#### Chapter 385: Inviting the Divine Doctor

When the old doctor received Cheng Tang's invitation, he happened to be performing an emergency surgery for a patient. As the patient's condition was critical, this surgery took twelve hours. He did not even rest after the surgery and rushed to the Kang family without stopping.

As the surgery was done overseas and it took a lot of time to reach Beijing, Lin Yuan's broken limbs were left there for too long.

The old doctor did have the ability to reattach the broken limbs, but he was really not confident that he could reattach it to Lin Yuan after more than twelve hours. The broken limbs were sealed in a special medicine and it could preserve the activity of the nerves and muscles when they were in the medicine. However, once they were taken out, regardless of whether the broken limbs could be reattached, the part that was soaked in the medicine would immediately be contaminated by the various gasses in the air when it came into contact with oxygen. By then, it would be too late.

When Kang Ying heard this, she immediately collapsed to the ground and cried uncontrollably. "Doctor, please help my mother reconnect her hands. She's such a vain person. If she doesn't have hands, how will she live in the future! She became like this because of me. Please save her. The Kang family will give her as much money as you want. As for the Lin family, as long as you help my mother reconnect her hands, feel free to ask for anything!"

Seeing that Kang Ying's face was red, crying so hard that she was out of breath and looked like she was about to faint from sobbing, Cheng Tang couldn't help but frown. She took two steps forward and stood in front of the old doctor. She asked in a low voice, "Doctor, is there really no other way? On account of the Cheng family, please help us think of an idea."

So what if he could ask for anything from the Kang and Lin family? The old doctor was highly respected and naturally did not lack these. However, it was different if Cheng Tang came forward. He agreed to the Cheng family to rush over to fix Lin Yuan's broken limb because he had owed the Cheng family a huge favor many years ago.

Now that Cheng Tang had asked him to think of a solution, he naturally had to help her come up with an idea seriously.

He lowered his eyes slightly and pondered for a moment. A few minutes later, he seemed to have thought of something and his eyes lit up. He quickly looked up at Cheng Tang and said excitedly, "Ms. Cheng, I remember now. Two years ago, when I was participating in a medical forum, I happened to come into contact with a medical faction that specializes in bone reconnection techniques. That group of scholars had inadvertently revealed that there was a doctor called the 'divine doctor' in the martial arts world who was very proficient in bone reconnection techniques."

After a pause, the old doctor rubbed his palms slightly and added, "Besides that, I've also heard a rumor that this 'divine doctor' had come to Beijing a year ago and had even reconnected the head of a young master whose neck had been broken."

Upon hearing this, Kang Ting asked in shock, "Reconnected his head?"

/ please keep reading on

The old doctor sensed that he had used the wrong words and quickly lowered his head to cough twice to explain, "Master Kang, it's not what you think. The patient's cervical spine was completely broken, and his head was already lying limply on his shoulders, unable to move. He almost died, but he happened to encounter the 'divine doctor', so he saved him."

"What about now? How's that person's recovery?" Kang Ying asked anxiously.

The old doctor thought for a moment and replied in a low voice, "He should have more or less recovered. I only roughly understood this matter back then. After all, when something happens to a big family, they suppress the news immediately. In addition, the young master has been treated. In order to prevent others from having ill intentions towards them in the future, they naturally won't reveal any more information."

When Cheng Tang heard this, she nodded and agreed, "That's right. I've heard about this matter before, but I thought that it was a joke and didn't take it seriously. Now that you've said it, it really seems like it has happened."

After a pause, she lowered her eyes and continued, "In that case, since then, no one in Beijing has mentioned this news. I believe that the young master of that family should have completely recovered. Therefore, in order to reconnect these hands, the only thing we can do now is to invite this legendary 'divine doctor' to treat her as soon as possible!"

## **Chapter 386: Wanting to Invite the Divine Doctor**

Cheng Tang had heard of this “divine doctor” with superb medical skills that the old doctor mentioned. However, in recent years, very few people she knew were proficient in medicine. In addition, the people in the family had never been seriously ill with an illness that was difficult to cure, so she did not pay much attention to the news of the “divine doctor”.

