

Starchild 881

Chapter 881: Biddable

Stable!

After occupying four corners in a row, Immortal in the Pot finally breathed a sigh of relief.

At least in all the Starry Sky Chess patterns he had learned, the chances of winning with four corners against the Tianyuan were one hundred percent.

In this game, he would definitely not experience the big comeback of the previous round. He has occupied all four corners, how could he lose?

Hey newcomer, you should just lose to me this round!

It doesn't matter how high your talent is in Starry Sky Chess, and what achievements you will have in the future, winning against this respected senior in your first chess game in Stardust Zone is really disrespectful.

Speaking of which, even his Martial Brother has the bad habit of teaching newcomers, but his methods are more gentle, better at playing handicap games.

If it weren't for the appearance of the Starry Sky Chess Master, perhaps this Sterling Chess Tournament would have become a stage for Buddhism to become famous all over the world.

"Maha Mystery""

"Cyber Elf Alpha""

"Unrivaled Hero"

And finally the most terrifying "A Cloud in the Sky."

These four newcomers of the Starry Sky Chessboard have completely changed the history of Starry Sky Chess, especially with their final debut "A Cloud in the Sky," which has yet to face defeat.

Cyber Elf Alpha's strength is enough to make countless high-ranking Starry Sky Chess players feel hopeless. Any player who has played against Cyber Elf Alpha can feel the overwhelming sense of powerlessness in their calculations being completely crushed.

Compared to Cyber Elf Alpha's chess, Starry Sky Chess Master, "A Cloud in the Sky", his's chess looks plain. Many people don't even know how they lost in the end, which is a world of difference from Cyber Elf Alpha's crazy crushing style.

There is only one game of chess where people have witnessed the real attacking power of the Starry Sky Chess Master.

The Godly Battle – the fall of the stars, is destined to be immortalized and engraved in the history of Starry Sky Chess as a divine game.

When Immortal in the Pot saw that chess game, his whole body was covered in goosebumps.

Before the divine game, no one knew that Starry Sky Chess could be played in such a manner.

After that game, all present came to know that Starry Sky Chess could be played in such a manner.

The Starry Sky Chess Master is not incapable of attacking, but if you lack the skill of one as masterful as Cyber Elf Alpha, you have not even earned the privilege of witnessing his attacking methods.

Upon reviewing the chess game record of that match, Immortal in the Pot was suddenly struck with a great desire.

In this lifetime, he also wishes to play a match with the Starry Sky Chess Master, regardless of victory or defeat. It is a belief, a dedication.

For all enthusiasts of Starry Sky Chess, this is likely a dream.

Even though he has played just over one hundred games, many of the records he left remain incomprehensible to this day, yet the Starry Sky Chess Master has become a totem in the hearts of all who play the game.

No one knows where he comes from, his race or gender are unknown.

He is like a cloud on the horizon, arriving silently, leaving behind a game of divine proportions that truly changed the history of Starry Sky Chess, then quietly departing without taking a trace of the clouds with him.

Countless people wish to play a match with him, but so far only Cyber Elf Alpha, the closest to him, has realized this dream.

If he were willing to give guidance, then even the players in the entire Stardust Zone and even the Star Zone above will have to line up for their turn.

Judging from the spread speed of Starry Sky Chess now, after a year, those who want to queue up will need a five-digit number.

You should know that this is the upper level of the Seven Towers!

Watching more and more novices come to play chess, Immortal in the Pot, who was brought into the Starry Sky Chess gate by his Martial Brother Dao Quanzi, was overjoyed.

Hmm, after this game, I'll find a new player to guide!

"Crack!" Yun Xi's steady move shattered Immortal in the Pot's joyful fantasy.

The golden-red brilliance is gradually lighting up from the center area of the star chart.

"What is this?" Immortal in the Pot looked confused.

"What is this?"

"I, I have seen this, this is..."

"Could it be...? Oh my God!"

Very few people can truly see this scene just by looking at the chessboard.

Even in the games played by high-level Starry Sky Chess players, it is rare to see such a spectacle.

In battles at the Stardust Zone, it is almost impossible for this scene to occur.

This represents the power of Starry Sky Chess pieces on the star map, calling forth fantastic creatures symbolizing the power of the stars.

It is not surprising that Immortal in the Pot has not seen it, as only those who face the endless radiance emanating from the star map can truly comprehend it, which is quite different from merely looking at the chessboard.

Even if it is recorded in a chess manual, it is impossible to fully depict the posture of these star creatures. Those who just look at the manual often see either a burst of golden light or something similar to a dark nebula.

Only true players can clearly see what they or their opponents have summoned and possessed, and what terrible power they have.

As a Golden Core cultivator who has long cultivated eternal life and perspective, Immortal in the Pot has never imagined in his life that he would see the dreamy scene that represents the Starry Sky Chesspeak while playing at the Stardust Zone.

"Golden horn, silver edge, straw bale belly" is indeed the correct formula discovered by countless Starry Sky Chess players applicable to all low-level games, and in this respect, Immortal in the Pot's layout is not wrong.

However, a new player named "Little Cloud" held a higher level of understanding of the Starry Sky Chess regulations.

In the midst of all the phenomena, everything is possible.

In the world of Starry Sky Chess, there are infinite possibilities, akin to the rules of Go, but only as the outermost reinforcement.

To hold the stars, manipulate the trajectories of the stars, attract god-level creatures that fly in the world of the stars, and even cause the stars to collapse and shatter. That is the highest realm of Starry Sky Chess.

It's like how one plus one equals two is an absolute and correct truth at the most basic level of addition, but when reaching a certain level, it will evolve into higher and more difficult problems.

"Princess..." Yun Xi lightly stroked the familiar golden feather with his fingertip, feeling the warm breath that wasn't at all burning.

Or rather, it is only for the hand that controls the stars that the true fire of the Great Sun Crow will be so gentle, and the bird will be so dependent.

"Gudong! Gudong!"

Immortal in the Pot felt like he must have had too much to drink, or perhaps not enough.

Well, it must be so.

Otherwise, why would he be sweating profusely and experiencing illusions.

How could that golden dreamlike god bird, whose feathers were floating in the air, give him, a Golden Core cultivator, a sense of deadly oppression?

Chapter 882: Three Stages of Starry Sky Chess

In one tournament after another of the Starry Sky Chess, the legend-ranked enthusiasts who were keen on the trial of the Starry Sky Chessboard gradually summarized several stages of the game.

The first stage is known as Star Falling.

In this stage of Starry Sky Chess, it mainly takes on the form of Go, where whoever can eat more pieces and occupy more territory will gain a huge advantage.

The formalized pattern of the game, also borrowing the terminology of Go, is used to construct consistent formations for novice players in the constantly changing game of Starry Sky Chess.

This stage of Starry Sky Chess could be considered an evolution of Go.

However, occasionally someone could make an unbelievable move on the Starry Sky Chessboard, resulting in various fascinating phenomena.

This marks the second stage of Starry Sky Chess, where it starts to break away from the rules of Go and expose more rules of its own.

Essentially, Starry Sky Chess is a seemingly simple game of "placing" and "occupying" on the board, where every move a player makes will impact the star chart.

The star chart itself is constantly changing, and each move made by the chess player could potentially result in endless possibilities. However, due to the limited variables, it cannot be reflected on the star chart.

Therefore, the change in the second stage of Starry Sky Chess is called "Star Summoning."

Starry Sky Chess players who can achieve this step, even if they make it by chance, represent extraordinary talent. To reach the higher level, this is the skill that must be learned.

Norn the God of Wisdom.

Princess Orfina, the Ruby Dragon.

Maple Fang, the Black Mage, Duke Roman, and Maha Mystery.

The high-level players in the top ten ranking of Star Zone are all masters of this level, and Cyber Elf Alpha, who is almost invincible in Star Zone, is among the top players.

When playing against other high-level chess players, Cyber Elf Alpha often exerts crushing calculation power, summons the power to destroy everything, and completely shatters her opponents.

