

## Chapter 1262 Spark Fire

Upon hearing Shiloh's words, Liam gave a slight nod of agreement.

He then approached the struggling spark beast.

At that moment, the spark beast was emitting agonized howls.

But Liam harbored no compassion for it.

Given the bitter enmity between the Human Clan and the Beast Clan, his apathy was understandable.

Thus, Liam drew a plain dagger and plunged it swiftly into the spark beast's skull, killing it instantly.

Once the spark beast was dead, Liam extracted the spark metal.

Meanwhile, Trudy glared at Liam's back, her voice thick with anger. "He barely lifted a finger to help us. Yet, he rushes to claim his share of the spoils now! So shameless!"

Noticing Trudy's rising temper, Shiloh frowned and sharply reprimanded her. "Trudy! That's enough! Speak such nonsense again, and I'll ensure you are grounded once we return to our family."

Realizing Liam's considerable abilities, Shiloh could no longer afford to underestimate him.

Initially, his respect for Liam had stemmed from his good manner.

However, now, Shiloh respected Liam for his formidable strength.

At this juncture, Liam took out the sword of darkness and methodically collected all the spark metal.

The hoard totaled nearly one hundred kilograms.

While Liam did not fully understand the benefits of the spark metal, he was aware that possessing more would be advantageous. He was happy there was a hundred kilograms of spark metal.

Liam then divided the spark metal into three equal shares and distributed them between Shiloh and Trudy.

After the division, Liam turned to Shiloh and inquired with a smile, "Can you now tell me the uses of the spark metal?"

Curious about the properties of the spark metal Shiloh had mentioned earlier, Liam waited for Shiloh's explanation.

Shiloh responded without reservation, "The spark metal is not only valuable for task completion but also vital for harnessing the law power of the fire element. Moreover, it can refine and enhance the spiritual power of a Primogem Warrior."

After all, Liam had only recently arrived in the Cosmic realm, so he was unaware of these benefits.

Upon hearing Shiloh's explanation, Liam came to understand the valuable uses of spark metal and expressed his gratitude to Shiloh.

Meanwhile, a sudden blue light emerged at the spot where Liam had collected the spark metal.

"What is that?" Unsure of what the blue light signified, Liam

turned to Shiloh for answers.

The sight of the blue light caused Shiloh's expression to darken dramatically.

He exclaimed, "That's spark fire! Spark fire is extremely dangerous. It has the power to incinerate both the body and soul of a Primogem Warrior. Anyone caught in its blaze could only succumb to a torturous death. It is far more perilous than a spark beast!"

Realizing it was spark fire, Liam grasped how terrifying it was.

His prior mission briefings had mentioned spark fire, so he knew about it already.

He had assumed its appearance here was merely a coincidence.

However, he soon noticed the spark fire moving swiftly out of the hole, as though it were alive, and its target was unmistakably him!

As the spark fire hurtled toward him, Liam's demeanor turned grave.

Despite being aware of his own robust physical resilience, he knew better than to face the spark fire head-on.

Thus, he promptly summoned the giant, hoping it could shield him from the spark fire.

When the spark fire collided with the giant, it unleashed its fearsome heat.

Yet, the giant still managed to retaliate.

With its inherent elemental power, the giant began to neutralize the extreme heat of the spark fire.
