

Starchild 581

Chapter 581: The Power to Save the World (1)

When Eternal Green, Eternal Red, Eternal Blue, and Eternal Gold surrounded Alpha, chattering like chirping birds, a drop of sweat dropped from the girl beside them.

Who can tell me how to escape after saving this world?

Naturally, the girl's real identity was Yun Xi, who accidentally broke into this world after drinking Hydra's poisonous wine.

After stepping across the door and entering this world created by Alpha, his life form had been transformed into a "quantum ghost" in this virtual world, just like all the other Planet Quadrant Computers.

With the special power of a "quantum ghost", he transformed into this appearance, then summoned the three Water God's priestesses in his mist soul army. This was his way to save this world after considering for a long time.

The contradiction between human beings in the Mechanus God's Domain and Cyber Elf Alpha was that they couldn't understand and communicate with each other.

The god's world outlook was quite different from that of ordinary people. Alpha wouldn't specifically tell people why she wanted to build more Planet Quadrant Computers, and even if human beings used the craziest means to resist her, they could do no harm to her.

Alpha only wants to immerse herself in the world of Star Go, apart from the chessboard, she probably had nothing in her eyes. The Planet Quadrant Computers were awakened by her, so they also wouldn't consider the whole thing from the human's angle.

At this time, only Yun Xi, who was a human and also a quantum ghost could break the impasse as an outsider.

The Planet Quadrant Computers couldn't understand humanity's complex feelings and their fear towards quantum lives.

Humans couldn't understand Planet Quadrant Computers' thinking circuits.

Humanity was a whole civilized system based on the relationship among family, clan, and friends.

Planet Quadrant Computers were born to be Alpha's subordinates, they wouldn't question and betray. Naturally, they would regard Alpha's command as the supreme law.

Therefore, they were so dissatisfied after knowing that human beings had disobeyed Alpha's order to build more Planet Quadrant Computers.

From the viewpoint of human beings, the more Planet Quadrant Computers there were, the stronger Cyber Elf Alpha would become, and it would be easier for her to destroy human beings.

In addition, through the military's false propaganda, Alpha had become a world-destroying devil in ordinary people's eyes.

People thought that nuclear weapons could be a deterrent to Alpha, unfortunately, it was just a delusion.

The truth was, even if people destroyed all the Planet Quadrant Computers, Alpha would only lose most of her computing power, but these Planet Quadrant Computers wouldn't die, because their life forms had been transformed into quantum ghosts.

As long as the new Planet Quadrant Computers were rebuilt, they would return. Nuclear weapons just destroyed their carriers.

And this wasn't the most terrible thing yet!

The most terrible thing was that if Alpha got serious, her destructive power was far stronger than nuclear weapons.

As a god, she had hundreds of ways to exterminate human beings.

If the destructive power of one nuclear bomb was 1, then the total destructive power of all nuclear weapons in the Mechanus God's Domain was over hundreds of billions.

However, Alpha's destructive power was " ∞ ", a number that human beings weren't capable of imagining.

The legend rank represents a power that was far beyond the comprehensible range of human beings in the Mechanus God's Domain, it was a force that could even distort "physical laws".

For example, the power of Golden Crow Princess' light furnace (SN-Drive) could destroy the Mechanus God's Domain countless times.

The thermonuclear reactions that occurred on the real solar surface every second were equal to the explosions of hundreds of millions of tons of nuclear weapons.

The largest planet in the Mechanus God's Domain was just a small glass bead in front of the heat generated by the sunspots.

This was the gap between the legend rank and mortals. Moreover, Alpha wasn't a common hero ranked being, she was a hero ranked god!

Calculate everything, deduce everything, as long as she had enough computing power, she was theoretically able to calculate the future.

Alpha's strongest power was her thousands of times legend ranked computing power!

Perhaps now her computing power was limited by the number of Planet Quadrant Computers, but it was enough for her to crush all the legend ranked chess players on the Starry Sky Chessboard.

As for losing to that "person" who hadn't even reached the hero rank... it wasn't her fault.

As a person who understood how strong Alpha was, Yun Xi even somewhat admired these Star River nobles.

Should he say that the ignorant are fearless? They dare to challenge Alpha even though they don't understand the gap between them and Alpha. Fortunately, this was just a virtual world created by Alpha, they could revive no matter how many times they had been destroyed.

In the real world, they wouldn't have any second chance.

Once they released the power of nuclear weapons, the doomsday of self-destruction would become inevitable to all humans in the Mechanus God's Domain.

In fact, nuclear weapons could do no harm to Alpha at all.

For example, if there were millions of ants, they may be able to bite an elephant to death, however, could ants beat down "gravity", "heat" or "electromagnetism"?

To "ants", Alpha was such a "physical law".

Chapter 582: The Power to Save the World (2)

Yun Xi couldn't just watch the human beings of the Mechanus God's Domain looking for their own destruction and do nothing. Therefore, he tried to combine quantum ghosts' viewpoint and humans' viewpoint and got the correct answer that could save the world.

Communication and understanding are indispensable. It doesn't matter even if their world outlooks are distinct, as long as human beings understand what Alpha wants and what human beings have to pay, there will be a basis for equal trade.

In other words, it is the "principle of equal value exchange".

The Planet Quadrant Computers chose the spokespeople from the human race.

Humans understood Alpha's idea through those spokespeople.

As long as the first step was completed, Alpha would have a bridge to communicate with human beings.

In order to accomplish this first step, Yun Xi had to pretend to be these Planet Quadrant Computers' companion, and because Planet Quadrant Computers all chose female appearances, he had to pretend to be the nonexistent girl "Qian". At the same time, he used his song to resonate with human beings, so that he could obtain people's trust.

Well, so far, everything had been perfect.

Even though General Lorton detonated the last nuclear weapons, the dawn of humanity had emerged.

However, that was all Yun Xi had calculated.

He solved the problem of the Mechanus God's Domain, but he didn't think about his own problem after solving it.

Now surrounded by the Planet Quadrant Computers, he was so nervous and perplexed.

"Qian, you are wonderful!"

“The song just now is so beautiful. What is that song?”

“We searched all the databases and there was no data of this song at all!”

“Did you write this song yourself?”

All Planet Quadrant Computers had extraordinary computing power, which was the special ability born under the unique rules of the Mechanus God’s Domain.

When they excluded all the impossible answers, the only correct answer was obtained.

The youngest of them had a sense of “art” that none of them had ever had.

As Planet Quadrant Computers, they could instantly calculate numerous formulas, they can deduce the trajectory of stars, however, only in the field of “art”, let alone Planet Quadrant Computers, even their God, Alpha wasn’t good at it.

This wasn’t surprising, after all, the legend rank didn’t mean “almighty”.

