

Starchild 591

Chapter 591: Direct Connection (1)

“From your body, I can smell something unusual.”

“Unpredictable, making me feel surprised.”

“Accidents, pleasures, excitement, impossible variables.” Alpha pointed out Yun Xi’s characteristics one by one.

Yun Xi grinned bitterly and thought that if he should reflect on it.

However, he wouldn’t talk about his biggest secret!

Keeping silent was Yun Xi’s only means of resistance.

“Qian, it’s a good name. Is it your real name, Master of Star Go?”

Looking at Yun Xi, Alpha’s eyes became brighter and brighter.

Apart from the time when the Mechanus God’s Domain was first discovered and connected to the star bridge system, legend ranked beings rarely entered this god’s domain.

The rules of this god's domain were unkind to supernatural powers, therefore, apart from alchemists, there were rarely outsiders coming to visit this god's domain.

If elves didn't discover the potential of this god's domain and bring the God Crystal here, the Mechanus God's Domain might be able to create an artificial intelligence themselves, but it would be many years later after the science here reached a critical point.

This god's domain had no connection with the vast majority of supernatural powers, the legend ranked beings Alpha had met were all from the Starry Sky Chessboard.

Who was the strongest player on the Starry Sky Chessboard?

Who was a mystery that even Alpha couldn't calculate?

After excluding all impossible answers, the only remaining one, no matter how incredible it was, must be the correct answer.

There is only one truth.

"Yeah, she's the Master of Star Go!"

"Alpha's strongest opponent!"

"Even with 10,000 times legend ranked computing power, Alpha can't defeat her!"

After getting the answer from Alpha, all the Planet Quadrant Computers looked at Yun Xi as if they were going to eat him.

For them, Alpha was their god, their supreme master.

Now, they knew that Qian was the Master of Star Go who had once defeated their god.

In an instant, Qian's status was upgraded from the youngest sister of all Planet Quadrant Computers to the same great existence as Alpha in their hearts.

“...”

Yun Xi looked around and just didn't speak.

Unfortunately, his silence didn't mean that Alpha had no way to deal with him.

“Now... your form is a quantum ghost...” Alpha showed a mysterious and pleasant smile on her face, which gave him an ominous presentiment.

“Oh, it's true!” Eternal Green's eyes sparkled as if they had discovered a new world.

“No wonder that we couldn't find her true identity.” Eternal Red blushed and stood on her toes.

“Oh... In that case...” Eternal Blue licked her lips and her eyes became dangerous.

“Well, we won’t let this opportunity go.”

Eternal Gold, Eternal Silver held each other’s hand, approaching Yun Xi together with others.

What are you doing?

I protest! I have the innate rights of a man!

Don’t come over here! What do you want to do?!

“Let me do it first!” Eternal Green pulled out a green transparent thread from her hair.

Following closely, Eternal Red pulled out a red crystal thread from her hair.

Eternal Blue smiled and gently pulled out her long blue thread.

Eternal Gold and Eternal Silver pulled out their twisted pairs, gold and silver colors glittered in the air.

The last one was Alpha, whose thread showed ever-changing, magnificent colors, as if it contained all the colors in the world.

“This... This is...” Yun Xi was flabbergasted looking at them.

“Let’s do a direct connection.” Eternal Green closed her eyes and was the first who connected her thread with Yun Xi’s body.

Direct connection – it was the unique way of communication for Planet Quadrant Computers, and the most efficient and direct way of communication in the world.

Connecting Yun Xi’s body with a “thread” represented that they had opened up their minds to Yun Xi, allowing him to browse all their data.

Even for Planet Quadrant Computers, they rarely used this direct connection. Apart from Alpha, they had never been directly connected to other Planet Quadrant Computers before.

The green thread touched Yun Xi’s quantum ghost body, and Eternal Green’s body suddenly shivered, emitting a sweet and moving groan.

What is this?!

Why is the feeling totally different from when I connected with Master Alpha?

When they connected with their god, they could naturally feel quiet and peaceful. Their self-consciousnesses were all awakened by Alpha. In a sense, they were Alpha's daughters.

However, the feeling of being connected with "Qian" was like their blood was boiling and their hearts were pounding.

But... she was a Planet Quadrant Computer! She didn't have blood nor heart!

"Ah... ha... no, that's too bad!" Eternal Green whimpered like a small animal as her whole body trembled.

"Let me do it!" Eternal Red was the second who directly connected with Yun Xi, and her performance was even worse than Eternal Green.

"Why... oh... no, no! Something hot is coming!"

"What is this... mikamika!" Emitting a confusing, lovely voice, Eternal Red's little body was about to curl up into a ball.

For her, the stimulation was too great.

"As I expected... you are special..." Eternal Blue cast a meaningful glance at Yun Xi and also joined the direct connection.

Three seconds later, Eternal Blue's eyes changed. She gazed at Yun Xi with a confusing but also enjoyable look, which was warm and moving.

Chapter 592: Connections (2)

Eternal Gold and Eternal Silver's fingers crossed, they connected their threads with Yun Xi's body nervously.

Soon, their faces turned red and their feet were shaking slightly. Finally, they collapsed together on the ground and covered their skirts with their hands.

"This... This..."

"Very bad... Ah!"

Almost the same whimper came out of the two beautiful girls' mouths, as pink appeared quietly, touching on their snow-white skin.

So far, all Planet Quadrant Computers had fallen into the pleasant feeling of connecting.

Yun Xi found that it was hard to tell about his sufferings. He was not a Planet Quadrant Computer, how could he have the so-called "direct connection" ability?

But the truth was, Eternal Green, Eternal Blue, Eternal Red, Eternal Gold and Eternal Silver actually connected directly with him!

Therefore, Yun Xi saw their past and present lives.

