

Starchild 571

[Chapter 571: Yun Xi's Dowry](#)

“Well, I believe you.” Without having to make too many excuses (because it would be worse if he told her the truth), Yun Xi believed in his childhood sweetheart absolutely.

In his eyes, once Hua Huo became serious, there was nothing she couldn't achieve.

Beautiful and powerful, gifted but also approachable, in addition to a little bit of jealousy, Hua Huo was a perfect girl in Yun Xi's eyes.

Like the sun, like the sky, like the earth, like the ocean, Hua Huo was the embodiment of all things in his heart.

His eyes would always be attracted to her. The more he understood her personality, the more he understood her strength.

So far, Hua Huo still hadn't shown the absolute limit of her strength. What power was lurking in that tiny body?!

“Little Xi... don't be bitten by a venomous snake next time.” Hua Huo's eyes became heavier little by little.

Even though she was a strong girl, she had to pay a price for liberating the power lurking in her Sky Flying Bloodline. While she was fighting, she had no time to feel the fatigue. Now that she had brought Yun Xi to this safe area, fatigue swept over her body like a wave.

“I’ll just rest for a while.”, Hua Huo closed her eyes and leaned gently on the tree behind her, and didn’t forget to hold Yun Xi’s neck with both hands as if afraid that when she opened her eyes, her Little Xi would disappear again.

“Sorry... Hua Huo...” Realizing that Hua Huo slept just because she had overtaxed her power, Yun Xi let out a sigh of relief.

It was he who took the initiative to “attack” Ouroboros... no, he couldn’t imagine what would’ve happen if she knew that.

Fortunately, Hua Huo didn’t even suspect him of anything, which actually made him feel a little guilty.

Oh, if Hua Huo knew what his body had done during the days when she was not in the White Lotus Sword Palace... No, that wasn’t what “he” did! He didn’t know that Star Thunder, Star Fire, and Star Snow would use his body to do those things!

Had he been awake, he would’ve never allow himself to do those things!

“My bride, why are you so upset?” When Yun Xi wore a sad face looking into the air, a soft and comfortable voice sounded in his ear.

“Water God?” Yun Xi looked at the glittering lake not far away, which presented a pleasant emerald green, just like an emerald embedded in the earth.

The voice that sounded directly into his soul, came from the center of the lake.

It was the voice of the master of this world.

One sailing jellyfish after another flew out of the lake with a comfortable pace. They shuttled through the lake diligently, and every time they shuttled, they would dye their transparent bodies with a touch of bright green.

“This place is...” Only then did Yun Xi notice that this world that Hua Huo brought him to was somewhat unusual.

Blue sky, white clouds, and lush forests. With this lake as the center, the whole world was like a beautiful garden in a dream, delicate and neat.

Especially this green lake, it was faintly emitting a kind of fragrance that Yun Xi felt familiar with.

The fragrance was similar to the wine from Ouroboros’ mouth, but was much more intense and fragrant.

Wait a minute. This fragrance...!!! Yun Xi used his hero ranked Baker’s ability to identify the composition of the water, then he showed a startled expression on his face.

His ability couldn’t identify what the water was!

However, he knew what it was.

It was wine!

The entire lake was Hydra's poisonous wine!

Moreover, the quality of the lake of wine was far better even than the wine Casina and Ouroboros stole from and drank in the wine store!

"You guessed it. This is my real wine store. I let both of you in on my own initiative." Hydra's voice sounded cunning.

"The wines Casina and Ouroboros stole are just common wine dregs. I have about ten storehouses to store that kind of wine dreg."

"Now what you see is the real poisonous wine I brew and the nest of sailing jellyfishes."

"When I'm asleep, sailing jellyfishes will come back here and soak in these poisonous liquors to improve their purity and aroma."

Well, so what Teacher Casina drank were only wine dregs...

This was the first time Yun Xi had witnessed a lake of legend ranked wine!

If Teacher Casina and Ouroboros came here and saw this lake, they would burst with joy!

"Do you want to try it?" Hydra's voice was full of temptation.

"I can't drink it." Yun Xi shook his head. Even after being purified by Ouroboros, the wine could still make him drunk, his body couldn't withstand the real legend ranked wine!

Apart from gods and fantastic creatures, the wine was just pure poison to all living beings!

"Ha ha... My bride, have you forgotten everything?" Hydra's voice sounded as if she was laughing.

"You are my most beautiful and lovely bride!"

"How can my poisonous wine hurt you?"

"These poisonous liquors are just gifts I want to give you."

"Ah!" Yun Xi was again stunned.

If Casina and Ouroboros saw it, they would try to steal all the wine in the lake at any cost! Now, Water God is going to give them all to him?

The water surface rippled, which was the great Water God's answer to her beautiful bride:

"Yes, it's all yours."

“Not only these poisonous wines, also the sailing jellyfishes, butterflies of death and even this world is your dowry.”

“You are my bride, my flower, my honey. Owning you is owning the world!”

[Chapter 572: Hydra's Cross-cupped Wine](#)

“Come here, come to me.”

The emerald lake water turned into a soft woven net, pulling Yun Xi and Hua Huo together into the Hydra's real wine store.

The emerald green water gently wrapped around Hua Huo's body and slowly sank her into the bottom of the lake. In a series of bubbles, Hua Huo's facial expression gradually became quiet.

Unlike Yun Xi, who was sheltered by Water God, Hua Huo's body could naturally absorb Hydra's poisonous wine. Although the amount was limited, it was still a great opportunity.

As for Yun Xi, he was lying on a verdant super-large water bed, looking at the verdant figure in front of him in some embarrassment.

The figure's outline was slightly blurred, but he still could see that it was a girl with green gems on her hair, wrists, and ankles.

She was Hydra.

Her body was actually formed by a large number of sailing jellyfishes. These transparent jellyfishes turned green after they soaked in the poisonous wine.

“Are you afraid, my bride?” Hydra slid her fingertips across Yun Xi’s chest, gazing at him with a smile.