Alpha was a god born for calculating and analyzing all truth, not a god of art.

“New possibilities... song...”

“New branch options... the future of mankind...” Countless data flows flashed through Alpha’s eyes.

“The Master of Star Go... inexplicable Star Go strength...”

“Uncertain possibilities...”

With the goal of “uncertain possibilities”, Alpha finally found that even in the databases of the entire Mechanus God’s Domain, there were still many incomprehensible things.

Art was such a thing that even human beings knew little about it. Even some artists didn’t know why they could create a masterpiece. Art was a realm that was completely different from mathematics.

“I need data... more data...” Alpha had always thought that human beings were dispensable, she didn’t pay much attention to humans, but now, she started to have a little interest in human beings.

Accurately speaking, she had an interest in human’s “art”, including “song”, “music” and “literature”, which were full of uncertain possibilities.

Yun Xi’s song changed Alpha’s impression on human’s art, and also changed the fate of human beings in the Mechanus God’s Domain.

“Qian... sing it again...”

“This time, let’s sing it together...” Alpha gave up on continuing her experiments of destroying the world.

Compared with this virtual world, Alpha wanted to observe the real world, which was full of uncertain possibilities.

If Qian’s song appeared in the real world, what would happen?

Before human beings start to use nuclear weapons, can Qian’s song change the world?

If Qian could do such a thing, she would insert these “uncertainties” into her new formulas, perfecting her algorithm.

In order to defeat “A Cloud in the Sky”, Alpha was willing to try and change everything.

So, try it, if Qian’s power can even affect her, then it can certainly create miracles in the real world!

“Well, the real world?” Yun Xi was dumbfounded.

He didn’t mind pretending to be a girl in this virtual world, after all, it was just a fake world. But... appearing in front of the real people of the Mechanus God’s Domain in this appearance?

What kind of shameful punishment is this?!

“Okay! Let me try!” Knowing that they were going to show themselves in the real world, Eternal Green got excited and began to fabricate her own human image.

Eternal Red, Eternal Blue also began to create their own human images.

Because their god, Alpha was a girl, naturally, Planet Quadrant Computers were all females. Because of the differences in their databases, their appearances were more or less different.

“Qian... According to my database, human beings should all prefer big breasts.” Eternal Green weighed up her papaya-sized breasts with her hands and asked Yun Xi with a serious face.

“No, a flat chest is a status symbol! It’s a precious rarity! This is what recorded in my database!” Eternal Red protested strongly. Her human image was a typical petite and lovely girl, she was born an enemy of Eternal Green.

“I think white legs are the best.” Eternal Blue also joined the battlefield. Her human image had a pair of extremely slender legs, accounting for almost three-fifths of her height.

“Twins are the best!” Eternal Gold and Eternal Silver were Planet Quadrant Computers built together on Gemini stars, their hobbies were naturally different.

Chapter 583: The Power to Save the World (3)

It had been proved that even though the Planet Quadrant Computers looked the same, but, just like there were no two droplets of water the same, they chose different human images for themselves.

Because of the difference in their databases, which was actually the difference amongst different customs and hobbies of different planets, the female images the Planet Quadrant Computers chose for themselves were also full of their own characteristics.

The people that lived on Eternal Green's planet paid the most attention to the beauty of breasts, so she devoted most of her computing power on shaping her perfect breasts.

As a result, Eternal Green had the most perfect "great peaks of art" amongst all the female images of her sisters.

"Perfect!" Eternal Green stood in front of a mirror and appreciated her human appearance.

In theory, she could create an infinite number of virtual images for herself, but she instinctively knew that this image was the real self, it was the only human image in line with her will.

Once this image was formed, she would never change it again, because it would be a mirror reflecting her reality.

She devoted all her energy to the shaping of her breasts, which was the best choice in her eyes!

"Qian... am I beautiful?" Anyway, all of them were Planet Quadrant Computers, Eternal Green didn't mind being naked in front of her "sisters".

"Beautiful... Beautiful..." Yun Xi looked at the naked beautiful woman in front of him and tried his best to restrain himself.

Big tits! This was his deepest impression of Eternal Green.

“Hey, hey! Come and see me too!” After Eternal Green, Eternal Red had also completed the modeling and jumped to Yun Xi’s front.

It was a little girl whose height only reached Yun Xi’s chest. Her face was still childish and her young body was not fully developed.

Her small breasts were like a pair of budding flower buds. On the delicate face, a pair of black and round eyes deliberately showed some timid, pleasant and provocative look.

The slender waist and snow-white skin made her look like a large doll, containing a hint of taboo lure in the purity.

This painting style... is this the preferences of the people living on Eternal Red’s planet?

Are the people of the entire planet all lolicons?! How wicked they are!

A living lure of crime – This was Yun Xi’s impression of Eternal Red.

“Humph... I won’t lose either...” The third Planet Quadrant Computer also finished modeling her image.

At first glance, Yun Xi saw her pearl-like tender toes.

A pair of clean, beautiful and soft feet appeared in front of him. The pink soles were glistening and moist. Five slender toes were neatly joined together and contracted slightly into the center of the sole.

Smooth and round ankles, white and silky soft insteps. These elements combined together and formed a perfect pair of slim feet. Just like Eternal Green's breasts and Eternal Red's petite body, Eternal Blue's legs were also the perfect crystallization of art and imagination.

Finally, the twins, Eternal Gold and Eternal Silver came on stage.

There was no need for a mirror at all, they were the perfect mirror image of each other.

Not only their faces and heights, but even the length of their toes and the curve of their bodies were also the same.

Their graceful, slender bodies were like carved jades, beautiful and vivid.

Through their female images, Yun Xi could easily guess the cognitive characteristics of beautiful women on their planets.

The people that lived on Eternal Green's planet must like big tits, therefore, Eternal Green's breasts were the largest. None of other Planet Quadrant Computers could be compared with her.

Eternal Red's planet must have a lot of criminals, because they liked little girls.

The people lived on Eternal Blue's planet concentrated on women's body curves, especially on their legs. A pair of beautiful feet was the perfect symbol.

Eternal Gold and Eternal Silver's stars were known as the homeland of engineers and programmers. They had crazy hobbies for symmetry and order. Each of them was an incurable paranoid patient. Therefore, Gemini, the symbol of perfect symmetry had become the supreme beauty.

In that case... Yun Xi looked at Alpha's petite body and got lost in thought. Thinking about it carefully, is "loli" the hidden dominate hobby of the Mechanus God's Domain?

"Ah... Ah... I... stretch out my hand." After creating her own human image, Eternal Green tries to open her mouth and repeat the miracle their youngest sister created on the stage before.

However, what puzzled Eternal Green was that even though she used the same frequency and voice as in the record, she couldn't sing the same song as Qian.