The first was “Star River”, the Planet Quadrant Computer that located in the central star field of the Mechanus God’s Domain, who was also the first Planet Quadrant Computer Yun Xi had met, the confident young girl whose code name was Eternal Green.

Her birth symbolized the first contact of the Mechanus God’s Domain to the realm named “quantum”. After many upgrades, her computing power was always the strongest amongst all computers.

Her database recorded all the historical changes of the Mechanus God’s Domain.

All kinds of intrigues, tricks, betrayals were faithfully recorded in her database. As the first Planet Quadrant Computer, she had seen too many ugly aspects of human beings, and naturally she didn’t like humans.

General Lorton wasn’t the first who tried to use nuclear weapons. Even looking at the numerous plans recorded in Eternal Green’s database, It was hard to accept that the people in the Mechanus God’s Domain had made so many plans to exterminate themselves.

Perhaps that was why Eternal Green was so cynical.

Compared with her, the second Planet Quadrant Computer, the “Garden” system in the northern star field was more stable.

After learning from the experience of building the first Planet Quadrant Computer, “Star River”, humans built her in a militarized zone in the northern star field.

Yes, Eternal Blue was built by the military, most solar wing systems were under her control.

Her betrayal was a real lethal blow to humans. She controlled all the “Mech” in the Mechanus God’s Domain, her betrayal directly cut off the sharpest blade in human’s hands.

More than 90% of “Mech” were placed in the northern star field, fighting against the Star Beasts that occasionally invaded the Domain.

The strongest Mech may not be as destructive as nuclear weapons, but their speed and maneuverability were far stronger than nuclear weapons. The Mech carrying nuclear weapons were the strongest force in this Domain.

However, these complex war machines were all equipped with the subsystem of the Planet Quadrant Computers, otherwise, their own computing power wasn’t strong enough to support them to fight alone in outer space.

After the awakening of the Planet Quadrant Computers, Eternal Blue took over the military’s supreme force directly, which was one of the greatest factors for the Star River nobles to become desperate.

Without the help of the Planet Quadrant Computers, how could human drivers control their Mech’s alone? Eternal Blue looked mature and kind, but in fact, she was the absolute fatal blow to humans.

Compared to Eternal Blue, the planet Eternal Red was on was the center of arts and culture of the Mechanus God’s Domain. Her Planet Quadrant Computer “Saya” recorded almost all cultural works of the southern star field.

Eternal Red was the perfect image in the minds of many artists and writers.

Pure, innocent, unaffected by the darkness of the society, like an angelic girl.

Finally, there were the Gemini Planet Quadrant Computers, code-named "Double Stars". They were the latest models established. Their respective computing power might be inferior to Eternal Green, but when they calculated together, they were the fastest computing system, carrying half of the computational complexity in the Domain.

Together, they dominated the entire quantum network and controlled the power, agriculture, water conservancy and logistics channels of the entire Mechanus God's Domain.

As long as humans dared to fight against Alpha, they would collapse the transportation, logistics and even agriculture of the Mechanus God's Domain.

In the highly developed society of the Mechanus God's Domain, no one still grew their own fields, people left all the work to the Planet Quadrant Computers, there were Planet Quadrant Computers who provided human beings with a variety of food and raw materials.

What human beings were good at was cooking, farming had long disappeared in the history of the Mechanus God's Domain.

Without the food provided by Planet Quadrant Computers, people couldn't even feed themselves. They were accustomed to being looked after by computers. If they lost their computers, they couldn't even survive, not to mention to fight against Alpha.

After browsing the database of all Planet Quadrant Computers, Yun Xi once again confirmed that his choice was correct.

There was no need to use weapons at all. As long as all Planet Quadrant Computers shut down, the social order of the humans would collapse within seven days, and half of them would die within a month.

This was the situation in the Mechanus God's Domain. People who relied too much on the power of Planet Quadrant Computers could no longer adapt to society without the support of Planet Quadrant Computers.

Is such a world normal?

In the Sky Sword God's Domain, people still lived a self-sufficient life. Most people didn't even leave their houses and go more than 100 kilometers away in their lives, only a few people would travel to other god's domains through star bridges.

Compared with the Mechanus God's Domain, the civilization in the Sky Sword God's Domain seemed too old.

However, in the ranking of "seven towers", the Sky Sword God's Domain was only inferior to the legendary Kunlun God's Domain amongst all god's domains.

There were seventeen legend ranked Sky Swords in the Sky Sword God's Domain, however, there was only one god in the Mechanus God's Domain, Cyber Elf Alpha, a new god who was just born not long ago.

Chapter 593: Connections (3)

If we only looked at the number of human beings, the total population in the Mechanus God's Domain was probably ten times more than that in the Sky Sword God's Domain, and the size of the Mechanus God's Domain was only one tenth of that in the Sky Sword God's Domain.

With the support of Planet Quadrant Computers, the land of the Mechanus God's Domain could feed a hundred times more people than the land of the Sky Sword God's Domain.

However, once without the support of Planet Quadrant Computers, the Mechanus God's Domain would begin to self-destruct, which was exactly the opposite of the situation in the Sky Sword God's Domain.

No matter if there were Sky Swords or not, people in the Sky Sword God's Domain lived a self-sufficient life.

Theoretically, Sky Swords were the masters of the Sky Sword God's Domain. In fact, most Sky Swords never interfered with any affairs in the Sky Sword God's Domain but left everything to local forces such as White Lotus Sword Palace and the Great Xia Empire for autonomy.

Without Sky Swords, the people in the Sky Sword God's Domain could still live peacefully, however, without Planet Quadrant Computers, the Mechanus God's Domain would collapse completely.