Although Cheng Tang was not too sure that this legendary person who had always lived in the rumors of others could definitely reconnect Lin Yuan’s broken arms, if she could invite the “divine doctor” to treat Lin Yuan, it would be considered as her doing her part as a member of the Cheng family.

Seeing that Cheng Tang agreed with his opinion, the old doctor nodded frequently and replied, “I only know a little about the news about the ‘divine doctor’. However, I’m sure of one thing. In Mrs. Kang’s situation, if she wants to reconnect her broken limbs and return to her previous life, this legendary ‘divine doctor’ will be her only hope!”

After hearing the old doctor’s suggestion, Cheng Tang frowned slightly and pondered for a moment. She raised her hand and casually summoned a servant she had brought from the Cheng family.

Unexpectedly, before she could instruct her, Kang Ying stood up from the ground anxiously. She grabbed the corner of her shirt and begged loudly, “Aunt, I’m begging you. Only you can save my mom now. Please think of a way to contact this ‘divine doctor’ on my account. The only way now is to invite him. Only then will there be a glimmer of hope of my mom’s hands being healed.”

Cheng Tang squatted down slightly. Seeing Kang Ying’s dejected expression, she patted the girl’s hand that was holding the corner of her shirt tightly and said softly, “Ying’er, don’t worry. I will think of a way to invite the ‘divine doctor’ to help your mother reconnect her broken arms.”

After saying this, she stood up and waved her hand behind her. The servant who had taken two steps forward and was about to listen to Cheng Tang’s instructions immediately came close. “Someone, pass my order down. Tell them to place an order at the Love Pavilion in the name of the old master of the Cheng family. No matter what high price the other party offers, you have to ask them to find the traces of the ‘divine doctor’. Tell them that as long as they contact the ‘divine doctor’, they are free to ask any amount for the consultation price!”

After hearing Cheng Tang’s instructions, the servant bowed respectfully. After acknowledging, he left the Kang family and went to the Love Pavilion to place an order.

On the other side, just as the person Cheng Tang sent contacted Cheng Yi and said that he wanted to invite the “divine doctor” for treatment, Cheng Yi called Mo Zhu.

At this moment, Mo Zhu was about to contact Meng Ran and Jiang Yu to ask about the situation at the research institute when she suddenly received a call from Cheng Yi. She thought that there was some new development in the case they had discussed last time.

/ please keep reading on

She swiped the answer button and replied softly. Mo Zhu listened to Cheng Yi's movements very quietly on the other end of the phone.

Cheng Yi picked up the teacup on his desk and took a sip of tea to moisten his throat. He coughed twice and said, "Girl, I think I have something to tell you."

Upon hearing that it was not related to the case, Mo Zhu raised her eyebrows with interest. "Oh? What's the matter?"

Cheng Yi continued in a low voice, "Just now, Cheng Tang sent someone in the name of the old master of the Cheng family to invite the 'divine doctor' to help Lin Yuan of the Kang family reattach her broken limbs. When she placed the order, she even promised that no matter what price the 'divine doctor' offered, as long as he was willing to take a look, the Cheng family would agree to it."

"Any price is fine?" Mo Zhu played with her fingers, interested in this question.

Cheng Yi nodded and replied, "That's right. According to the information I've found, Cheng Tang should have already asked an expert to treat Lin Yuan, but for some reason, that expert didn't have a good way to treat Lin Yuan's broken arms. That's why she thought of asking the 'divine doctor' through the Love Pavilion."

## **Chapter 387: The Divine Doctor Takes Action**

Following Mo Zhu's instructions, Cheng Yi had been sending people to keep a close eye on the movements of the Kang family and the Cheng family. Therefore, he had naturally found out everything that had happened in the Kang family.

Furthermore, as everyone knew, if anyone wanted to look for someone, the most efficient organization that would be able to offer assistance would be the Love Pavilion. However, the most special thing about the Love Pavilion that others did not know was that the Love Pavilion was the only way to invite the "divine doctor" to take action.

"Sure." Mo Zhu smiled lightly and replied with deep meaning in her eyes, "Ask the staff to go back home and say that the 'divine doctor' has accepted this job. Give Cheng Tang a price of ten billion yuan and tell the Cheng family that seven days later, the 'divine doctor' will send someone to the Kang family to personally graft Lin Yuan's broken limb, but the premise is that the money for the consultation has to be transferred over these two days."