Clearly, the data of the song was the same, but her song didn't contain the power of impact on popular feeling.

"It's there, so beautiful... as if it can breathe..." Eternal Red also tried to repeat the data of the song.

No! Anyone could find out that this wasn't the song!

"I made a wish..." Eternal Blue frowned, held her breasts and sang softly.

“I rejoice in it, and I’m happy about it...”

Eternal Gold and Eternal Silver made a melodious sound.

Finally, even Cyber Elf Alpha joined the chorus.

“Who are you?”

“Where do you come from?”

“Where are you going?”

Chapter 584: Preface (1)

“My name... is Alpha!”

At the end of the melody, all the Planet Quadrant Computers, including Alpha frowned with dissatisfaction.

“No, that’s not the song at all!”

Eternal Green folded her arms across her chest and complained.

“Yes, why is it not at all like Qian’s song?”

Eternal Red ran to Yun Xi, looking at him up and down, and even tiptoed to lick his ear tip.

“Qian, can you tell me what’s the secret of your singing?”

Eternal Blue’s slender legs walked to Yun Xi with fascinating footsteps. She was one head taller than Yun Xi and her perfect figure was exposed incisively and vividly when she was asking.

“Why is our song not charming at all?”

“What’s the problem?”

Eternal Gold and Eternal Silver looked at Yun Xi with their pitiful, watery eyes as if they were injured animals, which made him feel guilty.

“Is this art, Qian?” Even Alpha opened her mouth. As the ultimate fantasy of the Mechanus God’s Domain, she felt something confusing from Yun Xi’s song.

Their songs were essentially different from Yun Xi’s song.

From the information recorded in their data, they had completely copied Yun Xi’s song.

It was a complete and perfect replication, absolutely without any errors. This kind of thing didn’t even need their fantastic computing power, any common computers could complete this process.

However, the duplicated melody may not even have one-thousandth of the original effect of Yun Xi's song.

"This... actually... I don't know why..." Yun Xi wasn't lying.

The song "Wish" wasn't only sung by him, but by him and the three Water God's priestesses.

The three queens were the strongest of their respective races. In the Water God's world, they were truly world-famous singers.

Their song was the prelude to the call of god, which had never appeared in the Mechanus God's Domain before.

Computers could record every detail, every note, every turn of their song, but they couldn't record the emotion contained in the song. "Emotion" wasn't something that could be reproduced by data.

Even Alpha couldn't reproduce the emotion contained in the song, not to mention the Planet Quadrant Computers.

"Is it a change in disorder?"

"This song... it doesn't belong to the Mechanus God's Domain..." The light in Alpha's eyes became brighter and brighter.

Unknown, unpredictable... For Alpha whose ultimate goal was to parse all things in the universe, there was no subject more pleasing to her than the “unknown”.

Why Alpha and the Planet Quadrant Computers were indifferent to the human beings in the Mechanus God’s Domain?

Because their computing power had far surpassed that of human beings.

Alpha could even pack the entire Mechanus God’s Domain into a database to calculate, and clearly see the destruction of the Mechanus God’s Domain more than a thousand times.

If it weren’t for the arrival of “Qian”, perhaps the end of the real Mechanus God’s Domain would be the same as that in the virtual world.

For the human beings who were destined to perish, Alpha naturally wouldn’t pay too much attention to them.

She observed only about a dozen of the human’s annihilations and gave all the subsequent calculations to the Planet Quadrant Computers, continuing to immerse herself in the duplicate game with her strongest enemy.

Until Yun Xi sang the song “Wish”, Alpha finally moved her eyes away from the chessboard.

“Qian... I envy you so much...” Eternal Green stared at Yun Xi, and then deliberately straightened up her plump chest.

Now, only the soft breasts could bring her a little self-confidence.

“Whoop... I want this talent too!” It seemed that Eternal Red was going to cry.

“Be good... This is Qian’s unique talent...” Eternal Blue embraced Eternal Red, but her eyes were still full of puzzlement.

Their lives and talents were theoretically all granted by their god, Alpha.

Why does “Qian” have a talent that even Alpha herself doesn’t possess?

“Then, let Qian be the leader.”

“Let’s assist her.”

Eternal Gold and Eternal Silver held each other’s hand.

“Qian, use your song to conquer the world.” Alpha smiled and gave orders to Yun Xi.

Sure enough, do I have to play it? Yun Xi closed his eyes with a helpless look.

Well, in order to save the world, even if he had to do the “shame play”, singing in front of millions of people, he would have to endure it!

A gentleman is one who dares to do what others don't dare to do!

In the Mechanus God's Domain.

In the meeting room of Star River nobles, a lot of projections who had only code names floating above their heads were discussing intensely.

Twenty-four hours had elapsed since the beginning of the conference, which would determine the future of the Mechanus God's Domain.

The topics of the conference included how to fight back against Alpha, how to urgently transform the current way of detonating nuclear weapons, and how to escape from the Mechanus God's Domain if they failed. This conference would determine the fate of Star River nobles and the Mechanus God's Domain in the next few years.

For the sake of confidentiality, all participants didn't use any quantum network, but used the most primitive black-and-white projection to represent their identity.

Number One projection was General Lorton, who held the highest force in the Mechanus God's Domain and was the only person who could control all the troops.

At this moment, the table in front of General Lorton had been cluttered up with cigarette ends.

“Well, that’s the intention for the time being.”

“We humans will never surrender to Alpha!”

Knocking on the table, General Lorton ruthlessly determined to launch the final rebellion against Cyber Elf Alpha.

Chapter 585: Preface (2)

“But... in this way, our influence in the Mechanus God’s Domain will suffer a devastating blow.” Number Two, the businessman who held the power of wealth of the entire god’s domain said in a hesitant tone.

So far, nuclear attack was currently the only proven way to destroy Planet Quadrant Computers, and it should also be able to deal a lethal blow to Alpha.

The fact that Alpha stopped them from detonating the nuclear bombs inside the Planet Quadrant Computers also proved this.

“Is it time to consider this?” General Lorton slapped the table with rage.

“Cyber Elf Alpha has controlled all the Planet Quadrant Computers.”

“Our quantum networks, including satellites that provide energy for Planet Quadrant Computers and planetary power plants are all controlled by Alpha.”

“Now, we still hold the ultimate trump card, we have nuclear weapons in our hands. If we wait a little longer, after Alpha obtains all the power of the Planet Quadrant Computers, she will be able to destroy us effortlessly.”

“Fortunately, Alpha is still addicted to Star Go, this is our last opportunity for mankind!”

“If we fail, there will be no future for mankind!”

The projections whose code names were “Number Three”, “Number Four” and “Number Five” fell into silence one by one.