Understanding the difference, Yun Xi felt that people in the Mechanus God's Domain should get rid of their dependence on Planet Quadrant Computers. At least, so they wouldn't starve themselves to death in this case.

He could save the Mechanus God's Domain one or two times, but he couldn't always help them. If people always looked for their own death, he had no way to help them.

He sincerely hoped that human beings in the Mechanus God's Domain would learn how to get along well with Planet Quadrant Computers, recognize Alpha's existence and stop thinking that they were the only ruler of the universe.

This had long been proved that it was just a delusion. In the infinite god's domains realm, there were innumerable races who were smarter and stronger than human race.

The only advantage or feature of human beings was "average".

Average intelligence, average strength, average agility. The human race was the only race in the endless god's domains who didn't have any shortcomings neither super abilities.

Humans could adapt to the environment in any god's domains and survive, this was probably the characteristic of human beings.

Gods, demons, Sky Swords, fantastic creatures... human beings could believe in anything and adapt to anything. The people in the Mechanus God's Domain didn't understand Alpha, but they were just a special case.

In other god's domains, people would choose a strong existence as their belief, whether it was a god, a devil, a Sky Sword, a fantastic creature, or a legend ranked human being.

In the Sky Sword God's Domain, Sky Swords were the highest force.

Why is the land in the Sky Sword God's Domain presenting a sword-like shape? Because the legend ranked power of Sky Swords distorted the rules of the universe, embodying its own essence.

Perhaps the future of the Mechanus God's Domain was to integrate humans and computers, evolving towards an extraordinary realm.

Since the moment people chose Planet Quadrant Computers, this future had been doomed.

Soon or later, Alpha would be born in the Mechanus God's Domain. She was chosen by the Mechanus God's Domain.

After accepting the large amounts of information, Yun Xi felt as if he had watched the history of the entire Mechanus God's Domain.

Ah, it's an excellent history lesson! Yun Xi opened his eyes and saw...

The cornerstone of the civilization of the Mechanus God's Domain, the Planet Quadrant Computers representing the highest crystallization of wisdom in the entire Mechanus God's Domain, were all wrapped around him in a naked manner.

Eternal Green straddled on his body, her big breasts were almost close to his mouth, and her soft breasts almost squeezed out all of his breath.

In addition, his left hand was held by Eternal Red, and his right hand was grasped by Eternal Blue. His feet were entwined by Eternal Gold and Eternal Silver.

After taking off their clothes, all Planet Quadrant Computers had snow-white skin while emitting a sweet and attractive smell.

Where is this place?

Who am I?

What happened?

Yun Xi just read the history of an entire god's domain, his mind went blank and couldn't imagine what was happening.

From the history of a civilization to a pink paradise of girls, everything happened only within one second.

From the database of the Planet Quadrant Computers, he saw everything in them.

Then, what did they see and feel from him?

Yun Xi felt that he would never know the answer.

"Whoa... no, no..." Eternal Green made a voice that was like groaning but also intoxicating.

Her snow-white perfect body, angel-like shiny hair, round and lovely eyes, cherry-petal-like lips, thin neck, slender shoulders, as well as that pair of rich fruits in front of her chest...

No! I shouldn't keep looking!

Yun Xi turned over his head and saw Eternal Blue's slim waist, incredible and elegant hip curve, dazzling long legs, soft thighs, and flawless ankles.

That's not good either!

Yun Xi turned his head again and saw Eternal Red's petite body.

Her naked petite body exuded a soft, moist and charming luster, which made her extremely eye-catching, arousing the deepest desire to commit a crime in his heart.

No! Not good at all!

Yun Xi closed his eyes and tried to be immersed in the history of the Mechanus God's Domain again to escape from this tempting paradise.

At his foot, there came the tender and gentle groans of the twins.

He didn't look at them at all, but their gentle and beautiful curves, graceful and sleek shoulders, and delicate skin all clearly appeared in his mind.

No! This isn't right! An upright gentleman shouldn't image any of these!

[Chapter 594: Scenery in the Dream](#)

Yun Xi wasn't a Planet Quadrant Computer, neither did he have a database that only Planet Quadrant Computers had.

A database and the underlying codes were the basis for the birth of the Planet Quadrant Computers, which represented the most obvious changes in their respective characteristics.

Through direct connection, Planet Quadrant Computers could see each other's code, which was tantamount to understanding each other's knowledge.

These codes and data recorded everything of a Planet Quadrant Computers, therefore, apart from Alpha and special cases like the direct connection between Eternal Gold and Eternal Silver, Planet Quadrant Computers wouldn't directly connect with each other.

Since Yun Xi didn't have a database, what did Eternal Green, Eternal Red, Eternal Blue, Eternal Gold, and Eternal Silver see in his body?

The answer is, the memories of the girls of Yun Xi's Mist Soul Army.

They saw the most profound and unforgettable memories of his brides. Through the direct connection with his body, they all experienced the same thing the mist soul girls had experienced before.

In the memory world Eternal Green was immersed in, the White Emperor gently opened her sister's soft lips and put his tongue in. The two tongues were closely intertwined and exchanged saliva.

"Ah... Um... Ah..." From her sister's fragile lips came a continuous panting. While greedily enjoying her sister's kiss, White Emperor unlocked the buttons of her sister's priest's robe.

Her sister's white robe slid down quickly, revealing her shiny white skin.

Their lips were separated, but there was still a silver thread connected.

"No... it's wrong to do this..."

"I... I'm not your fiance yet..." Her sister seemed to protest in a whisper.

Her sister blushed and tried to push the White Emperor away, but the thrust of her hands was negligible.

White Emperor reached out his hands skillfully and took off her sister's last piece of underwear.

Her sister was so shy that her body was stiff. The White Emperor gently bit the pink bud, teasing her sister with the tip of his tongue.