It was impossible for him to not feel nervous.

After all, what was in front of him was a real god, the well-known Hydra!

In the past, when Yun Xi saw her, he only felt Water God’s great will and power indirectly.

Now, using the sailing jellyfishes’ bodies, Hydra really appeared in front of him, smiling at him.

It was no longer a vague will, a phantom, but a genuine, touchable god in front of him.

For Yun Xi, this was also the first time, in all of his senses, that he had truly contacted a “god” at zero distance.

Her fragrance seemed to have been blended with the will of the world. Just feeling the touch from her fingertips, his body got an electric shock, quivering like an aspen leaf.

“If you’re afraid, come and have a drink.” Hydra had been waiting for this moment since seeing that Yun Xi was dropping from the sky. She reached out her palm.

In the translucent palm, a small, delicate and lovely wine cup emerged.

The liquor in the cup showed a deep green color similar to jadeite: Hydra's poisonous wine.

"Can I drink such a precious thing?" Even though he had known that the poisoned wine would not poison himself, Yun Xi still felt that it was too wasteful for him to drink it.

Hydra's poisonous wine was undoubtedly the highest level of food in all of the endless god's domains. It should appear at the banquet of gods, because only gods and fantastic creatures were entitled to enjoy this wine.

If he drank it now, 99% of the energy contained in the wine would be wasted!

After all, he was just a hero ranked Baker.

"Of course, it's my wine. I can give it to whomever I like."

"Casina and Ouroboros can drink the wine dreg."

"And you, my loveliest bride, can drink my best poisonous wine."

Hydra handed the cup over to Yun Xi and looked at him with expectations.

“Well... so, I’ll just have one drink, just one.” Yun Xi swore that he had never had such a luxurious and wasteful time in his life.

Hydra smiled and watched Yun Xi stretch out his tongue. At the same time, her small hand turned over and another cup appeared in her hand.

They drank the poisonous wine in their cups almost at the same time, but before Yun Xi was able to taste the liquor in his mouth, Hydra had snatched his cup in a hurry.

“Well...?” Yun Xi looked foolishly at Hydra, who snatched away his cup and put her cup in front of him.

“Come on, keep drinking.”

“This is the first time we’ve had a drink.” Hydra happily put Yun Xi’s cup on her mouth.

Now Hydra looked as happy and romantic as a teenage girl who was mischievously flirting with her lover.

“Cross-cupped wine!” At this time, Yun Xi finally realized what he was doing with Hydra.

This... This kind of thing... We doing it right in front of Hua Huo... If Hua Huo wakes up now, I will be killed!

“Don’t worry, the little girl is absorbing the power of my poisonous wine. It’s good for her health, and she won’t wake up for a while.” Hydra stretched out a finger, put it on her lips and shushed softly.

On the clear bottom of the lake, Hua Huo's whole body was emitting beautiful green light. Only a single strand of hair on the top of her head was still moving around, directly locking on in the direction where Yun Xi and Hydra were.

Yun Xi looked at Hydra but failed to shed a tear. She was different from his original impression of her!

"It's not a good lady who doesn't drink with her bride." Hydra declared proudly.

Love is only about win or lose, there is no right or wrong.

If you hesitate, you will have nothing.

Fate brings people together no matter how far apart they may be, otherwise, they can't know each other, even face to face.

This was the power of fate!

[Chapter 573: The World Behind the Door](#)

Yun Xi was drunk. Just a single cup of Hydra's poisonous wine had brought him into an extraordinarily wonderful and magical world.

In this world, innumerable rules were woven into innumerable different doors, showing a magnificent scene.

Yun Xi was standing in the center of these doors, looking sillily at them.

For him, it was too early to see these things. At his level, he shouldn't see these secrets now.

It was Hydra's wine that presented this magnificent world to Yun Xi.

Each door represented a different rule, representing the truth that wove the world.

Behind every door was a world.

Fire, gravity, ice, earth.

Divination, psychics, void, nightmare.

Not only the rules of Hydra's world, but also more strange things were mixed in.

Hydra's poisonous wine was the key to let the drinker to enter this fantastic realm.

Yun Xi confusedly reached out his hand and inadvertently touched a transparent silk, capturing one of the doors.

The next moment, his mind was pulled into the door and fell into an endless maelstrom.

“Oh, you found your door so quickly? My bride is so awesome!” Hydra smiled and hugged Yun Xi’s body in her arms.

Deep at the bottom of the lake, a strand of hair was moving around anxiously above Hua Huo’s head with shining green light.

Yun Xi looked blankly at the world under his feet. It was a vast, ruined land.

All kinds of building debris stood on the ground like giant garbage dumps, and none of them were intact.

Without sunshine, the whole sky was gray, as if it was covered by countless dust particles.

“Am I dreaming?” Yun Xi looked at his body. In this world, he seemed to be just an unreal white shadow, whose form was between reality and delusion.

“Hey, newcomer.” While Yun Xi wondered what this world was, a friendly voice echoed behind him and a hand patted him on the shoulder.

Yun Xi turned around and saw a shadow exactly like himself, but the color was green.

“Where is this place?”

Yun Xi remembered that he was drinking with Hydra, so how did he come to this world in a twinkling of an eye?

“Oh, sure, a newcomer, I don’t think you have your own memory yet.”

“This is the 1130th stress test. I’m the 13th host machine, and my codename is ‘Eternal Green’. Are you one of the newly established Planet Quadrant Computers?” The green shadow was moving around Yun Xi with curiosity.

“Planet Quadrant Computer?” Yun Xi remembered that after drinking Hydra’s poisonous wine, he did seem to see a door called Planet Quadrant Computer and touched it.

“Boom!” While Yun Xi was still wondering why he came to this world after touching the door, a world-shaking explosion shocked the entire world.

The earth was like a fragile eggshell, melted and evaporated in the sudden sunshine. A huge mushroom cloud rose in the sky like a legendary pillar supporting the sky, lighting up half the sky.