General Lorton was correct. They were the people who controlled the finances and politics of the entire Mechanus God’s Domain, they could feel the impact of Alpha’s behavior better than anyone else.

Losing control of the Planet Quadrant Computers had caused a huge impact on their original domination of the entire god’s domain.

If Alpha was willing to do it, she could let all the financial and social orders of the Mechanus God’s Domain collapse in the next second.

Only the military system was still unaffected, and this was the reason why only General Lorton still had the courage to fight against Alpha.

“I know all of you are reluctant to give up your immovable property and forces here, but forget about them.”

“From the moment Alpha was born, we had lost!”

“If it hadn’t been for a problem in her thinking circuit, we would have all been eliminated!” General Lorton knew better than anyone how horrible Alpha was.

Without the support of the quantum network, most of the military weapon systems would be scrapped, and only nuclear weapons, the ultimate force that existed before the birth of the quantum network were still reliable.

The military’s trump card, “Mech” would be just big toys without the support of the quantum network.

Ultimately, only the “old-fashioned” nuclear weapons were still trustworthy.

General Lorton believed that nothing in the world couldn’t be solved by detonating a nuclear bomb.

If not enough, then detonate two nuclear bombs.

If still not enough, then detonate more nuclear bombs!

In the era of the Star River Alliance, people produced countless nuclear arsenals, and many of them were manufactured before the birth of the first Planet Quadrant Computer.

The method of detonating these nuclear weapons was simple and reliable: they must be detonated manually.

No matter how powerful Alpha was in the quantum network, she couldn't stop them from using hand-operated weapons!

These legacies of the Star River Alliance were General Lorton's last trump card to fight against Alpha!

"Ah... How did we create such a disobedient dog?"

"I thought she could be our best tool."

"These elves and alchemists had no good intentions! They must have already known that Alpha would get out of control!"

These Star River nobles complained and finally voted.

A total of seventeen members attended the secret meeting, and the seventeen people were the real masters who dominated the Mechanus God's Domain for thousands of years.

Their decision could be regarded as the supreme will of the Mechanus God's Domain, until the birth of Cyber Elf Alpha.

"Well, I will have to let my best descendants study abroad."

"I have people in the Knight God's Domain. Do you want to come?"

“Fortunately, our family has a business in the Dragon God’s Domain. It’s a good place.”

After deciding the fate of the Mechanus God’s Domain, the Star River nobles began to discuss their own way out.

“I won’t go, just leave me alone in the Mechanus God’s Domain.” General Lorton straightened his cap with a determined look.

As the supreme representative of the military, General Lorton was the only person who dared to fight against Alpha.

Whether they would win or lose, he had no intention of surviving. It was precisely because he didn’t even mind dying that he had become the core of all the Star River nobles.

“Lorton, we will leave it to you.”

“In the next few years, you can mobilize all our resources without restriction.”

“You are really... your temperament kills you.”

Faced with such a desperate situation, it was probably only Lorton who dared to gamble everything to launch a rebellion.

Other Star River nobles could only expect Lorton to create a miracle. Unlike them, Lorton didn't give himself any way out.

In a sense, Lorton represented the strongest side of the Star River nobles. He would never admit defeat.

"Ding!" Suddenly, an urgent signal light flashed on General Lorton's table.

"What's the matter? Didn't I say not to let nobody disturb me?" General Lorton looked angrily at the signal light on the table.

This meeting was extremely important. He ordered his subordinate to cut off all external communications. In theory, no one could call him now.

"General, it's Alpha's announcement." It was the voice of General Lorton's subordinate.

"She... she said... she would hold a concert..."

Chapter 586: Preface (3)

General Lorton had prepared for the worst when he heard the name "Cyber Elf Alpha".

This was the last bastion of Star River nobles. In order to ensure that Alpha wouldn't be able to find them, they even used the communication methods from other god's domains.

Now, his subordinate told him that Alpha was making an announcement?

In an instant, General Lorton gloomily imagined the worst situation.

With the control right of all Planet Quadrant Computers, what could Cyber Elf Alpha do?

No one knew it clearer than him.

To destroy the financial, transportation, and even the most basic food, electricity, and water systems of the Mechanus God's Domain were only the most basic means Alpha could use.

Manipulating super-large factories to produce countless combat robots was also a method.

To make the whole thing worse, as long as Alpha used the solar wings (which were used to provide Planet Quadrant Computers solar energy) to irradiate the ground, humans would perish like roasted ants under focusing mirror.

These means were originally mastered by Star River nobles and one of the purposes of building Planet Quadrant Computers was to suppress all potential rebels.

They never imagined that the Planet Quadrant Computers would be the rebels before.

After losing Planet Quadrant Computers, they had lost the control right of the entire Mechanus God's Domain.

If it wasn't because they still had the last trump card, nuclear weapons, they would've already escaped in despair.

After hearing Alpha's name, General Lorton almost immediately pressed the button in front of him to detonate all nuclear weapons in the entire Mechanus God's Domain.

Just hearing the name "Alpha", he felt as if the silver-haired god's indifferent eyes had appeared in front of him, he couldn't stop himself from imagining that all his troops had been eliminated by endless battle robots.

Until his subordinate shouted several times, General Lorton tremblingly loosened his right hand on the button, and his whole body was wet with sweat.

"Concert... concert?" General Lorton said and paralyzed in his seat.

"Ha..." Almost at the same time, the other sixteen Star Rivers nobles also let out a sigh of relief. When they heard Alpha's name, all of them stopped breathing.

When General Lorton pressed his hand on the trigger button of nuclear weapons, their minds were blank and none of them dared to breathe.

Although all of them had voted to fight against Cyber Elf Alpha, none of them dared really say "no" in front of Alpha except General Lorton, who had decided to sacrifice himself to fight to the end.

Avoiding the quantum network mastered by Alpha and starting this meeting were already their boldest means of resistance.

Among the seventeen people, apart from General Lorton, the remaining sixteen didn't dare to reveal their faces and even changed their voices.

"Concert... oh, it's not the ultimatum."

"Confirm that the financial system has not collapsed."

"The traffic system is also functioning normally."

"The star bridge hasn't been closed, we can still leave."

"The solar wing system hasn't turned into the ground attack mode."

After recovering from the shock, the Star River nobles began to make every effort to confirm that Alpha hadn't started attacking.

If they were roasted by the solar wing system before they fled or were blocked by endless battle robot troops, they would have no way to survive!

All nobles collapsed in their seats like General Lorton after making sure that Alpha didn't launch any attacks.

Many people skillfully took out the pills for heart diseases and swallowed them without even drinking water.

For them who were already no longer young, the scares they had had in recent days were so great that none of them had slept well since Alpha seized the control right of all Planet Quadrant Computers.