"Ah ah!" Her sister kept panting but could not stop the White Emperor's fingers from wandering around her body. Whenever the White Emperor's fingers changed their positions, her sister would make an exuberant voice.

Her snow-white toes suddenly opened and suddenly locked, her thin feet sometimes became tense and sometimes became powerless. She was totally not resisting but enjoying it.

Sister, no, don't do this!

I am the first! You can't enjoy it faster than me!

In the memory world Eternal Red was immersed in, "Apostle... I... feel strange..." A girl who was as delicate as Eternal Red but had a pair of little cat ears on the head was putting her hands on the Apostle's chest.

Her clear, innocent eyes looked nervous, and her soft, well-lubricated body was instinctively struggling in the Apostle's arms.

Her snorting, groaning, panicky look could seduce any man to commit a crime.

Therefore, a person really committed the crime.

Although her small mouth was closely clenched, the man still easily broke through the blockade, the tongue went straight to her sweet mouth, catching her small tongue, licked and sucked it. A pair of hands touched her elastically little round buttocks, moving up and down.

As the tip of the tongue went down, a small, tender and sensitive little red bean entered the wolf's mouth.

In the memory world Eternal Blue was immersed in,

The Caelian Queen, the sacred and inviolable human queen of the Water God has taken off her shoes and socks. Her soft feet had a white-cheese-like texture.

On the original holy face, her cherry lips gently bit and her beautiful eyes shyly closed. Her long hair scattered on her shoulders, sending out the most unique charm in the world.

Her beautiful legs, from her delicate feet to her round arches, from her tiny toes to her smooth insteps, were full of his kiss marks and his taste.

His hands held the delicate and tender feet, the palms move up gently, gradually from her lower legs to the thighs, and then towards the “indescribable land”...

“Ah...” This was Caelian Queen’s soft voice.

“Ah...” This was Eternal Blue’s sweet groan.

In the memory world Eternal Gold and Eternal Silver were immersed in, The twins would only enter other twins’ world.

Two girls were singing.

Their cheeks still looked callow, from their cherry-like lips, slowly singing a seductive song.

Two pairs of slender feet were gently swaying in the air, like two oars rippling a pool of spring water.

Finally, it was the memory world Alpha entered.

On the chessboard, she felt the complex emotions from Eternal Green, Eternal Blue, and Eternal Red, while playing Star Go with Yun Xi.

Because Alpha was too powerful, she couldn't find any corresponding projection in the Mist Soul Army. She was still herself, the highest god in the Mechanus God's Domain.

"Yes... here it is..." Alpha's small hands shivered, feeling the tremor that went straight to her soul.

This was where she lost for the first time in her life.

So far, she had no doubt about Qian's real identity.

Except for "A Cloud in the Sky", no one could reproduce this scene!

Alpha's tiny body trembled, and her eyes became ineffably blurred, just like the Planet Quadrant Computers who were immersed in the memories of mist soul girls.

For Alpha, this was the most exciting thing she had ever dreamed of.

[Chapter 595: A Flower of Pain](#)

A flower of pain.

As red as blood, a beautiful flower that could only be bred by pain slowly blooming in Alpha's heart.

As the supreme god of the Mechanus God's Domain, from her birth, like a flower blooming in heaven, what she saw in her eyes were all beautiful things, nothing could let her understand what "pain" was.

She was the great will, born on the basis of Planet Quadrant Computers, from the moment of her birth, she had been standing at the top of the Mechanus God's Domain.

Her strength was infinitely stronger than General Lorton's most exaggerated imagination.

As long as she wants, she has endless methods to exterminate human beings. What she showed in front of the people of the Mechanus God's Domain was just a small corner of her real power.

It was also because of this, from the moment of her birth, Alpha had felt endless loneliness.

She knew about all nuclear weapon arsenals General Lorton knew, and she also knew a great number of nuclear weapon arsenals that General Lorton didn't know about.

For her, there was no secret in the Mechanus God's Domain.

Alpha was the only real being close to “omnipotence” in the Mechanus God’s Domain.

Fortunately, there wasn’t only Mechanus God’s Domain in the universe. Even in the Mechanus God’s Domain where was exclusive of foreign forces, a symbol of the highest civilization in the Western God’s Domain was also established: “the God Tower”.

According to the planning of elves, Alpha entered the God Tower in the identity of a newborn god, and she felt happiness there from the bottom of her heart.

No wonder that the elf race had a lot of legend ranked members. They clearly knew what a legend ranked god would like.

There were too many unknowns and mysteries in the God Tower, and in the endless god’s domain, there were a total of seven such towers!

Alpha soon found something she liked in the God Tower, she found the stage that could make her feel excited.

The Starry Sky Chessboard!

Even though her computing power was thousands of times stronger than her opponents, she still couldn’t control everything on the chessboard.

Alpha liked this place, because it was a stage where she could release the limit of all Planet Quadrant Computers.

From the moment of defeating her first opponent, Alpha had found that her inner desire kept expanding.

She wants to win, to be the strongest chess player on the stage, to prove that she is the strongest Star Go player in the endless god's domains!

This stage was infinitely broader than the Mechanus God's Domain, and each game was full of countless variables. To Alpha, there was no stage better than the Starry Sky Chessboard for her in the universe.

Win!

Win!

Winning all the way, Alpha was greatly satisfied, no matter how many times she played Star Go, she wouldn't feel bored.

Finally, she was only one step away from the highest throne she longed for.

Then, the final game began. She met "that person".

"Here it is... That's the place..." Alpha's body shivered slightly as her face blushed.

Her real body was in the God Crystal. Even if thousands of legend ranked beings attacked the God Crystal at the same time, it wouldn't even have a crack on its surface. Because of this, Alpha never experienced what "pain" was.