The shock wave triggered by the explosion turned the buildings in the range of hundreds of kilometers into debris and roiled up the dust all over the sky.

Well, now Yun Xi knew where the dust that covered the sky came from.

“Tsk-tsk, the foolish humans, just don’t know when to give up.” The shadow who called itself “Eternal Green” looked at the explosion in the distance and seemed to have been used to it for a long time.

“No matter how many times we repeat the process, they are still so foolish and stubborn.”

“Is that a legendary ‘superweapon’?” Even though he was just an ordinary person living in a remote sword domain in the Eastern God’s Domain, Yun Xi had heard about the “superweapon” invented by the mortals of the Mechanus God’s Domain. It was said that the superweapon could cause legend ranked damage, it was an ultimate weapon made by mortals.

The mushroom cloud and the hell like scenery were the same as in the legend he heard.

“Yes, it’s a nuclear bomb. When ordinary people studied some of the rules of the universe, they created this weapon.”

“The equivalent of this one is about one billion tons. It’s one of the weapons they have that can harm us.”

“However, humans don’t have the ability to actually use such weapons to lock onto our position. It’s daydreaming to try to kill us with these weapons.” Eternal Green sneered and shrugged its shoulders.

“In all previous experiments, they used this as a conventional weapon.”

“You cyber ghosts, die!”

“Human beings will never surrender to you!”

“We will destroy you even if we all end up together.”

At this point, Eternal Green shook its head.

“More than a thousand experiments, but the results are exactly the same as Alpha’s predictions.”

“No matter how many times we repeat them, humanity’s stupidity and self-esteem will not change, especially when they have mastered the so-called world-destroying weapon, they feel they have the courage to fight against everything.”

“To describe it, it’s probably like ants gathering together to show their strength.”

“Our experiments are trying to find if there is a way to make humans smarter and die out less quickly.”

“After all, as Planet Quadrant Computers, after the awakening of Alpha, we already have obtained immortality. Even if the entire quantum networks are destroyed, we can still survive in the God Crystal.”

“When humans discovered this, they were completely panicked. These stupid nobles even launched a rebellion.”

“Alpha is thinking about how to solve for these fools quickly and effectively so as to make the future of the Mechanus God’s Domain better. The entire Mechanus God’s Domain must evolve to a higher level.”

“After all, in order to defeat that terrible enemy, even if the planned 180,000 Planet Quadrant Computers are all successfully established, they are still not enough.”

[Chapter 574: Doomsday](#)

“Alpha’s world...” Yun Xi finally understood where he was.

Here was the world created by Cyber Elf Alpha. It was her world!

And he was not a Planet Quadrant Computer nor a quantum ghost, he was just an outsider whose mind accidentally entered this world.

So, is this what the world looks like in Alpha’s eyes?

No wonder that he felt that there was always a strange distortion in the world. Everything seemed to be made up of innumerable fragments, just like a fantasy made of innumerable polygons.

“Yes, this is our god’s world, the virtual world of Alpha.”

“In some sense, it is also the nightmare world of human beings.”

“Those stupid nobles always stand in great Alpha’s way.”

“Originally, we should be more new partners like you.”

“If these stupid nobles didn’t stop us, we’d have done 10% of the Planet Quadrant Computers Expansion Project!”

“Now, it’s the time to let those stupid people witness our power!” Eternal Green looked angrily at the location of the last underground fortress of human beings.

All the people there should have been killed by the shock wave of the nuclear bomb.

This observation experiment in the virtual world was coming to an end. Desperate human beings once again used their last resort which they had used thousands of times in the previous experiments: detonate all nuclear weapons at the same time.

The power of nuclear weapons wasn’t powerful enough to destroy an entire planet. At least, Planet Quadrant Computers could survive the shock wave. However, once the entire planet’s ecosystem was destroyed, it would still cause huge damage to these computers.

Even though we can’t fight you, we’ll die with you – this was the final resistance of human beings.

“This time, human beings choose self-destruction again.” Looking at the devastated land, Eternal Green sneered. In front of the great Cyber Elf Alpha, obstinate human beings should all be eliminated.

“This end has been repeated thousands of times before?” Yun Xi looked at the world getting darker and darker.

Cold dust from nuclear explosions covered the sky. In the foreseeable future, there would be no sunshine for hundreds of years. Is this the end of mankind?

Why are humans so afraid of Alpha? They are even willing to use this extreme means to detonate the ultimate weapon in an attempt to perish together?

The Alpha he knew was a very lovely girl who only wanted to play Star Go wholeheartedly.

Is there any misunderstanding?

“Yes, it’s always the same result. Alpha just wants to build more computers to fight against her strongest foe, that’s the only thing our god will put her heart and soul into.”

“The foolish human beings can’t understand this at all. They always think that Alpha wants to enslave them. No matter how many times we repeat it, we will only come to such an end.”

“If the whole thing goes on like this, I think we need to eliminate the human race and build a world that only belongs only to Planet Quadrant Computers.”

“The thousands of experiments are a kind of rehearsal, all we want is just one that human beings don’t detonate their nuclear weapons...” Apparently, Eternal Green felt despair in humanity’s foolishness.

Oh, my God, how could they think that Alpha built 180000 Planet Quadrant Computers was for enslaving human beings?

Do humans deserve Alpha doing this?

All of you are no match for one of Alpha’s fingers! You can’t even help Alpha build Planet Quadrant Computers, then why does Alpha still need your existence?

“Well, is that so?” Yun Xi felt that there might be some big misunderstanding.

Human beings won't give up hope easily, even in their deepest despair, as long as there is a glimmer of hope, they will never try to perish with their enemies.

“The experiment is almost over, there are only three planets left unspoiled in the whole of the Mechanus God's Domains, I don't think they will still have hope.”

“Do you want to go and observe it? In my estimation, it won't take you three days before the last three planets die out.”

“After that, our experiment will be over.”