Everyone has always thought that this is the end of Starry Sky Chess, until the day when facing Cyber Elf Alpha's crazy attack, the figure standing at the pinnacle of the stars made a chess game that no one has been able to replicate so far.

The third stage of Starry Sky Chess - Star Collapse, a game played only once by the gods, symbolizes a myth of Starry Sky Chess.

Most of the chess players in Stardust Zone are newcomers who haven't even completed the "Star Falling" stage. It's even harder to imagine what the "Star Summoning" in the second stage would be like.

Now, they finally witnessed, with their own eyes, the greatness belonging to Starry Sky Chess.

"So... it wasn't just me being drunk..." Immortal in the Pot looked at the golden bird dancing on Yun Xi's fingertips with envy.

This is the true and pure fantasy from beyond the stars, a miracle that can only be realized by the Starry Sky Chessboard.

Within the Starry Sky Chessboard lies great knowledge, great opportunities, and great destiny!

No, it's not just a fantasy species symbolizing the rules of the world!

As long as they are recorded in the memory of the stars, all creatures will appear on the star chart. Even the greatest creatures that will be born in the distant future may appear.

All the races and civilizations that have never been in contact with the outside world are recorded on this Starry Sky Chessboard.

Everything that existed in the past, present, and future has the potential to appear on the Starry Sky Chessboard and interact with the chess players.

This is such a miracle - even the gods cannot do it.

At this moment, the golden mythical bird dancing on the fingertips of "Little Cloud" is the one that will be remembered by the starry sky. She proudly displays her golden-red wings, releasing an endless breath of sun flames to everyone.

Undoubtedly, this is a born sun-walker, a powerful fantasy species that dances in the thirty-three heavens.

If a practitioner of the cultivation fire system can contact and communicate with it even once, it is possible to comprehend the great power of the fire system. Every trace of its breath is a treasure among treasures, and the benefits of obtaining it are infinite.

What kind of great fortune did this boy receive?!

To be able to summon such a divine bird, you must have used up all your luck from your past eighteen lives, haven't you?!

From your appearance, it seems like you were a pure-hearted child in your past past past life, which is why you had a chance encounter with this golden divine bird in this life.

This kind of great opportunity, not to mention me, even my Martial Brother Dao Quanzi would envy it!

Immortal in the Pot drank half a gourd of his Shaoxian wine wildly, his eyes almost red.

What he cultivated is precisely the divine powers of the fire system. If he could exchange it, he would be willing to use half of his wealth to exchange for a chance to be so intimate with this golden divine bird.

Why is it that the person who gets a chance encounter with this divine bird is not a reputable person like me who accumulates karma by playing chess and doing good deeds every day, but this newcomer?!

Look at you, what an improper manner! This is a mythical bird born with the true sun flames, yet you dare to touch it with your fingers.

Stop touching!

Haven't you had enough!

Why do you keep touching!

...

"Princess...we meet again..." Yun Xi gently scratched the wings of the Golden Crow, skillfully finding its sensitive spot.

The power of the sun in this star map is not very strong, so it cannot summon the mighty Great Sun Golden Crow as in the Starry Sky Chess game. It can only summon this small Golden Crow that is only the size of a palm.

However, it should be more than enough to defeat that Immortal in the Pot.

"Oh...oh..." The Golden Crow Princess danced happily on Yun Xi's fingertips, occasionally pecking at his familiar nail and singing a cheerful song.

She really enjoys being summoned by Yun Xi from the chessboard. If only the power of the sun in this star map was stronger, she could easily burn all the messy chess pieces on the opposing side.

"Snap!" The chess piece in Yun Xi's hand was burning with golden-red flames, and the second level of the Starry Sky Chess was imprinted on the star chart, causing an entire star region to ignite.

Even the tiny golden bird has the momentum to burn mountains and seas. Its size is irrelevant, as it is naturally divine!

Chapter 883: Envying Him!

Defeated!

Since the Golden Crow Princess danced on Yun Xi's fingertips, Immortal in the Pot knew he had lost, and lost terribly.

This newcomer is incredibly strong!

Whether it's luck or something else, any chess player who can summon the star spirits on the Starry Sky Chessboard and pass the star position test is only a matter of time.

The appearance of star spirits, whether gods from the past, fantasy species, or others, represents that the chess player has monster-level talent for the Starry Sky Chess.

The few hero-ranked chess players in the Star Zone are such monsters.

Many star position tests that cannot be surpassed by legend-rankeds are just a beginner's course for them.

These monsters are simply born heroes for the Starry Sky Chess.

Among them, some possess unparalleled judgment, some excel in military tactics, and some have extraordinary insight into the power of the stars.

Even during their novice phase, they were able to demonstrate their talent in Starry Sky Chess.

Calling forth spirits is undoubtedly the best way to showcase this gift.

To trigger the hidden power within the starry sky through Starry Sky Chess pieces, one must either use calculations that are thousands of times stronger than the normal legend-ranked, just like Cyber Elf Alpha, or have the ability to comprehend the mysterious trajectories among the stars in order to capture the mystical power hidden within the star chart.

Immortal in the Pot cannot achieve either of these points, and neither can most of the legend-ranked.

"Young... too young..." After confirming his defeat, Immortal in the Pot continued to move his pieces while shaking his head.

"Hehe, are you giving up on yourself, sir?"

"No, he is merely entertaining himself."

"Since he cannot win anyway, is he trying to prolong the game?"

"Exactly, this is a game where spirits have been called forth, and there have been very few instances of this happening in his lifetime."

"Furthermore, the divine creature that appeared is the most suitable fire attribute bird for his character."

Immortal in the Pot's expression was very easy to understand. He was drunk to the point of being intoxicated and his eyes were turning red as he gazed at the Golden Crow Princess.

Ahhhhh!

This divine bird is simply too beautiful!

Why wasn't this divine bird of the sun summoned by him!

If he had known that occupying the Tianyuan region could summon such a Golden-red Golden Crow, he would have made every effort to do so!

Immortal in the Pot was filled with regret, to the point where stamping his foot was not enough to express it. Only by gazing harshly at the Golden Crow, memorizing every feather and every gesture, could he slightly make up for this great regret.

"Uh..." Yun Xi noticed that from the moment he summoned the Golden Crow Princess, the eyes of the prestigious and respected Golden Core cultivator on the other side had changed.

Those eyes were full of intense heat and almost drooling.

"Snap!" After a long time, Immortal in the Pot finally made his move, but he didn't even look at where he placed his piece.

At this point, it doesn't matter how the game progressed, because it's all a loss anyway. What's important is the golden red divine bird.

Once again, Immortal in the Pot despised his lackluster talent in Starry Sky Chess. He was a prestigious Golden Core cultivator of the legend-ranked, and had even been taken under the tutelage of the venerable Martial Brother Dao Quanzi. Yet he failed to even pass the Star Positioning Test.

Now, his attempt to slaughter the young had resulted in him taking ten thousand points of damage from a novice.

"Gudong! Gudong!"

Only great drunkenness could alleviate his worries. Immortal in the Pot savored the opportunity to observe the Sun God bird that was so hard to come by, as he indulged in the Shaoxian wine and became more unrestrained by the minute.

"..." Yun Xi was too embarrassed to remind the distinguished Immortal in the Pot, who had made his entrance with an air of unparalleled mastery, that he was actually eating the chess pieces.

Is this some sort of new tactic? Is there a trap hidden that he cannot fathom?

The Suicide Formation?

"Yaa... yaa..." The Golden Crow Princess was unceremoniously wielding the power of the true sun's flames in the star map, conquering territory with ease and engulfing Immortal in the Pot's already decimated chess formation.

With each move Yun Xi made, the golden-red hues on the star map grew more intense, and the proud Golden Crow Princess danced jubilantly at his fingertips.

Immortal in the Pot's few pitiful chess pieces were trembling in fear, even as they huddled in the remotest corner of the star map.

The disparity is just too great.

Even when playing chess with his Martial Brother Dao Quanzi, Immortal in the Pot had never suffered such a miserable defeat.

