

Chapter 1424 Liam's Plan

Liam didn't know that his special mission was in a secret realm within the Rosefinch Galaxy.

This secret realm had been set aside specifically for Liam by Caden.

After all, Caden knew that Liam had previously asked Christos about the fragment of the Heart of Life.

Back then, Caden had intended to send Liam there, but the City Lord had stopped him because Liam hadn't been strong enough at the time.

Considering Liam's lack of strength back then, entering the secret realm would have been no different from seeking death for him.

But recently, Liam had been acknowledged by the Sea of Death and had become its rightful master. Only then did Caden think of this secret realm.

Since Liam had become the master of the Sea of Death, he could face the Death Power domain in the gray area. Even if he couldn't control it, no harm would come to him. This was the main reason Caden had allowed Liam to enter the secret realm.

That was why Caden had reported the situation to the City Lord and arranged for Liam to enter the secret realm as part of a special mission.

To help Liam grow, both Caden and the City Lord had put in a lot of effort.

This was incredibly rare in the history of the Human Clan throughout the Cosmic realm.

But Liam wasn't aware of any of this.

Since he couldn't enter the lake, Liam had no choice but to sit at its edge, deep in thought.

Sadly, there wasn't a good way for him to dive into the lake.

Before Liam had obtained the Death Power domain, he might have had a chance to dive into the lake.

At that time, the death aura within him hadn't been too pure, and the life force from the lake would have been less likely to resist him.

But now, due to the influence of the Death Power domain, the death aura in Liam's body had intensified, making it naturally difficult for him to reach the lake's depths.

Yet, Liam was not discouraged.

He calmed down and began to think of a solution.

It was inevitable that the life force in the lake would resist the death aura on his body.

Liam understood this well, and thus he knew that finding another way into the lake's depths would be challenging.

Liam's expression grew more serious. Suddenly, he looked at his own body.

His body had achieved the "Silver-Form Body" level, known for its robust defense.

If avoiding the lake's life force's resistance was impossible, why not attempt to force his way to the bottom?

He could just rely on his physical resilience to overcome the lake's resistance!

Liam's eyes lit up as he thought this approach would work.

However, before he proceeded, there was something else he needed to do.

He retrieved a red vial from his pocket—the Blood Sovereign's blood essence.

Liam planned to consume a tenth of the Blood Sovereign's blood essence to bolster his physical strength.

Even though a fraction of the Blood Sovereign's blood essence couldn't fully elevate his body to the Gold-Form Body, taking it would still boost his physical strength.

With this boost, Liam would feel even more confident about reaching the lake's bottom.

Liam knew the life force coming from the lake was strong. He realized that if he jumped in without being prepared, he would end up getting hurt badly.

His life might even be in danger because of this!