Although she had a grudge against the Kang family and Cheng Tang for joining forces against them, it was not a bad deal to be able to make a killing before she really took revenge on these two families.

Mo Zhu had a grudge against this group of people, but it did not mean that she would let the money go. In this world, who would complain that there was too much money to spend?

Upon hearing Mo Zhu's words, Cheng Yi knew that she had always had her own opinions. He did not stop her and immediately nodded. "Alright, I'll instruct someone to inform the Cheng family as you said later."

After saying this, Mo Zhu nodded lightly and hung up the phone neatly.

After making this call, she remembered that the matter at the research institute had not been settled. Seeing that it was already late, Mo Zhu sent Meng Ran a message asking her to help cover up tonight.

Not long later, Meng Ran replied to Mo Zhu's message. The message said that the research institute had received a notice from Country H this afternoon. The finals of the Mathematical Olympiad this time was set to be in Southeast Asia's Country N. The time was the day after tomorrow. Considering that the members of the various countries who had entered the finals came from all over the world, in order to better ensure the safety of their students, Country N had sent a private plane to the airport in Beijing to pick up the contestants tomorrow morning.

After hearing this news, she recalled that Huo Xuan was also going to Southeast Asia to settle some matters. Mo Zhu asked Meng Ran for the contact number of the person-in-charge of the research institute. After making a call to apply for leave and explaining the situation to the relevant staff, she said that she wouldn't take the private plane sent by Country N tomorrow. After arriving in Southeast Asia, she would take the initiative to report to the competition venue.

/ please keep reading on

When the person-in-charge of the research institute heard Mo Zhu's words, he thought that the families of the students who could successfully enter the finals were either rich or noble. He did not ask for any detailed information and only registered Mo Zhu's name and group number before agreeing to this matter.

After settling this matter, Huo Xuan happened to enter Mo Zhu's room after taking a shower.

Seeing that Mo Zhu was leaning against the head of the bed and staring at her phone in a daze, he took two steps forward, pulled open the corner of the blanket and lay down

on the bed. He raised his hand and gently ruffled the girl's hair as he asked, "What are you thinking about? Why are you so engrossed?"

When Mo Zhu heard this, she retracted her gaze from her phone and looked up at Huo Xuan before replying indifferently, "I wasn't thinking about anything important. I contacted the research institute just now. The finals of the Mathematics competition is the day after tomorrow. The location is set in Country N in Southeast Asia."

After saying this, she paused for a moment and added, "Last time, I remember you saying that you have something on and want to go to Southeast Asia personally. When are you leaving? If it's convenient, you can go with me tomorrow."

Upon hearing Mo Zhu's words, Huo Xuan held the girl's hand and gently rubbed the back of it. He pondered for a few seconds and nodded. "Alright, the matter here has come to an end for the time being. I'll book a plane tomorrow. I'll accompany you to Southeast Asia to participate in the Mathematics competition this time."

## **Chapter 388: Discovering Something Wrong**

The next day, as Huo Xuan had mentioned in advance that he had booked a plane for this trip, Mo Zhu wasn't in a hurry. She slept until she woke up naturally before instructing Mo Wu to bring her to the research institute to pack the luggage and belongings she had brought with her.

When Mo Zhu arrived, the participating students and supervising teachers of the research institute had already taken a private plane to Country N, leaving only a few staff members to clean the venue.

She walked around the empty square with familiarity and passed through a few small roads. Mo Zhu quickly arrived at the dormitory building and prepared to pack her things and bring them away.

When she arrived at the dormitory door, she inserted the key into the lock and opened the door with all her might. Just as she opened the door, she was attracted by an unusual "oil stain" behind the closet.

Frowning slightly, Mo Zhu took two steps forward and stared intently at the small drop of oil that was already slightly smudged. She lowered her eyes and pondered quietly.

When she first received the dormitory key, she was the first to enter. As her results were good and she was the first to choose a bed and cabinet, she had personally checked every corner of the dormitory. If she was not wrong, the staff of the research institute had cleaned the dormitory area very well. It was impossible for such traces of "oil stains" to appear here.