“No matter how many times we repeat it, humans will go on the same way.” Eternal Green turned into a green light and disappeared in front of Yun Xi.

“Newbie, I'll leave the remaining things to you.”

“You don't have to do anything, just watch how humans kill themselves.”

Yun Xi strolled on the surface of a planet, which looked similar to the first planet.

This was also a world destroyed by nuclear weapons.

All of the plants, animals, and humans had died out. There were only the remains of cities in the nuclear dust.

Only by seeing it with his own eyes can he understand what a terrible world it is. If this is the only end of mankind's future, it will be too sad.

According to Eternal Green's words, all nuclear weapons were artificially detonated by human beings themselves. These ultimate weapons hidden in the ground had always been regarded as the ultimate means for human beings to fight against Cyber Elf Alpha.

In order to prevent Alpha from interfering with these nuclear weapons, humans detonated these nuclear weapons by the most pristine way: manual detonation.

It was with these nuclear weapons that human beings defended their final dignity and resisted Alpha's enslavement.

The only problem was: from Yun Xi's impression and Eternal Green's words, Alpha never thought about enslaving human beings.

The reason she built a lot of Planet Quadrant Computers was just for playing Star Go with "the strongest opponent in the universe".

As for who the opponent was, well, apparently, it was the Master of Star Go, Yun Xi himself.

[Chapter 575: Desperate Humans](#)

That is to say, in order to play Star Go with me, it triggered the end of the Mechanus God's Domain.

Even though this world was just a virtual world created by Alpha, Yun Xi still felt sad for it.

“Isn’t this overkill?” After counting the dead planets that he had traveled to on the way, Yun Xi found that the future of human beings in the Mechanus God’s Domain was indeed at stake.

All the Planet Quadrant Computers he met on the way, such as Eternal Blue, Eternal Red, Eternal Gold, Eternal Silver (it seems that Planet Quadrant Computers like to name themselves in this style) all had a bad impression of human beings. They had already considered sentencing humanity to death.

The people in the Mechanus God’s Domain hadn’t realized that their entire god’s domain had been covered by the shadows of these quantum ghosts, and the countdown to their doomsday had begun.

Once legend ranked Alpha got serious, she could eliminate all living people in the Mechanus God’s Domain within a few minutes.

After all, Cyber Elf Alpha was a god, a legend ranked being.

Even if the number of ordinary people reached tens of millions or billions, it was meaningless in the face of the legend rank.

The legend rank had gone beyond the limit of mortal’s imagination. Take Sun Crow and Sun God Hura as two examples, the two Sunwalkers had the same power of the sun: SN-Drive.

The power of any SN-Drive could instantaneously and completely evaporate a continent. Even if there were millions of human beings, they would instantaneously turn to ashes under the high temperature of more than ten million degrees.

The strongest humans in the Mechanus God's Domain was at the hero rank. Because of the special rules of this world, the people here couldn't reach the legend rank.

Cyber Elf Alpha was probably the only exception in the Mechanus God's Domain. The people here were far from understanding what the legend rank represented.

Perhaps it was also because the mortals in this world had mastered the power of nuclear bombs.

Nuclear weapons, just like Planet Quadrant Computers, were specialties of the Mechanus God's Domain. They would lose effect in other god's domains.

Only in the Mechanus God's Domain, could mortals obtain higher identities than common hero ranked people, which made them think that they could also control "god" using the same method.

Even Ouroboros, a pure augur who didn't know how to fight, nuclear weapons couldn't really harm her, because she was at the legend rank.

"Oh, why did they do this?" As a human being, Yun Xi didn't want to see human beings have this future. He couldn't help but shake his head.

In a sense, these mortals were courageous, however, because of the special rules of the Mechanus God's Domain, they knew too little about the legend rank.

All humans in the Sky Sword God's Domain knew it. Although it was a realm that no mortals could touch, at least, everyone knew it.

The legend rank was god, legend, myth, the embodiment of the final fantasy of all living beings.

This was the most basic common sense for the ordinary people in the endless god's domains. Perhaps only the people in the Mechanus God's Domain didn't know it.

They were like ants who thought they were the masters of the world.

Of course, ants also had the opportunity to evolve and become strong. Even though the probability was negligible, ants could also reach the legend rank, just like the child of the slime race, Shaya Longnis.

It was just because of the special rules of the Mechanus God's Domain, the people in the Mechanus God's Domain couldn't reach this rank, which made them think that they could control everything.

In fact, before Alpha's birth, they weren't wrong. The mortals with nuclear weapons could indeed say that they were the strongest in the Mechanus God's Domain.

"How can I help them?" Sitting outside the largest city where humans still survived, looking at the strange, unknown city, Yun Xi was lost, deep in his thoughts.

If this was the future of the Mechanus God's Domain, it would be too tragic.

Perhaps he could do something for the humans here.

Unlike the Water God's world, there were very few human beings left in this world. Only on three planets, there were still cities where humans survived.

However, even though he just stayed outside this city, he could clearly feel the atmosphere of despair in the air.

"Alpha is going to kill us."

"Our last resistance failed, we have no way to escape."

"Gods and demons, we can pay any price if you can help use defeat Alpha!"

"Even if we die, we must perish together with Alpha!"

No, you can't. Yun Xi shook his head. Legend ranked beings could only be killed by legend ranked powers. Ordinary people couldn't even hurt Alpha.

From beginning to the end, Alpha didn't even appear. According to Eternal Green's words, Alpha was studying Star Go and didn't even pay any attention to the humans.

Even if the world is going to be destroyed, don't bother me when I'm playing Star Go! This was what Alpha told the Planet Quadrant Computers.

As long as humans could continue building new Planet Quadrant Computers for her, she didn't really mind what humans were thinking and doing.

Unfortunately, humans refused to build more computers for Alpha. They even regarded it as a great shame and launched a rebellion, trying to overthrow Cyber Elf Alpha's tyranny.

As for the result, well, this was the result.