They had nightmares every day. In their dreams, Alpha always destroyed their lives in the cruelest way, just as they destroyed the lives of ordinary people who dared to fight against their domination.

“Concert? Did Alpha really say that?”

“What does that mean? When was Alpha interested in the concert?”

“How can a disobedient electronic life understand the greatness of human art? It is a blasphemy to human art!”

“We can’t let her succeed, we must firmly oppose it!”

The Star River nobles began to speculate about Alpha’s intentions. Although they didn’t know why Alpha wanted to do it, all of them agreed that they should do their best to stop it.

They must not give her what she wants. Who knows what will happen?

“It’s no use... If Alpha wants to hold a concert... We have no means to stop it.” General Lorton gritted his teeth and looked at the trigger button of nuclear weapons in front of him.

Move! Move now! If I press the button now, about one-third of the nuclear arsenals can explode and blow up more than half of the Planet Quadrant Computers.

No, it's too early. Only one-third of the nuclear arsenals aren't enough to deal a lethal blow to these Planet Quadrant Computers. We must produce more and more nuclear bombs so that we can have the power to fight against Alpha.

In the end, General Lorton didn't press the button.

He was not a war madman. He was a man who fought for the dignity of the Star River nobles and the human race.

Even though he had prepared to die with Alpha, he must wait until the number of nuclear weapons had reached the critical point to strike a deadly blow to Alpha.

Before that, whether Alpha was addicted to Star Go or wanted to start a concert, he had to endure it.

Of course, this was also because he had no way to interfere with Alpha's movements except to endure.

Thus, the curtain to the legend parted.

Chapter 587: Stage (1)

It was a dark world.

People in the entire Mechanus God's Domain, whether they were walking on the road, observing penguins in the far north, or conducting military exercises, they all saw the darkness.

At this moment, all the screens in the Mechanus God's Domain were covered by darkness.

Not only that, as far as the eye could reach, people saw huge projection screens everywhere floating in the sky, the earth, the ocean, and even the depths of the ground.

For the first time, Alpha showed her divine right as a cyber god in front of the people of the Mechanus God's Domain.

"What happened? The screen suddenly went black, did I get a virus?" People tapped the keyboards of their computers, thinking that their computers had been attacked by some virus.

"Hey hey, no, it's my favorite TV show!" In front of the TV, people changed the channel, but no matter which channel they switched to, there was only dark on the screens.

"Pa! Pa! Pa!" The engineers of an underground polar science team tapped their instruments, trying to restore the display devices.

Most people were staring at the huge screens suddenly appearing in the sky, the earth and the ocean at a loss.

This was the largest and unprecedented broadcasting in the history of the entire Mechanus God's Domain. Alpha had put all the projection screens on wherever she could find humans.

All display devices and even the planet itself had become the stage for the concert prepared by Alpha.

In the meeting room, General Lorton stared at the projection screen which suddenly appeared in front of him, his face turned black with rage and his right hand pressed on the trigger button of nuclear weapons again.

“General, we have confirmed that Alpha’s projection has covered the entire Mechanus God’s Domain!”

“She has controlled all display devices, and projection screens will appear wherever there are human beings.”

“We can’t interfere, cancel these projection screens, and we can’t make any changes to the display devices under our control.”

General Lorton was greatly depressed by the news.

Is this the power of a real god?

Showing this power in front of all human beings... is Alpha finally ready to slaughter human beings?

No, I must let Alpha know that human beings will never yield!

I’ll see what the hell is this concert!

“Is this a government program?”

“How much tax do we have to pay for so many huge projection screens?”

“We shouldn’t waste money in this way! I protest!” The people who were forced to watch the huge projection screens began to complain. They didn’t know that it was Alpha’s plan and thought that the government was wasting taxpayer funds for no apparent reason.

In any case, they could not imagine how many people were affected by this emergency.

The darkness lasted about thirty seconds, and then a light appeared. It was a pure white light like the first ray of dawn from the horizon, glorious and sacred.

A girl came on the stage.

She had a delicate face, soft and touching black hair, and her whole body was covered in a light white halo like an elf from a fantastic dream.

In the middle of the white dress, there was a knitted bow. On the soft feet, there were a pair of crystal shoes.

“Hum? Who is she? When did the government change the style of its programming?”

“What a beautiful girl! Is she the new spokesman for the government? The government has gorgeous eyes this time!”

“Well, the tax isn’t being wasted this time.”

People believed that it was just a program of the government, they stopped their footsteps and gazed at the screens.

The girl raised her skirt and greeted everyone with a smile.

At this time, no one thought that this would be the beginning of the legend.

Yun Xi himself also didn’t expect that he would come to this point.

His dream was to inherit the small bread store and marry one of his common childhood sweethearts, not to sing in front of the people of an entire God’s Domain!

What a shame it is! It’s just a punishment, a torture!

He wasn’t singing in front of the virtual people living in the virtual world created by Alpha, but in front of the real human beings in the Mechanus God’s Domain!

People could only see the center of the stage, but he could see the countless screens around the stage.

Through the screens, he not only saw busy cities, but also saw a few tents in the desert, and even a submarine in the deep sea.

Alpha turned the concert into a broadcast to all mankind.

Sure enough, it is impossible for human beings to understand the thoughts of the gods.

In order to save the Mechanus God's Domain, he had no way back!

I'm sorry to letting you see such a bad performance, please forgive me!

The girl stood in the middle of the stage, holding out her hand.

The first light came from the remote border of the Mechanus God's Domain, converging to the girl's side.

It was the sunlight reflected by the solar wing system. Eternal Green stepped on the light and came to the girl's side.

Quickly, the second and third lights were also shining on the stage.

Eternal Red, Eternal Blue, Eternal Gold, and Eternal Silver arrived at the stage one by one.

This stage had become the first stage for the Planet Quadrant Computers to appear in front of human beings.

Every time a female image of a Planet Quadrant Computer appeared, there would be captions on the screens to indicate where they came from.

In the eyes of ordinary people, they thought that they were the spokespeople chosen by the government from different planets.

“Beautiful, they are too beautiful! Look at the breasts!” The people who lived on Eternal Green’s planet were all attracted by her perfect breasts.

Ah, thank the world! Her breasts must be the greatest works of art in the world! This was all men’s thought.

Ah, I want her breasts! How can her breasts be so perfect?! That was what women wanted to know most.

[Chapter 588: The Day of the Legend](#)

When Eternal Red appeared, a large crowd of “gentlemen” cheered.

Wearing a princess dress and holding a small umbrella in her hand, even though Eternal Red did nothing, countless men cheered looking at her.

“Oh, look at her tender little hand!”

“Look at her fragrant and soft face!”

“Ah, I would like to spend my life guarding this lovely little angel!”

Well, the people of Eternal Red’s planet seemed to be a little bit of an anomaly.

