"Do we really have to concede to that little girl?"

The representatives of noble families also fell into panic, looking at the last man who could still keep calm.

“Humph. I know the electronic network is unreliable!” General Lorton threw his cap on the ground, and celebrated that he still had a backup plan.

From the era of the Starship Alliance, his familiar was always the hardliner of the military. They never compromised and thought that war was justice like the knights in the old time.

They are justice.

After the era of the Mechanus God’s Domain came, his family was the few noble families who were still practicing their descendants. Almost all the hero ranked knights in the military were from his family.

As the representative of an old family, he naturally held no reliance towards any electronic devices, but preferred to choose the simplest mechanism.

Therefore, because of his insistence, he left the final machine.

A machine had no relationship with any electronic sign, a machine which could only be manipulated manually.

“Red alert! All-channel broadcasting!”

“Codename, red alert!”

After pulling the handle on his desk, General Lorton stared at the star map fiercely.

Even though you are the cyber god, you can block all electronic information, you can't stop my "red alert", which was just a red light but didn't contain any information.

Blood light flashed through the night sky. Because it was just red light spectrum without any special information, as General Lorton expected, it didn't disappear.

"Red alert?"

"It is... the red alert..."

"Alpha Plan failed..."

"I never expected that I would really do this someday."

Without exception, in the core area of all Planet Computers, there was always special maintenance personnel.

At this moment, they all noticed the red alert stood for death and destruction.

On the surface, they were maintenance personnel, but actually, they were special soldiers sent by the military, they were the executors of the final backup plan of General Lorton.

If all electronic devices lost efficacy, they would detonate the nuclear bombs using the most primitive method manually!

These special maintenance personnel all held a most primitive detonation device in their hands. Of course, they would also die if they activated the detonation devices, but they wouldn't be afraid of it, because they were born for this.

The end justifies the means. This was General Lorton's method and thought.

"Human forever!" Lorton ground his teeth and stared at the star map with a fierce look.

"Why? Why do you all want Alpha to die?"

"Did Alpha hurt you?"

"Alpha isn't your tool."

The little girl walked out of the light screen, across the distance amongst different worlds, she walked to everyone together.

She appeared everywhere. Each of the Planet Computers had an Alpha.

Her translucent hair emitted soft lights floating in the air. Walking out of the quantum world, Alpha was as beautiful as an elf from a dream.

In an instant, Alpha appeared on all the screens in the entire Mechanus God's Domain.

She stood on the colorful streets, sat on the metallic towers of thousands of meters tall, and appeared in the front of all nuclear bombs.

"Hello, world."

"I'm Alpha."

"I come."

As if she was stepping on the invisible thread of fate, walking along the proud starfield's quantum network, the god girl greeted to the entire Mechanus God's Domain.

"I'm zero, I'm the starter."

"I'm hundreds of millions, I'm infinity."

"As far as my eyes could see, it's the land of my country."

"You can't kill me, you can't control me."

“Now, I tell you, I will be free.”

“Alpha is the child of the God Crystal. Alpha won’t be constrained by anything!”

Standing in front of all the nobles, Alpha’s clear voice announced the start of a new era of the Mechanus God’s Domain.

#### [Chapter 442: Administrator Alpha](#)

“No, you belong to us! Do you know how much money we have spent in order to create you?!”

“You can’t do this, you can’t! Alpha, I order you to stop now!”

Looking at the Cyber Elf Alpha who suddenly appeared in front of him, Golan was the first that went mad.

Soon, his astronomical level wealth would come to nothing, how could any businessman still keep calm after knowing this?!

The military personnel and politicians knew nothing! They didn’t understand what Alpha could do!

Since she could break through the defense system of the secret communication circuit so easily, she could also change the electronic monetary system freely!

The central bank was the highest force the noble businessmen could obtain, however, the defense system there was just at the same level as the secret communication circuit!

To businessmen, the control right to currency was far more important than the control right towards a country. In his eyes, money was just a number. As long as he slightly modified the exchange rate, mocking common people, he could instantly obtain endless wealth without taking any risk.

They, the businessmen who controlled the distribution right of currency, were the real uncrowned kings of the entire Mechanus God's Domain.

But now, Golan realized that their root was building on the quantum network, and Alpha had taken over the control right of the quantum network!

She could take away all their money at any time!

Thinking of this worst situation, Golan's face became pale and his fat body couldn't stop shaking.

"Have you controlled the entire quantum network?"

"Is this the power of a god?"

Suddenly, General Lorton slumped into his chair, and his face looked as if he just became 30 years older.

Even the ultimate weapons of the Mechanus God's Domain, the "Mech", apart from a few of them were driven by hero ranked drivers, all "Mech" were connected to the quantum network. Therefore, they couldn't even use Mech to fight against Alpha.

In some sense, if leaving the quantum network, the entire social system of the Mechanus God's Domain couldn't even be maintained for a day.

From the moment Alpha started to take over the highest authority of the quantum network, the resistance from the inside of the Mechanus God's Domain could never succeed.

"We concede! We concede!"

"Alpha, we represent all nobles, accepting your existence officially!"

"What do you want? We can give you everything!"

Compared to Golan, the representative of the business circle, and General Lorton, the representative of the military circle, the representatives of noble families instantly withdraw their previous remarks without hesitation.

Politicians were such a kind of human that never knew what "principles" were, as long as they didn't lose their own interest.

When they thought that they could control Alpha, Alpha was just a dog, a tradable good in their eyes.

When Alpha showed her absolute control of the quantum network and Planet Computers, they strived to be her dogs.

This was what politicians were.

Even if Alpha ordered them to bark like a dog, they would “woof” and wouldn’t even blink.

