

Chapter 1401 Share The Rewards Equally

After hearing their explanation, everything clicked to Liam.

It turned out that the 100 days of free cultivation time was incredibly precious.

If he made full use of this, it could be equivalent to one hundred thousand points.

That was no small amount.

No wonder everyone had been surprised when they had heard about his rewards. They had even urged him to value this opportunity.

"Liam, it's better if you keep the rewards for yourself. You can gain a lot from this. However, if you share your rewards with others, the value of the rewards will drop significantly. You'll end up losing a lot. We didn't team up with you just for the rewards. You don't have to share your rewards with us," Chad said.

Upon hearing this, everyone around Chad nodded in agreement.

Shiloh stepped forward and said, "Exactly. During the special mission at the stronghold of the Titan Bugs, neither Trudy nor I did anything significant. It's enough for us that we completed the task. You don't need to share the rewards with us equally."

Lindy and Annabella also nodded in agreement.

They felt awkward about sharing the rewards equally with Lewis and the others, who were powerful Primogem Kings. After all, at the base, without the protection of Lewis and the others, they wouldn't have survived, much less completed the mission.

However, Liam remained resolute in his decision to divide the rewards equally. He shook his head at everyone and spoke with conviction.

"All of us faced many hardships in the stronghold of the Titan Bugs. It wasn't easy for any of us to survive. How could I break my promise now? Besides, if we hadn't worked together, how could I have possibly escaped from the stronghold of the Titan Bugs? I completed the task because of all your help. I promised to share the reward equally and intend to keep that promise! I've always planned to distribute my own rewards to those who received less."

Everyone's eyes widened in disbelief. They were clearly shocked by Liam's decision.

Liam was actually planning to use his own reward to address the unequal distribution of the rewards!

For people like Lewis and others, who were well-off in terms of points, making such a decision was already difficult enough.

After all, the team comprised fifteen Primogem Kings.

They were bound to accumulate more points than Shiloh and the others.

Equalizing everyone's points would require at least tens of thousands of points!

As a cultivator who had just entered the Cosmic realm, it seemed impossible for Liam to amass such a large number of points.

Yet, seeing Liam's unwavering determination, everyone realized that no amount of persuasion would change his mind. They exchanged glances and chose not to say anything.

After declaring his intention to distribute his points to address the unequal distribution of rewards, Liam said, "Everyone, please share the rewards you've obtained from this special mission. It will help me determine how to allocate the points effectively."
