

Starchild 451

Chapter 451: Alpha's Active Attack Policy (2)

Confident and free.

Strong and wayward.

Innocent and simple.

Don't like to be fettered by anything.

This was the newborn, unique cyber god.

In the face of the dirty faces of the Star River nobles, Alpha easily overturned the order in the entire Mechanus God's Domain.

In the face of the mysterious A Cloud in the Sky, Alpha totally became another person.

Her shy and lost face would only show to one person.

Unfortunately, Yun Xi didn't know how valuable her cute emotion was. In fact, he looked very embarrassed now.

In the face of Alpha's questions, he didn't know how to keep hiding his secret!

"... I see. I'm still not qualified to know your name now, am I?" Although Yun Xi said nothing, Alpha thought that she had understood his unspeaking words.

Yun Xi's silence was like a hint in her eyes.

The Alpha now was like a child who saw her favorite toy, she couldn't stop herself.

"Yes, I understood. I'm still too weak now. Even though I have 12000 times legend ranked computing power, I still don't have the qualification to be your opponent. The game just now must be just a teaching game to you."

"However, I will keep growing. Since 12000 times computing power isn't enough, I will increase it to 120000 times!" Alpha wasn't just talking nonsense, she had really made a decision.

After returning to the Mechanus God's Domain, I will change the developing policy of the entire god's domain! I must build more and more Planet Computers!

If I have ten times more Planet Computers than now, how strong can I be?

This was one of the reasons she still remained confident now.

Of course, it was the confidence of "I can have the qualification to play Star Go with him", but not the confidence of "I can defeat him".

I must go forward step by step. 120000 times legend ranked computing power, I hope I won't suffer such a devastating defeat then.

At that time, I won't make any mistakes like what I did in the game just now!

I actually wanted to save my computing power at the first... how arrogant I was!

There is always someone who is better than us. People should never be arrogant!

At this moment, the legend, the god of Star Go was right in front of her!

"Oh, you... you are actually very strong..." Yun Xi didn't know how to respond to her words.

The world of the legend rank was still too far away for him.

The Cyber God? The Mechanus God's Domain? 12000 times legend ranked computing power? What was she saying?

Isn't Star Go just a simple game? Even a beginner like me can understand it fast and summon an unknown creature on the chessboard.

95% correct rate? Me? Does such a rule exist in Star Go? I just put down the chess pieces following my feelings, was it really a thing that was worthy of being mentioned?

“No. I admit my failure... you are the strongest...” After her try of building the mathematical model of Yun Xi’s style, Alpha could feel the infinite possibility in the game.

Even her 12000 times legend ranked computing power was just like a grain of corn in the wide sea when playing Star Go.

The star map was made of countless orbits of stars, the possibility it contained was “infinite”. It was like idiotic nonsense if any legend ranked being said that he could figure out all the changes on the chessboard.

With her 12000 times legend ranked computing power, she just stepped into the door of Star Go, as for Norn the God of Wisdom, Orfina the Ruby Dragon and other Star Go players, they were still wandering outside the door.

Only “A Cloud in the Sky” really understood the rules of Star Go!

Only he could be her target, opponent and teacher!

There were too many words she wanted to say, there were too many things she wanted to know.

The “unknown” had made her drunk.

Her eyes gazed at Yun Xi with scorching desire.

“Hey, play Star Go with me!”

“Come to me, and teach me more things!”

“Alpha wants to know more about you.”

“If you agree with me, I can help you on a lot of things.”

“Apart from playing Star Go, I’m very strong in a lot of other realms.”

Sweat broke out all over Yun Xi’s body and trickled down his back.

It seemed that the whole thing was developing in a very bad direction.

It seemed that the girl who called herself “cyber god” was attracted to him.

If he wasn’t using Teacher Casina’s body, he had conceded.

In some sense, Alpha’s words were even stronger than his Starburst.

On the Starry Sky Chessboard, Yun Xi was the free, omniscient god. After leaving the Starry Sky Chessboard, in the face of the legend ranked cyber god, he instinctively noticed the huge gap between their life forms.

“Ok, it’s a deal. I will find you in the Sky Tower. Please don’t refuse me at that time!”

When Yun Xi realized what happened, he had promised that he would play Star Go with her in the Sky Tower. Not just playing one or two times, but playing for seven days and seven nights!

“The promise is a promise, even ten thousands years later, the promise between us won’t expire!”

“Just like the stars twinkling in the night, our meeting is a forever miracle.”

[Chapter 452: The Shock of Starburs](#)

“Alpha, how terrible she is...” Looking at Alpha’s body grudgingly vanishing on the other side of the Starry Sky Chessboard, Yun Xi wiped the sweat away from his forehead.

No doubt that she was the only 7 star chess player, her temperament and aura were distinct from any other chess players.

Of course, it didn’t form a threat to him.

“Mei’er, was it true? Was I really playing with a god?” Remembering what Alpha said, Yun Xi doubted her true identity.

“Of course. If a person didn’t have sufficient power, the person couldn’t even step onto the Starry Sky Chessboard.”

“Undoubtedly, she is a newborn god,” Mei’er said in a certain tone.

“Don’t look down on the body you are using. Casina the Battle God isn’t a common Sky Sword.”

“So... it means...” Yun Xi was reminded how great Teacher Casina was. If he didn’t become her disciple due to luck, he probably couldn’t enter the mystery world “Starry Sky Chessboard”, and never understand the fun of Star Go.

“Are the people who were defeated by me also at the legend rank?”

“Do they also like to play Star Go?”

Although it was a bit late, Yun Xi finally realized what a valuable opportunity Teacher Casina gave him was.

Probably Teacher Casina had predicted that he would come to the Starry Sky Chessboard, so she lent me her identity. (Casina: No! I wanted you to go to the Battle God’s Championship Contest!)

“Yes, this is the best place for your talent, master.” Mei’er showed a mysterious smile on the corners of her mouth.

“Ha ha, I kind of like this play. Star Go is really interesting.” Yun Xi indeed liked this game called Star Go.

“Yes, whatever makes you happy.” Mei’er held a second of silence for the legend ranked “big shots” who were defeated by her master.

You tried to overcome the Starchild on the chessboard of stars? You are lifting a rock only to drop it on your own feet!