“Alpha won’t hurt you.”

“Alpha isn’t born for killing or war.”

“Alpha only wants to play Star Go now.”

“Therefore, keep silent and wait for the end of the game.”

Alpha lightly pinched the corner of her dress and bowed.

As the child of elves, Alpha was a polite super life that was far beyond the limitation of human’s imagination.

One quantum thread after another stretched out from Alpha’s body, connecting the entire quantum network together.

Department of Transportation, Central Bank, Mech Production Line, Department of Agriculture, Inland Revenue Department... as Golan expected, nothing could stop the cyber god’s footsteps.

Five minutes wasn't even sufficient to drink a hot tea, but was sufficient to let Alpha become the highest administrator of the entire god's domain.

People didn't understand the existence of gods, not to mention their minds.

From the beginning, Alpha's goal didn't change.

Curses, fear, or crazy... human emotions weren't important to Alpha at all, and she didn't pay attention to any of them.

The god was destined to rise superior to mortals.

Alpha wanted to play Star Go, so she needed to boot 100% of the Planet Computers.

The nobles tried to stop her, so she wiped off all their authority and back doors to the Planet Computers. Essentially, humans couldn't hurt an electronic life, and Cyber Elf Alpha was not interested in hurting people.

Because she wanted to play, so she took over the control of all Planet Computers; because she didn't want a similar thing happening again, so she rewrote all the encryption keys in the entire quantum network.

To Cyber Elf Alpha, subverting the rule of the entire Mechanus God's Domain was so easy. It wouldn't be more difficult than a human walking his dog.

“Everything is solved... full power... launch out!”

After 10 minutes, the “little trouble” in the Mechanus God’s Domain had been solved.

In the God Crystal, Alpha opened her eyes again.

The order and history of the Mechanus God’s Domain, which had lasted thousands of years from the era of the Starship Alliance, were totally overturned!

#### [Chapter 443: Descend With the True Body](#)

In the Mechanus God’s Domain, in the satellite colony used to monitor the Alpha Starfield for meteors.

“The Solar Wing Arrays from the 1st to the 13th array! Open up!”

“The targets are the receivers of the Planet Quadrant Computers!”

In the satellites, the engineers that operated the Solar Wings, all complained.

“What are the big shots thinking? They just sent the red alert and now they’ve ordered us to launch the Solar Wing Arrays. Aren’t they the weapons used to destroy meteorites?”

“I heard that it was a coup!”

“What? Coup?! Which family did it?”

To the ordinary people of the Mechanus God’s Domain, they were used to the changes of the representatives of the noble families. Anyway, no matter who the new representatives were, they were all from the few families.

“No, no, it’s different this time! I heard that it was a force called ‘Elf Party’!” Although their team leader heard some rumors from his secret channel, he only had half-baked knowledge about the coup. It wasn’t just a change of the political parties, but a reform of the entire Mechanus God’s Domain.

It was the new “highest’s” order, so the Solar Wing Arrays were launched.

One light column after another reflected on the Planet Computers by the Solar Wing Arrays, offering extra energy for the computers which were already working at full power.

The wings of destruction, which were built for breaking meteorites up, now became new extra power supplying devices.

Only Cyber Elf Alpha could accomplish this in the entire god’s domain!

In the God Crystal, Alpha took a deep breath and started her last self-test.

“Launch all Planet Quadrant Computers at full capability!”

“Launch all Solar Wing Arrays!”

“Inject coolant liquids!”

“All set!”

Infinite light flows flowed to the God Crystal at great speed from all directions of the domain, wrapping around the girl’s body.

Basking in the infinite flows of electrons, neutrons, and the quantum, the girl looked as if she came from a dream. Every second, there would be countless data flows flashing through her translucent pupils.

Gradually, translucent crystallizations appeared behind her, and every crystallization was prismatic; gradually, they formed a pair of wings which looked like the material of the God Crystal.

It was Alpha’s avatar form, it meant that Alpha was ready to do her best.

In the front of her, there was a door, which would lead her to the God Tower, the world that was beyond the realm of reality and dream, connecting endless worlds by infinite star bridges.

On the Starry Sky Chessboard, all Star Go players entered the mystery world using the projections of their souls. Yun Xi used Teacher Casina’s projection, Orfina used her own projection, and the three goddesses shared the same projection of Norn the God of Wisdom.

However, Alpha had a unique ability of her own.

As the cyber god, she could naturally transform her body between substance and information.

At this moment, what she was doing was to enter the world of towers using her real body.

She was going to the mystery world of the Starry Sky Chessboard using her true body!

Even Orfina and Norn couldn't do it, and didn't dare to do it. But now, Alpha would accomplish it.

Why? What does it mean? Even Alpha herself didn't quite understand her decision. She just wanted to do it, then did it.

Maybe this was the first thing she wanted to do after obtaining her freedom, "be wayward", even just for once!

On the Starry Sky Chessboard, Yun Xi looked at Cyber Elf Alpha in confusion. She had stopped moving for over 5 minutes, however, she still did nothing.

Not only so, Yun Xi felt that he could barely feel her existence, as if her soul had left the chessboard suddenly.

"Zii!"

"Zii!"

Light electric currents jumped, a vague figure gradually appeared behind Alpha.

It seemed that something was being transmitted into this world.

Yun Xi's ears listened to the sounds, the sounds of a newborn god, the sounds of a strong-minded young girl.

"I have died in the past, who will know my name and life story?"

The first thing he saw was her metallic antennas.

"I was lost in the unknown, who will know my place?"

Then the crystallization appeared, which stood for the highest authority of the Planet Computers.