Mo Zhu lowered her eyes and gently tore off a small piece of paper from a corner of the exercise book on the table. She squatted down and simply dipped it in the “oil stain”. She placed it under her nose and smelled it before observing it carefully for a few seconds. Then, she seemed to have thought of something and her expression instantly darkened.

On the surface, this “oil stain” didn’t look anything special, but after careful observation, as long as one approached it, they would be able to smell a special fragrance from it. And this fragrance was something Mo Zhu had smelled on Huo Xuan when she rushed to the Kang family to pick him up the day before yesterday.

If her judgment was correct, the predecessor of this “oil stain” might be what was used to drug Huo Xuan that day!

Thinking of this, Mo Zhu’s eyes instantly turned cold. She packed her things neatly and didn’t stay at the research institute any longer. She got into Mo Wu’s car and instructed him to drive to the airport to meet Huo Xuan.

/ please keep reading on

After getting on the plane, Mo Zhu looked out the window at the blue sky and white clouds along the way, thinking about the “oil stain” she had discovered in the dormitory. Seeing that the girl looked like she had something on her mind, Huo Xuan didn’t take the initiative to disturb her.

An hour later, the plane stopped at Country N’s international airport. Someone opened the door for Mo Zhu. She listened to the guide’s arrangements and unbuckled her seatbelt before getting off the plane.

Just as he walked out of the airport, someone Huo Xuan knew drove over to pick him up. When he saw them walk out, a man from Country N who looked to be in his thirties welcomed them with a smile. He said in fluent Chinese, “Mr. Huo, it’s been a long time. How have you been in Country Z recently?”

When Huo Xuan heard this, he also smiled and shook hands with the person. “It’s pretty good. Business here is pretty good too, right?”

Upon hearing Huo Xuan’s question, the person’s expression froze slightly. He rubbed his palms nervously and said in a low voice, “It’s alright, Mr. Huo.”

Just as he finished speaking, Huo Xuan glanced at him with a fake smile and said lightly, “Mi Lai, I thought you didn’t want to see me? It’s really unexpected. You’re the first person to pick me up when I just arrived in Southeast Asia!”

The man Huo Xuan called Mi Lai scratched his head and continued with a terrified expression, “How is that possible? Mr. Huo, Country N welcomes you. Why wouldn’t we

be willing to see you? You're the most respected guest we have welcomed in the past few months!"

After saying this, he put on a respectful expression and bent down slightly to open the car door for Huo Xuan. He invited him very politely, "Mr. Huo, we have specially prepared a welcoming banquet for you. Please do us the honor of taking a look."

Huo Xuan nodded and turned around to instruct Mo Wu to escort Mo Zhu to the competition venue. Then, he got into the car and left the airport with Mi Lai.

## **Chapter 389: Gathering for the Competition**

Country N's territory was not as big as Country Z's, and the facilities in all aspects were not as good as Country Z's. Therefore, they had decided to gather the contestants of the various countries at a certain national high school and booked a nearby hotel for the participating teams of the various countries to stay.

According to the coordinates sent by the person-in-charge of the research institute, Mo Wu successfully found the hotel that Country N had specially reserved for the students of Country Z.

When he saw Mo Zhu rush over to gather with the rest, Luo Nan hurriedly took two steps forward and reminded her worriedly about the things to take note of when she was staying in Country N for the next two days.

To Luo Nan, others might not know, but he knew very well in his heart that Mo Zhu, this student, had a chance of winning the championship of the Mathematics competition this time. All these years, there had never been a genius young student under him or even in the entire capital who had grasped so much mathematics knowledge like Mo Zhu and could solve all sorts of difficult questions without being taught.

Mo Zhu was a champion seedling that the heavens had given to Country Z. Nothing could happen to her at such a critical moment, so he had to take this student seriously.

When he saw that Mo Zhu did not come to gather this morning, Luo Nan was extremely anxious. For this, he even specially went to look for the person-in-charge of the research institute to inquire about the situation. After understanding that Mo Zhu wanted to come to Country N by herself, he heaved a long sigh of relief.