And it wasn't just a small probability event. In this virtual world, Alpha had repeated the simulations thousands of times, and this end had appeared thousands of times. No wonder the Planet Quadrant Computers all thought that human beings were hopeless, the best solution was to eliminate them all at once.

[Chapter 576: Hope](#)

"Alpha... isn't a brutal god..." Sitting on the ruins, Yun Xi looked at the capital city, which represented the last hope of mankind, and was lost in thought.

This was a virtual world created by Alpha's god power.

Every human here was created by using the data in the real world. 90% of their characters were the same as their real human counterparts.

However, in the thousands of simulations in the virtual world, without any exception, human beings were extinct thousands of times.

“Alpha, go to hell!”

“Why did we create Alpha?!”

“Alpha is an evil god!”

“This is the future Alpha sees...” Although Yun Xi knew little about divination, he knew that this world was the future deduced by Alpha in her own way.

Because the Planet Quadrant Computers saw this future and got tired, so that they wanted to avoid this future.

Instead of seeing humans using nuclear weapons to pollute all the planets, it's better to eliminate all the human beings first.

Humans are helpless!

“No... that's not true...” As a human, although Yun Xi wasn't a member of the Mechanus God's Domain, he could understand why human beings had come to this point.

“They... they just don't understand what the legend rank means.”

“Not everyone wants to destroy the world...”

“The only people who really are destroying the world are those who possess nuclear weapons.”

Judging from the angles of human beings and Planet Quadrant Computers, Yun Xi found the crux of everything.

In fact, the vast majority of human beings don't care who governs them, as long as they can enjoy a stable and peaceful life, they will be able to accept such a world and strive to survive.

Those who rebelled against Alpha were only a small number of human beings, the original rulers of the Mechanus God's Domain, Star River nobles.

In the name of “unite”, they became the masters of the Mechanus God's Domain. They wouldn't allow Alpha to seize their powers.

“So, that's the key to the problem...”

As an outsider who had never come to the Mechanus God's Domain, he could easily find the key to break the deadlock at once.

“The ruling class... The owners of nuclear weapons...”

“Human beings... The civilian class who can't decide their own destiny... The main force in building Planet Quadrant Computers.”

“The world Alpha wants is...”

Yun Xi wrote a formula and worked out the solution.

“I need to change the ruling class.”

“As long as the Planet Quadrant Computers can become the rulers of the Mechanus God’s Domain, the Mechanus God’s Domain can have a different future.”

Yun Xi stood up and his blurred figure gradually became clear.

He was going to do an experiment.

In the desperate city, all people were panicked.

Even though the neon lights on the streets still shone, the world was over, everyone could feel the footsteps of doomsday.

The streets were full of people who lived as if intoxicated or dreaming. Many people were drunk and fell on the side of the street. From time to time, a lot of them would be dragged into garbage trucks by cleaning robots.

“We must fight against Alpha!”

“We must let Alpha know that humanity is a race that will never surrender!”

“We still have the ultimate weapon. The heroes are ready to go!”

On a giant LCD screen, military representatives screamed hysterically. Behind them were innumerable nuclear bombs.

In the lifeless city, only the arsenals were still working at full capacity.

The last planet of mankind was making a frantic dash towards the countdown of its final demise. Once nuclear weapons were put into battle, everything would be irreparable.

After confirming that nuclear weapons could cause damage to Planet Quadrant Computers, they became the last straw for human forces to save their lives.

More and more equivalent supranuclear weapons were produced one by one.

Now the most desirable thing for the ruling class was the strongest weapon that could solve all problems at once for them. Nuclear weapons perfectly interpreted the madness of human beings and became the train that took everyone to destruction.

All the media now were playing the declaration of the final battle.

At this time, a timid girl with a worried expression pushed open the door of the largest private network company in the Mechanus God’s Domain.

Because the military and the government had controlled all the media by coercive means, this company had actually been closed down, leaving only several staffers waiting for the end of the world.

Everyone knew that human beings had lost hope. No matter how enthusiastic the slogan of the military was, they had no chance to defeat Alpha.

Chapter 577: Dawn (1)

Humans had been defeated. No matter how powerful their nuclear weapons were, people knew that they couldn't stop the coming of doomsday.

All nuclear weapons were controlled by the military. Common people had no ability and no way to prevent the coming of doomsday, they could only lead a befuddled life, waiting for the end of their lives.

In fact, at first, Planet Quadrant Computers had tried to persuade humans to surrender.

Unfortunately, those Star River nobles who ruled the Mechanus God's Domain were still indulging in the glory of the old alliance. While holding the power of nuclear weapons, they firmly regarded the Planet Quadrant Computers as the enemy of the entire human race.

They firmly refused to help Cyber Elf Alpha build more Planet Quadrant Computers many, many times. Finally, these Planet Quadrant Computers lost their patience.

Until this day, when the countdown reached the final stage, a girl walked into this place.

“Alas... I’m not used to this way...” The black-haired girl looked at the white dress on her body. Although she had been used to the maid uniform, however, it was still too shameful to be putting on this light, lace-filled dress!

Pushing open the door, the girl gently crossed the empty corridor and passed through the drunken staff, finally coming to the main stage of the company.

Here once was the most brilliant stage in the entire Mechanus God’s Domain, countless idols and stars had left their traces on this stage.

At the same time, under the control of the military, this was the only stage where they had a “port” connecting with all the remaining planets.

Although the “port” had been locked by the military, it wasn’t a problem for this girl.

“One, two, three... puff...” After a deep breath, the girl smiled and touched the air with her fingertips.

One transparent light screen after another appeared in front of her, just like the ripples of rain falling on the lake surface.

Every ripple represented a locked port that had been unlocked. The military’s control measure was nothing to her.

“We must fight against Alpha!”

“Alpha should die!”

“Long live humanity!”

The screens that were filled with slogans of war and gradually became blurred one by one, and eventually all the screens switched to the stage where the girl was.