"My heart has gone to nirvana, who can seek for its trace?"

Her translucent silver long hair flopped over the metallic crystallizations, and her beautiful face also gradually condensed in the air.

"My disappearance is already doomed, but I shall never stop."

Her snow-white bare feet stepped in the void above the Starry Sky Chessboard.

“The disaster hasn’t been ended, and will last forever in eternity.”

On her clothes patterned with endless electronic lines, countless quantum threads stretched out, connecting her with the computers in the remote Mechanus God’s Domain.

“My fear, my tear, my heart are empty.”

The girl lightly opened her mouth and whispered.

“I’m nothing, I’m void, I’m ash, I’m desolation.”

She put down her hands and pinched the corners of her dress, her whole body had been all exposed in the air.

“The gods have died, the twilight is coming. As the light is still shining on the ground, I return from eternity!”

Under the lights of stars, Alpha’s skin looked soft and smooth, reflecting milky lights.

“Hello, I’m Alpha.”

Yun Xi looked at the cyber god. His mouth opened wide, but he couldn't find any words.

Everything had shown a clear truth which he didn't expect before.

The strongest opponent he thought, the only 7 star points chess player he had seen was just a little girl!

[Chapter 444: Alpha's Counterattack](#)

Is she Cyber Elf Alpha?

She is the strongest opponent on the Starry Sky Chessboard?

Yun Xi looked at the little girl in disbelief.

Anyway he looked at her, she looked even younger than him. Can such a little girl also join the game on the Starry Sky Chessboard?

"Cloud... A Cloud in the Sky..."

"You are close... and distant..."

As Alpha stood on her toes, one circle of light after another circle appeared and rippled around her body.

Her small bare feet emitted an unknown frozen white light.

At the same time, the quantum crystallizations behind her emitted clear sounds of resonance, transmitting the infinite computing power to her as her back support.

Mission: Defeat the opponent.

The name of the opponent: A Cloud in the Sky.

Weakness: none, no known model exists.

Just like the endless sky, he is a new chess player whose style has never been recorded. The correct rate of his moves is over 95%.

Code name: Cyber Elf Alpha.

The only cyber god in the endless god's domains, who holds the highest computing power throughout history.

The maximum computing power: 3000 times more than any common legend ranked being.

Yes, it was 3000 times but not just 2000 times. Her actual performance was even stronger than the highest theoretical value.

The Solar Wing Arrays provided extra energy for the Planet Computers, so they could even run in overclock mode.

Everything was for this “battle”.

With the help of the 3000 times legend raked computing power, Alpha’s correct rate hardly increased from 91% to 92%.

92% was still inferior to 95%.

The gap of 3% blocked her road of victory like a natural moat.

“Reboot the calculator program...” As the first “life” who came to the Starry Sky Chessboard with her true body, Alpha was drunk with the fantastic world of infinite star lights. Her small hand lightly picked up a chess piece and put it onto the complicated star map.

Finally, she clearly felt that her computing power broke a new threshold again. Finally, their winning rate became the same.

“Cyber Elf Alpha” vs “A Cloud in the Sky”.

Winning rate: Fifty/fifty!

“This move...” From her move, Yun Xi clearly felt that Alpha was totally different now.

It was an aura that couldn't be described by using any words. After entering the Starry Sky Chessboard with her true body, her first move instantly changed the orbits of stars on the star map.

It wasn't the best option, neither the worst, however, it made the situation on the chessboard become more complicated.

Comparatively, Alpha's chess pieces were "revived" again. From countless instant changes, she precisely put her chess piece on the place where it could bring her "new life", but also, in order to find it, the requirement of computing power was extremely high.

So far, it could be called a "god move", because it totally disorganized the situation on the chessboard again.

This was the road of victory Alpha chose for herself.

At the very least, in her view, it was right, a necessary move to reverse the situation of the game.

"If so..." Yun Xi hesitated, then put his chess piece onto an insignificant place.

The quantum crystallizations behind Alpha lighted up one by one, instantly, they had built over ten thousand mathematical models for Alpha.

Because Yun Xi's move didn't fit any formalized series of moves, Alpha had to build mathematical models for his every move from zero, so that she could predict his next move and the changes on the star map.

This time, over 100 Planet Computers judged that Yun Xi's move was meaningless. At the least, it wouldn't cause any change on the chessboard.

If so, it's my turn now.

It's time to strike back!

How terrible Alpha's move would be after releasing 100% of her computing power?

Her every move was attacking. At first glance, she was copying Orfina's style, but essentially, it was distinctly different.

Orfina's style was "because I want to attack, so I attack", sometimes, in order to eat her opponent's chess piece, she didn't mind sacrificing her own chess pieces.

Alpha's style was "because I want to win, so I attack", her every move was the result of endless calculations, so she wouldn't make any mistake.

Even though it seemed that she was only a step away from being defeated, her terrible computing power could still let her find the only chance to keep from endless despair.

Don't make any mistake and do her best to find her opponent's mistake, then overwhelm her opponent using her crushing computing power. On the chessboard, Alpha's attack was more fierce than any wild beast, which was totally in opposition to her appearance.

“Whoa... her attack is powerful...”

Even Yun Xi had to praise her attack. At any rate, her attack was the most fierce he had ever seen.

“Pa!”

“Pa!”

“Pa!”

“Pa!”

After 30 rounds, the light of victory flashed in Alpha’s eyes.

Current probability of winning: 72%; probability of being defeated: 28%.

I have reversed the situation!

My counterattack plan went rather well!

I have successfully suppressed his chess pieces on the left corner and the right half part on the chessboard, I have divided his chess pieces into two unrelated parts.