Li Xiao followed behind Luo Nan in a hurry to look for Mo Zhu. As the form teacher of Class Eight, the leader of Jingyang High School had specially reimbursed him for him to come to Country N to accompany the students for the competition.

When he was taking attendance just now, Mo Zhu was not there. Li Xiao was also anxious. Now that he saw the girl being sent over safely, he was finally relieved.

The two of them instructed Mo Zhu to be careful and brought the girl to the front desk to check in.

Just as he walked into the hotel with Mo Zhu, the other candidates frowned in surprise when they saw this scene. They gathered together unhappily and started discussing.

/ please keep reading on

“Who’s that girl over there? Why didn’t I see her during the training previously? Does she have a powerful background? Why is Professor Luo by her side and looking so happy?”

“That’s right. In the past few days of training, I’ve almost never seen Professor Luo smile, let alone take such good care of a certain student. What background does this girl have to make Professor Luo take her so seriously!”

It was no wonder that the students had such a big reaction. In everyone’s eyes, Luo Nan was originally someone who was very cold.

He was also a genius in the past. With his talent in Mathematics, not only did Luo Nan enter Beijing University to further his studies at a young age without having to take the exams, but he had also held the position of professor at a young age and led the top students nurtured by the country, one batch after another.

In addition, he was a man of few words and did not care about anything other than Mathematics. In the eyes of teachers and high school students of his age, he could be said to be very cold and arrogant. Therefore, at this moment, no one expected that the cold and famous Professor Luo would actually put on an amiable appearance to an ordinary high school student.

And something even more unexpected was coming.

The person in charge of bringing Country Z’s students to Country N to participate in the finals this time was the top teacher, Yao Mei, who had been specially chosen by Beijing University. As everyone knew, this teacher was famous for being strict. His strictness was not only reflected in supervising the students’ studies, but also in managing their lives. Therefore, the leaders of Country Z unanimously recommended him as the person in charge to come to Country N to lead the students to the finals.

However, what surprised everyone was that when he saw that Mo Zhu was late, he only smiled and waved at the girl. He did not reprimand her at all.

## **Chapter 390: Unexpected**

“What’s going on? This girl’s background is too powerful. Even Teacher Yao is so friendly to her. I think her family probably used money to buy connections to get her into the finals!”

“That’s right, that’s right. Which family’s daughter is this? Have you seen her before?”

At this moment, the discussions of the crowd were even louder than before. Their voices were so loud that they wished that everyone in the hall would know that Mo Zhu had gotten the spot to participate in the finals through the back door.

Apart from some families with powerful backgrounds who used money to buy spots for their children, all the students present had worked hard to study and solve questions to get the spots to participate in Country N’s competition. Therefore, when they heard these miscellaneous discussions, everyone instantly looked at Mo Zhu with expressions showing their complicated feelings.

After leading Mo Zhu through the check-in procedures, Luo Nan brought the girl straight to the elevator door. When they passed by Yao Mei, the man quickly stopped them.

The reason why Yao Mei knew Mo Zhu was not only because she had performed outstandingly in the few test questions she had done in the research institute, but also because he was one of the teachers Chen Man had specially invited from Beijing to Cloud City to tutor Mo Zhu in Mathematics.

Seeing that Mo Zhu had completed everything and that Luo Nan and Li Xiao attached great importance to her, Yao Mei nodded and said with a smile, “Mo Zhu, I heard that you came here as soon as you got off the plane. You must be tired from the long journey. Coincidentally, there’s a pre-examination preparation meeting in the afternoon. Since your knowledge is so good, I think you don’t have to participate. You should recuperate in your room and rest well!”

The students might be puzzled as to why the teachers were taking such good care of Mo Zhu, but Yao Mei knew very well in his heart that they had to rely on this girl and she would decide whether they could win the first place in the Mathematics competition this time. If they did not value her and she became unhappy and unwilling to participate in the competition, then they would really have missed the chance to win the championship!

When Mo Zhu heard this, she nodded politely at Yao Kun and deliberately lowered her voice as she replied, “Thank you, Teacher. I understand.”