In fact, even if Mei’er didn’t say it, all the people who were paying attention to the Starry Sky Chessboard had firmly remembered “A Cloud in the Sky” in their hearts.

The reason was simple. Because as a newbie, he even defeated the “monster”, “Cyber Elf Alpha”.

“Cyber Elf Alpha” achieved the unprecedented record of 70 victories in a row, and he defeated her!

“A Cloud in the Sky”.

His style of Star Go wasn’t aggressive at all, and his victories all based on the mistakes his opponents made.

Other chess players studied his style before his battle with Alpha, and they drew this conclusion in their short break time.

Until they saw Yun Xi’s attack after Alpha was forced to give up the battle around tengen and opened a new battlefield.

Starburst.

The “ko” he created could let all stars collapse, annihilating all things in the starfield. He didn’t only smash Alpha’s counterattack, but also shocked all chess players who saw the record of their game.

“How can it be true? Can he make the stars to self destruct?” Norn the God of Wisdom, the three goddesses exclaimed when they watch the record.

“He controls the origin of stars,” Urd, the goddess of the past said.

“He guides the orbits of stars,” Verdandi, the goddess of the present said.

“He lets the stars entering the circulation of the universe,” Skuld, the goddess of the future said.

“This is Starburst.” Urd tightly held her arms and her legs trembled as if she had seen the fate of all stars falls.

“Unstoppable, unavoidable, unbeatable.” Verdandi’s delicate face looked shocked as if she had seen the end of the world.

“No, no, no! It can’t be true! How can we beat down such an opponent?” Even though Skuld still refused to concede, her face looked puzzled.

Yun Xi’s performance taught all Star Go players a lesson that everything was possible on the Starry Sky Chessboard.

Even if it was the doomsday of the fall of countless stars.

Starburst stood for the beauty of void, it was the fleeting fireworks in the night sky. Even though Norn the God of Wisdom, who had the ability of prophecy, didn't expect to see this shocking scene.

"Wow, it's awesome! Is she really the Casina I know?"

"When did my Casina obtain such a strong power?"

"Has she mastered the secret of the fall of stars?"

Staring at the scene of the fall of stars, Orfina the Ruby Dragon could feel more mystery from it, it was her star-type talent from her bloodline.

She vaguely realized that it was the most terrible and strongest side the stars contained. It was a realm beyond the legend rank.

Most legend ranked beings were the favorites of the world. Because they were blessed and protected by their worlds, or even merged with the wills of their worlds, so they could become forever legend rank, become the immortal god.

And this scene of the fall of all stars could be seen as the annihilation of countless legend ranked wills.

The legend rank could never stop this power!

All the chess players realized it, and all the legend ranked beings who were watching the Starry Sky Chessboard and understood the real meaning of Star Go realized it!

The Starburst showed Yun Xi's absolute combat power on the Starry Sky Chessboard using the most straightforward method!

[Chapter 453: New Era](#)

"A Cloud in the Sky, who is he?"

"Even Cyber Elf Alpha can't defeat him, what a monster he is!"

"When did the Sky Tower develop such a strong chess player?"

No one could deny Alpha's strong, terrible Star Go strength, after all, she was an unprecedented 7 star points chess player.

However, such a 7 star chess player was defeated by "A Cloud in the Sky". A crushing defeat!

Countless legend ranked beings studied their game, which was destined to be recorded in the history books.

Everyone wanted to know how Alpha was defeated. Did they misjudge the players again?

Each chess player who was defeated by Alpha could only smile bitterly when remembering her attack.

Her attack and defense around tengen with “A Cloud in the Sky” made their eyes brighten up. They never expected that the battle would be so fierce after putting the first chess piece onto tengen.

When Alpha used the Sea of Chaos, even Black Mage was dumbfounded. Compared to Alpha’s Sea of Chaos, his Sea of Chaos was like a child’s game.

Until they saw the decisive moment, seeing the stars falling from the sky.

Starburst. No one doubted the true strength of “A Cloud in the Sky” after seeing that.

Just like what Alpha thought, other Star Go players were at the same level, she was at the higher level, and Yun Xi was at the highest level, a place where they could never touch.

Even the people who didn’t understand the rules of Star Go would be shocked by the splendid scene of Starburst on the chessboard.

At the legend rank, there could be a more fatal attraction from the collapse of all stars.

It was an unparalleled strategy on the Starry Sky Chessboard. Unlike other strategies whose goal was to eliminate the opponent’s chess pieces, Starburst was a power that could totally clear the entire star map on the chessboard.

Even Alpha's 15000 times legend ranked computing power could do nothing in the face of Yun Xi's Starburst.

No word could be used to describe how great this strategy was.

Therefore, "A Cloud in the Sky" enjoyed an unparalleled treatment in the next games.

Yun Xi's thirty-fourth game.

Before the game started, he heard a cry from his opponent.

"A Cloud in the Sky! You! You are the person who defeated Cyber Elf Alpha!"

"Yes, it's me." Yun Xi looked at his opponent. It was a 3 star points chess player, just like himself, named "Master Shin".

"You... you... it's you!" Master Shin looked at Yun Xi's confused face as if he was looking at a monster. His body was still trembling after seeing Yun Xi's Starburst, and now, he faced the "monster" directly!

"Pleased to meet you!" If it was the game of Go, it wasn't necessary to play the game, because both of the chess players would know that it would be a one-sided crushing game.

However, they were at the Starry Sky Chessboard, the highest stage of the wisdom in the endless god's domains!

Not all people, not even legend ranked beings were qualified to take part in this stage.

Even if he couldn't win, the truth that he could step onto this stage was already a supreme glory.

All Star Go players were the top wise people in the endless god's domains, including Norn the God of Wisdom, Orfina the Ruby Dragon, and Black Mage, no one was an exception.

Each turn of the game on the Starry Sky Chessboard could help them understand the secret of stars. Nowhere else was better than this place to observe the orbits of stars.

Therefore, every time the Starry Sky Chessboard opened was a great chance.

Maybe he would concede after doing everything he could, but he wouldn't give up before he had tried everything!

Even though he was facing a person who even defeated Alpha, the unprecedented 7 star points chess player.