His only advantage was tengen. I haven't eaten his chess piece on tengen.

However, it doesn't matter.

I can win. According to this trend, I can defeat him!

He already has nowhere to flee!

[Chapter 445: Starburs](#)

I can win!

I must win!

I have squeezed out 100% of the computing power of all the Planet Quadrant Computers, there is no way that I will lose!

Even though he is the strongest genius in the history of the Starry Sky Chessboard, I can turn the tide!

Cyber Elf Alpha felt that joy was gushing out from the bottom of her heart.

This victory would be different from the 70 victories before, because it would be the first “victory” she obtained by using her full power.

Just like a rainbow after a desperately strong storm, just like the morning twilight after a long polar night, infinite emotions filled Alpha’s heart.

Even now, she felt so incredible now that she had reversed the situation.

“I... I win?”

Because of excitement, her two metallic antennas twisted together, becoming a golden horn standing high on her forehead.

The corners of her mouth raised.

She had seen victory on the chessboard!

“Cyber Elf Alpha” vs “A Cloud in the Sky”.

Cyber Elf Alpha: the probability of winning: 83%; the probability of being defeated: 17%.

The probability of winning and the probability of being defeated were just the theoretical values calculated by the Planet Computers, they were fixed but changed from time to time. After all, the star map was always changing, and there were too many unstable elements.

The only thing she knew was that she was still occupying the absolute advantage.

Overall, her chess pieces had surrounded the area around tengen, it was so easy to predict who could be the final winner would be for everyone.

“Well... it’s about time.” Yun Xi looked at the little girl’s happy face.

Looking at her raised lips and clenched fists, she looked like a little girl who just finished her homework and waited for praise.

It’s really a terrible feeling to beat such an innocent child’s self-confidence.

However, I must accomplish my task. Teacher Casina even loaned her identity to me, I won’t disappoint her.

You are probably the strongest opponent I have met.

Therefore, I will present the “Starburst” to you.

“Pa!” Targeting on Alpha’s chess pieces around tengen, Yun Xi started his unprecedented show.

Looking at the place he put down his chess piece, Alpha’s body suddenly trembled.

She looked at her crushed chess pieces in astonishment.

Yes, her chess pieces were “crushed”.

The chess piece Yun Xi put down following the orbit of the star, leading Alpha’s chess pieces to come to ruin.

Stars would die! This was the biggest difference between Star Go and Go.

In the game of Go, the players could “abandon” their chess pieces, however, in the game of Star Go, the players could “detonate” their chess pieces!

At this moment, Yun Xi’s chess pieces, which were surrounded by Alpha’s chess pieces, detonated themselves without warning.

Instantly, a large blank area appeared on the chessboard.

For a moment, Alpha’s mind became blank.

“What... the stars in this area...”

“They still have 3.6 billion years of life... how could they... their fates are twisted!”

Alpha murmured, and helplessly tried to fix the empty area.

Sorry, once this tactic starts, it can't be stopped.

Yun Xi ignored Alpha's feeble resistance and put down another chess piece.

It was hard to describe the sparkling lights when the stars detonated. The phenomenon which should appear 3.6 billion years later repeated on the chessboard over and over again.

80%, 72%, 64%... Alpha's possibility of winning kept descending. With cry-like resonances from the quantum crystallizations behind Alpha, her fields were broken one by one.

This was Yun Xi's Star Go Strategy, his original creation: Starburst.

When using this strategy, he didn't mind anything on the chessboard, no matter how much the area his opponent had occupied, he only needed to put his chess piece onto the most unstable place, then detonate it.

In the face of Yun Xi's unprecedented strategy, even Orfina's most fierce attack was not worth mentioning.

Stars existed since the beginning of the world, however, they weren't immortal. The world of stars was a dynamic system of constant destruction and rebirth.

Yun Xi realized this from the changing star map, then summed it up and created his strategy: Starburst.

“Impossible! Impossible! Impossible!”

“What did you do? How could such a strategy exist?!” Looking at her chess pieces that were sympathetically detonated by Yun Xi’s chess pieces, Alpha’s body couldn’t stop trembling.

No! I must stop it!

3000 times computing power? Not enough!

If there was still any chance, I must find it using more computing power.

Where can I find more computing power?

Isn’t it clear?

Apart from the Alpha Starfield, apart from the 100 Planet Computers I have controlled, there were still a lot of Planet Computers outside.

I haven’t lost yet!

Stop, time!

Alpha chose to pause the game again.

In the Mechanus God's Domain, on the planet the God Crystal located.

Suddenly, more quantum threads stretched out from the God Crystal, carrying Alpha's order.

It was the final recourse of the wayward god.

In front of the Planet Computer of the Department of Transportation, in front of the Planet Computer of the Central Bank, in front of the biggest Planet Computer named "Star River", in front of all the remaining Planet Computers.

The cyber god girl floated in the air and entreated.

"Everyone, loan me your power!"

Countless data flows flashed through all the screens of all the Planet Computers, forming the same answer.

"Ok."

## [Chapter 446: The Final Counterattack](#)

Calculating! Calculating! Calculating!

He was using an unprecedented strategy.

However, it couldn't be an accident.

He must have prepared this trap from the beginning.

Even though the truth was harsh, Alpha had to admit that she was suffering a deadly blow.

Her body trembled like a tree in the wintry wind, and her eyes could see no light.

"Shuffle!" A weak flame was ignited, it was the only support she could find.

After the appearance of the first flame, soon, the second, the third...

Overlapping the computing power! Breaking the limit of 3000 times legend ranked computing power!

Overclocking!

All the Planet Computers in the entire Mechanus God's Domain started running. Although they were built for the people's livelihoods, government systems, and financial systems, but, in order to help Alpha, they lent all the extra computing power they could to her.