The power gap between them had completely flipped with their true cultivation base.

"The master has lost this round."

"Of course, the moment the newbie summoned the divine bird, it was defeat after defeat for the master."

"Judging from the master's expression, it seems he is finding pleasure in his suffering."

"Indeed, he has lost and been defeated. The master who slaughters the young has now been slaughtered in turn."

Although the two in the game could not hear it, Immortal in the Pot clearly noticed something and boasted to his group of friends, indicating that he could still fight.

As long as the hourglass has not run out, the battle is not over!

He hasn't had enough of looking at that cute little bird yet.

Thus, with an immensely strong will, Immortal in the Pot refused to give up and kept staring enviously and jealously at the Golden Crow Princess entwined around Yun Xi's fingertips.

Why bother playing chess when it's time to admire the bird?

The grains of sand from the golden hourglass fell one by one, and finally, Immortal in the Pot ran out of time again while the one on Yun Xi's side remained almost untouched.

"Snap!"

Immortal in the Pot grinded his teeth and made a move!

"Snap!"

Immortal in the Pot made a vicious move.

"Snap!"

Immortal in the Pot made a move as if he was going to devour his opponent.

"Senior, you've already made all your moves..." Yun Xi helplessly looked at Immortal in the Pot making futile moves on the board, where he had lost all his pieces.

The entire chessboard was already shrouded in endless flames of the sun, as the proud Golden Crow Princess danced in the highest realm of the starry sky, showering everything with a golden red brilliance.

According to the current rules, Immortal in the Pot couldn't make any more moves, which is a rare occurrence of "absolute victory" in Starry Sky Chess.

"I can still fight!"

"Let me watch for a while longer, just a little longer!" Immortal in the Pot shouted loudly as he gazed at the golden red divine bird that had occupied the entire star map.

Missing this opportunity, who knows how long it will take to find this golden red divine bird again.

Even the exact time period when this divine bird existed, whether it was in the past, present, or future, is unknown.

The Golden Crown Princess landed comfortably on Yun Xi's fingertips, unfurled her wings, glanced back at Yun Xi with a smile, and whispered something only he could hear.

"Remember to meet me in the Kunlun God's Domain."

Chapter 884: Another Newcomer

"My little bird!"

"Hand it over, I want to see it one more time!" Immortal in the Pot grabbed Yun Xi's collar, tears streaming down his face, with a look of despair.

"Hahaha, old man, you fell for it."

"Indeed, it's a pity. I wanted to play another game of Summoning Spirits like this next time."

"Young man, you have a bright future. It seems like The East God's Domain will have another ranked chess player."

"The future belongs to you!"

A group of elders from The Heaven's Path Palace laughed loudly, and some even began to applaud Yun Xi.

Some people were even more concerned about Yun Xi, with clear intentions.

"Young man, how old are you? Are you married? I have a few granddaughters who are still unmarried and have a special interest in Starry Sky Chess."

"Go away, old ghost, you'll be forever single, where would you find a granddaughter? Don't mind this old man, come to our Pine Crane Palace instead. We are currently lacking a master for Starry Sky Chess, the benefits are generous!"

"So young and talented, whose disciple are you?"

"Young man, you have a bright future. How about joining our Spirit Pearl Dao Palace?"

Even among the elders of the Heaven's Path Palace, there are factions; when they see talented individuals, how could they not try to recruit them?

The Heaven's Path Palace is an extremely vast organization, with over dozens of Dao Palaces distributed across the East God's Domain. Unlike the Sword God's Domain, which is dominated by the sword, the Heaven's Path Palace is a truly large-scale sect that spans across god's domains.

"Go away, this young man was clearly discovered by me. If he's joining, it will be in my Heaven's Path School." At this point, Immortal in the Pot went crazy and spat on a group of old friends who came to recruit the young man.

"Didn't your Heaven's Path School stop accepting disciples a long time ago?" The elders of the Heaven's Path Palace were all looking at each other.

The Heaven's Path School is the highest sect in the entire Heaven's Path Palace. There are already three Golden Core cultivators who serve in the Palace, and each one has a higher cultivation base than the other.

Even though Immortal in the Pot has the weakest cultivation base, his talent in Starry Sky Chess is not bad; he also brews a good Shaoxian wine, and has a broad circle of friends. His figure can be found all over half of the endless god's domains, and he frequents the gatherings of the gods in the Western God's Domain.

Now, Dao Quanzi, the number one player in Starry Sky Chess in the Heaven's Path Palace, who is considered the next successor to the Palace Master position, is the true person in charge, and was once recognized as the number one player in Starry Sky Chess in the East God's Domain. His cultivation base is unfathomable.

And, hailed as the strongest Golden Core cultivator in the world, Immortal Qingxue who wields seven ancient God Weapons.

This individual is the widely known number one force of the Heaven's Path Palace, believed to be the legend most likely to ascend to the position of the Celestial Immortals of the Heaven's Path Palace.

A school with three Golden Core cultivators, having twelve disciples under its tutelage, all of whom are believed to possess the qualification of Earth Immortals, undoubtedly the strongest sect of the Heaven's Path Palace.

Every time the Heaven's Path School opens the gate to accept disciples, those who wish to become cultivators of the Heaven's Path School would have to circle around the entire hall of the Heaven's Path Palace ten times.

However, since the appearance of the final registered disciple, the entire Heaven's Path School has not accepted any new disciples ever again. It is said that this is because Immortal Qingxue believes that the current twelve disciples are already sufficient to inherit the grand tradition of the Heaven's Path School, and there is no need to open the gate to accept more disciples.

"Hmph, even if it's my Martial Sister, she would probably be moved by this young man," Immortal in the Pot confidently stated.

If he were the one in charge of the Heaven's Path School, with his passion for chess and backed by Martial Brother Dao Quanzi who would definitely support him, it would be a sure deal to accept this gifted young man of Starry Sky Chess as their disciple.

However, the one in charge of the Heaven's Path School at present is not them, but the youngest and most accomplished cultivator in the history of the entire Heaven's Path School, the young Martial Sister Immortal Qingxue.

For reasons unknown, this young Martial Sister doesn't like males, and the last three disciples accepted by the Heaven's Path School in this generation are all females.

"This is not right, your Heaven's Path School has stopped accepting disciples a long time ago, don't delay others."

"The famous cleanliness fanatic Immortal Qingxue probably wouldn't have the patience to teach this young man."

"Let us handle it instead."

The elders breathed a sigh of relief upon realizing that Immortal in the Pot was just putting on an act.

If the Heaven's Path School really tried to recruit this young man, they wouldn't stand a chance.

Fortunately, Immortal Qingxue doesn't like male disciples, which is well-known throughout the entirety of the East God's Domain and gives other Daoist sects a chance.

Unfortunately, they celebrated too early.

"Uh...I already have a master, sorry." Yun Xi explained to the elders of the Heaven's Path Palace who surrounded him, stating that he was just here to play chess and had no intention of seeking an discipleship.

He was perfectly content with his master, Casina the Battle God - in fact, he idolized her.

After all, it was Casina's guidance that led him to the world of Starry Sky Chess and ultimately brought him to where he is today.

Without Casina's guidance, he wouldn't even know where the entrance to Starry Sky Chess was.

At this point, the elders of the Heaven's Path Palace were dumbfounded.

"Who is your master?"

"Is it that your skill in chess has been taught? No wonder?"

"What do you think? This boy is not a beginner's level, is your master perhaps..."

Before Yun Xi could explain, the entire Stardust Zone suddenly shook.

"Huh, what's this?"

"This kind of aura, which master has arrived?"

"No, it's a newcomer."

"How is it possible, is there really such a newcomer?"

Not only the elders of the Heaven's Path Palace, but even Yun Xi noticed the uniqueness of the "newcomer" who suddenly appeared in the Stardust Zone.

Her appearance was truly stunning and awe-inspiring.

A pure white aura surrounded her, and even the Stardust Zone, which restricted cultivation base, couldn't block the extraordinary aura that was beyond human imagination.