Therefore, as a 3 star points chess player, Master Shin was overwhelmed by the unexpected favor, but he wouldn't be shy to have a try at challenging the strongest chess player.

"Pa!" Yun Xi won the game of guessing odd and even, he put down his first chess piece on tengen.

“Tengen!” Master Shin’s eyes brightened up.

Now, no one still dared to say that “putting the first chess piece onto tengen” would only appear in teaching games. Maybe only strong chess players like “A Cloud in the Sky” could call it “teaching game”.

Could other people’s tengen and “A Cloud in the Sky’s” tengen be the same thing?

It was ridiculous!

“Pa!” This time, Master Shin also put his chess piece at a place close to tengen.

Yes, he knew it. He would lose, and become an inconspicuous name in the battle record of “A Cloud in the Sky”.

However, he would see the miracle personally, and become a part of the miracle. He was already satisfied with this result.

He wanted to know how Alpha, the “monster” who defeated him was defeated by this stronger “monster”.

If possible, he also wanted to see the Starburst again. It would become the biggest glory in his life.

He would lose, but he would do his best, adding his color of life for this game!

It's so great to play with the strongest Star Go player who is destined to be written into the annals of history!

"Hum?" Yun Xi could feel the changes contained in his opponent's chess pieces.

He couldn't see Master Shin's face through the star lights, however, he could clearly feel his emotion from his moves.

At this moment, Master Shin was in a very special mood.

He was devout, dedicated, and somewhat holy.

Not only so. A part of Master Shin's power was absorbed by the Starry Sky Chessboard and naturally flowed into Yun Xi's body.

The power wasn't being absorbed by Teacher Casina's projection but entered his mind.

Even though it was just a part of the power of Master Shin's projection, it was still a pure, real legend ranked power.

[Chapter 454: Benefactor, You are Preordained to Join Buddhism!](#)

"He wins!"

"He wins again!"

“Next please!”

In the Sky Tower, God Tower and Dragon Tower, more and more legend ranked beings gathered together.

Originally, the opening of the Starry Sky Chessboard was a once-in-a-thousand-year great event, this time, this game was destined to be a legend that would shock all god’s domains!

Cyber Elf Alpha! The unprecedented 7 star points! The unprecedented 70 victories in a row!

Four newbies created the strongest record of newbies in history.

Some Star Go players even swore that Alpha’s Star Go strength was stronger than any chess player they had seen, her computing power was probably even beyond the legend rank.

When all people thought that Cyber Elf Alpha would become the new legend of Star Go, after achieving 70 victories in a row, she was defeated by “A Cloud in the Sky”.

A total crushing defeat!

The power of Starburst could shock gods and ghosts. Even these legend ranked “big shots” couldn’t imagine how it could be true. How deep an understanding about stars “A Cloud in the Sky” had? How could anyone make the stars self-destruct?

Just like when everyone was paying attention to Alpha's killing spree, everyone was paying attention to Yun Xi's battle record now.

His style wasn't as fierce as Alpha's style, he could always achieve victory easily, as if his opponents were all newbies who didn't understand any rule of Star Go.

However, after seeing his battle record, the game with Alpha, no one would think that his victories were just because of luck.

"His moves look simple, but have reached the realm of Tao."

"Yes, he is like the god of Star Go. We are not playing the same game!" Most chess players from the Eastern God's Domain had this feeling in their hearts.

"I thought that his weakness was attack, so he didn't dare to launch any attack proactively. How naive I was!"

"I calculated it. Alpha's computing power is probably hundreds of times stronger than mine, and when she played with me, she didn't even use one-tenth of her computing power. Now, she was defeated by A Cloud in the Sky! Just how strong is he?"

"Why? Why is there such a wide gap between us?"

Compared to the chess players from Eastern God's Domain, the chess players from Western God's Domain didn't understand what "Tao" was, but they had a more intuitive feeling to Alpha's Star Go strength.

It was easy to find the gap of computing power on the chessboard. When you put down your chess piece and your opponent had figured out your next 10 moves, the sense of pressure could be sensed by every experienced chess player.

Therefore, Alpha's crushing victory was so thrilling.

Compared to her, Yun Xi's style didn't give his opponents this feeling. They often thought "This is a newbie! I going to win this!".

Of course, now everyone knew it that it was just a delusion.

No one would still hold any illusion of winning after seeing the battle between Yun Xi and Alpha!

"His 47th victory. Another loser."

"He is going to reach the 5 star points. Can anyone stop him?"

"Impossible. Don't even think about it!"

"Cyber Elf Alpha achieved 20 successive victories again!"

"Norn the God of Wisdom and Orfina the Ruby Dragon are also reaping victories!"

“This session of Starry Sky Chessboard is really wonderful!”

While a lot of legend ranked chess players looked at Yun Xi in awe, Yun Xi easily achieved his 48th victory.

“Just now, I didn’t see any 7 star points chess players, not to mention any of the higher star points players.” Yun Xi felt confused.

In his imagination, 7 star points chess players were just common experts, 8 star points chess players could be called masters, and 9 star points chess players should be the strongest. However, since he didn’t even see any of them.

Is the newbie protection mechanism still working?

Because he met the 7 star points Cyber Elf Alpha, who shouldn’t appear in the newbie area, to compensate, the Starry Sky Chessboard only let him meet 1 star point, 2 star points and 3 star points chess players?

If so, it should be an accident to meet the 7 star points Cyber Elf Alpha in the newbie area, is my luck so bad?

Compared to his confusion, a lot of legend ranked beings held their breath and waited for the destined moment.

“50 victories in a row! He reached 5 star points now!”

“Tsk-tsk, can anyone stop him?”

“They are not at the same level.”

“Wait! We are witnessing the birth of a brand new legend! The strongest Star Go player!”

Yun Xi’s 57th game, he met an acquaintance.

Maha Mystery, this monk already had 3 star points now.

“Benefactor, you are preordained to join Buddhism!” Maha Mystery’s eyes brightened up. The last time he just said it to Yun Xi habitually, this time, he said it honestly and even looked a bit impatient.

Such a wise man who can even defeat a monster like Cyber Elf Alpha... if he can’t join Buddhism, then who is eligible?

He has great wisdom, which means great theurgy, and great theurgy means a great relationship with Buddha!