On the way to the room, Luo Nan and Li Xiao chattered on about many things to take note of. After instructing her to rest well and maintain a good state during the competition, the two of them went straight downstairs to settle the other students.

/ please keep reading on

In the hall on the first floor, everyone had seen the scene just now. Many students had started to criticize Mo Zhu. Seeing that the teachers had arranged for everyone to share a room with another person, everyone started complaining loudly again.

“Why can that girl stay in a room alone? Why do we have to share a room with another person? We’re all participants in the finals. The teachers can’t treat us differently, right?”

“That’s right. I think there must be a deeper meaning behind the teachers’ arrangements, right? Or is this student going to accompany a certain big shot tonight?”

At this point, before he could finish, the sound of a plastic bottle being crushed suddenly came from the side.

Looking in the direction of the voice, Meng Ran was holding Jiang Yu’s hands tightly. As she comforted the girl in a low voice, she tried to restrict Jiang Yu’s hands that were about to take action on the people. “Xiao Yu, we came to Country N to participate in the competition together. At such a critical moment, endure it for a while and everything will be calm. Take a step back and it will be alright. You can’t be so impulsive because of these words!”

After saying this, afraid that Jiang Yu wouldn’t listen, Meng Ran said in a low voice, “I know that you and Sister Mo grew up together and your relationship must be very good, but we can’t cause trouble for Sister Mo at this time. It’s already very difficult to participate in the finals in a foreign country. If we offend the students who came together, these girls will definitely cause trouble for us behind our backs. The gains don’t make up for the losses!”

After taking a few deep breaths, Jiang Yu was finally appeased by Meng Ran and did not really fight with the group of gossip women.

When Meng Ran saw this, she patted her chest in relief.

## **Chapter 391: Questioning Xing Meng**

In the end, the matter in the hall did not blow up. In order to comfort the negative emotions of the students, the teachers were forced to give Mo Zhu a roommate.

Considering that Mo Zhu’s personality was cold and she usually only interacted with the students of Class Eight, under Li Xiao’s suggestion, Meng Ran was assigned to stay in the same room as Mo Zhu.

After receiving the order, Meng Ran knocked on Mo Zhu’s door with her luggage. After explaining the situation in detail to Mo Zhu, Mo Zhu nodded and gave up the other bed in the room.

As the rooms were arranged by the competition's judges, this hotel had provided the students with a standard room with two beds. Now that one of the beds was taken by Meng Ran, the room was filled with a lot of luggage and it did not look as empty as before.

After unpacking the things she had brought, Meng Ran was about to ask Mo Zhu what she had done the last time she left the research institute in a hurry. Unexpectedly, before she could speak, Mo Zhu stood up, opened the door neatly, and left.

Meng Ran scratched her head and stood in the room in a daze, looking like she did not know what was going on.

After leaving the room, Mo Zhu casually found a familiar student from the corridor and found out Xing Meng's room number.

After walking two steps, Mo Zhu found the room and knocked on Xing Meng's door impatiently.

Xing Meng was unpacking the luggage that the Xing family had brought for her. When she heard someone knocking on the door anxiously, her expression darkened unhappily and she exuded a cold aura.

After instructing a young lady from a high school in Beijing who was staying with her to open the door, Xing Meng lowered her head and suppressed the anger in her heart before continuing to unpack.

/ please keep reading on

A moment later, just as the door was opened by the young lady, Mo Zhu could not wait to kick the door open. Her sharp eyes saw Xing Meng squatting by the bed and unpacking the clothes in her suitcase. She flashed to the girl and Mo Zhu frowned as she scolded, "Xing Meng, is this how you return my favor?"

Seeing that the person who came was Mo Zhu, Xing Meng raised her eyebrows and stood up. She crossed her arms and asked with interest, "What favor? And what attitude did I have towards you?"

Mo Zhu looked up at Xing Meng, a cold glint shooting out of her eyes. She said in a low voice, "Do you dare to admit that you're the eldest daughter of the Xing family? Do you dare to say that you, Xing Meng, didn't participate in the incident where the Kang family poisoned Huo Xuan two days ago?"