However, “A Cloud in the Sky” let her understand what “pain in your heart” was.

She brought despair to other players, and now, Yun Xi returned ten times the pain to her.

For the first time, she experienced what powerlessness was.

For the first time, she found that she still had so many shortcomings.

In some sense, Yun Xi had taken away countless “first times” from Alpha.

Now, she was back in the memory of the game, feeling the countless “first times” she had lost again.

“Pa!”

“Pa!”

“Pa!”

Every sound of chess piece fell on the chessboard was like a hit at Alpha’s heart.

To Alpha, there was no more powerful stimulation than these soul-stirring sounds.

Compared with the spurs Eternal Green, Eternal Blue, Eternal Red felt in their dreams, the pain Alpha felt now was a thousand times stronger.

At first, Alpha was still awake. Her hazy eyes still looked at the chessboard dispassionately.

In the middle of the game, she started her counterattack, and she thought that she had full assurance of success.

However, it was just her imagination. All her programs and all her deductions were wrong.

“Pa!”

“Pa!”

“Pa!”

Yun Xi’s “Star Breaking” began.

This series of attacks completely destroyed all her pride and self-confidence, and also denied all the formulas she had established before.

Defeat!

Defeat!

Like a girl who had been stripped of all her clothes, she had not even the slightest resistance.

Throughout the physical and mental pain, she struggled confusedly and finally found that this was completely meaningless.

She lost thoroughly, and she didn't even know why she lost.

"Oh... It's here... and there..." Returning to the game again, this time, Alpha finally understood something.

Although she still couldn't resist, at least, the innocent girl had understood how she was hurt, humiliated, and finally thoroughly ravaged. At last, she had some clues.

In pain, there was a slight trace of happiness.

Is that the price that must be paid for the pursuit of truth?

So, let me look again, just for a moment.

Even if she would be hurt again, she was willing to pay the price.

The flower of pain blossomed again on the black and white chessboard.

[Chapter 596: Another Round!](#)

Yun Xi gazed at the countless data flows in front of him.

Ununderstandable, unacceptable, he didn't even understand what they were.

Unlike the database of other Planet Quadrant Computers, Alpha's database was so huge that Yun Xi couldn't even understand what he was looking at, as if he was a person being drowned by endless waves alone.

This was the field of the legend rank, the soul impact of Alpha's mind.

"No... My brain is going to blow up... Yun Xi felt the endless information, showing a crying look on his face.

I'm just a hero ranked Baker, how can my mind be directly connected with Alpha's mind?

Alpha's information was thousands of times bigger than any common legend ranked beings.

How could his mind withstand it?!

Did I really defeat this monster twice on the Starry Sky Chessboard?

“Shuffle!” At the moment when Yun Xi remembered the Starry Sky Chessboard, the scenery in front of him suddenly changed, he jumped out from the endless flow of information.

A black and white chessboard with endless stars as the background of the stage.

He became “A Cloud in the Sky” again, returning to his home field.

“You’re here...” Alpha felt the pain and looked at the familiar figure on the other side of the chessboard.

It was this figure who made her understand what “pain” was and what “failure” was.

“Alpha...” Yun Xi stopped on the right side of the chessboard and looked at Alpha.

For some reason, when he came to the Starry Sky Chessboard, all his tension naturally disappeared and replaced with a feeling of ease.

Just standing here, his mind that had just been impacted by the endless flow of information had recovered.

Just like the time when he stepped on the stage as a newcomer, playing Star Go with “the Ruby Princess”, “the God of Wisdom”, and “Cyber Elf Alpha”.

On the chessboard, gods, demons, monks, dragons, or newbies were treated equally.

There is only one thing that determines your position on the chessboard – the power of Star Go!

“Pa!”

“Pa!”

“Pa!”

The memory was still continuing, Yun Xi looked at the game he played before curiously.

The battle with Alpha was the only one he felt under pressure amongst the 100 games.

After experiencing Alpha’s god power and seeing the history of Planet Quadrant Computers, he finally realized how much Alpha had paid for this game.

At the most intense stage of the game, when Alpha’s real body appeared in front of him, all Planet Quadrant Computers in the entire Mechanus God’s Domain started overclocking, squeezing out all their computing power.

However, Alpha still failed. She eventually failed completely.

Yun Xi didn’t understand why Alpha needed such a huge amount of computing power, and why she still couldn’t figure out the correct answer.

“I... I’ve been waiting for this moment for a long time...” At the end of the memory, Alpha flushed all over her face and looked at Yun Xi with her wet eyes.

Yun Xi had a bad feeling.

“Play with me... Let’s play Star Go again!”

Even though she knew she would be defeated again, she wanted to challenge him!

This was the biggest idea since Alpha’s birth, and also her biggest goal she had so far.

Where she fell, where she would stand up!

She could lose, but she would never run away!

“Oh... ok.” Now, Yun Xi also wanted to know if he could defeat Alpha again on the Starry Sky Chessboard.

“God Tower, apply for the match.” Alpha smiled and applied to the God Tower in the identity of the highest god of the Mechanus God’s Domain.

It was precise because of the birth of the Star Go Master, the Starry Sky Chessboard was opening to all lives in the endless god's domain. If Yun Xi went back to the Sky Tower and checked his email, he would see innumerable invitation letters there.

The people who wanted to play with him could even fill an entire god's domain!

Likewise, as the only Nine-star Star Go player, there were also countless people who wanted to challenge Alpha.

Unlike "the Master of Star Go", who never replied to any invitation, Alpha never rejected anyone.

Even so, because none of her opponents were strong enough, after defeating all of them over and over again, she was still the only Nine-star player.