If “A Cloud in the Sky” agreed to join Buddhism because of his persuasion, it would become a great contribution of Maha Mystery in Buddhism!

“Amitabha! Join Buddhism and all your wishes can come true!”

“Err... thanks.” Yun Xi felt both funny and annoyed. In front of him, Maha Mystery was emitting golden lights from his body, and his face looked as if he was going to write “I’m a great monk” on his forehead.

What is this? A new type of soft sale?

Yun Xi felt a bit interested.

“No, don’t refuse! You are really preordained to join Buddhism!”

“The sea of bitterness has no bounds, repent and the shore is at hand! If you agree to join Buddhism, I promise you can learn all scriptures of Buddhism, obtain golden kasaya and eight god ranked weapons, be protected by 18 arhats, 33 Buddhist nuns, and 72 Buddha’s warrior attendants...”

Maha Mystery spouted his eloquent speeches and didn’t mind that even he himself hadn’t obtained these yet.

[Chapter 455: The Furious Princess](#)

“Join Buddhism, you can obtain immortality.” Behind Monk Maha, Manjusri Bodhisattva picked a flower in her hand and smiled.

“Join Buddhism, form is emptiness and emptiness is form.” Ksitigarbha Bodhisattva clasped his hands with a serious look.

“Join Buddhism, you can witness 3000 paradises.” Maitreya Buddha patted his big belly and laughed loud.

“You are predestined to join Buddhism!” This time, it wasn’t the persuasion from Maha Mystery, but the sounds from the three Dharmakayas together. He was trying to influence “A Cloud in the Sky’s” mind using his theurgy!

“Gee? Is it real?” This time, Yun Xi had to believe Maha’s words and was slightly interested in it.

“Sadhu! Sadhu! Join Buddhism, you will get rid of all troubles!” Seeing that Yun Xi looked interested, Maha Mystery was delighted and excited.

If Maha could persuade such a sophist to join Buddhism, he would obtain a great benefit.

It would be even more important than his achievement on the Starry Sky Chessboard! After all, he could barely obtain 3 star points, but “A Cloud in the Sky” even defeated that 7 star Cyber Elf Alpha and created the unprecedented Starburst!

Even though Maha only let him feel a bit interested in Buddhism, he could clearly feel that his merits and virtues were increasing rapidly.

How much benefit can I obtain after I succeed? Even just thinking about it, Maha’s body couldn’t stop feeling electrified.

“But... I don’t know much about Buddhism.” Yun Xi felt hesitated. He put down his first chess piece onto tengen.

Monk Maha's body suddenly shivered. A flake of flower dropped from the projection of Manjusri Bodhisattva's hand into Maha's body, a wave of occult Buddhist aura quietly appeared around Maha's body.

"The bodhi tree is not a tree, the mirror does no one reflect."

"Clean and polish frequently, how could there be dust any more?"

"The bodhi tree is not a tree, the mirror does no one reflect."

"The mirror is clear from the beginning, why do we have to clean it?"

"The bodhi tree is not a tree, the mirror does no one reflect."

"Void it has been or is to be, no dust, nothing to collect."

"We can find our bodhi in our hearts, why do you look for it elsewhere?"

"Cultivate following my words, the paradise is right in front of your eyes!"

Yun Xi confusedly listened to the Buddhist allegorical words, and vaguely felt a trace of "Tao" from them.

“Do you mean if a person had the heart of Buddha, he could see Buddha everywhere?”

“Therefore, even if he didn’t know Buddhism at all, he was already a Buddha?”

“Bodhi is in everyone’s heart, and everyone is predestined to join Buddhism?”

Monk Maha spent a smile and nodded.

“Good, you have the heart of Buddha!”

The next second, Maha’s body shivered again and put a serious look on his face.

“Nam-Myo-Ho-Len-Ge-Kyo! What is misery? What is karma?”

“I can give you a sword of wisdom, to cut off all threads of love in the world, so that you could enjoy the endless freedom.”

“I can give you Sharasojyu, so that you can keep your heart clean and be away from any evils...”

“Well...” Yun Xi was suddenly overwhelmed with anxiety. Sword of wisdom? Endless freedom? Sharasojyu? He suddenly had a bad feeling when he heard these words.

No, it wasn't just his delusion. He could clearly feel something in the air changed when Maha said "a sword of wisdom".

As if a lot of eyes suddenly paid attention to this place from nowhere, they made Yun Xi shudder.

"Amitabha!" Even the will that was possessing Maha's body couldn't withstand the gazes of the eyes. It instantly left and let another will take over Maha's body.

"Go west! Go west! The sea of bitterness has no bounds, repent and the shore is at hand!"

"Remember! Go west, not just go to the Western God's Domain!" Maitreya Buddha laughed and winked at Yun Xi, then disappeared in the air with golden lights.

"Hiss!" Maha Mystery gasped after realizing what happened just now.

Just now, the three Bodhisattvas and Buddha possessed his body and persuaded "A Cloud in the Sky" personally!

Gosh! What great luck!

"Pa!"

"Pa!"

“Pa!”

Maha Mystery didn't pay attention to the chessboard at all, and his moves became disorganized. Quickly, he was defeated by Yun Xi with a scared look on his face.

“Benefactor, you are...” Before leaving, Monk Maha tried to make the last effort. However, before he finished his words, the sweat suddenly broke out all over his body and tricked down his back.

A gust of frightening aura suddenly rose up from the chessboard and tightly locked on Maha's body.

“Hum? White?” Yun Xi realized the aura of the abyss. Isn't it the mysterious existence he summoned in his game with Alpha?

“Bald monk... die...” White stared at the monk in front of her and felt uncomfortable. She couldn't stop her killing intention from rising high.

“Amitabha!” Maha Mystery quickly quit the game, running away from the “evil”.

“Why do you come out? Don't you need time to structure your body?” Yun Xi looked at White. Her body was still just a black figure now.

“Humph! I just hate him! I hate bald monk!” White looked angry. If it wasn't because her body hadn't been formed, she had chased after Monk Maha.

As an unknown creature from the abyss, she didn't need any reason to eat anyone!

“You are too childish!” Although Yun Xi understood that White was an unknown creature, he didn’t hate her at all.

