

Chapter 1248 The Limit Of Liam

As Liam surveyed the throng of unfamiliar foes before him, his expression grew stern.

He was accustomed to facing adversaries several tiers above him, but this was the first time he encountered rivals on his own level.

However, Liam didn't underestimate his enemies.

He knew well that even a lion must use full force to capture a rabbit.

He believed that even with superior strength, one must never lower their guard!

This understanding had kept Liam out of dire straits for many years.

Thus, as the voice declared the start of the trial, Liam sprang into action simultaneously.

"Lava fire!"

In a flash, Liam unleashed a torrent of lava fire.

The inferno of flames and magma swiftly engulfed the alien attackers in front of him.

Clinging persistently to the aliens' bodies, the lava fire made it impossible for them to escape its grasp.

Within moments, the hundred diverse aliens facing Liam succumbed in less than ten seconds to his fiery onslaught.

Liam achieved a resounding victory!

Even Liam hadn't anticipated such an effortless triumph over so many adversaries.

But soon, realization dawned on Liam.

It seemed that his strength had evidently soared beyond that of a level-ten, one-star Primogem Warrior.

This was the reason he had killed so many foes with such ease.

As he stood in the test chamber, the voice echoed once more, announcing the imminent second round.

"Please prepare yourself. The second round of testing will commence in ten minutes."

Upon hearing the announcement, Liam quickly began to ready himself.

He hadn't anticipated a second phase in this talent test.

As the ten minutes elapsed, the starry expanse before him was filled with aliens once more.

While the number remained the same—a hundred enemies—their strength had escalated from one star to two at the tenth level.

With a stern look, Liam braced himself.

Each star's advancement at level ten signified an exponential increase in power.

Nevertheless, Liam still went all out.

Surprisingly, Liam managed to annihilate all one hundred

level-ten, two-star aliens in a single, fiery move—without using his Origin Technique or special powers.

This unexpected feat left him slightly surprised.

He had never imagined his strength to be so formidable.

Even when confronted by level-ten, three-star aliens, Liam killed them with a single strike.

It wasn't until he faced level-ten, four-star adversaries that Liam began to feel some pressure.

Each round brought him face to face with a hundred aliens. Such a number was significant enough to shift the dynamics of the battle.

Unwilling to hold back, Liam used his Malicious Aura Domain and tapped into the special power of the five elements.

The level-ten, four-star aliens were quickly wiped out by Liam's formidable abilities.

A flicker of excitement crossed Liam's eyes after his victory.

He was eager to push his limits and see how far his powers could go.

After a brief ten-minute rest, Liam entered the fifth round of the test.

By the sixth round, when a level-ten, six-star alien emerged, Liam noticed a significant change.

Instead of the usual hundred aliens, only one appeared this time.

But despite the reduced number, Liam recognized that the

single level-ten, six-star alien before him was a prime warrior among his rank, representing a unique challenge akin to facing a hundred aliens!

As soon as the battle started, Liam felt exhaustion creeping in.

His opponent unexpectedly dodged his attack and launched a counterattack.

This meant that to conquer this adversary, Liam would have to exert more energy and display greater strength.

The battle dragged on for ten minutes before Liam emerged victorious.

He rested for another ten minutes before entering the seventh round.

The battles were getting tougher from the sixth round, and Liam would take much longer to defeat his enemies.

When he reached the eighth round against a level-ten, eight-star alien, he nearly used up the full thirty minutes allotted for the test.

Now, in the ninth round, Liam faced a level-ten, nine-star alien.

He wondered if he could defeat this foe within thirty minutes.

The result did not disappoint Liam too much.

Utilizing his life-draining ability and an array of special powers from various elements, Liam managed to defeat the alien in the last few seconds, barely scraping through the ninth round.

Exhausted and drenched in sweat, Liam felt his muscles

ache and found himself too weak to even lift his arm now.

"It seems this is my limit," he muttered, wiping sweat from his forehead. Acknowledging his current strength's limit, he decisively chose to give up on the tenth round.

Continuing seemed pointless if it meant facing an even stronger enemy he couldn't possibly defeat.

So, Liam concluded the first test of his attack power without any regrets.