She wore a seven-colored crown, suspended in the void about one meter above the ground, her snow-white ankles stepping on a transparent halo, and hazy clouds covering her true face, emitting an incredible mysterious beauty.

Every inch of her skin, every part of her body, seemed to embody some kind of supreme truth of heaven and earth, symbolizing the incarnation of beauty.

A strange creature, radiating a golden light, entwined around her body, with its entire body snow-white.

This snake-like creature unfolded three pairs of transparent wings on its back, meandering freely in the clouds without flapping its wings, and releasing the original rules of thunder and lightning with ease.

"That is...the Feathered Serpent!"

"Not just any Feathered Serpent, but the highest level of Feathered Serpent - the King of the Feathered Serpents!"

"With three pairs of wings, this is the true body of the Feathered Serpent in its ultimate form, the source of thunder and lightning!"

Those who recognized the transparent snake-like creature turned pale one after another - the thunder and lightning power ruled by the fantasy species of the Feathered Serpent represented the most violent lightning rules among all the elemental rules.

In terms of rank, the power of this Feathered Serpent even surpasses that of most deities in the Endless God's Domains!

Chapter 885: Dark Abyss God's Domain

Despite being surrounded by mist and only revealing a small portion of her skin, this woman who appeared for the first time in the Stardust Zone still caught everyone's attention.

Even Golden Core cultivators like Immortal in the Pot couldn't help but widen their eyes upon seeing her.

Strong, unabashedly strong.

Even in the Starry Sky Chessboard trial where combat was not allowed and everyone's power was restricted, her strength still shone brilliantly.

The six-winged feathered snake joyfully swimming beside her is the best proof that this lightning's favorite has clearly been tamed by her.

Each gemstone in the seven-colored crown contains a terrifying power, undoubtedly a top-tier God Weapon.

"Who is this...?" Immortal in the Pot searched through all the experts in the East God's Domain, but couldn't find anyone on a legend-ranked who could match this figure.

"She's not from our Western God's Domain..." Similarly, chess players from the Western God's Domain also shook their heads, indicating that they didn't know this up-and-coming newcomer.

"I haven't seen her... If she were on a legend-ranked in our North God's Domain, there's no way we wouldn't have any impression..." Now, the North God's Domain centered around giant dragon God's Domain has also been excluded.

The rest is...

"..."

"..."

The faces of the few chess players from the South God's Domain suddenly changed as if they had thought of something, but they trembled and didn't dare to speak.

In the world of the Endless God's Domains, the East God's Domain, the Western God's Domain, and the North God's Domain all have their respective corresponding creators.

The East God's Domain is ruled by the Kunlun God's Domain, the mother of the ten thousand monsters - Her Majesty, the West Queen.

The Western God's Domain, the ruler of the colorful realms, the god of gods - Ionia.

The North God's Domain, the mother of time and space, the supreme dragon god - Yasha.

Only in the South God's Domain, there is no absolute ruler, or a terrifying existence with a dominating rank that extends beyond its peers.

Compared to the other three God's Domain, the order in the South God's Domain is the most chaotic, accommodating all sorts of disorder, evil, and strange things.

Therefore, the South God's Domain, also known as the Dark Abyss God's Domain, symbolizes an endless place of darkness and abyss, which is the least ventured by humans and the most inhabited by various ancient evil creatures in the God's Domain.

In the Seven Towers Alliance, there are as many as three "towers" standing in the South God's Domain.

The Earth Tower, the Shadow Tower, the King Tower, and the Sky Tower in the East God's Domain; the God Tower in the Western God's Domain and the Dragon Tower in the North God's Domain correspond to each other.

Moreover, the strength of these three towers is by no means inferior to that of the Sky Tower, the Dragon Tower, and the God Tower supported by three God's Domains. With the power of a single God's Domain, they achieved the great feat of confronting the other three God's Domains.

As there has never been any unified force, the situation in the South God's Domain is the most chaotic and changeable among the four God's Domains. It even has friction with the other three God's Domains at the same time, and sometimes erupts into massive wars.

From that endless chaos, emerged very terrifying power.

Yun Xi looked at the legend-ranked expert said to be from the Dark Abyss God's Domain, and smelled the breath from the abyss emanating from her.

Among the Endless God's Domains, the abyss area corresponding to the ancient gods is located on the dark side of the entire world. Without a doubt, the Dark Abyss God's Domain is the starry area where the ancient gods appear the most.

It is said that over one-third of the world in the entire Dark Abyss God's Domain has been occupied by the ancient gods and turned into an endless abyss.

This kind of world would never be allowed to happen in the other three God's Domain, and occasionally, the ancient gods that come to these three God's Domain would sneakily devour the creatures of a world before retreating back to the abyss.

Only in the South God's Domain, meaning the Dark Abyss God's Domain, can they appear with great pomp in broad daylight, even become the dominators of many small and medium-sized God's Domains, regarded as true gods.

"Don't be afraid, even the legend-ranked in the Dark Abyss God's Domain can't violate the rules of the Starry Sky Chessboard here."

"Yes, the trial rules of the Starry Sky Chessboard have been granted..." The speaker quickly stopped talking, apparently the secret was public, but no one dared to discuss it.

After all, this is the world of the Starry Sky Chessboard, the highest level trial stage of the Seven Towers Alliance.

Even dangerous creatures from the Dark Abyss God's Domain cannot kill here, only play chess.

However, compared to most other three-party God's Domains that know each other thoroughly, the Dark Abyss God's Domain, in endless chaos and darkness, seldom appears openly in the trials of the Seven Towers.

Compared to the Seven Towers' trials, the legend-ranked of the Dark Abyss God's Domain prefers the real-world bloodshed, death, and darkness.

They are mostly monsters that other legend-rankeds of God's Domains try to avoid.

Speaking of which trials attract them, probably only the Battle God's Championship Contest, representing the highest combat ability of the endless god's domains on the stage of the Seven Towers trial.

The legend-ranked from the Dark Abyss God's Domain is recognized as the opponent that people would rather not encounter in the Battle God's Championship Contest.

Their attribute mostly being "chaotic", and being incompatible with other intelligent beings, they never regarded the Battle God's Championship Contest as an arena, but a slaughterhouse.

In such a unique environment, chess players from Dark Abyss God's Domain who come to the Starry Sky Chessboard are naturally rare. They have formed their own small circle and rarely communicate with outsiders.

However, at this moment, the entire group of this small circle looked at the figure with the Feathered Serpent King descending on the Stardust Zone, and all of them showed a fearful expression.

As one of the few pacifists in Dark Abyss God's Domain, they could hardly imagine that this figure would come to the trial of the Starry Sky Chessboard.

Shouldn't she be in the "city"?

The "King" of the Seven-color Crown.

The princess of the Tower of the King, the "Demon King" feared by countless people in the Dark Abyss God's Domain.

The King of Feathered Serpents looked curiously around, coiling obediently around the woman's arm, while the seven-colored crown released dazzling radiance.

Then the woman chose a seat and started playing chess.

Silently, a large number of chess players gathered around this mysterious "King," watching her play.

Yun Xi was also one of them, finally liberated from the elder's siege of the elders of the Heaven's Path Palace. With a curious mentality, he gazed at the snow-white little hands, feeling a sense of incredulity.

Her chess was played very quickly, so fast that it didn't seem like Starry Sky Chess.

Even the rules used didn't seem like Starry Sky Chess.

The opponent chosen by her looked completely bewildered as he gazed at her "four-four" and "three-three" tactic, his face full of disbelief.

Is this Starry Sky Chess? Why does it seem so much like the moves in Gomoku?

The problem is that this move possesses an astonishing power.

Once the five pieces form a line, it will emanate a radiance that could cleave through all things, flashing away from the star chart.

At this moment, all the chess players remembered this name, the new chess player who possessed an unparalleled ferocity - "Sweet Dream."

Chapter 886: Sweet Dream

"What, Starry Sky Chess can still be played like this?" Immortal in the Pot felt that his three views had been completely subverted today.