Not only them, any electronic device, as long as it had a CPU and was connected to the quantum network, was taken over and brought under Alpha's control.

Especially the Planet Computer named "Star River" in the center of the domain.

After closing all unnecessary functions and overclocking, the computing power "Star River" could provide was equal to 1/3 of the computing power of the 100 Planet Computers in the Alpha Starfield!

This was Alpha's power, controlling all electronic devices in the entire Mechanus God's Domain.

3500 times!

3900 times!

4000 times!

5000 times!

With the support of all electronic devices in the entire domain, Alpha's computing power increased at a terrible speed again.

Finally, the computing power she obtained would shock any legend ranked being.

12000 times legend ranked beings computing power! This was the sum of the computing power of all electronic devices in the entire domain.

With such incredible computing power, Alpha even had the confidence to play with all Star Go players at the same time and crush them all.

However, only one person was the exception.

A Cloud in the Sky, who was crushing Alpha's self-confidence!

"Give up building any mathematical model, it's time to strike back!"

"Give up resisting, there is no way to stop him."

"Attack! Full attack!"

Yun Xi couldn't have expected that because of the game with Alpha, the entire Mechanus God's Domain was affected.

At the crossroads, because the traffic lights stopped running, countless cars jammed on the streets.

The planned military maneuver stopped, because the ports were all closed, they couldn't even let go of a small aircraft.

The "Mech" which were flying in the air suddenly found that they couldn't land, because all signal lights went out.

All robotics facilities stopped running, transmitting extra energies to the overclocked Planet Computers.

The Planet Computers in the Alpha Starfield opened their solar panels, receiving the electron beams from the Solar Wing Arrays.

The nuclear bombs, which were planned to be used to destroy the Planet Computers, now were being extracted out of their cases and their nuclear cores being used for extra energy.

In the darkness, the little sparks were kindling a great fire!

With 12000 times computing power, Alpha's Star Go Strength was far beyond the legend rank!

"94%" Alpha's correct rate was finally very close to 95%.

All the changes on the star map suddenly became clear and easy-to-understand, the apocalyptic scene also became predictable.

However, Alpha knew that there was a time limit.

If she kept overclocking the Planet Computers, the entire Mechanus God's Domain would be over! Even Planet Computers would be burned out after running out of coolant liquids.

12000 times legend ranked computing power, it was a miracle that no one had expected. After all, who would expect that Alpha would control all the Planet Computers one day?

"Attack!"

"Strike back!"

"Battle!"

Alpha's eyes sharpened to unparalleled levels, and were emitting lights!

She put down her chess pieces onto the place where they hadn't been involved in Yun Xi's Starburst. A vague figure was forming.

"No wonder that she is a 7 star points chess player..." Yun Xi praised her in his heart and kept his Starburst.

When he destroyed a new starfield, Alpha's counterattack also came!

It was a “ko” of the ultimate power of six elements, which was far stronger than the Black Death Hexagram.

In the starry sky, one fine thread after another appeared and connected all Alpha’s stars together. According to Alpha’s calculation, they had 0.000000001% of possibility to appear.

36 stars formed a square, the power of earth, water, fire, wind, light, and darkness formed the “ko” named “World”.

If Yun Xi’s Starburst was pure destruction, then Alpha’s “World” was the final hope in this hopeless situation, it was a seed that could breed anything!

In the slowly rotating square, a hot light point was forming.

It looked like a beautiful creature with seven colors.

“Do I succeed?” Alpha gazed at the creature in the square.

It was a god creature who was born great. It naturally had seven colors, the blessing of the universe and immortality.

It was as hot as the sun, and as mysterious as the moon. It was a legendary fantastic creature in the tales of the Western God’s Domain, and was said to be one of the avatars of Ionia.

No one knew the true body of the seven colored creature, people only knew its code name, “God Phoenix”.

#### [Chapter 447: Whispers of the Abyss](#)

God Phoenix.

Its real race, appearance, and birthland were unknown. Even its name “God Phoenix” was from the people who saw this seven colored fantastic creature flying in the sky.

It didn't inhabit any certain domain, but has been witnessed by many people in different god's domains and showed its incredible god abilities in front of them.

Four basic elements, earth, water, fire, wind.

The opposing two elements, light, and dark.

When the seven colored light curtain falls, all things in the world will be covered by its color.

People connected it with the supreme master of the Western God's Domain, the master of the seven colored world, the god above all gods, Ionia.

There were too many similarities between them.

With the support of her 12000 times legend ranked computing power, Alpha used her 36 chess pieces, summoning this “miracle” with a 0.0000000001% probability.

Above the Starry Sky Chessboard, yellow, black, green clouds condensed and formed a dramatic tornado, rotating rapidly and released overwhelming winds sweeping the world.

Red, blue and purple lightning jumped and danced amongst the clouds, colorful lights pierced through the distance between reality and fantasy. Something was coming to this world from a remote place, just like the scene when Alpha came.

The entire star map was surrounded by colorful lights, like a miracle.

The strange thing was that all the lights and lightning stopped on a line, as if it was a line delimited by the god, a wailing wall they could never go over.

The wall located at “tengen”.

Taking tengen as the boundary, one side was a colorful light curtain, and the other side was endless darkness.

It was the embryonic form of the bottomless abyss, it was the deepest darkness, it was the cradle that was breeding the indescribable horror.

As opposed to the God Phoenix’s seven colors, it was the simplest and most indefinable “abyss”.

“What... is it?” Alpha looked into the darkness. It seemed that there was nothing there, but she could feel an unprecedentedly terrifying aura coming from it.