Even though she didn’t even have a human formed body, she naturally felt familiar.

The last time he had this feeling was when he met Mumu, the poor girl who ran away from home.

“I’m not a child... why do I have to listen to your homily?” White didn’t understand her emotion at this moment.

What is this feeling?

I don’t even know his name, and he just gave me a name “White”, I was so happy and even chased after him.

I just heard that bald monk’s words, then I felt annoyed and wanted to kill him. Since when do I be so impetuous?

As the princess of the deepest abyss, I shouldn’t behave like this!

I looked like a spoiled child just now!

It was too strange!

[Chapter 456: The Princess of the Abyss](#)

White slept in a very, very deep place.

No sound existed in this place, neither any lights. Even the concept of “existence” was close to “zero” here.

Apart from the endless darkness, it was a world of nothing.

To White, this was the cradle she was going to be born in, and she would be the princess of the dark abyss.

Occasionally, she could hear songs echoed inside her ears.

Sometimes, it was a gentle lullaby.

What is the weakest thing in the world?

It exists for protecting us.

Even the stars in the sky are so beautiful,

They can't make me move my eyes from you.

This is love, because I want to see the same beautiful scene with you;

Because I want to hear the same clear sound with you; because I want to experience the same warm mood with you; therefore, open your eyes, open your wings, my cute child.

Sometimes, it was a jaunty ditty.

The sun comes up in the east, I'm invincible, under the mulberry tree, I make a cradle for you.

I have a tree that can connect the sky and earth.

I have a mountain that can seal demons and devils.

Oh, look! It's a big tree! It's a big tree!

My children, you should cheer, because you are all my babies.

Two mothers, two different songs, but they both contained their love for their children.

Sleep, my child, it's not the time to open your wings.

You are the princess of the abyss, you are the child of the great chaos. When you wake up, you will be the natural Abyssal child.

White didn't have arms and legs, and her figure didn't even look like a human. She could vaguely feel that her body was huge, which was far beyond the imagination of mortals.

Sleep, sleep, my era hasn't come. My real mother and the mother of my body are all gestating me.

Her birth, her real mother had fed her countless sacrificial offerings, forging the most terrible black shell for her using endless demons' flesh and blood.

Her true body was hidden in the safest place in the endless god's domain, in the void where no one could interfere.

She hadn't been born, but could already respond to the sacrifice from some special beings.

She felt curious about the person who tried to summon her, so she left the endless abyss, peeking at this strange world in the darkness.

Then, she saw her strong sister, God Phoenix.

God Phoenix had another mother, the god above gods, Ionia, and the same mother with her, West Queen.

Someone touched the abyss and aroused her from the endless darkness.

She changed to a lot of languages, and finally found the right method of communication.

“You... where are you from? What are you?” The body of the person who summoned her was covered by star lights, so she couldn’t see him clearly.

“I’m from the abyss... I’m the princess of the deepest abyss.” She said in a proud tone. Although she hadn’t been born, she felt proud of her bloodline, her mothers.

“Oh... what’s your name?”

“I... I don’t have a name.”

She felt a bit confused. Why didn’t her mother, the master of chaos, Nyack give her a name? Her sister had a good name, God Phoenix; she wanted a good name too.

“You are the princess of the deepest abyss, but you are friendly. Hum, how about I give you a name?”

Yun Xi didn’t know what a taboo he had touched.

If he summoned her using a black magic, he had to sacrifice thousands of people’s souls.

If it wasn’t because the Starburst on the chessboard, he had no chance to summon her.

“Give me a name? Ok, try it. But, if you can’t make me feel satisfied, I will eat you and let you become a part of the abyss.”

She wasn’t joking. Each of her words was serious and would become the truth of the universe.

If the name couldn’t satisfy her, the abyss would obtain a new sacrifice.

When you looked at the abyss, the abyss was also looking at you.

“The endless darkness, the deepest abyss... hum, I will name you ‘White’, how about it?”

The princess of the abyss felt surprised.

The unknown existence from the darkest abyss.

The absolute power that could overturn all things.

“White” stood for the purest color.

It sounds good!

No, not just good. It is the most suitable name for me!

“White... White... White...”

“Good, I like it. From now on, my name is White.”

From the moment she obtained her name, a strange feeling was aroused in her heart.

She knew she should return to the abyss as soon as possible, because every second she stayed here would consume a lot of her energy.

To her whose body hadn't formed, it was dangerous to stay outside of the abyss.

However, she just didn't want to leave.

Because she was the princess of the abyss, the child of the great master of chaos.

She could do whatever she wanted!

“Remember! You are not allowed to join Buddhism for all eternity!” White waved her black tentacles and threatened Yun Xi.

“Maha is an eminent monk, he means no harm.” Yun Xi felt interested in Buddhism. Actually, if White didn't come, he was prepared to talk about more things with Maha Mystery. The sword of wisdom he mentioned sounded interesting!

If I can use the sword of wisdom to cut off the threads of love between me and my ex-girlfriends, can I successfully get rid of them?

“No, no, you are not allowed to join Buddhism... if you dare to do this, I will eliminate all monks in the world!” When White said that, she was serious and her eyes were full of killing intention.

She didn't like monks from the beginning.

Only dead monks are good monks!

[Chapter 457: Invincible](#)

“I... will keep watching you!” As one of the incarnations of the abyss, White affirmed that he was an interesting man.

Nothing could be better than this as an amusement in her sleeping period.

She wasn't acting like a spoiled child! It must be just a delusion!

Therefore, Yun Xi obtained another special will, the gift from the abyss. It passed through Teacher Casina's body and entered his soul.

He had collected a dozen similar wills after his battle with Alpha.

Yun Xi didn't know how they went into his soul, but he couldn't stop them.

The nature of his soul was at the hero rank, how could he refuse the wills of the legend rank!

Fortunately, apart from White's will from the abyss, all the others were from his opponents on the Starry Sky Chessboard.

No one was hostile to such a strong chess player. Yun Xi could only feel reverence from these wills.

He was too strong on the Starry Sky Chessboard.

Anyway, they did no harm to his body and didn't have any negative effects, after a few tries, Yun Xi gave up and continued to play Star Go.

"Carry him out! The next!"

"Maha Mystery was defeated again!"

