

Chapter 1245 Four Galaxies

Liam was taken aback by Sheldon's words.

This was his first encounter with the terms "City of Divinity" and "Sacred Road".

He had never heard of these places before.

Noticing Liam's puzzled expression, Sheldon explained, "The City of Divinity is the revered site of our Human Clan. The Sacred Road, on the other hand, is a sacred path within the site. Think of it this way: Every member of the Human Clan aspires to reach the City of Divinity and climb the Sacred Road. However, very few talented individuals are fortunate enough to have that opportunity. Even Lindy's chances of climbing the Sacred Road are slim!"

Upon hearing this, Liam couldn't hide the longing that crossed his face.

If he could get in there, he would definitely gain a lot.

Then, Liam heard Sheldon say, "Young man, I see great potential in you! I am confident you'll have the opportunity to visit the City of Divinity and climb the Sacred Road!"

Why did Sheldon hold him in such high regard?

Even Lindy looked at Liam with respect now.

With her master's approval of Liam, she believed Liam might really get the opportunity to enter the City of Divinity and climb the Sacred Road.

Surprised and honored, Liam pondered over Sheldon's

high opinion of him, especially since they had just met.

After the conversation with Liam, Sheldon changed the subject. He turned to Lindy and said, "Lindy, please help Liam get registered with our Human Clan's forces."

Lindy nodded in agreement.

Seeing Liam's confused gaze, Lindy began to explain with a smile, "We are currently in Revelation Planetary System 131 of the Rosefinch Galaxy. Revelation Planetary System 131 includes three habitable planets, six resource planets, and numerous asteroids! Each habitable planet is home to trillions of members of the Human Clan. That's more than the population on Blue Star, where you used to live."

Upon hearing Lindy's words, Liam was surprised.

He hadn't expected there were trillions of people on a habitable planet.

That was thousands of times more than on Blue Star!

Liam now viewed the Cosmic realm differently.

Following Lindy, Liam absorbed more information about the Human Clan.

"Our Human Clan is a dominant force in the Cosmic realm, quite different from the Human Clan in your Celestial Realm. You've noticed the difference, haven't you?" Lindy said.

Liam gave a slight nod, acknowledging this.

Lindy then continued, "The Human Clan controls extensive territories here. Our habitable planet is part of the Rosefinch Galaxy. There are three other large galaxies similar to ours: the Dragon Galaxy, the Whitetiger Galaxy, and the Tortoise Galaxy. The four galaxies stand united as

guardians of the central Divine Domain. The City of Divinity and the Sacred Road lie within the heart of the Divine Domain. However, getting into the City of Divinity is not that easy. If you aim to enter the City of Divinity, be prepared for numerous challenging tests!"

Liam remembered every detail of what Lindy said.

While they talked, they reached the place for Liam to register his identity.

With Lindy's help, Liam completed the registration process smoothly.

Lindy handed Liam the certificate and said with a smile, "There you go! From now on, you're free to explore the world of our Human Clan!"

Liam returned the smile and nodded. He was still thinking about the network he had accessed during the registration.

This network was known as the "Network of Human Sovereign".

It was a world that was part virtual, part real.

Within the Human Clan's territory, Liam, with his verified identity, could access the Network of Human Sovereign at any moment.

Once connected to the Network of Human Sovereign, Liam could perform any activity that one might do in the physical world, such as isolating himself to improve his strength.

In essence, Liam had the ability to access a unique space where he could do whatever he wished.

This left Liam in awe of the Human Clan's advanced

civilization within the Cosmic realm.

Considering the current level of technology on Blue Star, it would likely take many millennia, if not longer, to achieve such advancements!

Lindy said to Liam, "Now, we'll head to the Sanctuary of Human Sovereign's palace to assess your talents! Everyone newly arrived in the Cosmic realm from their own Celestial Realm is entitled to a free evaluation of their spiritual power, special power, and primogem energy at the Sanctuary of Human Sovereign. The experts there will provide a detailed assessment of your potential based on your test results. The test results will be categorized into four grades."

Liam nodded, taking note of the different test levels.

He then followed Lindy into the Sanctuary of Human Sovereign.