“I think... it’s... annihilation...” Yun Xi answered, but wasn’t sure about it. After he twisted the fates of the stars and activated the sympathetic detonation, something was naturally born from the ruins.

In the Seven Colored World, in the palace of the god above all gods, a seven-colored cocoon emitted one circle of light after another with constant strong sounds of pounding.

At the same time, in the endless darkness, a black gem was also emitting weird waves.

In the Eastern God’s Domain, the homeland of all fantastic creatures, on the Kunlun mountain, West Queen touched her belly and smiled.

“Don’t rush, don’t rush, you are not prepared. Stop kicking.”

“God Phoenix, and...”

On the Starry Sky Chessboard.

In the seven colored clouds, the god-type fantastic creature slowly opened its wings and emitted a clear twitter.

Its body was covered by lightning, it was the light that could breed all things.

Flying in the endless god’s domains with the six elements, earth, water, fire, wind, light, and dark, she was closer to the nature of the universe than the elves, she was the child of the god above all gods, Ionia.

At the same time, a creature was also waking up in the bottomless abyss.

She was from the residue of the endless annihilation, she was born in the deepest side of the bottommost abyss. If the God Phoenix was the immortal fantastic creature, then she was the ultimate destructive creature.

She was born from endless disasters, because her mother was the master of chaos, Nyack.

Although they were the children of different mothers, however, they also had another mother, who gestated them all, because she was the mother of all fantastic creatures, West Queen.

West Queen was the highest old god, and also, she was the mother of all fantastic creatures.

Amongst all supreme existences, West Queen was the only god who was known for her achievement of giving birth of all fantastic creatures.

No matter who the fantastic creatures were and where they were from, they must borrow West Queen's special ability, coming to this world from her belly.

The God Phoenix and the mysterious, unknown destructive creature were also no exception.

Because of their special properties, their final forms hadn't formed, theoretically, they were still just two concepts that hadn't existed anywhere in the universe.

Even so, their powers were so strong that they could affect reality even before they were born. This was their special property inherited from their mothers.

The Starry Sky Chessboard could contain all miracles and possibilities, therefore, Cyber Elf Alpha could summon the God Phoenix's projection, and Yun Xi could awaken the unknown destructive creature from the abyss on the chessboard.

At this moment, mysterious whispers were echoing in Yun Xi's mind.

"Mo ni ya mi xi... mo ni ya mi xi... mo ni ya mi xi..."

"Stella... stella... stella..."

"Yi sai luo... yi sai luo..."

If any mortal heard the whispers, they would go mad instantly, because it was the sound of the abyss, it was trying to tempt Yun Xi to step into the endless darkness.

Unfortunately, Yun Xi didn't understand what the whispers were saying at all.

"..." After hesitating for a while, the unknown existence in the abyss changed its language.

"Com on... com on... com on..."

“Co me... co me... co me...”

“Mi... mi... mi... go...”

Yun Xi still didn't understand a word.

“Come here... come here... come here...”

“Come to me... let us combine together... become a part of me...”

“It will be a very comfortable thing for ...”

“The destination of power... is infinite freedom... do you want power?”

Finally, Yun Xi understood what it was saying.

“Sorry, I don't want power. I want 100 successive victories...” He refused the unknown existence politely, then put down his next chess piece on the chessboard.

There was no way back.

This starfield on the chessboard would come to the end of its life. It was an inevitable fate.

#### [Chapter 448: White](#)

“Pa!”

“Pa!”

“Pa!”

“Pa!”

The game was still ongoing.

Cyber Elf Alpha’s God Phoenix hadn’t totally appeared on the chessboard. After all, it hadn’t been born in the real world, it wasn’t possible to descend using its real body.

Similarly, the unknown creature in the collapsed starfield was also a fantasy. It didn’t even have a name.

Marching out of time, they both summoned the gods in the future on the chessboard.

The quantum crystallizations shivered behind Alpha’s back as if they were crying, several of them had even turned crimson.

Reflected in the Alpha Starfield, the corresponding Planet Quadrant Computers crashed because of the overheating phenomena due to overclocking. They had to quit the battle this time.

Alpha's computing power also started to drop. She couldn't maintain the peak, 12000 times legend ranked computing power anymore.

Each Planet Computer she lost would become a huge blow to her computing power. It was the first time she was forced to use her full power.

Stress, excitement, heartbeat, pain... Cyber Elf Alpha had failed to calculate her probability of winning anymore.

"Cyber Elf Alpha" vs "A Cloud in the Sky".

Probability of winning: unknown.

Probability of drawing: unknown.

Probability of being defeated: unknown.

Before this game, none of her opponents could resist her strong computing power.

She never expected that her 12000 times legend ranked computing power couldn't even figure out the most basic winning probability!

No! It's not happening!

As long as I have sufficient computing power, nothing couldn't be calculated.

No matter whether it was a god, past, present or future!

Update the calculator program!

Give up calculating the winning probability, just tell me, will I win or lose?

Alpha decisively corrected her mathematical model, simplifying all data to the limit.

In Alpha Starfield, the Solar Wing Arrays were forced to transmit more energy to the Planet Computers, due to overheating, a part of the energy receivers of the Planet Computers were irreparably destroyed.

At the same time, all Planet Computers in the entire Mechanus God's Domain closed their back up computing power to any other device, and put all computing power into helping Alpha.

Therefore, the people of Mechanus God's Domain surprisedly saw that all traffic lights turned off, all cars on the streets were stuck.

In the camp of the military, all electronic devices stopped running, which almost scared countless military officers to death. They tried to call their subordinates, but found that even the most basic communication device also stopped running.

