

Chapter 1195 A Heavy Task

Noticing that Liam was slightly distracted, the president was worried his mindset would change, so he said, "Liam, you have no other choice. You will go to the Cosmic realm sooner or later. It's the only way you'd have a chance to protect Blue Star. You have so much potential. Besides, I think your mother changed some things in your body. This is why things even I can't understand happened to you!"

Hearing this, Liam's expression changed.

He realized that the white light deep in his heart probably had something to do with his parents.

But Liam remained quiet about this.

It was wiser to keep this to himself.

The president couldn't tell what Liam was thinking, so he didn't overthink it.

Liam looked up at the president. "Master, I forgot to ask. What should I do if I want to leave Blue Star?"

Liam's heart thumped rapidly in his chest with excitement.

He knew his parents had to be alive. He knew he needed to leave Blue Star and head to the Cosmic realm to find his parents.

The president's answer was unusual. He cleared his throat and said, "Liam, leaving Blue Star isn't about rockets or satellites. You could also leave that way, but you won't truly go to the Cosmic realm. Meeting the requirements to go to the Cosmic realm is impossible

with the current technological power of Blue Star. To go to the Cosmic realm, the first condition you must meet is to reach the tenth tier as a Primogem Warrior. And so far, no one has been able to reach this level in Blue Star. The Pope of the Saint Society and I are only at the peak of the ninth tier. There are few ninth-tier Primogem Warriors on Blue Star. It's very rare!"

Liam smiled bitterly.

He hadn't expected that his master and the Pope of the Saint Society hadn't reached the tenth tier in such a long time.

If they couldn't even do that, how could he?

Besides, less than a year was left before the Saint Society would invade Blue Star.

Liam had zero confidence in himself, but his master did. He gave Liam a small smile. "Liam. You are a very talented young man. Your senior and I have both acknowledged this. In the Cosmic realm, being a tenth-tier Primogem Warrior is quite normal. In some races, their infants are born with strength much stronger than tenth-tier Primogem Warriors. You should know that reaching the tenth tier's strength may not be as impossible as you imagine. You must believe in yourself."

Somehow, Liam's master's pep talk made Liam feel worse.

Some kids in the Cosmic realm were already much stronger than a tenth-tier Primogem Warrior? Liam couldn't believe it.

Still, Liam shook himself out of it and decided not to feel discouraged.

After all, he was the type of person who grew stronger with every setback! Otherwise, he wouldn't have been able

Chapter 1195 A Heavy Task

 +120 Points at most

to return to, and even surpass his previous peak, especially after everything he had gone through.

It wasn't like he was considering leaving the Blue Star immediately. He still had a long way to go before becoming a tenth-tier Primogem Warrior.

His goal at that moment was to reach the eighth tier as quickly as possible so that he could rescue his wife and child.