Not only him, but other Starry Sky Chess players watching the game also showed the same expression.

The entry-level stage of the three realms of Starry Sky Chess — Star Falling, is a realm that has been summarized by the predecessors of Starry Sky Chess players, and is best expressed in the form of Go chess.

The weakest among those able to play under the Starry Sky Chess board is also the elite of hero rank. Naturally, they can easily master the rules of Go and their ability to learn established patterns is beyond doubt.

In the hearts of everyone, Go is the best way to learn Starry Sky Chess, and it still has very high reference value until the Star Falling peak.

Until this round, the newcomer "Sweet Dream" from the Dark Abyss God's Domain showed everyone that Starry Sky Chess can be played like this.

That's right, Starry Sky Chess is played like this. Yun Xi smiled and watched Sweet Dream play Gomoku, feeling a sense of camaraderie with her.

No one has ever specified that Starry Sky Chess must be played according to the rules of any particular game.

"Make a move."

"Occupies"

Holding the Starry Sky Chess pieces, enjoy the pleasure of stars falling into your hands on endless star charts, watching the starry sky being changed by the stars. This is the meaning of Starry Sky Chess.

The rules of Starry Sky Chess have never been fixed.

Those experiences and patterns summarized by the past Starry Sky Chess players are only a small part of the Starry Sky Chess world.

It's like people observing another world through small holes opened on a wall that they cannot see the end or thickness of.

Everyone sees a different world through their own small hole, and the rules they summarize about that world are different and even contradictory.

However, they are actually observing the same world and the same place, but they cannot see the real world because they observe too little.

Starry Sky Chess is such a world of truth. Past Starry Sky Chess players used Go as a tool to study Starry Sky Chess, and derived rules and patterns that are suitable for Starry Sky Chess.

These are not wrong and viable because these rules are one of the parts accommodated by Starry Sky Chess.

Similarly, the moves of "Sweet Dream" right now are correct. She used the moves of Gomoku to play Starry Sky Chess and automatically understood the "cutting" rule that belongs to Starry Sky Chess.

Judging solely from her comprehension of the Starry Sky Chess, she has even surpassed Cyber Elf Alpha, whose chess strength is currently second only to Yun Xi, and possesses an innate talent for capturing the laws of the starry sky.

Cyber Elf Alpha also possesses the same talent, but her talent is a "crushing" talent that is based on the support of a huge planetary quantum computer group, which is another kind of violent talent.

"You lost!" Watching the newcomer who came to play chess for the first time, "The Tenth Wise One," Sweet Dream's opponent, cleanly drops the piece and concedes defeat.

His chessboard has been cut into a mess of three strands and five strings, which is a game he has never played before and is even beyond imagination.

Known as "The Tenth Wise One," he represents his identity as a wise man recognized by the Western God's Domain and the God Tower, and is a true great magician and one of the top ten masters in the Wise Council.

Although he cannot compare with Norn the God of Wisdom, who currently holds the title of the first wise one, as a newly promoted wise man, he had considerable confidence in his own chess skills. He was one of the newcomers in the Stardust Zone who was considered to be a sure thing to achieve a rank in the future.

But now, he saw a wall, a wall called "talent," which made people feel hopeless.

Also a newcomer, "Sweet Dream's" chess moves had completely baffled him. How could Gomoku (Five in a Row) exert such power?

Is it wrong to be confined to the established forms of Go? The Tenth Wise One asked himself, then shook his head.

No, it is not Go, which is the learning tool for the first stage of Starry Sky Chess, that is wrong. This is the golden rule that has been summed up by countless Starry Sky Chess players and is applicable to most of the players from the endless god's domains.

The logical calculation and research on territorial occupation in Go are extremely suitable tools for beginners to enter the world of Starry Sky Chess and can be used until the peak of the Star Falling stage.

However, some people are born to follow an unconventional path.

The world of Starry Sky Chess seen through their eyes is completely different from the normal way of playing the game.

Such individuals are bound to become monsters on the Starry Sky Chessboard and eventually reach the summit of the stars.

He accepted his defeat wholeheartedly.

"I'll play! I'll play!" Upon witnessing the Tenth Wise Man's miserable loss, someone quickly sat across from Sweet Dream and challenged this newcomer.

Throughout this game, everyone once again saw how Sweet Dream from the Dark Abyss God's Domain plays chess.

She doesn't even understand the conventional rules of Starry Sky Chess, nor does she bother with the rules of "Gold Horn, Silver Edge, Grass Bag Stomach".

Her moves are dignified, straightforward, and easy to understand.

4-4, 3-3, 4-3!

No matter how complex and sophisticated her opponents' moves are, no matter which piece of land they occupy, she always responds in the simplest way.

Her chess pieces always move forward in a straight line, resolute and unyielding.

Every time she completes a row of five, a sharp flash of light shimmers across the Starry Sky Chessboard.

That is the princess wielding her sword.

That is the king's footsteps.

That is an unstoppable, undefendable ray of slaughter.

The more you play against her, the more you feel the gap called "talent", which shows up concretely on the Starry Sky Chessboard as a means of killing and turns into a force to be reckoned with.

You play Go, I play Five in a Row and then force you into my rhythm, using my unparalleled skills to slay you, this is probably "Sweet Dream's" way of playing.

Chess players who are killed by this kind of tactic cannot recover for a long time, just as if a divine sword had truly struck their soul.

Even though all sounds were cut off when Clearly was playing chess, everyone who watched Sweet Dream's chess game heard the sound of the sword's melody.

Sever!

Cut!

Show no mercy, give no chance.

Each of her moves was equivalent to a sword strike, even though she had no sword in her hands, onlookers could not help but envision the silhouette of an unparalleled divine sword.

The opponent she played chess with was the target she tested her swordsmanship against.

"Terrifying as it is, what kind of talent is this."

"Dark Abyss God's Domain, it really is a gathering place for monsters!"

"It's my turn next, I don't believe I can't beat Five in a Row at Go!"

The gazes of the people were gradually infected with shock and trembling, it was an instinctive reaction to witnessing the unsheathing of an unparalleled divine sword.

Those who were stunned by this style of play had to admit that some people are just born different.

In the world of Starry Sky Chess, there is now another chess player with unparalleled talent.

Today is the moment for her to slay in all four directions.

Chapter 887: The Challenge From Sweet Dream

Sweet Dream left no chance for the opponent, and with each game, the unstoppable and lethal swordlight was certain to appear.

Although it was a game of chess, Sweet Dream's movements resembled that of a swordsman, with each strike hitting the opponent's vital points, causing real damage beyond any defense.

Inevitable and unavoidable, even in the vast expanse of the starry sky, once Sweet Dream's sword-light appeared, it dealt a severe blow to the opponent.

Several legends of the rank suffered a crushing defeat, with even their steps faltering.

Playing against Sweet Dream not only consumed one's mental energy, but also damaged one's soul with every move!

As a newcomer to the Stardust Zone, Sweet Dream has already won thirty consecutive games, and no one has been able to last until the middle or endgame on the Starry Sky Chessboard.

Her attacks are always swift, ruthless, and effective.

Among a thousand troops and ten thousand horses, the head is taken straight away!

"Such a remarkable move." Even Yun Xi couldn't help but applaud her brilliance. This style of play had never before been seen on the Starry Sky Chess board, a visible gift.

Her game was like a legendary sword, unparalleled.

At that moment, the sword had already been unsheathed, seeking challengers to duel with and rise to the top of the starry sky.

"My lord, would you like to play a game?"

"Another challenger has arrived. As customary, it is your turn to play."

"If now isn't the time to act, then when is?!" The elders of the Heaven's Path Palace encouraged and stirred Immortal in the Pot to take the challenge.

"Go! Go! Go! I've had too much to drink. I won't pick on a little girl today." Immortal in the Pot huffed, looking at his group of drinking buddies.

Going up now would be like lambs to the slaughter. Several players at the legend-ranked who could spar with him evenly have already been beat until their faces turned blue.

Each move played resulted in a surprising development, this young lady from the Dark Abyss God's Domain is already unmatched!