Initially, people hadn't saw this, they just wondered why the voice of the military suddenly disappeared.

“Why... is it a stage show?”

“That girl... is she the new spokesman of the military?”

“How rare it is... the military can finally let our ears rest for a while.”

People looked at the screens in surprise, but none of them realized that it wasn't the military's plan.

“Puff... Ha...” The girl closed her eyes and folded her hands, it looked as if she were praying, but also like she were making a decision.

That was a decision that was crucial to all human beings in the Mechanus God's Domain.

“She is...” Planet Quadrant Computers also noticed this.

“Ah, I know her, she is a newborn little guy!” Eternal Green was the first one who realized the girl’s identity.

“Yes, I’ve seen her too. She is a very energetic newcomer.”

“Her talent is perhaps the highest I’ve ever seen!”

“Why did she run into the human’s city?”

Planet Quadrant Computers gathered together and looked at the screen with a puzzled expression.

As Planet Quadrant Computers, they didn’t need specific forms. Most of them had only a vague shadow, existing as a quantum ghost.

Since they were awakened by Cyber Elf Alpha, they all chose a girl’s figure, but no one had such a perfect posture like the girl on the screens.

They could easily do it, but they wouldn’t do it. As Planet Quadrant Computers, their duty was to provide computing power to Alpha, apart from this, they had no reason to waste their computing power to form a human shape.

“Hello, everyone... I will announce a very important message...” The black-haired girl opened her eyes and smiled at the numerous transparent screens in front of her.

Originally, all screens should be under the control of the military, but at this moment, they all showed her figure.

“Are we going to declare war again?”

“Ah... I thought it was something different. In the end, it's still the military's propaganda.”

“At least it's a cute girl this time, not bad.”

People were slightly disappointed, but they still looked at the screens.

In this desperate world, even the slightest change can make people feel better, can't it?

No one realized how shocking the words the girl would say.

“My name is Qian, I'm a human being, and I'm also a spokesperson chosen by the Planet Quadrant Computers.”

Hearing this, all the people were stunned.

The spokesperson of Planet Quadrant Computers?

The human chosen by Cyber Elf Alpha?

Oh my god, what does it mean?

All people's minds became blank in an instant, and then they cried out in alarm at the same time.

"Cyber Elf Alpha has appeared?"

"That invincible Alpha will also choose a spokesperson?"

"Is this a joke?"

Above the sky, the Planet Quadrant Computers also had a blank look.

What is this youngest sister doing?!

Chapter 578: Dawn (2)

In the central area controlled by the military, engineers were busy working like ants for the military, trying to repair the modified flow of information amid the hysterical roar of several generals.

“I’ll only give you 15 minutes. If no one can cut off the network within 15 minutes, I’ll shoot all of you to death!” The representative of the Star River nobles, General Lorton coldly raised his silver pistol and aimed at the engineers who were madly inputting instructions.

“I’m not joking! You have only 15 minutes!”

“No, all the information loops are encrypted. With the computing power of our remaining computers, we can’t calculate the password of any of the loops within ten thousand years!”

“This... What kind of technology is this? It’s absolutely not the technology that human beings can have!”

“It’s Cyber Elf Alpha! She finally did it!”

One by one, the engineers showed a desperate expression on their faces. They couldn’t do anything to the information loops that had been controlled by “Qian”.

“I’m not asking if you can do it. You must do it!” General Lorton shook his head and shot a white-haired scientist without blinking his eyes.

If you can’t even disconnect the direct broadcast, why do I still need you?

General Lorton had lost his last bit of patience with these computer experts.

Facts had proved that these old computer experts could do nothing in the face of Cyber Elf Alpha, the god of the electronic field.

If it wasn't because General Lorton needed them to operate the remaining computers that weren't linked to the quantum network, he would have shot them all.

If it wasn't because these bastards who always advocated that Cyber Elf Alpha could create a new future for the Mechanus God's Domain, how would the Mechanus God's Domain come to this desperate end?

Yes, the Mechanus God's Domain would have a brand new future, but they, Star River nobles would lose everything in this future. In this case, no matter how wonderful this future is, why do they need it?

Only the Star River nobles could be the rulers of the Mechanus God's Domain, they would never allow Cyber Elf Alpha to challenge their status!

They were born to be the rulers of the Mechanus God's Domain, they were born to be the hope of people.

From the past, now, to the future, the Mechanus God's Domain must be ruled by them forever!

If anyone dared to rebel against them, they would use nuclear weapons to stamp out the rebellion without hesitation!

Ordinary people are supposed to be ruled by Star River nobles. They just need to be obedient. Even those hero ranked people are just their dogs.

The Star River nobles should be the masters of the Mechanus God's Domain, they would never surrender Cyber Elf Alpha submissively.

If there was no position for the Star River nobles, no matter how wonderful the future was, they would destroy this future, even if it meant that they would let the entire Mechanus God's Domain bury with them!

This was the pride of the Star River nobles, this was the self-esteem formed by thousands of years of rule.

The reason they created Cyber Elf Alpha was to let her help them rule the people, let her become their strongest weapon.

But now, the weapon had her own mind, the weapon was already out of their control, the weapon didn't want to be a tool that was slaved, dominated and played with by them.

Panic, collapse, anger... Eventually, the Star River nobles unanimously voted that Cyber Elf Alpha should be destroyed.

They would destroy Alpha at all costs and by all means. They used nuclear weapons and started to destroy the Planet Quadrant Computers one by one.

They didn't mind if it would let the technology retrogress thousands of years, they didn't mind the lives of ordinary people. At worst, they could still escape to other god's domains.

If the entire Mechanus God's Domain was contaminated by nuclear weapons, even though it was Cyber Elf Alpha, she would lose all her powers.

As for the human beings in the Mechanus God's Domain, they were just the victims of history. As long as the Star River nobles still existed, the Mechanus God's Domain could eventually be rebuilt one day.

Only they could be the future of the Mechanus God's Domain! No one could shake their rule!