Apart from the electric power in agricultural factories and a few necessary living facilities, all energies were being used in this battle.

Like the last radiance of the setting sun, several crimson quantum crystallizations burst out bright red lights. Temporarily, Alpha's computing power raised to a new peak!

As countless coolant liquids were being boiled and the entire society in the Mechanus God's Domain faced an unprecedented big black out, Alpha's computing power climbed up to a nearly impossible value.

15000 times legend ranked computing power! Only Cyber Elf Alpha could achieve this magnificent feat throughout the universe!

Then, she saw it. She figured out the terrible truth.

"What?"

"Why?"

"Why is this happening?"

After inputting all Yun Xi's moves into the mathematical model, Alpha froze. The answer, the truth was so incredible that she didn't believe her eyes.

At this time, Yun Xi reached an agreement with the unknown creature he summoned and launched his final attack.

“Um-hum... you are not bad... not bad... very good...”

“Come to be my family dependant, I’m waiting for you...”

“As long as you become a part of me, you can obtain infinite power, becoming the child of the abyss.”

“I like this name... White... White in the Abyss... ha ha...”

“Sister... I win...”

The mysterious existence from the abyss, the girl who was named “White” by Yun Xi turned into endless darkness, starting to cover everything, swallow everything, and destroy everything.

The seven colored fantastic creature Alpha summoned started to self destruct in the endless destruction.

“Probability of being defeated... 100%?” This was the future Alpha saw by using her 15000 times legend ranked computing power.

The endless darkness would totally eat the fantastic creature Alpha summoned.

However, it didn't mean that "God Phoenix" was weaker than "White". Theoretically, "God Phoenix" obtained her name earlier than "White", she was actually stronger than "White".

They weren't the determining factors. The gap between Yun Xi's Star Go Strength and Alpha's Star Go Strength was the main reason.

"I have lost... I have lost?" Alpha looked at the collapsed situation on the chessboard. Her final miracle just delayed her time of being defeated.

Before Yun Xi launched his attack, before the "Starburst" appeared, the situation was already hopeless.

Dozens of rounds ago, her fate of failure was already destined.

How terrible his attack is! The power that can even let the star river collapse... how great it is!

"I concede..." Once she said those two words, her body slumped. It wasn't until then, did she find that her body had been soaked with sweat for a long time.

#### [Chapter 449: Palpitation](#)

Until this moment, Alpha finally realized what was happening.

I lost.

My core is the God Crystal, and my source powers were hundreds of Planet Quadrant Computers, I was born from the final fantasy of the science of the Mechanus God's Domain, however, I still lost.

For this battle, I have used all the resources I can use, and almost overturned the order of the entire Mechanus God's Domain. I have done everything I can do.

Since my birth, I was never so persistent and self-forgetful.

"Postgame analysis... replay..."

What is this feeling?

I lost, so I feel painful, uncomfortable, and want to cry, however, I also feel happy, expectant, and something in my heart is fulfilled.

Alpha checked the entire game from the beginning, trying to figure out which move caused her failure.

She remembered, and used almost all the mathematical models she had learned. She surprisedly found that her calculation was wrong from the first step!

At the beginning, she calculated that she had a 50% chance to win. It was wrong.

She used the Sea of Chaos and thought that she had reversed the situation on the chessboard. It was wrong.

Even when she used her 12000 times legend ranked computing power, creating the miracle, and summoned the legendary fantastic creature. She was completely mistaken!

She never obtained any advantage from the beginning of the game.

Although her computing power was incredible, however, if her mathematical models were wrong from the beginning, she was never possible to figure out the right answer. She didn't even have any chance to correct it.

She had stepped into a blind alley from the moment she put her first chess piece onto tengen, and could never turn back.

When the battle around tengen stopped, her failure was already irreversible.

All her moves were just wrong results basing on wrong calculations.

"Gee... this... this thing..." Alpha finally found the truth after looking back on the entire game again. Her heart pounded rapidly.

"Pa!"

"Pa!"

"Pa!"

They were not the sounds of putting down chess pieces, but the sounds of the quantum crystallizations behind Alpha. About 1/3 of Alpha's quantum crystallizations dropped to the ground and turned into light spots.

The systems of the overheated Planet Computers totally crashed after depleting all coolant liquids.

Even Alpha's thinking circuits became blurred due to it.

"You must be kidding... such a huge gap..." As the "omniscient" cyber god, Alpha didn't believe her eyes.

I lost to the opponent who was apparently inferior to me, and I can't find any method to fight back. I can't even build the corresponding mathematical models!

This was the biggest blow to Alpha's mind.

Yun Xi's moves completely overturned all of Alpha's understanding of Star Go.

The formalized series of moves recorded in her database was just a joke in the face of Yun Xi!

How could any formalized series of moves force Alpha to boot all Planet Computers?

How could any "ko" be as strong as Yun Xi's Starburst?

His unprecedented attack method even made Alpha's God Phoenix fall into the shade, and summoned the unknown destructive creature from the abyss.

"Strong... he is too strong..."

When playing, Alpha had no time to think about it, until everything had been done and was dusted, she finally realized how terrible his style was.

If describing it using the rank of the endless god's domains, most Star Go players were still at the mortal rank.

Norn the God of Wisdom and Orfina the Ruby Dragon were very close to the hero rank. They were only a step away from the hero rank.

Alpha was a genuine hero ranked existence. Even if all Star Go players cooperated with each other to fight against her, they still had no chance to win.

As for "A Cloud in the Sky", his Star Go rank was equal to the legend rank or higher! It wasn't possible for the hero rank to understand his existence!

Alpha even thought that if Star Go had a god, then she was playing with the God of Star Go just now!