He just finished a game with "Little Cloud" and was completely exhausted. Going up now meant surrendering immediately!

"Oh, isn't it true that you always boasts of being able to drink a thousand cups without getting drunk?"

"So even the fairy in the wine pot can really get drunk?"

"This little girl seems to be about to dominate the Stardust Zone."

The elders of Heaven's Path Palace around had a smile on their faces, which made Immortal in the Pot blush.

Previously, most people avoided the legend-ranked of the Dark Abyss God's Domain, but it is different here.

The Starry Sky Chessboard is one of the few trials in the endless god's domains that is completely forbidden from fighting.

Whoever comes here, even if it's a demon god or a powerful fantasy species like the king of feathered snakes, cannot break the rules of the Starry Sky Chessboard.

The only way to fight here is to play chess and each using chess pieces that represent stars on the endless star map.

It is because of this that Stardust Zone is so popular, as it has attracted so many newcomers to the Starry Sky Chess after its official opening.

The enchantment of Starry Sky Chess is spreading at a speed surpassing thousands of times.

One can safely comprehend the mysteries of the stars and communicate with fellow The Legend Rank players in Stardust Zone without any fear, playing chess, chatting, and simply enjoying oneself. This portion of the Endless God's Domains is a haven.

As Starry Sky Chess gains popularity, Stardust Zone will undoubtedly become more vibrant. It is virtually impossible to find as many The Legend Rank players anywhere else.

"She won, she won again!"

"The wise men of Western God's Domain were all defeated. This person's chess skills should not belong in Stardust Zone!"

"I think we should conduct a star rating test right now. Her chances of passing it are hundred percent."

"Even the Dark Abyss God's Domain will produce an extraordinary chess player."

"Sweet Dream, she might become the top player of Starry Sky Chess in the future."

Looking at Sweet Dream from the Dark Abyss God's Domain mercilessly annihilating all the big shots who had been mingling in Stardust Zone, everyone had this feeling that they were witnessing something historic.

Today, they would bear witness to history.

"I surrender." With the final defeat of the last expert in Stardust Zone, Sweet Dream successfully achieved the feat of "ruling Stardust Zone" and the silence spread among the surrounding people.

"Are there no stronger opponents?" Sweet Dream curiously looked around, as it was her first time at the Starry Sky Chessboard and she was still unsure of the level of Stardust Zone.

"Go take the Star Position Test, your chess skills surpass everyone here."

"Star Zone is where you ought to stay, my friend from the Dark Abyss God's Domain."

"I believe no one here can match your skills anymore."

The Starry Sky Chess players who fell under the attack of the Sweet Dream's sword qi shook their heads, feeling hopeless at the disparity of their talents.

As fellow players of the Legend Rank, they were initially stunned by Sweet Dream's strength, but now, they were even more impressed.

"Wait, there is still one person who might be able to fight back."

"Earlier, he also revealed the Star Summoning vision."

"Yes, we also have this newcomer!"

It was unclear who initiated it, perhaps one of the many elders of Heaven's Path Palace, but suddenly everyone's focus shifted to "Little Cloud."

Indeed, as a new player here, there is also a chess player who has produced the Star Summoning phenomenon.

Equally visible talents. Perhaps he may not match up to "Sweet Dream" from the Dark Abyss God's Domain, but he undoubtedly possesses immense potential.

Within a day, two such talented newcomers have arrived in the Stardust Zone. The endless god's domains truly possess infinite possibilities.

The world of Starry Sky Chess will become more and more exciting with the emergence of these terrifying newcomers.

The stage representing the highest wisdom of the endless god's domains is so exciting and full of unknowns.

"You...are strong?" Sweet Dream approached Yun Xi's face and looked at him with a bewildered expression.

Originally just a spectator, Yun Xi instantly became the focus of everyone.

This is what they call being in a dilemma, with no escape route.

"Only in playing chess..." Yun Xi felt that he only had this one advantage in this Stardust Zone where legend-ranked experts gathered.

Compared to the cultivation base, this person in front of him can probably kill him with just one finger. He felt immense pressure when the king of feather snakes looked at him.

"I have no quarrel with you." Yun Xi felt the cold gaze of the feather snake and had an innocent look on his face.

"Very well, let's play chess." Sweet Dream smiled slightly, and the figure shrouded in clouds released a gentle aura.

"I find this game very intriguing."

"It's simple yet fun, perfect for unwinding."

"Hmm, that's Starry Sky Chess for us." Yun Xi also thought so. It's such an easy game to understand and always brings him joy.

"Hiss!" The feather snake wrapped around Sweet Dream's skin spread its three pairs of wings and released intense hostility towards Yun Xi.

If this weren't a non-combat trial on the Starry Sky Chessboard, Yun Xi felt he might have been eaten by this terrifying feather snake.

Chapter 888: Her Confidence

"Amu, quiet down," Sweet Dream touched the raging Feather Snake King on her body, wearing a perplexed expression.

She, who grew up under the protection of the Feather Snake King since she was a child, the princess of Dark Abyss God's Domain and the King Tower, had never seen her Amu display such a violent expression.

It seemed as if she held an irreconcilable grudge against that "Little Cloud" on the other side, surpassing all hatred levels at their first meeting.

"Hiss!"

"Hiss!"

With an unparalleled strength, the Feather Snake King, capable of silencing the crying of infants in the dominion of Dark Abyss God's Domain and the King Tower, showed no signs of calming down. It was only a step away from flying out of Sweet Dream's side to bite Yun Xi fiercely.

"Amu!" Sweet Dream grabbed the slippery body of the Feather Snake King and forcefully stuffed it into her chest, leaving only a tail twirling around, looking quite amusing.

Those who understood the terrifying power of the Feather Snake King were left dumbfounded at the sight. That was an ultimate thunderous creature capable of world annihilation, an embodiment of the rules connecting heaven and earth.

"Alright, let's begin!" After sending her Amu into the mysterious [Field], Sweet Dream elegantly walked in front of Yun Xi and sat on the left side of the chessboard.

"Woosh! Woosh! Woosh!" The surrounding crowd instantly made way, ready to witness what could possibly be the highest level game representing the Stardust Zone.

The entire Stardust Zone started buzzing because of these two newcomers.

The high-ranking the legend rank experts even began placing bets on this game.

"I bet on Sweet Dream to win, her talent is just too extraordinary!"

"I bet on her too, with such talent, she's destined for the Star Zone. The constellations testing will be a piece of cake for her."

"Hmph, I bet on the kid. Come on, who's afraid of who!" Immortal in the Pot stood firmly on Yun Xi's side, defending the honor of the Sky Tower.

As the one who had played a serious match against Yun Xi, he knew best what the summoned Sun God bird represented.

This was also talent, another kind of terrifying talent. These two newcomers represented completely different directions.

It's hard to say who wins or loses.

"This place... is an interesting one." All external sounds began to be isolated, and Sweet Dream's voice became indistinct.

"Yes, I really like this place." Yun Xi had no sense of being a Starry Sky Chess Master. He was originally a novice at Starry Sky Chess, unaware of what it was just a month ago.

Thanks to the discerning eyes of Teacher Casina the Battle God, she must have seen his talent in chess, which allowed him to achieve a hundred consecutive victories on the Starry Sky Chessboard.

He completed the mission of Casina the Battle God and gained confidence.

The battles against each of the legend rank chess players greatly broadened Yun Xi's horizon and made him not feel the least bit complacent about his small achievements in the real world.

Having witnessed the endless Starry Sky Ocean, he, who hadn't even stepped out of the White Lotus Sword Domain, had no qualification to be proud.

"I like to win."

"The feeling of winning brings me joy, I don't like to lose any match."

"Since I was little, as long as I played seriously, I've never lost."

"This time won't be an exception either."

Sweet Dream earnestly told Yun Xi about her strength.

This is not bragging, the princess of the King Tower was born a victor, she defeated countless opponents before reaching the peak of the King Tower.