Only Ten-star Star Go players could challenge Yun Xi, therefore, even if Alpha wanted to challenge him, she was not qualified to do so.

Therefore, there was only one way to play Star Go with Yun Xi.

Take the initiative to find him, and apply for a face-to-face confrontation with him. This was what Alpha was doing now.

Familiar Starry Sky Chessboard once again appeared in front of Yun Xi.

This time, it wasn't the chessboard in Alpha's memory, but the real projection of the real Starry Sky Chessboard.

Yun Xi hadn't found out yet how radical the changes were that he had brought to the endless god's domains.

[Chapter 597: Gaming Again](#)

At any time, anywhere, Alpha could summon the Starry Sky Chessboard to play Star Go.

This was the privilege of all high-star-point Star Go players after the Starry Sky Chessboard was opening to the endless god's domains.

Orfina the Ruby Dragon.

Norn the God of Wisdom.

Cyber Elf Alpha.

Black Mage.

Duke Rome.

Maha Mystery.

These Star Go players were recognized by the Starry Sky Chessboard and were qualified to summon the Starry Sky Chessboard outside of the “towers”.

Originally, only a few legend ranked beings had the chance to enter the Starry Sky Chessboard, now, Star Go was popularizing in the upper class of the endless god’s domains at an incredible speed.

Among them, “Cyber Elf Alpha” was the craziest one.

As long as anyone applied for play Star Go with her, she never rejected any of them and crushed all of them on the chessboard.

Whether the opponent was a newcomer or a veteran who had fought many times on the Starry Sky Chessboard, none of them could stop shaking after hearing Alpha’s name.

“The invincible Alpha.”

“The malicious Alpha.”

“The atrocious Alpha!”

At lightning speed, Alpha became well-known amongst all Star Go players.

If it wasn’t because there were the videos about how “A Cloud in the Sky” defeated Alpha, no one could believe that Alpha would be defeated by the same person twice.

“A Cloud in the Sky”, “the Master of Star Go” had completely become a myth!

Through Alpha’s “appalling battle power”, people could realize how incredible Yun Xi was.

Most of the time, the Master of Star Go acted like a newcomer, but he could always win.

Only in one game could people really feel his unfathomable strength of Star Go.

That was the only time that the Master of Star Go took the initiative to attack.

Like an endless abyss showing a corner, his “Star Breaking” let people witness the ultimate power of chess pieces.

As if they first recognized Star Go, people finally found that they were so ignorant of the rules of Star Go and became more and more longing for the stage represented for the highest wisdom in the endless god’s domains.

The duel between Alpha and Yun Xi had far-reaching influence that was far beyond Yun Xi’s imagination.

After the duel, the Starry Sky Chessboard opened to all “towers”. After that, a storm of studying Star Go had begun to sweep through numerous god’s domains.

Before Alpha and Yun Xi appeared, just at the moment their names appeared on the display panel of the Starry Sky Chessboard, which attracted countless people's attention.

This was the position that everyone could see, where was high above the chessboard and could look down at all living beings.

All Star Go players would see that position after they entered the Starry Sky Chessboard and knew that that position belonged to only one name, one person.

He only played a hundred times on the Starry Sky Chessboard, but it had become a legend loaded into the history, being remembered by countless people.

The lower part of this position was still empty up to now. That was the area for ten-star players.

Below that, there was a lone code name, Cyber Elf Alpha, the only nine-star player.

At the bottom of the display panel, there were countless names of newbies. Even though they were newbies, most of them were famous, powerful big shots in countless god's domains.

The Starry Sky Chessboard had just opened several days to the endless god's domains, but the number of newbies was already dozens of times more than the total amount of the players in the past. This number was also quickly increasing, and the number of audiences was even hundreds of times more than the number of players.

Therefore, when people saw the names appeared on the top of the display panel, countless people were shocked.

“Has Cyber Elf Alpha found the Master of Star Go?” Like Alpha, the three sisters of Norn the God of Wisdom also spent all day on the Starry Sky Chessboard. They immediately used their privileges to enter the nearest seats to observe the upcoming duel.

“Auditorium” was also a new rule of the Starry Sky Chessboard. Top-level players could get the nearest seats, as for those newbies, they could only watch in the back row.

“Casina, why don’t you approve my invitation? I also want to play Star Go with you!”

Well, the Ruby Dragon was a little jealous.

“Amitabha, benefactor, you are preordained to join our Buddhism!” Finding that Yun Xi was protected by the rules of the Starry Sky Chessboard, so he couldn’t approach Yun Xi, Maha Mystery sighed.

On the Starry Sky Chessboard, neither Yun Xi nor Alpha heard the voices from the auditorium.

Even though there were tens of millions of people watching their duel, they wouldn’t be disturbed by any external forces.

“Finally... I can play Star Go with you again...” Alpha’s fingertips stroked the chess piece in her hand as her heart beat fast, as if she was dating.

“Well, I will go first.” Yun Xi picked up a black chess piece and put it in the center of the chessboard without hesitation.

Tengen!

[Chapter 598: Iron Girl](#)

Game started!

Alpha was absorbed in watching the only black chess piece on the chessboard and instantly gave her whole attention to calculate.

“Tengen!” Skuld, the youngest of the three goddesses screamed.

“Tengen...” Urd’s face turned unusually red.

“It’s tengen again.” Verdandi hugged her sisters and murmured to herself.

Tengen, in the past, no one placed the first chess piece on tengen... until Yun Xi appeared.

As long as he went first, he would put his first chess piece on tengen, and he was never defeated.

This was how incredible the Master of Star Go was, and because of him, people called this move “The Move of the Master of Star Go”.

“As I expected, he chose tengen again!”

“The invincible myth of tengen.”

“I’m afraid that Alpha would be defeated again this time.”