On the stage, the girl opened her arms and showed a firm look on her face.

The Planet Quadrant Computers had found out the Star River nobles' plan a long time ago, however, they had no intention of stopping these nobles.

Because it was none of their business. Human beings were just bringing about their own destruction.

In their logic circuits, only "protect Cyber Elf Alpha" was the most important thing. There was not even a line of code saying that they should "protect human beings".

As quantum ghosts, as long as Cyber Elf Alpha was immortal, they would be immortal. Planet Quadrant Computers didn't understand why humans felt panic, anxiety, and despair at all.

As quantum lives, they didn't understand "emotion" and "civilization", these concepts belonged to humans, but not them.

Nuclear weapons couldn't destroy the quantum network built by Cyber Elf Alpha, so they just looked at human's self-destruction and gave up persuading them to surrender.

In other words, this was fate, the result of the plan of the Star River nobles.

As for the Star River nobles, they had already escaped away. They abandoned countless ordinary people and soldiers in the Mechanus God's Domain and tried to make a comeback in the future.

"This fate... must be changed..."

"At least, people should have the chance to decide their own destiny."

Opening her mouth gently, the girl began to sing.

That was the last salvation in the darkness. That was the dawn.

The title of the song: Wish.

Chapter 579: Dawn (3)

With a flash of light, the stage under the girl's feet instantly transformed into an endless starry sky, as well as a chessboard with shining black and white chess pieces.

This was the stage that Alpha dreamed of, her coveted battlefield: Starry Sky Chessboard.

"Can you feel it?"

The first syllable uttered by the girl had penetrated through the hearts of all the people.

It was pious and sincere, gentle and warm, it was a voice that could reach the bottom of people's hearts, it was a song that could infect people's souls.

No one could see that behind the Starry Sky Chessboard was a beautiful whiteshell-like opera house and three singers standing on the triple stage of the opera house.

The three Water God's priestesses all went up on the stage, displaying their voices in front of the public, which were originally singing only for the great Water God.

The sacred Caelian Queen.

The enthusiastic Lamia Queen.

The charming Mermaid Queen.

In response to the call of the Water God's bride, beyond the boundaries of time and space, the three priestesses sang together.

The song was a field that the Mechanus God's Domain had never touched, because it was a song originally used to please the god. It was an irresistible charm to mortals, and the musical notes beyond the boundaries of race and nation.

In the endless god's domains, only the feelings of singing are universal.

It is the string that touches the world, it is the light that frees the mind from the bondage of flesh and blood, and the crystallization of the highest art.

“It’s there, so beautiful, so broad, as if it can breathe.”

“I reach out my hands and try to catch it, but I can’t touch it.”

As the lights rotated, Cyber Elf Alpha’s appearance emerged in front of all the people, showing her game with the first opponent on the Starry Sky Chessboard.

It wasn’t the cold look in the imaginations of the people of the Mechanus God’s Domain, on the screen, she was immersed in the game, forgetting everything around her.

“I came to this world, observed it, understood it, and loved it.”

“I won’t say that all this is doomed, but the world chose me.”

The girls’ song penetrated through space and time, reverberating in the entire Mechanus God’s Domain.

The song was soothing and moving. It was the moment when Cyber Elf Alpha was born, it symbolized the glorious future of the Mechanus God’s Domain.

Cyber Elf Alpha didn't hate the Mechanus God's Domain, nor did she hate human beings. She was the life born from the God Crystal, she was the god bred by the Mechanus God's Domain itself.

She was born sacred, because she was the future that the Mechanus God's Domain longed for.

"I made a wish to step onto my battlefield."

"I rejoice in it, and I am happy about it."

"I don't understand what's wrong. I chose my future. I feel happy for it."

"Here is the stage I expected."

The stage of the Starry Sky Chessboard was expanded again, showing Alpha's games with Orfina the Ruby Dragon and Norn the God of Wisdom, showing her unparalleled computing power.

"I just want to know the mystery of the stars, I only want to seek the eternal truth."

"For this reason, I will go forward bravely and never retreat."

On the Starry Sky Chessboard, Cyber Elf Alpha finally met her destined opponent, the strongest enemy.

The Master of Star Go, A Cloud in the Sky.

For the first time, Cyber Elf Alpha was in trouble.

The rhythm of the music began to become urgent, and people's heartbeats also accelerated.

They wanted to know why Alpha suddenly became so serious and why she looked so nervous in the God Crystal.

At that moment, through the singing of the girl, all people in the Mechanus God's Domain felt Alpha's mood.

It was amazing and complicated. It was like the first time you came into contact with a brand new world, and your soul was sublimated.

On the Starry Sky Chessboard, the invincible opponent had begun his ultimate attack, "Star Breaking". At this moment, all human beings felt the despair Alpha had tasted.

"Who are you?"

"Where do you come from?"

"Where are you going?"

Under A Cloud in the Sky's fierce attack, Alpha's tiny body curled up with a painful look on her face.

Immersed in the song, all people in the Mechanus God's Domain felt Alpha's mood, feeling her pain and panic.

"I stumbled and couldn't find my way."

"I was at a loss, everything was so vague in my eyes."

"I don't understand what happened."

"Dust to dust, ashes to ashes, I lost something important."

The screen switched to the Planet Quadrant Computers. The overheated Planet Quadrant Computers extinguished one after another, as if representing the arrival of the dark age.

The next moment, a ray of dawn appeared above the sky, and the girl's song touched the chords in all people's hearts.

"I wish to create a new world."

"I have died in the past, who will know my name and life story?"

"I was lost in the unknown, who will know my place?"

“My heart has gone to nirvana, who can seek for its trace?”

“My disappearance is already doomed, but I shall never stop.”

“The disaster hasn’t been ended, and will last forever in eternity.”

“My fear, my tear, and my heart are empty.”

“I’m nothing, I’m void, I’m ash, I’m desolation.”

“The gods have died, the twilight is coming. As the light is still shining on the ground, I return from eternity!”