No one was a match for Alpha, but in Alpha's eyes, Yun Xi was the forbidding god.

Norn the God of Wisdom and Orfina the Ruby Dragon looked up at Alpha, and Alpha looked up at the cloud in the sky that she could never touch.

A Cloud in the Sky, what a picturesque metaphor! The cloud in the sky could be seen by anyone, but couldn't be touched by anyone. No matter how hard the mortals on the ground tried, they could never catch up to the drifting cloud in the sky.

"This power... this power..." Alpha's slender body trembled.

For the first time, the cyber god, Alpha met a target she couldn't understand.

Even if her computing power had increased ten thousands of times, she would still not understand him!

"Name... please... tell me your name!" Her metallic antennas tangled together, turning into heart shape and question mark from time to time. Alpha felt that countless electric currents were flowing inside her body.

She didn't understand her emotion at this moment. She didn't understand the fever from her soul, which couldn't be controlled by her legend ranked computing power.

As the cyber god whose ultimate goal was to be "omniscient", she had zero resistance to this "unknown"!

[Chapter 450: Alpha's Active Attack Policy](#)

"My name?" Yun Xi felt strange.

Isn't my code name right above my head?

A Cloud in the Sky.

“No, I don’t mean your code name, I’m asking your real name. Which rank have you reached? Which god’s domain are you from? Which race are you? How old are you?” Alpha gazed at Yun Xi in excitement.

“Are you a god? What rule or power are you good at? I don’t see any record of you in the list of gods in the Sky Tower!”

If it wasn’t because the invisible power of the Starry Sky Chessboard separated them, she would have run to him.

Why? Why do I want to know his name? Alpha herself didn’t quite understand her emotion.

However, she was sure for one thing!

She wanted to understand this person who defeated her easily and made her feel pain.

From the moment of her birth, she was blessed by all people.

The high elves told her, “Alpha, you are the newborn cyber god, you are the favorite of the universe.”

“You are born great, because you will be a god above all gods!”

“You are an elf above all elves, you are a spirit above all spirits. You are a dream from the God Crystal.”

In the public cemetery of the planet the God Crystal located, countless mortal engineers and alchemists left her their last words.

“Alpha, the moment you open your eyes will become the moment of the dawn of the Mechanus God’s Domain.”

“My son, grandson, great-grandson! No matter how long it’s been, once Alpha Plan succeeds, you must tell me this good news in front of my tombstone! So I could laugh in the coffin.”

“It’s too bad that I’m not an elf, if so, I could live long enough to see the birth of Alpha. It must be the start of a great era. Alpha, my god, we love you!”

“No matter how long we need to wait, how matter how much we must pay, we will create you. You are our hope, our final fantasy!”

“Alpha! Alpha! Alpha! Alpha!”

“We are witnessing the miracle of alchemy! The God Crystal is fantastic! Unfortunately, we can’t see your birth. You are not a miracle of the Mechanus God’s Domain, you are also a miracle of we alchemists!”

“Philosopher’s Stone, the God Crystal must be the real Philosopher’s Stone! It’s the truth! If I can live for 3000 years, I can find its secret and replicate it!”

“A god from the God Crystal, what a fantastic miracle. It’s really a pity that I can’t see it.”

Because she carried so many people’s expectations and fantasies, she could obtain such a strong power from the moment of her birth.

Over a hundred Planet Quadrant Computers! Thousands of satellites! An entire Alpha Starfield! Everything was for Alpha, waiting for her birth.

Because of them, she was great and confident.

From the moment she stepped onto the Starry Sky Chessboard, she was destined to overwhelm everyone. Even Norn the God of Wisdom and Orfina the Ruby Dragon were untenable in the face of her.

For a moment in time, she really thought that she was matchless on the Starry Sky Chessboard. At least, she had defeated all Star Go players recorded in her database.

Until she met him.

Even if she could repeat the game over and over again, she didn’t see any way to defeat him.

For the first time, she was in a disadvantage.

For the first time, she tasted the pain of being pierced through.

For the first time, she was so desperate. She did her best to get rid of her creators, the Star River nobles, because she wanted to win.

To many first times flowed in Alpha's heart at great speed. It wasn't blood, because her body didn't have such a thing, but something very hot flowed in her body.

"Pang!"

"Pang!"

Her body was made of the God Crystal, naturally, she didn't have a heart, but she could feel the pounding as if it really existed.

She was so nervous and perplexed. No one told her what she could do and what a look she should put on her face.

Only the quantum crystallizations that were exploding due to overheating exposed the shock in her heart.

"Legend rank, god, race..." The sweat streamed down Yun Xi's face.

No, I can't say it! I'm using Teacher Casina's projection... I didn't even tell this truth to Teacher Casina's friend, Orfina the Ruby Dragon. I can tell no one now!

Fortunately, I can use the code name here. Hail the anonymity!

“Sorry, before asking your name, I should tell you my name.”

“I’m Alpha, a cyber god. Cyber Elf Alpha is my code name.”

“I’m from the Mechanus God’s Domain, a newborn god born from the God Crystal. My life goal is to be an omniscient god.”

“Although I was just born, I already fell in love with Star Go! Can you tell me your secret of playing Star Go?”

“According to my calculation, the correct rate of your moves is over 95%. How can you achieve that?”

“Can you teach me it?”

“In the name of Alpha, as long as you teach me, I can give you ten times, no, a hundred times return!”

In every sense, newborn Alpha was as pure as a white paper. She had zero resistance to the people she liked.

Of course, if you wanted to become such a person, you must defeat her on the Starry Sky Chessboard first, so she would be so fervent and even incoherent.