Watching Yun Xi’s first move on the chessboard, everyone knew that they were witnessing history, the third duel between Alpha and the Master of Star Go!

“Pa!” Alpha had fantasized this scene countless times. She put down her chess piece without hesitation.

Faced with the Master of Star Go, she would save her every bit of computing power. Most of her Planet Quadrant Computers were still under reconstruction, she could only use half of her computing power now.

In order to defeat her strongest opponent, more than 90% of her computing power was used to optimize her calculation program of Star Go. Especially the 100 games Yun Xi had played, she had analyzed them countless times.

She herself was also accustomed to putting her first chess piece onto tengen, but was only for a simple reason: to defeat her opponents at the fastest speed.

“A Cloud in the Sky” was different from her, his moves contained some higher rules that she didn’t understand. If she continued to launch an attack and defend battle around tengen, she would be undoubtedly defeated again this time.

At least, with her current computing power, she should avoid doing this.

This time, Alpha changed her tactics.

“She put her chess piece on the corner?”

“Don’t she plan to stop the Master of Star Go at tengen?”

“Yes, if she also chose to put her chess pieces around tengen, she would have no chance to win.”

Watching the game, Orfina the Ruby Dragon and the three goddesses made the same judgment.

In fact, they had analyzed Yun Xi’s style countless times, and they had the same conclusion as Alpha.

No one should launch a battle around tengen with the Master of Star Go.

It was tantamount to committing suicide.

The best thing to do at this moment is to quit.

If they don’t fight against him, they won’t be defeated. At least, they would avoid this from happening at the beginning of the game.

“Pa!”

“Pa!”

“Pa!”

Whether it was Alpha or Yun Xi, they put down their chess pieces quickly.

Alpha had prepared for this moment for a long time, so she could be so fast.

As for Yun Xi...

“Oh... it’s really a happy feeling to play Star Go...” As soon as he looked at the familiar chessboard, all the troubles in his heart disappeared.

In this world, he didn’t need to think about anything.

After coming to the familiar chessboard and playing with the familiar opponent again, it seemed that everything was no longer a problem in his heart... at least, no longer a problem at this moment.

Alpha was a supreme god in the Mechanus God’s Domain.

However, on the chessboard, they were just players, and he could even take the upper hand here.

Familiar chessboard, familiar chess pieces, familiar trajectory of stars... Yun Xi suddenly regained his self-confidence and was no longer at a loss as when he was in the Mechanus God's Domain.

The Starry Sky Chessboard is his home field!

After a dozen turns later, Alpha's chess pieces had formed shape on the chessboard.

"Defense?" The three goddesses looked at the chessboard in surprise.

"It's not like her style!" Orfina had been defeated by Alpha a lot of times, naturally, she was familiar with Alpha's style. She was also surprised by Alpha's new playing style.

Like an iron wall, her chess pieces formed a flawless defense on the chessboard. This was the tactic Alpha prepared for Yun Xi.

Code name – Iron Girl.

[Chapter 599: The Differences in Algorithms](#)

"Iron" symbolizes the strongest shield forged with the strongest will.

"Maiden" is the sign of perfection and flawlessness.

The tactics of the Iron Maiden was to use the optimized calculation formula to increase her defense power to the limit and then to find the path leading to victory.

It would be a big mistake to think that Alpha's Star Go strength also declined after she lost half of the Planet Quadrant Computers' computing power.

Alpha only used one-tenth of her computing power, then she had built a whole world to deduce the future of mankind.

After accomplishing all this, she randomly put Planet Quadrant Computers into it to let them observe and learn how to take over the world after the demise of mankind. If it wasn't because of Qian, she wouldn't have noticed that mankind could still be saved.

As for the remaining 90% of her computing power, she put all of them into calculating the rules of Star Go, seeking for the slim chance to defeat the Master of Star Go.

Compared with the calculation scale of Star Go, the computing power she used to calculate the future of the Mechanus God's Domain wasn't worth mentioning at all.

In order to defeat the Master of Star Go, Alpha wasn't fighting alone.

Countless engineers and alchemists in the Mechanus God's Domain worked day and night to optimize the rules of Star Go, and all of them had a copy of Yun Xi's 100 battles on the Starry Sky Chessboard.

Now, Alpha's computing formula had been updated to the third edition, which was ten times more efficient than the original version!

With the current computing formula, if she was facing her old self on the Starry Sky Chessboard, she could defeat her old self easily.

Actually, she had had the potentiality to upgrade to the 10-star points, but the levels of other players were too low, even if she defeated them ten thousand times, her star point wouldn't be upgraded to 10 under the new rules of the Starry Sky Chessboard.

The only person who could let her upgrade on the Starry Sky Chessboard was right in front of her!

He was her ultimate challenge goal!

Yun Xi could see Alpha's changes and feel her strong will contained in it.

Well, how to describe it?

He felt as if he saw a young girl who was wearing hard silver armor, holding a huge tower shield over her height, and looking at him carefully.

Her only ability was multi-overlapping defense, which was so indestructible at first glance.

To attack her, he would have to break her large shield, then break her flawless silver armor, and finally break the girl's determined will.

So, attack it, even if it was Yun Xi, when facing such a strong defense, he felt a little tricky.

However, as long as he was still on the Starry Sky Chessboard Star Chess, nothing would be a problem!

Even if she was an iron giant, she couldn't block his attacks!

"Pa!" Yun Xi started.

"Game starts!"

"Alpha's great crisis!"

"Come on, Alpha!" The three goddesses cheered.

Anyway, they didn't have a good impression of "the Master of Star Go". What happened when they played Star Go with Yun Xi, was the most shameful memory in their lives, that they would never tell anyone about it.