Eternal Blue stepped on high heels and came to the stage wearing black silk stockings. Her slender legs attracted countless people’s eyes.

“Oh my god, what is that pair of long legs!”

“Stockings and skirts! It’s a crime!”

“I can eat three bowls of rice looking at this pair of legs!”

Eternal Gold and Eternal Silver stood side by side, holding each other’s hand. They attracted countless programmers’ eyes.

“Symmetry, proportionality!”

“Height, weight!”

“Primes, Truth!”

Well, we have to admit that programmers are strange creatures.

The appearances of the Planet Quadrant Computers chose for themselves, were the embodiments of their planet's aesthetics and world outlook. When they appeared on the stage together, everyone could find the special type they liked.

Big breasts, slender legs, petite body, perfect twins, white dress... no matter what hobbies you had, everything was here.

"It's a great TV show!"

"The government has done a good job this time."

"They should have done this from the beginning! Did the government call these girls to perform a play for us?"

"It's strange, why don't I have even a slight knowledge of these beautiful girls? I have collected all the idols' information in the Mechanus God's Domain!"

People began to talk about the girls on the screens, and most people were satisfied with the government's special program.

In the secret meeting room of Star River nobles, General Lorton roared looking at the screen in front of him, "They... they are not humans!"

How can human beings have such a perfect appearance and temperament?

Especially the girl called Eternal Green, her breasts are totally impossible to exist in the real world! Only in a fantasy world, such a pair of breasts wouldn't sag!

Even if he thought with his toes, he knew that it must be one of Alpha's conspiracies!

He wouldn't be deceived! Compared with the glory of the nobility, beautiful women are nothing in his eyes!

"Hello, everyone. My name is Qian."

Sorry, I will lie to you. Forgive me, the people in the Mechanus God's Domain!

"The girls around me are chosen by Planet Quadrant Computers, we are going to sing a song for you."

"The song's name is Wish."

Yun Xi closed his eyes and started to connect his mist soul army.

In this world, only Yun Xi could see a miracle had started.

Like a white shell, the Water God's Opera House was opening.

One after another beautiful girl surrounded the stage, waiting for the appearance of the three singers.

The Mermaid Queen first went on the stage, as if she noticed something, her face looked very excited and began to hum a strange tune.

"My beloved, what are you doing now?"

"The world is going to be destroyed. Are you going to save it?"

"Raise your white dress in front of countless people! Come on!"

The Queen Lamia was the second singer to appear on the stage. She looked at her best friend and immediately understood what the Mermaid Queen was thinking about.

"Why are you looking at me?"

"Why? Can't I look at you?!"

Well, there seemed to be some kind of sparks splashing between them.

Finally, the Caelian Queen appeared. Although her age was the youngest amongst the three queens, her temperament was the most mature and stable one.

Her eyes glistened with the lights of miracles, and her appearance brought a natural halo of calm, which quickly resolved the contradiction between the Mermaid Queen and the Lamia Queen.

When the three singers came on stage, countless girls cheered and applauded together for the three Water God's highest priestesses.

Among the blessings of millions of girls, the three of them sang together.

At this moment, they were singing only for Yun Xi.

This was the song and melody they had tailored for Yun Xi and Alpha, this was the ballad created by the mist soul army, the one million brides of Yun Xi's together.

This was Yun Xi's "wish"!

This was a miracle that could only be accomplished in the Water God's world, and now, Yun Xi brought it out.

Although he was now in the Mechanus God's Domain, here he existed as a quantum ghost, and the strength of the mist soul army came from the support of the Water God's world.

At this moment, Yun Xi represented the aggregation of different rules of the two god's domains.

In the real world, Yun Xi hardly dared to look at the numerous projection screens, but stretched his body naturally and reached out his right hand to the air.

The next second, a song echoed in the entire God's Domain, even the Planet Quadrant Computers were intoxicated with it.

It was a melody that went deep into the soul, it was music dedicated to the gods, it was the voice of the soul that human beings couldn't resist absolutely.

Endless chessboards appeared in front of people, and a hazy shadow first appeared in front of all the people of the Mechanus God's Domain.

Looking at this figure, people in the Mechanus God's Domain, especially engineers and scientists felt an inexplicable kindness instinctively.

It seemed that this figure naturally possessed some kind of extreme aesthetic feeling, which attracted their attention more than any beautiful woman, just as it interpreted some kind of truth that they dreamed of.

"Can you feel it?"

"How beautiful and ugly the world is."

With a heartbreaking whisper, the most magnificent and dreamlike concert in the history of the entire Mechanus God's Domain was finally played.

In the future, people called this day "The Day of the Legend".

[Chapter 589: The Melody of God](#)

"Bang!" When the first note echoed in the Mechanus God's Domain, countless people felt a sudden throb in their hearts.

They were not engineers or programmers, they couldn't feel the existence of Alpha, but simply moved by the ethereal melody.

In the beginning, only about a third of mankind stopped and stared at the projection screens, then when the melody of the song "Wish" started, almost all people raised their heads and listened to the song carefully.

Not only humans but even the animals in the Mechanus God's Domain looked up at the huge projection screen that suddenly appeared in the sky.

The song "Wish" was truly a song of the soul that could touch everyone's heart, regardless of race, gender and age!

Standing beside Yun Xi, the Planet Quadrant Computers understood this point better than anyone.

What a good song! Why can only Qian sing such a wonderful song? God, why are you so unfair? – Eternal Green.

I want to listen to Qian's song! No matter how many times I listen to it, I won't get tired of it. – Eternal Red.

This melody seems to touch and move the strings in my body. So incredible. – Eternal Blue.

Yes, that's the tremor of the soul.

Yes, that's the sound of heartbeat.

Ah, there are still good things in the human world.

Ah, I love you, Qian! – Eternal Gold and Eternal Silver.

Even General Lorton had to admit that this song was extraordinary.

"Is this Alpha's conspiracy?" General Lorton was accustomed to pressing his right hand on the trigger button of nuclear weapons.

His intuition as a veteran was warning him that something was happening, something he couldn't imagine would completely change the fate of the Mechanus God's Domain.

It wasn't nuclear weapons nor the scorching rays of the solar wing system. It was something stronger and more shocking that was coming.

“Tsk-tsk, I didn’t think Alpha had so many beautiful subordinates.”

“It’s a lovely song, and the girl named Qian is lovely also.”

“Oh, if she isn’t Alpha’s person, I would spend a lot of money to promote her and make her the greatest singer of our God’s Domain.”

Almost all of the sixteen members of the Star River nobles couldn’t help but praise them with more or less murky desires.

No one realized that since even they couldn’t resist Qian’s singing, then what would happen to other people in the Mechanus God’s Domain?