After being suddenly criticized by Mo Zhu, Xing Meng really did not react to what had happened. She stood rooted to the ground for a few seconds before asking indifferently, "The Kang family? Do you think that a small family like the Kang family can suck up to the Xing family? What a joke, what a huge joke. If I wanted to attack you and your

fiancé, why would I spend so much effort to find the Kang family to join forces? It's really degrading!"

When Mo Zhu heard this, she lowered her eyes and pondered carefully for a moment. She felt that what Xing Meng said made sense. She frowned coldly and asked bluntly, "You keep saying that you didn't do it, but what about the drop of liquid mixed with poison beside the closet in the research institute's dormitory?"

It was not that Mo Zhu had to suspect Xing Meng. There were a total of four people living in the dormitory of the research institute. Apart from Meng Ran, who was innocent and Jiang Yu was her relative, she could not be a suspect. The only person with a motive was Xing Meng, so she had no choice but to place the suspect on Xing Meng alone.

Xing Meng lowered her arm and gently rubbed her palms. Thinking that she still owed Mo Zhu a favor, she pursed her lips and explained with a good temper, "Mo Zhu, you're usually such a smart person. Why are you making mistakes now? Think about it carefully. With the Xing family's many years of work habits and family tradition, if I really wanted to take action on you, I definitely wouldn't use such a despicable method like drugging and poisoning you. The Xing family has many talents and strong abilities. Even if it's one-on-one, it's not that we aren't you and the Huo family's match!"

## Chapter 392: Suspecting Jiang Yu

After being reminded by Xing Meng, Mo Zhu already believed most of her words.

Previously, when she was browsing through Xing Meng's information in the principal's office of Jingyang High School, she had secretly investigated the Xing family. The Xing family was a martial arts family. All these years, other than the fact that their nephew was trained by various experts in the martial arts world, they had also secretly taught many secret guards who worked for the Xing family.

If it was really Xing Meng who did it, she really did not have to go through so much trouble to do it.

Seeing that Mo Zhu was lowering her eyes and thinking quietly, Xing Meng took two steps forward and approached the girl. "Mo Zhu, I really don't know about this. However, if you need me to help investigate the mastermind, I can send a message to my family and ask them to pay more attention to the Kang family!"

Upon hearing this, Mo Zhu looked up at Xing Meng with a deep meaning in her eyes. Then, she waved her hand coldly and said in a low voice, "It's alright. Since you didn't do it, this matter has nothing to do with you!"

After saying this, Mo Zhu turned around neatly and left Xing Meng's room.

In the eyes of the little girl who had opened the door for Mo Zhu just now, the intense battle between the two of them really frightened her. She had originally thought that living with Xing Meng was already very terrifying. She did not expect that among the students who came to Country N to participate in the finals, there was actually a girl who looked more terrifying than Xing Meng.

As she walked along the corridor that she had to pass through to return to her room, Mo Zhu lowered her eyes and looked at the overlapping patterns on the carpet. As she was in a daze, she was thinking about that suspicious "oil stain".

After a while, she seemed to have recalled something and a glint flashed across Mo Zhu's eyes. Then, she clenched her fists tightly.

After asking Meng Ran for Jiang Yu's room number, Mo Zhu did not stop and immediately went to Jiang Yu's room.

/ please keep reading on

Seeing Mo Zhu's unhappy expression when she returned to her room, Meng Ran quickly put down the clothes she was tidying up and hurriedly took out the room card before following closely behind the girl.

After knocking on Jiang Yu's door, Mo Zhu ignored Meng Ran, who had followed her all the way here. When she saw that Jiang Yu was alone in the room, she walked straight to the bed and sat down. She placed her hands on her knees and stared at Jiang Yu coldly.

When Meng Ran saw this, she thought that Mo Zhu definitely had something to ask Jiang Yu. She casually closed the door and timidly followed the girl to sit on the bed on the other side.

Meng Ran looked up at Jiang Yu, who was standing at a loss. She glanced at Mo Zhu from the corner of her eye. Before the two of them could speak, she cleared her throat and carefully stuck her head out to ask Jiang Yu, "Xiao Yu, did you make Sister Mo angry?"

