Chapter 1159 One Million Points

Liam's life-draining ability was swiftly siphoning the life force from the creature. As this occurred, he observed something peculiar.

The life energy he was taking in was remarkably pure, even encompassing the creature's untainted Origin Energy!

This unusual occurrence caused Liam's previously restrained level to unlock, allowing him to directly ascend to the level of sixth rank seven-star.

Furthermore, following this advancement, Liam's strength began to soar dramatically.

This unexpected twist left Liam both astonished and regretful.

His newfound level meant that the points he would gain from defeating this creature would be drastically reduced by tenfold.

What Liam failed to realize was that the life force and Origin Energy of the Blood Clan were deeply interconnected. This creature of the clan distributed its Origin Energy throughout its entire body.

Thus, in a sense, Liam had inadvertently struck a jackpot, despite his lack of joy about it.

The creature, sensing its life force being swiftly drained, was terrified and let out a roar. "Curse you, human! How dare you use such a trick?"

Liam merely frowned, disregarding the creature's protest.

Realizing that Liam wouldn't relent, the creature abandoned all hope of survival. Its gaze hardened as it resolved to use its Origin Technique—Blood Explosion!

Suddenly, the creature's bodily fluids began to boil, resulting in a series of explosions.

The creature attempted to kill Liam with a suicide attack.

But Liam simply gave a cold smirk, his grip on the creature unyielding.

The injuries Liam sustained from the creature's Origin Technique were swiftly healed by his relentless life-draining power.

For the first time, Liam truly valued the incredible ability to absorb life force. It was not only replenishing his own life force but also restoring his Origin Energy!

Sensing the nearly limitless power within him, Liam couldn't help but feel a surge of joy.

He hadn't anticipated his life-draining ability to be so potent against the creatures from the Blood Clan!

Liam increased the intensity of his life-draining power, and the energy of the creature swiftly diminished under this formidable force. Its Blood Explosion power was effectively neutralized.

The creature's resistance grew progressively weaker. Eventually, all of its life force and Origin Energy were completely absorbed by Liam's life-draining power, leaving nothing but a pool of dark red liquid seeping into the ground.

After defeating the seventh-rank creature, Liam felt an immense weight lift from him and collapsed to the ground, utterly exhausted.

Despite having killed the creature and saving himself from immediate danger, Liam still felt a twinge of regret.

After all, he had already ascended to a higher level before defeating it. As a result, the points he would earn for killing a seventh-rank creature were now only ten thousand.

Liam appeared troubled as he deliberated between the Shadow Flower and the opportunity to draw the Shadow Sword.

The Shadow Flower was Susannah's lifeline, and no matter how powerful the Shadow Sword might be, Liam couldn't justify giving up Susannah, who had saved his life once, for it.

Moreover, he didn't even have sufficient points to get the chance to draw the Shadow Sword.

After thinking about this for a while, Liam made a decision.

He decided he would forgo the opportunity to draw the Shadow Sword.

However, just as Liam was about to exchange his points for the Shadow Flower in the points store, he stopped in his tracks.

He was in disbelief when he saw that his points had soared to a staggering one million ninety thousand!

It turned out that the points he earned from defeating the creature earlier amounted to an immense one million.

Liam was ecstatic; he hadn't anticipated such a

Chapter 1159 One Million Points
substantial reward.

 +120 Points at most

Clearly, the points awarded for defeating a higher-ranked enemy were not calculated in the usual manner.