"I think no one would have any doubts now."

"7 star points... I never expected that I could see the birth of two 7 star points players in my lifetime!"

"No, 7 star points isn't his end! The game hasn't finished!"

All legend ranked beings looked at the name on the top of the ranking list with an air of wonder.

As for the news that Cyber Elf Alpha had achieved another 50 victories in a row... no one cared about that now.

People had understood that Cyber Elf Alpha's Star Go strength was strong, but she was still not at the same level as A Cloud in the Sky.

If Cyber Elf Alpha was the king of Star Go, then A Cloud in the Sky was the god of Star Go!

All other people were just mortals.

Only here, on the mysterious Starry Sky Chessboard, the legend ranked beings would have this feeling.

All people were waiting for the coming of an unprecedented moment.

Who could stop A Cloud in the Sky?

Or rather to say, what is the limit of successive victories on the Starry Sky Chessboard?

"I have achieved 7 star points?" Yun Xi looked up at the mark of 7 star points above his head. He felt incredible.

Isn't it too easy? Why are there so many 2 star points and 3 star points rookies?

Was it because of the newbie protection mechanism? Is it a bug?

Cyber Elf Alpha's Star Go strength wasn't bad. By analogy, 8 star points and 9 star points chess players must be stronger. Even he had to strive for winning.

Yun Xi had prepared to accept the truth that he couldn't achieve 100 successive victories this time around, and would come back after some hard practice.

"If only determining a person's star points from the number of the person's successive victories, it's really not reasonable." Mei'er also felt that this rule wasn't good.

Of course, no matter what the rule is, as long as it is still a game on the star map, my master won't lose!

Even though my master is still young, he is still the Starchild!

While Yun Xi was lost in thought, finally, his new opponent wasn't just a 2 star points or 3 star points rookie.

It was an opponent who had 6 star points!

"Oh! That pervert!" Skuld screamed when she saw Yun Xi's 7 star points.

“Oh, this is fate...” Urd shrugged her shoulders. Since the game was still continuing, this battle was inevitable.

“We can’t escape from our fate...” Verdandi sighed.

No matter how they predicted it from the past, present, or future, their winning possibility was zero.

The 72nd game, “Norn the God of Wisdom” vs “A Cloud in the Sky”.

“Uh... oh...” Urd looked at the chessboard and was already drunk.

“Sister... don’t emit that strange sound...” Verdandi said in a trembling voice.

“I mustn’t run away! I mustn’t run away! I mustn’t run away!” Skuld cried.

Her sisters became strange. She would become the last fortress, protecting her sisters bravely.

Unfortunately, the resistance of the weak was futile and meaningless in this world.

As the Starchild, Yun Xi was the god of Star Go!

His moves on the chessboard looked simple, but could actually change the orbits of the stars.

No matter what their attitudes were, they were destined to be defeated.

“I concede!” Urd ground her teeth and crossed her legs.

“Ha... puff...” Verdandi covered her face with her hands. Her neck was totally dyed pink.

“I must get revenge! Revenge!” Skuld was the only one who still had the strength to shout.

It was too shameful to experience that feeling again!

After defeating Norn the God of Wisdom again, Yun Xi was in a sunny mood again.

He didn't know the reason, but he felt happy when playing with the God of Wisdom. He was interested in Norn's three distinct reactions.

“It's fun to play Star Go!”

[Chapter 458: 100 Victories in A Row](#)

After defeating Norn the God of Wisdom again, Yun Xi surprisedly found that he saw no new faces now.

Precisely, this trend had appeared after his fiftieth victory, he just didn't find it out until now.

“No 8 star points chess player, neither 9 star points chess player?”

After confirming that he had played with all the other 46 chess players, Yun Xi noticed that the 7 star points Cyber Elf Alpha was actually the strongest chess player he had ever met.

He even had only met one 6 star points chess player, Norn the God of Wisdom.

“Pa!”

“Pa!”

“Pa!”

With clear sounds of putting down chess pieces, Yun Xi defeated the 5 star points “Duke Rome” again.

“Awesome! You deserve to be called the Hand of Starburst!” After being beat down again, Duke Rome didn’t look disappointed, but had said that in a tone of respect.

He had seen too many similar expressions from his opponents after his game with Alpha, and every time he would receive a legend ranked will from his opponent.

It was their respect for the strongest “god” of Star Go. It had nothing to do with right and wrong, but a sense of awe that even the three goddesses of Norn had to admit.

Only Cyber Elf Alpha didn't leave a similar will on the chessboard. It was because of her special attribute. As the cyber god, her power was based on the Planet Quadrant Computers in the Mechanus God's Domain, so she couldn't leave her will on the Starry Sky Chessboard.

"Infinite computing power" was Alpha's advantage, but in some sense, it was also her shortcoming.

"Hum? When did I get those titles?" Yun Xi felt confused.

"The Hand of Starburst."

"The God of Star Go."

"The Saint of Cloud."

"The King of the Sky Tower."

Duke Rome shrugged his shoulders and counted Yun Xi's titles one by one, which gave Yun Xi an impulse to hide into the ground.

These titles are too embarrassing!

He was just playing Star Go in a pleasant mood, how could he obtain these titles that sounded great?

He couldn't be the Hand of Starburst, neither the God of Star Go. He was just good at finding the changes on the star maps, it had nothing to do with himself!

For example, when he played with Alpha, he just found the trend of the destruction of stars and gave them a push. He also didn't expect it from the beginning.

After the destruction, that starfield would obtain a new life. This was the circulation of stars. And the traces of the past stars would forever exist in the star lights at the speed of light.

As long as the starry sky still existed, the memory of stars would never fade away. This was the first knowledge Yun Xi had learned.

"It's a great pleasure for me to be the witness of the first 8 star points chess player, I hope I can meet you again when the next time the Starry Sky Chessboard opens." Duke Rome bowed like a gentleman and disappeared.

Yun Xi achieved 80 victories in a row.

"Why does everyone think that it's such a great achievement? Is Star Go really that difficult?"

Till now, Yun Xi still didn't understand why the other people couldn't see changes on the star map clearly. Apart from the Ruby Dragon, the God of Wisdom and Cyber Elf Alpha, everyone always made a lot of mistakes.