The song, beyond the distance of time and space, continued to reverberate in the Mechanus God’s Domain.

“Can you feel it?”

“How beautiful and ugly the world is.”

“It’s there, so beautiful, so broad, as if it can breathe.”

“I reach out my hands and try to catch it, but I can’t touch it.”

“I came to this world, observed it, understood it, and loved it.”

As the song continued, Alpha’s appearance appeared in countless people’s hearts.

They watched her picking up the first chess piece, fighting for the Mechanus God’s Domain on the highest stage of wisdom.

She was the glory of the Mechanus God’s Domain.

She crushed one legend ranked opponent after another.

Invincible! All-conquering! She was the incarnation of victory!

Twenty victories in a row, thirty victories in a row, forty victories in a row!

Forward, Forward, Forward!

Victory, victory, victory!

“I won’t say that all this is doomed, but the world chose me.”

“I made a wish to step onto my battlefield.”

“I rejoice in it, and I am happy about it.”

“I don’t understand what’s wrong. I chose my future. I feel happy for it.”

“Here is the stage I expected.”

“I just want to know the mystery of the stars, I only want to seek the eternal truth.”

“For this reason, I will go forward bravely and never retreat.”

Alpha’s battle with powerful opponents on the Starry Sky Chessboard were all displayed in front of the people.

The song from the three Water God’s priestesses unfolded this scene in front of them like a scroll painting.

Little by little, people understood what Alpha was. They unconsciously stared at her, eager to know everything about her.

“Win! We must win!”

“We can do it, we will do it!”

“Victory, bring us victory!”

Unconsciously, people naturally imagined that they were the figure fighting on the Starry Sky Chessboard. After all, who would not like victory?

On the chessboard, the girl crushed all her opponents and stood on the top of the endless god’s domains.

She was only one step away from conquering the world.

In front of her, there was only one last mysterious opponent – A Cloud in the Sky.

At this moment, many people suddenly remembered the meaning of the name.

In their hearts, there was a sudden bad feeling.

Because Star River nobles blocked the existence of Alpha, the vast majority of people here didn’t know the particular process of the birth of the Master of Star Go, they didn’t know the fierce battle on the Starry Sky Chessboard.

And those who knew the process instantly understood what would happen on the screens.

For the first time, Yun Xi's song had changed.

This time, it was not the voice of the three Water God's priestesses, but the voice of the real Alpha.

Alpha asked only three questions.

"Who are you?"

"Where do you come from?"

"Where are you going?"

That was her questioning her strongest enemy, the Master of Star Go, and her questioning the meaning of her existence.

In the projection screens, her failure was replayed.

For the first time, Alpha knew the pain of being defeated.

The melody that echoed in the God's Domain also becomes sad. The voice of the three priestesses and the deep melody made countless people burst into tears.

"I stumbled and couldn't find my way."

“I was at a loss, everything was so vague in my eyes.”

“I don’t understand what happened.”

Like the darkness just before dawn, people’s hearts seemed to be overwhelmed by something heavy.

They could only stare at the screens, waiting for something and yearning for something.

Yun Xi responded to their expectations, the three priestesses sang aloud at the same time.

“Dust to dust, ashes to ashes, I lost something important.”

“I wish to create a new world.”

In the screams of numerous current flows, the cooling system of Planet Quadrant Computers was activated, and the girls around Yun Xi transformed back to their original appearances.

Eternal Green – The biggest Planet Quadrant Computer “Star River”, the incarnation of the Capital Star System in the Mechanus God’s Domain!

Eternal Red – the incarnation of the “Saya” system of the Southern Star Field.

Eternal Blue – the incarnation of the “Garden” System of the Northern Star Field.

Eternal Gold and Eternal Silver – the incarnations of the “Gemini” system of the Eastern Star Field and the Western Star Field.

With these five systems as the branches, countless solar wings unfolded and focused on one point, which was Yun Xi was.

The electric power system extracted the power of the earth, connecting the entire quantum network system to this small stage.

A Golden Crystal slowly emerged behind Yun Xi. For the first time, the divine crystal representing the god appeared so directly in front of all people in the Mechanus God’s Domain.

Alpha appeared.

On her small forehead, a pair of precise antennas were slowly unfolding, receiving the thoughts of all mankind.

It was also the first time that people in the Mechanus God’s Domain had witnessed their “god”.

“I have died in the past, who will know my name and life story?”

“I was lost in the unknown, who will know my place?”

“My heart has gone to nirvana, who can seek for its trace?”

“My disappearance is already doomed, but I shall never stop.”

“The disaster hasn’t been ended, and will last forever in eternity.”

“My fear, my tears, and my heart, are empty.”

“I am nothing, I am void, I am ash, I am desolation.”

“The gods have died, the twilight is coming. As the light is still shining on the ground, I return from eternity!”

“My name is Alpha, I am the supreme god of the Mechanus God’s Domain!”

It was the first time that humans in this God’s Domain heard and remembered the real name of their god.

“We are done! We are done!” Looking at Alpha, General Lorton desperately let his right hand go of the trigger button of nuclear weapons.

“So it is... so it is...”

“That’s her purpose, ha ha.”

General Lorton collapsed on his seat as if he was an incurable patient who had given up hope.

“Lorton, what’s wrong?”

“It’s just a song. I admit it’s a good song, so what? Why are you so desperate?”

“Didn’t we understand Alpha’s dominance over the quantum network long ago?”

Other Star River nobles looked at the frustrated General Lorton in bewilderment, wondering what had happened to him.

“Don’t you understand yet?”

“Look carefully, where is Alpha?”

“She... She...” General Lorton raised his pale face and pointed to the spot where the divine crystal appeared on the screen.

As the supreme leader of the army, he knew nothing about Star Go, and he didn't need to know what the meaning was to play this game at all.

While everyone was attracted by Alpha's appearance, only he noticed and realized one incredible thing.

Alpha was on the stage! The center of the civilization of the Mechanus God's Domain!

"Hum? So what?"

"It's just a projection, it can appear anywhere. What are you so surprised?"

"The sights and sounds are good."

General Lorton desperately looked at these idiots who had not yet figured out what had happened.

"Signaller, observe coordinates 0000, the center of the fourth quadrant point and tell me what you see."
General Lorton issued an order to his loyal subordinate.

This observation didn't even require sophisticated instruments. The light emitted by the solar wings were the best hint. If it was in the field of the capital, it could even be observed with the naked eye.

"I find an unidentified object!"

“It’s... it’s... it’s...”

“It’s Cyber Elf Alpha!”

“Coordinates, 0000, above the sky of the capital!”

At the moment when the signaller reported what he saw, most of the nobles in the meeting room didn’t realize what it meant, until Lorton pointed to the tiny figure on the projection screen and said in a desperate tone.