In the trials of the Starry Sky Chessboard, she was an unknown rookie, but in the exclusive trial of the King Tower, the "King Selection Battle," she was a myth admired by countless people.

"King Selection Battle" is a unique trial of the King Tower, where participants must demonstrate their strength, strategy, and courage, leading the army assigned by the King Tower to conquer countless cruel world memories.

The victors will receive numerous accolades and rewards.

The losers will have nothing, and they may even lose everything they have gained in the past.

Sweet Dream is the undefeated legend of the King's Trial, and with the support of the Feather Snake King, she has even defeated nightmare legions far stronger than herself.

The King of Kings.

The Chosen One.

That is Sweet Dream, the princess of the King Tower in the Dark Abyss God's Domain, the legend who reigns over countless ancient myths.

Today, she came to the world of the Starry Sky Chessboard to challenge all the strong ones and continue her undefeated legend.

She instinctively grasped the most advantageous aspect of the battle style of the Starry Sky Chess.

Just like in the King Selection Battle, her army was always the sharpest sword, tearing through the enemy's solid defense like thunder, bringing the dawn of victory.

This time won't be an exception either.

She is naturally favored by the Goddess of Victory!

Victory! Victory! Victory again!

In the depths of her heart, there was always a voice guiding her, showing her the path to victory.

Because of that, she firmly believed that she was different, chosen, and an ambassador of the will to win.

"Is that so?" Yun Xi looked at the confident Sweet Dream and began to contemplate.

Her talent indeed made people take notice, and perhaps she would be on par with Cyber Elf Alpha when she grew up.

However, for now, she was still just a fledgling. It would be immature to proudly spread her wings.

It's about winning a little less, like guiding a newbie to understand that the rules of Starry Sky Chess are not just about "cutting," but also about guiding her like stroking a child's head.

Or winning a bit more, allowing her to understand the cruelty of Starry Sky Chess, and grasp the higher mysteries of the Starry Sky world.

"Do you... look down on me?" Sweet Dream keenly sensed the hint of pity in Yun Xi's eyes.

That inexplicable look made the princess, who had always been victorious, feel challenged.

In this world, there was someone who could actually pity her? It was as if he saw the end of the game before it even began.

Would she lose?

Could such a thing happen when she had already mastered the killing strategies in Starry Sky Chess that favored her?

"Let's guess first." Yun Xi shook his head, indicating that Sweet Dream should start.

"You will regret it... I will soon make you understand the most terrifying aspect of Starry Sky Chess." The seven-colored crown on Sweet Dream's head radiated a brilliant light, a blessing from the King Tower.

Having been raised by the Feather Snake King since childhood, she had never tasted the bitterness of defeat and didn't feel the need to experience it.

As long as she wins, she doesn't accept any other outcome.

Whether it's a hero or a mythical creature, the princess of the King Tower will triumph and ascend to the highest throne.

Today, the princess of the King Tower, the chosen child of destiny, will continue to slay ruthlessly.

She will not fear any opponent, and she will not allow herself to lose!

"Hmm, it's my turn first."

Chapter 889: Faster

"Snap!"

The first move, still in the familiar position and scenery known to Yun Xi.

In the center of the star map, the origin point – Tianyuan.

"Snap!" The inexperienced Sweet Dream fearlessly responds with a move, initiating a battle against Yun Xi in the Tianyuan area.

"Snap!"

"Snap!"

"Snap!"

Ten moves in a row, neither side showing any hesitation, both appearing confident in their own strategies.

However, what puzzles Sweet Dream is that the opponent seems to be cooperating with her.

That's right, the game Yun Xi and Sweet Dream are playing is Five in a Row.

It's a very simple and easy-to-understand game, even young children who have just started school can play as beginners.

This is the first opponent Sweet Dream has encountered since entering the Starry Sky Chessboard who can play Five in a Row on an even level with her.

Hmph, how could I possibly lose at Five in a Row!

Sweet Dream confidently makes her move, knowing all the possible layouts in Five in a Row, with no reason to be defeated.

But as she keeps playing, she suddenly feels that something is wrong!

"Snap!" Yun Xi's 18th move lands on the board, and the overall shape of the game is gradually taking form. He doesn't allow Sweet Dream to achieve even a single line of five pieces in a row.

No, it is reversed, suppressing Sweet Dream's offensive moves.

If Sweet Dream is an unparalleled divine sword, then Yun Xi's pieces are forcefully pressing it back into its sheath, rendering it motionless.

"Strange..." Sweet Dream, playing against Yun Xi for the first time, furrows her brows. Five in a Row is a game with very simple rules and indeed, having the first move is advantageous. Being temporarily suppressed is acceptable.

But that's not the important part.

What she's being suppressed is not just in the game of Five in a Row, but her indomitable spirit in battles.

No matter how powerful a sword is, if it can't be unsheathed, it can't harm anyone.

Her game strategy is clearly being targeted, as if the opponent has already studied her moves and is using her strong suit, Five in a Row, to suppress her.

For the first time, Sweet Dream uses the sand of the golden hourglass, focused on the intricately woven board, trying to figure out why she can't smoothly launch her offensive moves.

The Feather Snake King, inserted into Sweet Dream's chest, takes the opportunity to emerge and angrily glares at Yun Xi, seemingly seeing through his vile tactics.

Yun Xi looks innocent as he watches the Feather Snake King, who is inexplicably angry at him. He really has no grievances with this magical fantasy specie!

As for the outcome of the game on the board, that's a different matter.

"Snap!" The 19th move, Sweet Dream continues to firmly play her strongest offensive move in Five in a Row, but Yun Xi only smiles faintly, as if he had already known Sweet Dream's choice.

Her game strategy is indeed easy to understand.

Unlike Cyber Elf Alpha, who can employ countless methods to resist, Sweet Dream's attacks are simple and direct, possessing devastating power.

As a result, those who became accustomed to her attacks found them incredibly easy to understand.

She is a child who never accepts defeat and will carry out the will to win until the very end.

Never give up until the very last moment.

Never stop fighting even if it means being torn apart.

Even though the sword remains in its sheath, the sword energy has already pierced through the sky, waiting for the opportunity to strike.

However, that is impossible.

Because her opponent is Yun Xi, who has comprehended the path of the starry sky's trajectory and wields the Starry Sky Chess pieces as the Starry Sky Chess Master.

The power of the Tianyuan is gradually revealing itself as the game progresses.

"Pa!"

The 27th move, Yun Xi's four connected pieces suddenly burst with a brilliant light, cutting through Sweet Dream's chess pieces, leaving her eyes filled with disbelief.

This move, almost identical to how Sweet Dream ruthlessly defeated other chess players in the Stardust Zone.

The difference is that Sweet Dream needs to form a line of five pieces or create an inevitable "four four" or "four three" formation in order to brew such a sword energy and cut her opponent's chess formation into pieces.

While Yun Xi only needs to connect four pieces to achieve the same effect.

Sweet Dream, using the rules of Gomoku to play Starry Sky Chess, forces her opponents to adapt to her own rules in order to defeat them.

On the other hand, Yun Xi can play any chess game and is not inferior to Sweet Dream in Gomoku. He only needs four pieces to cut open Sweet Dream's chess path.

This is a crushing domination on a different level, representing Yun Xi's understanding of Starry Sky Chess surpassing that of Sweet Dream.

Moreover, this is only the beginning.

After the first wave of sword energy, Yun Xi's chain attacks began.

Without needing to satisfy the five-in-a-row rule, he can launch attacks against Sweet Dream who is already at a disadvantage, anytime and anywhere.

His attacks do not need to follow the rules of Gomoku, but are more accurate and the timing of the strikes is more deadly compared to Sweet Dream.

Sweet Dream's five-in-a-row connections possess immense power, capable of completely tilting the scales of victory in her favor with just one display.

However, she doesn't have that chance, or rather, Yun Xi doesn't give her that chance.

The outcome was actually decided the moment Yun Xi cut open Sweet Dream's chess path with four pieces, leaving no suspense.