"Yes, it's not difficult. Maybe they just don't understand the orbits of stars. Master, you have great talent on this." Mei'er smiled.

They were bringing about their own destruction to play Star Go with the Starchild!

However, they also gained something from their failures.

Nothing could be better than playing Star Go with the Starchild if one was seeking for the secret of the stars. Master, do you see it? Everyone presented their power of will to master. It was an equivalent exchange actually.

Unfortunately, master can't absorb them now. They are too strong for master's hero ranked soul.

The ninetieth game.

"Casina! Casina! Casina!"

"My honey, teach me how to play Star Go! How did you create the Starburst?"

"If it wasn't because I remember your smell, I would wonder if you are a fake!"

Orfina looked at Casina's body with a look that made Yun Xi feel creepy.

If it wasn't because of the protection of the star lights, he would've run away.

Because of that creepy feeling, his moves on the chessboard also became fast and powerful.

Yes, Yun Xi started his attack. He never wanted to finish a game as quickly as possible like now.

“Gee? No way, you can actually put down your chess piece here!”

“Slow down... slow down, Casina! Don’t be in a rush!”

“Whoa! I’m miserable! I’m miserable! Gosh, how can I lose so fast?”

Orfina felt both painful and happy.

“Casina! I’m going to look for you! Wait for me!” Finally, Orfina moved her eyes from the chessboard and looked at Yun Xi with her glistening eyes, and her announcement made Yun Xi sweat like a pig.

Well... just look for Teacher Casina! It has nothing to do with me!

Yes, yes, that’s it! Yun Xi hypnotized himself.

He achieved 9 star points now!

After that, he could clearly feel the wave of his opponent's respect in each game.

On the Starry Sky Chessboard, the code name "A Cloud in the Sky" had become the symbol of invincibility, just like the "Battle God Casina" in the mystery world the "Battle God's Championship Contest".

The 91st victory! Black Mage.

The 92nd victory! Maple Teeth.

The 96th victory! Hero of Might.

The 99th victory! Norn the God of Wisdom.

Finally, he met that slender girl again.

Cyber Elf Alpha.

After 100 rounds, he won.

He achieved 100 victories in a row now!

[Chapter 459: Soul Jade](#)

In front of Yun Xi, Alpha looked at him grudgingly.

No, she didn't feel bad because she lost again, but because she couldn't use all her strength.

After the game with Yun Xi before, her 15000 times legend ranked computing power had dropped to less than 7000 times, not even half more than the peak value.

Over half of the Planet Quadrant Computers crashed because of overheating, they couldn't work again before some heavy maintenance of several months.

Even so, with half of the Planet Computers, her computing power was still strong enough to beat down everyone apart from Yun Xi, and obtained the opportunity to play with him again.

However, she felt very unsatisfied.

This time, with only half of her computing power, she was defeated quickly.

Even though she had rebuilt her mathematical model again, she still had no chance to win.

It was too bad!

She wanted to enjoy the game, but her hardware configuration wasn't sufficient. It was like a person who finally bought his favorite game, but sadly found that his old computer couldn't run the game.

No, I swear it won't happen again! I must build more Planet Computers using the fastest speed!

“I will go to look for you!”

“I will upgrade to 120000 times legend ranked computing power as quickly as possible!”

“No matter where you are, I will find you and play Star Go with you again!”

Her heart pounded and the antennas on her forehead formed a big heart-shaped symbol. After saying that, Alpha hurriedly left the Starry Sky Chessboard.

This game also became Yun Xi’s last game on the Starry Sky Chessboard.

He had achieved 100 successive victories!

This moment was witnessed by all legend ranked beings in the Sky Tower, God Tower, and Dragon Tower.

Norn the God of Wisdom, Orfina the Ruby Dragon, Black Mage, Duke Rome, Maha Mystery, Cyber Elf Alpha... all chess players looked up into the star-studded sky in their god’s domains.

Countless fireworks rose on the Starry Sky Chessboard, this was a scene only Yun Xi could see. Countless bright stars flew into the air above the Starry Sky Chessboard and demonstrated the circulation of stars.

Destruction and rebirth.

Countless lights crossed and formed a dance of the star river, it was the gift for the unprecedented champion of 100 successive victories.

Being surrounded by infinite star lights, Yun Xi was overwhelmed by an unexpected favour.

At the same time, the rewards of the 100 successive victories were also presented in front of Yun Xi.

They were four doors.

The first door was engraved with countless dragons.

Fire dragon, green dragon, black dragon, special jade dragon, bronze dragon, legendary giant dragon... all kinds of dragons on the door were vivid.

"The Dragon of Order, the Mother of Time and Space, the Master of all Things, the incarnation of birth, life, and death." Yun Xi read the words on the door and somehow, he started perspiring.

No, can it be...

No, change the door!

The second door was emitting beautiful seven-colored lights, which looked similar to the lights in his game with Alpha.

The colors of Earth, Water, Fire, Wind, Light, and Dark mixed on the door and were engraved on a slate, as if they were announcing their master's omniscient power.

"The God Above Gods, the Master of the Seven Colored World, the Host of the Market of Gods and Demons, the Omnipotent One."

This... this is... Yun Xi remembered his dream of stars.

No, not this! Change the door!

Yun Xi had had a very bad feeling at this time.

The third door was made of countless souls. Two gods of death stood on both sides of the door. It seemed that there was nothing under their black cloaks, but it also looked like they contained everything.

"The Root of Pain, the God of Disorder, the Nameless Madam, the Master of the City of Sigil."

No way! Can these doors be all... With his last hope, Yun Xi turned to look at the fourth door.

Endless black sea was roaring, and from time to time, unknown monsters with a thousand eyes and a thousand hands would be born in the sea and fly to one world after another.

“The unknown terror, the Incarnation of Chaos, the Mother of the Abyss.”

Ok, now my four ex-girlfriends are all here. Why are the rewards of the Starry Sky Chessboard the four doors?

“I only want a soul jade!” Yun Xi raised his hand and told the award issuer, although he didn’t know if the award issuer really existed.

“Soul Jade?” He heard a machine-like, unemotional voice. After a while, dozens of soul jades appeared in the air in front of him.