“Alpha is right there!”

“She is right above our heads!”

“She is coming!”

For a moment, the meeting room fell into a strange silence. Even though they knew nothing about military affairs, they understood what General Lorton meant now.

“Wait, can Alpha move?!”

“Didn’t elves tell us that the God Crystal couldn’t be moved, so they had to move the entire planet into our God’s Domain...”

“That... That position! Oh my God!”

Like General Lorton just now, everyone froze.

Alpha wasn't being bound inside the God Crystal!

Alpha could move freely and appear at any place instantly! She had appeared above the capital of the Mechanus God's Domain.

Alpha's true body could easily span the distance of light-years without the need to cross the Star Bridge at all!

It was impossible for nuclear weapons to hurt Alpha!

The Star River nobles finally understood the insurmountable gap between mortals and the legend rank.

Since Alpha's body could move freely to any place, she had made up her last weakness.

No, there was no such “weakness” at all from the beginning!

It was just that they thought nuclear weapons could threaten Alpha's true body.

Now, Alpha told these silly nobles in the simplest way that their plan was just a joke.

Perhaps the power of nuclear weapons could indeed achieve the legend rank.

However, the slow firing speed and fixed trajectory of nuclear weapons were about the same as snails for all legend ranked beings.

They thought that Alpha's true body, the God Crystal couldn't move, so they made this plan.

But now, Alpha's movement told them that it was just a funny joke.

Alpha just took a gentle step, she had destroyed General Lorton's entire plan.

"Abandon the plan of detonating all nuclear weapons."

"We... let's start all over again."

"Maybe... maybe there are other ways..."

"The meeting is over!"

In dead silence, General Lorton suddenly looked as if he had become thirty years older, but even so, he was still the backbone of the Star River nobles.

The plan for detonating all nuclear weapons was officially terminated.

...

On the stage in the middle of the stars, Yun Xi vaguely felt that the trajectory of fate had been changed.

He succeeded.

More than that, after singing “wish”, he seemed to have gotten a lot of other things.

A huge flow of information washed his core as a quantum ghost.

“Great, because of this song, I finally find the meaning of my life!”

“I want to be the best singer!”

“Sister, I love you!”

“Sister, I will work hard to become an idol!”

“Songs can create such a miracle! I want to have that glory!”

Why can I hear so many heartfelt wishes of girls in the Mechanus God's Domain? Yun Xi felt both amused and annoyed.

Sorry, if you knew the truth, you would be disappointed.

"Well done, Qian!" Alpha's hair was twisted with innumerable golden glows. They were the flows of information she received, which were hundreds of times more than Yun Xi had received.

The antennas on her forehead recorded the innumerable heartfelt wishes of people who were watching the projection screens.

This was a miracle that only Alpha could do. It was equivalent to opening hundreds of millions of threads at the same time and processing hundreds of millions of events in parallel.

Now, Alpha knew what she needed to do before she could fulfill her wish.

[Chapter 590: Disclosure](#)

"Establish the archives."

"Schedule the sequence."

"From coordinate 1 to 100, there are 3.65 billion human beings."

"From coordinate 101 to 200, there are 5.734 billion human beings."

“From coordinates... to... there are 4.6 billion human beings.”

Numerous data streams flashed through Alpha’s eyes like waterfalls, showing her unique side as an electronic god.

No one could imagine that in just a moment, she had set up new archives for all the people who watched the concert.

It wasn’t the data files in the quantum network database that just collected people’s occupations, hobbies, interests, ages, and gender, but the perfect files that were close to 100% real.

With this data, Alpha had indeed taken another important step towards her goal, “omniscient and omnipotence”.

As the most complex and smartest race in the Mechanus God’s Domain, human beings yearn for the existence of “omniscient and omnipotence”. Alpha’s birth responded to this expectation.

However, compared to being ordered by humans, this “omniscient and omnipotence” incarnation of science preferred to play Star Go, which was out of the expectation of the Star River nobles.

They created Alpha, but they couldn’t control Alpha.

“The third sequence of files, all completed.” It took Alpha a dozen seconds to get all the data of billions of human beings.

Even if one hundred legend ranked existences worked together, they couldn't do it as easy as Alpha. But Alpha's computing power was 10,000 times stronger than any other legend ranked beings, so she could do it as easy as pie.

That was why Alpha didn't particularly care about human beings. Compared with the battles on the chessboard, it was too easy to solve human beings.

The virtual world Yun Xi entered before only used a small part of Alpha's computing power, it was just a cradle for newborn Planet Quadrant Computers.

However, even Alpha didn't expect that "Qian" would appear to save the world.

"You're an immeasurable variable."

Alpha slowly stepped out of the God Crystal and walked towards Yun Xi step by step.

Oh, I have an ominous presentiment... Looking at Alpha's curious and expectant eyes, Yun Xi felt his head hurt.

"Tell me."

"Where are you from, Qian?"

“What are you?”

“Where are you going?”

Since her birth, Alpha had only encountered two special people she couldn't compute.

The first was “A Cloud in the Sky”, and the second was “Qian”.

All of her data showed that human beings were hopeless.

The Star River nobles had a 100% chance of destroying human civilization, and logically, after the extinction of human beings, she could rebuild the Mechanus God's Domain at a faster speed, so she didn't do anything to avoid this future.

After all, the Planet Quadrant Computers could build new Planet Quadrant Computers themselves, humans weren't indispensable. Moreover, Alpha didn't need a human's faith like other gods, she was a god that belonged to “science”.

The source of her power was from “Planet Quadrant Computers” and not “humans”.

Since she didn't need humans, she wouldn't waste her power to save the humans in the Mechanus God's Domain.

However, Qian's appearance changed this future.

Her song touched all Planet Quadrant Computers and Alpha's hearts.

So, human beings also had "art", which even she didn't fully understand.

In this way, human beings had the meaning of existence.

It was just one person's song that had changed the fate of mankind.

"I... I am..." Yun Xi said haltingly and didn't dare to look at Alpha's face.

"Qian isn't your real name."

"I didn't name any newborn Planet Quadrant Computer 'Qian'."

"Can you tell me your real name?"

Other Planet Quadrant Computers also ran to Yun Xi and surrounded him with curiosity.

"Isn't Qian a Planet Quadrant Computer?"

"No wonder all of us can't sing like Qian at all."

“Where did you come from, Qian? You clearly have the same smell as us.”

Yun Xi felt as if he was sweating, but quantum ghost couldn't sweat!

No, I can't say, I won't tell you my secret!

“Even if you don't tell me your identity, I can figure it out.” Looking at Yun Xi, Alpha suddenly showed a mysterious smile.

“Exclude all the impossible answers, no matter how dubious the remaining answer is, it must be the truth.”