Sweet Dream's chess has distinct characteristics that differ from other Starry Sky Chess players. Normal Starry Sky Chess players would find it extremely uncomfortable to face her five-in-a-row killing technique. Even Cyber Elf Alpha would probably need to update its algorithm to cope with this move for the first time.

In the Starry Sky Chessboard, perhaps only Yun Xi could easily adapt to Sweet Dream's unorthodox moves and counterattack her with even more unorthodox moves.

You have absolute confidence in your Go game, so I will respond to you and counter with a Four-in-a-row game that you cannot comprehend.

"Impossible... You need fewer nodes than me?" Sweat beads began to form on Sweet Dream's forehead, who possessed the genuine talent of the stars. The Feather Snake King coiled around her became even more irritable.

Why use the rules of Go? That's because her talent tells her that this rule is the most suitable for her on the stage of the Starry Sky Chessboard, an attack and kill rule tailored for her.

To create the most dominant path in the simplest and most effective way, leaving no chance for the opponent to counter.

Her moves are like those of an unparalleled swordsman. Once the divine sword is unsheathed, it is the moment when the opponent meets their demise.

But now the problem is that the opponent's sword is faster and deadlier than hers, leaving her no chance to strike.

Speed is the closest path to victory.

In a battle between two armies, the side with higher speed can easily gain a significant advantage.

In the King's Election Battle, Sweet Dream is renowned for her lightning-fast attacking speed. With the blessing of the Feather Snake King, she naturally possesses a permanent acceleration aura.

This aura is even effective in the world of the Starry Sky Chessboard. She can always find the fastest way to kill her opponent and excels at utilizing this advantage, leaving no escape for the opponent.

However, it was only when she encountered Yun Xi that she realized there was someone in this world who was faster than her.

Chapter 890: Pressing On Step by Step

Sweet Dream has never encountered such an opponent.

From childhood to adulthood, she has always been the fastest among everyone.

She has the fastest speed in practicing sword skill.

She has the fastest speed in leading the army to victory.

She was the fastest in ascending the Throne of the King.

Compared to anyone else, she is the one who leaves others only able to watch her back, and most people don't even have the qualification to catch a glimpse of her back.

She has never encountered anyone faster than herself, not even someone close.

She is the myth, the legend, the undefeated ruler of the King Tower.

Even on the Starry Sky Chessboard, she firmly believes that she is still the fastest.

Even after seeing the chessboard of the Starry Sky Chess Master and experiencing the shock of Star Collapse, she still believes that she won't lose.

No matter how strong the chess strategy is, it still requires a large number of pieces to support it, and she excels at not giving her opponents any chance to gather such power.

Speed attack, this is Sweet Dream's talent. As long as she gets a chance to connect five pieces, she can unleash her signature "Cutting" move.

As long as she takes the first point, it will be a continual slaughter, a grand massacre, an unstoppable divine killing.

This advantage is built on her speed talent, a talent that no one can imitate, not even the powerful Cyber Elf Alpha can replicate.

She firmly believes that as long as she plays chess, she won't lose, just like the miracles she created in the King Tower.

She is the most determined arbiter of victory and has absolute confidence in her own abilities.

As she arrives on the Starry Sky Chessboard, she is ready to launch an assault towards the pinnacle of the stars!

However, now this confidence has been greatly shaken.

Because she discovered that someone was faster than her.

Their understanding of the rules is deeper than hers.

Their methods of gathering power are simpler and clearer than hers.

Perhaps each step is only slightly faster than hers, but these accumulated advantages finally reveal a formidable power on the 27th move.

Her rhythm has been disrupted.

For the first time, Sweet Dream's little hand holding the chess piece trembled, and her previously clear calculations became hesitant.

Because the rules have changed.

This is no longer the Connect Five she excels at; her opponent can unleash a similar cutting power without needing to connect five pieces.

Perhaps the destructive power of this kind of attack is far inferior to her Connect Five's cut, but it completely surpasses the attack rules she has established.

It's as if she crushed those players who play Starry Sky Chess in the Go style using Connect Five, but now Yun Xi tells her that Starry Sky Chess is not limited to Connect Five, but can also be played with Connect Four.

Originally, Sweet Dream, who had been suppressing and even overwhelming her opponents with her unique rhythm, was now feeling her own thought process being suppressed.

So, it turns out that Starry Sky Chess can be played like this.

The rules here are more profound and complex than she had imagined.

Just by looking at the chess manual, one cannot imagine the profundity within it.

"Snap!" Unconsciously, Sweet Dream made a move.

"..." Yun Xi looked at Sweet Dream's bewildered expression. After this move, the game was basically over.

Because she had wavered and could no longer adhere to her own "Go" rules.

In reality, her rules hadn't become invalid. As long as she completed a five-in-a-row, she could once again unleash that suffocating cut-and-sever attack.

However, Yun Xi didn't give her such an opportunity. Starting from guessing who would go first and gaining the advantage of center control, Yun Xi completely took control of the game.

"43..." Yun Xi reminded Sweet Dream, as he completed the winning pattern in Go.

"Ah!" Only now did Sweet Dream fully awake from her daydream and realize that she had lost in Five-in-a-Row.

Moreover, this single loss caused her entire strategy to collapse.

Yun Xi, who had connected five stones, began ruthlessly cutting and severing the game belonging to Sweet Dream, just as she had done to other Stardust Zone players.

This time, Sweet Dream finally experienced the helplessness that others felt when being slain by her.

Once the outcome of Five-in-a-Row is determined, there is no chance for a comeback.

Unlike games played with Go rules, Sweet Dream's Five-in-a-Row rules indeed possess terrifying killing power and dominance. However, once she loses in Five-in-a-Row, the blow dealt to her is fatal.

Forcing the rules of Go into Five-in-a-Row is like a double-edged sword. When gaining an advantage, it can overpower the opponent, but once it backfires in a Five-in-a-Row game, it becomes irreparable.

With just seven moves, Yun Xi made Sweet Dream tremble all over, and her fair little hand could barely hold the delicate Starry Sky Chess pieces.

Each of these seven moves seemed like a blow to Sweet Dream, causing her to feel an unprecedented pain.

Am I going to lose?

In that moment of realization, Sweet Dream almost suffocated.

From childhood to adulthood, faster than anyone else, defeating all opponents, she who ascended to the Throne of the King is now about to encounter her first defeat in life?

And not on the pinnacle battlefield of the stars, but merely in this Stardust Zone, supposedly a place where Starry Sky Chess novices play.

Her proud absolute speed talent, which she believed to be equivalent to a surefire victory, led to her defeat even before engaging in a real battle against those high-level Starry Sky Chess players?

Why?

Why?

Why?

Was she too weak? Was she overly confident? Did she underestimate her opponent?

No, that's not the case.

The king of the lions, even when facing a harmless little rabbit, would give its all, not because it wants to devour the innocent creature, but to prove its majesty.

In this game, she didn't make any wrong moves, and she even felt that she played better and more focused than usual.

The strength of the opponent ignited her even stronger fighting spirit!

As long as she is given a chance, a chance to make a move, she will definitely unleash the most earth-shattering sword ever seen on the Starry Sky Chessboard.

Yes, just one opportunity!

Sweet Dream took a deep breath, looked at the nearly hopeless game, let go of all distractions, and searched for a chance to turn the tide in adversity.

However, Yun Xi did not give Sweet Dream such an opportunity.

Or perhaps, it was just Sweet Dream's illusion.

Many chess players who played against Yun Xi have had such illusions because Yun Xi rarely makes a fatal move, which gave his opponents a false perception.

I can still keep playing.

There will still be a chance for a comeback.

Hmm, indeed, it's a beautiful fantasy, but it doesn't actually exist.

Because once Yun Xi gains an advantage, he never makes mistakes, just like the despairing probability calculated by Cyber Elf Alpha.

Under an advantage, Yun Xi's winning probability is 100%.

"Snap!"

"Snap!"

"Snap!"

Those were the three moves that truly suffocated Sweet Dream, each one striking at her tight heartstrings, accelerating her heartbeat, and making her unable to extricate herself.
