

Chapter 1425 Short Seclusion

After devising a strategy, Liam wasted no time. He extracted one-tenth of the Blood Sovereign's blood essence, diluted it, and applied it across his body.

Having previously utilized the Blood Sovereign's blood essence, Liam approached the task with greater ease this time around.

He was well aware of the intense burning sensation that would occur when the powerful substance contacted his skin.

Bracing himself for the discomfort, Liam exerted all his effort to resist the pain induced by the blood essence.

Liam's thorough preparation ensured that he did not suffer excessively from the effects of the Blood Sovereign's blood essence.

Half an hour later, he successfully overcame the initial burning phase and transitioned to the next stage.

Of course, even though he had endured the most challenging phase, Liam did not let his guard down. Simultaneously, he was preoccupied with another task.

As the blood essence began to challenge his soul, Liam cleverly unleashed his primogem energy to synchronize with the blood essence.

This synergy allowed his body to assimilate the energy from the blood essence more efficiently and thoroughly.

At the same time, Liam began practicing the Human Body Refinement Technique, which he had acquired in the secret realm of the Shadow Palace.

This technique further facilitated the rapid absorption of the blood

essence.

After nearly half a day, Liam had fully absorbed all the energy from the Blood Sovereign's blood essence.

His eyelids, which had been shut for an extended period, began to quiver. Then, Liam awoke.

Upon opening his eyes, his first action was to assess his physical state to see if it matched his expectations.

He was not disappointed.

Thanks to the blood essence of the Blood Sovereign, he had achieved notable enhancements in his physical strength.

This time, the Blood Sovereign's blood essence did not elevate his "Silver-Form Body" to a "Gold-Form Body"; it merely strengthened his body slightly.

Though the improvement was modest, it still provided an added layer of security for Liam's upcoming venture into the lake.

Liam understood that despite the high quality of the Blood Sovereign's blood essence, the essence being a product of a different race meant he couldn't fully harness its potential.

Additionally, he had previously utilized the Blood Sovereign's blood essence, and his body had developed antibodies, significantly diminishing its effectiveness.

With each use, his body would produce more antibodies, progressively reducing the impact of the blood essence on his strength until it eventually became ineffective.

However, the Blood Sovereign's blood essence had other uses beyond augmenting physical strength; it could also aid in his cultivation.

Should the blood essence ultimately prove unhelpful, Liam could still

trade it on the Network of Human Sovereign for a substantial amount of special points.

Liam examined the vial containing the Blood Sovereign's blood essence in his hand.

There were nine drops of the Blood Sovereign's blood essence left.

Liam was confident that he could use all the remaining blood essence of the Blood Sovereign to elevate his body to the "Gold-Form Body"!