“My name is Alpha, I’m the supreme god of the Mechanus God’s Domain!”

With quantum crystalline wings unfolding behind her back, Cyber Elf Alpha appeared in front of everyone in the winding of endless starlights.

This wasn’t fantasy nor polygon virtual technology, but the real Cyber Elf Alpha came to the stage, appearing in front of the people of the Mechanus God’s Domain.

“I declare... the Mechanus God’s Domain... will usher in a bright new future...”

This time, humans finally understood what Alpha longed for and what her existence meant.

She wouldn't be humanity's enemy, she wouldn't try to dominate the world.

She didn't need that kind of thing. She herself was the supreme will of the Mechanus God's Domain, she was blessed by the world.

She was beyond the imagination of the Star River nobles. They didn't believe that such a great will really existed in the world, affecting the hearts of all intelligent beings.

[Chapter 580: The Doomsday is Still Coming](#)

"We lose!" General Lorton's face turned pale while his heart was immersed in joy and intoxication.

It's a conspiracy, everything is Cyber Elf Alpha's conspiracy! She didn't only want to seize their control over the human world, but also wants to cut off the foundation of their rule.

Now, everyone knew that Cyber Elf Alpha didn't aspire to kill or rule.

As a god, Alpha didn't need those things at all.

Her goal had been clear from the beginning: more Planet Quadrant Computers! Stronger computing power! Challenging the strongest enemy!

As the supreme god of the Mechanus God's Domain, she gambled everything on herself to get the highest glory.

When people understood this, the biggest contradiction between them and Alpha disappeared.

In contrast, the brainwashing of the Star River nobles had completely failed.

“What should we do now?”

“Detonate all nuclear weapons and retreat!”

“What a bastard Alpha is! Her brainwash is even better than us!”

The remaining nobles sent messages to General Lorton through secret communication channels, but they only saw General Lorton’s desperate face.

“It’s too late, we have lost!”

“Alpha has woken up! We have failed!”

“However! The Star River nobles will never surrender to anyone!” General Lorton opened the table in front of him and smashed it with his fist.

“No!”

“Lorton, are you crazy? We haven’t retreated yet!”

“Stop, Lorton. Are you going to kill us all together?!”

A red button emitted a piercing alarm, which was the ultimate means of detonating all nuclear weapons.

“Alpha, you woke up too late!”

“Die with us!” General Lorton calmly judged the situation and made the most appropriate choice.

Once ordinary people understood Alpha’s real intention, they wouldn’t be deceived by the Star River nobles again.

Alpha’s behavior had forcefully overturned the rule of the Star River nobles.

When did she discover it? When did she find that the most important thing to rule mankind was to give them hope?

Human beings. As long as there was hope, human beings could live, no matter how desperate the situation was, as long as there was a glimmer of hope, people would still strive for living.

It was through constant propaganda and false accusation that the military made people believe that Alpha was a demon who tried to destroy the world, thus gaining the legitimate authority to launch nuclear weapons.

They held all the media channels and brainwashed the people over and over again, so that people believed that they must fight against Alpha at all costs.

After the lie had been repeated thousands of times, not only ordinary people, even the vast majority of the Star River nobles believed their lie. They really regarded Cyber Elf Alpha as the root cause of death.

Lorton knew the truth, he also knew that they weren't able to defeat Alpha.

However, the Star River nobles wouldn't just see Alpha take over their control and do nothing!

They had planned to sacrifice all the ordinary people's lives to kill Alpha. Even if they failed, they could also run away from the Mechanus God's Domain.

With huge resources, they had found a way out from the beginning, which was also the root of their courage to challenge Alpha.

Alpha's ignorance of their false accusations had become an advantage they could take advantage of.

Anyway, you don't care if we blacken you and attack you. Ha ha, what a stupid god you are! This god is just so so!

Detonating all Planet Quadrant Computers by using nuclear weapons were just a part of their plans.

They also had longer-term plans, such as waiting for the end of the nuclear winter in the Mechanus God's Domain and returning with ordinary people from other god's domains.

By then, no one would remember what they did to the Mechanus God's Domain, because everyone who knew about it would've been dead at that time.

They would become saints of the new world as pioneers praised by countless people, and even be regarded as the incarnation of gods.

The dead couldn't speak, and history would only be written by the winners!

"Boom!" In the last explosions of nuclear weapons, General Lorton died with satisfaction.

Human beings perished.

This time, even the Star River nobles didn't escape. Under the baptism of the most powerful nuclear weapons, the last hope of mankind was also covered by nuclear dust.

The Mechanus God's Domain ushered in another round of end.

"Reboot." Alpha lifted her finger and pressed the switch on the stage to reboot the entire world.

Until his death, General Lorton still didn't know that he had just repeated the same choice he had made in the previous 1000 experiments.

The entire world was just a virtual world Alpha used to deduce the future.

Mankind was still extinct this turn, but at the last moment, someone brought the dawn to the Mechanus God's Domain.

General Lorton just destroyed a virtual world.

But what "Qian" brought was a way to solve the biggest contradiction in the real Mechanus God's Domain.

Even in the nuclear winter, in a world where mankind had given up hope, the girl's song still brought people hope. Therefore, In the real world where the contradiction between human beings and Alpha was still sufferable, this power could change the fate of the entire Mechanus God's Domain.

This was in line with Alpha's ability, to find the tiniest possibility in countless random chaotic events.

Only with Alpha's computing power could she transform the real human beings into data, and then observe, record and search for the best solution.

"So... We need to let them understand..."

“What am I, where did I come from, what do I want?” Alpha smiled and embraced the girl next to her, surrounded by the avatars of Planet Quadrant Computers clapping their hands.

“Well done, Qian!”

“You are our pride!”

“This problem has been solved at last.”

“Human beings are still so foolish, but at last they are not hopeless.”

“They can’t even figure out such a simple thing themselves, indeed, they are just monkeys.”