“Hum? Are they all soul jades?” Yun Xi didn’t know what a real soul jade looked like. In fact, before he had heard it from Tacher Casina, he didn’t even know of the existence of soul jades.

“Soul Jade of Four Spirits. A Soul Jade made of monster’s souls. You can make a wish to it, and it will disappear after your wish is fulfilled.”

“Soul Jade of Innocence. You can store your memory in the jade. Even if your existence was totally wiped off from the universe, your memory in the soul jade wouldn’t disappear.”

“Soul Jade of Blood. You can use it as the core of your god weapon. It can be upgraded by killing and finally evolve to be the rule of killing.”

“Soul Jade of Holy Light. Put on this soul jade and you can obtain a light-type talent.”

Looking at the dozens of soul jades, Yun Xi hesitated and finally pointed to the soul jade that was covered with soft white lights.

“I choose this, Soul Jade of Innocence.”

[Chapter 460: The Master of Star Go](#)

“Gee? Master, that isn’t the best soul jade.” Mei’er looked at the soul jade which was emitting warm white lights.

Apparently, the Soul Jade of Four Spirits was the strongest. As long as you keep releasing the power inside it, it could become a super god weapon.

And undoubtedly, the Soul Jade of Blood contained the greatest potential that can keep growing. It could be used as the core of a god weapon of killing, which was quite appropriate to be her master’s weapon. After all, Yun Xi would face more and more crazy trials, the soul jade could keep upgrading and growing in battles.

Even though he didn’t like those two, the Soul Jade of Holy Light was good too. He didn’t need to do anything and just put it on, then he could obtain a top-level light-type talent.

“Yes, it isn’t the best one, neither the most helpful one, but I think it meets Teacher Casina’s requirements.”

“Teacher Casina told me to look for a soul jade that can heal my soul. I don’t think my soul is injured, but if it’s true, I think only this soul jade can help me.”

“Moreover, it has no requirements in its owner’s physique.” Yun Xi said with a tone of confidence.

“You decide your reward, master.” Mei’er nodded her head although she didn’t fully understand.

“Ok, I choose the Soul Jade of Innocence.” Yun Xi pointed to the soul jade.

“Its value isn’t high. As the first chess player who achieves 100 successive victories, you can choose one more.” The unemotional voice told Yun Xi good news.

“Thanks! Then, I want that Soul Jade of Holy Light.” Compared to other soul jades, Yun Xi preferred the Soul Jade of Holy Light, which could strengthen his light-type talent.

“Then, congratulations! You are the first Star Go player who achieved 100 victories in a row.”

“You are titled ‘Master of Star Go’. Before you are defeated, it’s your exclusive title. Only 10 star points chess players can issue you a challenge.”

“You activated the hidden requirement of the Starry Go Chessboard. The rules of star points will be changed.”

“From now on, the star points will not only be based on the number of one’s successive victories, but will also depend on one’s performance in the game. And you will be the only Master of Star Go above 10 star points.”

“Based on the performance of all chess players, apart from Orfina the Ruby Dragon, all 5 star points chess players will be relegated to 4 star points; Norn the God of Wisdom will be relegated from 6 star points to 5 star points; Cyber Elf Alpha will be upgraded to 9 star points.”

“The code names of 1 star point chess players are as follows...”

“The Starry Sky Chessboard won’t appear randomly and will become a normal mystery world like the Battle God’s Championship Contest.”

“The difficulty of the beginner test will be lowered.”

With the sparkling of star lights, the rules of the Starry Sky Chessboard was totally reformed.

Yun Xi’s 100 successive victories and his Starburst activated a special reservation mechanism of the Starry Sky Chessboard.

The stage of the highest wisdom in the endless god’s domains finally actually descended into the world.

At the same time, the Starry Sky Chessboard also recognized Yun Xi’s achievement.

The “Master of Star Go”! Just like Casina’s title “Battle God”, it was a unique glory in the entire endless god’s domains!

“The Master of Star Go? Me?”

“Isn’t that too exaggerated?”

Yun Xi was dumbfounded. He thought that he didn't deserve such a great title.

He didn't think he was that strong, it was because... other people made more mistakes than him. This was the only reason he could win.

Teacher Casina must have expected this, so she sent me to this place. Without Teacher Casina's body, I couldn't even enter the Sky Tower.

"You don't have to be modest. You are the strongest Star Go player."

"Now, all towers are automatically opening to you. You are welcome to come to the Starry Sky Chessboard at any time."

"Master of Star Go."

Somehow, although the voice was still unemotional, Yun Xi felt a little respect from its tone.

Picking up the two soul jades, Yun Xi left the Starry Sky Chessboard. When his feet stepped on the altar again, his mind still didn't recover.

When he finally realized what happened, he was already being surrounded by countless, various messengers.

Some of them were animals such as fat white pigeon, vivid light dragon, and creepy owl.

Some of them were items such as the floating leaf of the World Tree, rattling mechanical puppet, and Eastern style flying sword.

All the messengers were coming to him.

“A Cloud in the Sky”, the legendary “Master of Star Go”, whose rank was even higher than 10 star points!

After the rules of the Starry Sky Chessboard changed, the position of 10 star points was temporarily empty. Cyber Elf Alp was the only 9 star points chess player, then were the 5 star points Orfina the Ruby Dragon and the 5 star points Norn the God of Wisdom.

Obtaining the title “Master of Star Go” meant that Yun Xi had become a legend of the endless god’s domains just like his teacher Casina!

Yun Xi randomly opened several messages and saw impassioned invitations.

“Dear Master of Star Go, I invite you to go to the Sea of Chaos, I’m willing to gift you 10 planets.” The message from Black Mage.

“Casina! Casina! Casina! I love you! Wait for me in the Sky Sword God’s Domain!” The message from Orfina the Ruby Dragon.

“I want to see you.”

“There is something I need to tell you.”

“Badman! I will get revenge!” Apparently, the contradictory message was from the three goddesses of Norn.

“A promise is a promise, after I finish repairing the planet computers, I will see you in the Sky Tower.”
The message from Cyber Elf Alpha.

“Ha ha... I’m not the Master of Star Go! You got the wrong person!” After reading several messages, Yun Xi immediately made a decision.

I will never expose my true identity!

Let “Master of Star Go” become a real tale!