"Casina, come on!" Well, Orfina was the Master of Star Go's strong supporter, she just didn't know that "he" wasn't the "she" she loved.

Alpha's body shivered slightly. Her newly formed strategy was being challenged.

No problem. My defense had only been reduced by one percent, it's still under my control. After calculating again, Alpha decided to continue to strengthen her defense.

In response to the situation on the chessboard, Alpha's chess pieces blocked the attacks of Yun Xi's chess pieces and seized a larger place on the chessboard.

According to the rules of Star Go, those who occupied more places on the chessboard would become the final winner.

"Pa!"

"Pa!" Yun Xi continued to attack with a strange smile on his lips.

Lost 2% of my defense? It's still acceptable.

Alpha calculated and continued her strategy.

"Pa!"

"Pa!"

"Pa!"

Yun Xi seldom attacked his opponents in succession, but this time, he took the initiative to launch his attacks.

Alpha's body trembled all over and her logical circuit warned her strongly.

"4%?" Alpha gazed at the chessboard. Surrounded by star lights, her chess pieces were being crushed and destroyed by some invisible force.

As time went by, her defense should become stronger and stronger.

In terms of data, the defense power of her chess pieces could grow by about 10% in every round. It was a super-large formalized series of moves initiated by Alpha, which had never appeared on the Starry Sky Chessboard before.

As time went by, Alpha even had the confidence to block all attacks from Yun Xi's "Star Breaking".

Undoubtedly, Yun Xi didn't use "Star Breaking" this time.

The algorithm he was using was still concise.

He wouldn't use any complicated algorithm, because he didn't have strong computing power, which had been proved when he was practicing Yun Hai's Quadrant Sword.

What he could do was pupil-level multiplication.

Well, at least for Yun Xi, that's how it works.

One chess piece equals 1.

Two chess pieces equal 2.

Three chess pieces equal 4.

Four chess pieces equal 8!

[Chapter 600: The Unfortunate Iron Maiden](#)

When the girl was born, the entire sky whispered her name, sending her blessings.

The supreme God said to her:

You are the strongest shield, the unbreakable wall.

You will use your wisdom and strength to protect the world.

You are the embodiment of justice.

You are a knight.

You are a princess.

You will use your power carefully to obtain victory.

I am proud to see you grow up, and I believe that the victory will belong to you.

One day, you will reach the end and be crowned king.

Now fight for me, my iron knight!

The girl raised her large shield and swore to her god:

“I will go forward bravely.”

“I will continue to improve myself.”

“I will defend my territory and my people.”

“I am a knight, a king, and I will carry out my mission!”

The god gave the girl the strongest shield, the hardest silver armor, waiting for the enemy's coming.

The girl could feel the overflowing power in her body, which was god's blessing and her belief.

Come on, I'm not afraid! The girl stood on her own position with the shield and showed her unmatched perseverance.

Then the girl saw the monster.

Covered by black glow, a "foreign body" pierced through the starry sky and descended into the world.

First, the large shield broke in the girl's hands.

Once, two, three, four, five!

This large shield was even taller than the girl's height, sheltered the girl five times, constantly pushing the black energy away and guarding the pure girl.

Until five black energy beams shot on the shield, it finally broke apart.

"God bless!" Instead of yielding, the girl drew out her holy sword and bravely resisted the black aggressor.

A halo of energy spread out under her feet, which was the holy halo with multiple buffs such as "Tenacity", "Hegemony", "Thorns", and "Purification". It was god's gift for the girl.

Once again, the girl blocked dozens of the black foreign body's attacks, but the black foreign body's tentacles were increasing.

By now, the girl was facing a 64-fold attacking frequency!

No matter how many times she cut off the tentacles, they would continue to grow up. The girl's resistance was being weakened little by little.

This wasn't because the girl's will had become weak, but because there was a huge contrast between the strength of the two sides.

Finally, when the eighth black tentacle appeared, the girl's sword was swept away. She lost her final weapon.

The glow of the halo under her feet had become so weak that it would be extinguished at any time, anywhere, like a candle in a storm.

The eight tentacles tore apart the halo and began to penetrate into the crevices of the girl's silver armor, tearing it apart from the girl's body violently.

The girl struggled desperately, never yielding to the ravages of the black foreign body.

Eight black tentacles mercilessly suppressed the girl's resistance and destroyed all her defenses.

Soon, the girl's snow-white skin, slender legs, and delicate feet were all covered by the eight black tentacles, and they were still moving deeper.

The girl had to start praying to her god.

"Lord god, give me the power of miracles."

"No way." Alpha looked at the "iron maiden" on the chessboard, "who" had been pierced through by Yun Xi's eight chess pieces with a helpless look.

She also wanted to create miracles, but there was no way!

Her chess pieces could increase 10% of their defense power every turn, but Yun Xi's chess pieces could increase 100% attack power per turn! How could she block his attack?

Why are you so strong?!

It was like her "iron maiden" was wearing paper armor in the face of Yun Xi's attack. Even she herself felt embarrassed looking at the chessboard.

Stop! It's not a fair duel at all!

Alpha had to concede. She even started to doubt if this formalized series of moves she created was really useful.

“Actually... I can only double my attack power one more time...” Yun Xi looked ashamedly at Alpha, who seemed to have lost her self confidence.

In this game, he could only create at most nine attacks from different directions. Well, he named this formalized series of moves “Hydra”.

“Nonuple attacks?” Alpha stared at Yun Xi.

Are you kidding me? By using my legend ranked computing power, I could only create the “iron maiden” which could increase its defense power 10% per turn, now, you told me that your attack could increase 100% for nine times?

Poor iron maiden, what a despairing and misfortunate situation she encountered! As her creator, Alpha couldn’t stand this anymore.

She could only give up.