When Jiang Yu heard this, she wrung her hands nervously and replied softly, "No, I've been staying in the research institute obediently to study and practice questions these two days. I didn't go anywhere..."

When Meng Ran heard this, she followed Jiang Yu's words and turned to look at Mo Zhu. She said sincerely as if she was a peacemaker, "Sister Mo, I can testify to this. Ever since Xiao Yu came to Beijing, she hasn't left our side at all. Even when you weren't in school for the past two days, she had been memorizing formulas and practicing questions seriously every day. Not to mention making you angry, she didn't even have the chance to interact with you!"

After pausing for a few seconds, Meng Ran emphasized, "Sister Mo, you might not know this, but Xiao Yu has been worried about you the past two days when you weren't around. She asked me every day if I had received any news from you..."

Before Meng Ran could finish, Mo Zhu looked up and glanced at Jiang Yu coldly. She asked in a low voice with a hint of displeasure, "Tell me, how much have you been involved in these things that have happened in Beijing recently?"

## Chapter 393: No Bad Intentions

Upon hearing this, Jiang Yu's face instantly turned pale. She gritted her teeth, pursed her lips tightly, and replied, "You, you know everything?"

Mo Zhu looked at Jiang Yu expressionlessly with the same coldness. "Give me an explanation."

Seeing that they were talking about a topic she had never heard of, and the atmosphere between the two of them was a little tense, Meng Ran tactfully stood up and left the room, leaving the room to Mo Zhu and Jiang Yu.

After Meng Ran left, Jiang Yu could not stand Mo Zhu's oppressive gaze that was fixed on her. Her lips trembled as she shouted excitedly, "That man, he's not worthy of you at all! What right does he have to be your fiancé? Apart from causing trouble and danger for you, he can't help you with anything!"

As if she had never expected to hear such an answer from the girl, Mo Zhu's eyes widened in surprise. "So you did all of this..."

Before she could finish, Jiang Yu continued with a flushed face, "I hacked into his computer twice. It's been so long, and the entire Huo Corporation hasn't even found my online name. I installed a fake bomb in that man's car, and he doesn't even have the ability to dismantle it. What right does he have to be with you? He doesn't deserve to stand by your side!"

When Mo Zhu heard this, her expression turned cold. Previously, she had only suspected that these things had something to do with Jiang Yu. She did not expect this girl to admit that she was the one who did it.

Mo Zhu lowered her eyes and rubbed her palms slightly. She asked coldly, "How much were you involved in the Kang family poisoning Huo Xuan?"

Jiang Yu was agitated by Mo Zhu's questioning tone. Thinking that the girl had always been protective of her in the past and had never been angry at her for such trivial matters, Jiang Yu's eyes welled up with tears uncontrollably. She sniffled aggrievedly and sobbed. "Sister, I did all of this for your own good. If that man can't even deal with such a simple plot, what right does he have to stand side by side with you from now on!"

Upon hearing this, Mo Zhu pinched the space between her eyebrows with a headache. She looked straight into Jiang Yu's resentful eyes and said lightly, "I just want to ask how much you know about the poison. You don't have to have such a big reaction..."

/ please keep reading on

Jiang Yu pursed her lips and looked away aggrievedly. "I don't know what kind of poison it is. The aphrodisiac I gave the Kang family that day was casually bought from the black market."

An aphrodisiac? She bought it casually?

Mo Zhu naturally believed Jiang Yu's words. Although this girl had the intention to harm Huo Xuan, she was a kind child by nature. It was impossible for her to hand the poison to the Kang family without hesitation despite knowing the danger of it.

Since Jiang Yu did not know the origins of this poison, everything else was trivial compared to it.

Waving her hand lightly, Mo Zhu instructed Jiang Yu in a low voice, "I naturally can't care about these things if they haven't been discovered by me, but now that I already know, it's impossible for me to ignore Huo Xuan."

After a pause, Mo Zhu raised her hand and ruffled the girl's hair. She advised softly, "Xiao Yu, you're my family. Huo Xuan is my partner for the rest of my life. I don't want there to be any estrangement or misunderstanding between the two of you. Let's end this matter here."

Understanding that the girl just couldn't accept her intimate relationship with Huo Xuan for the time being, Mo Zhu gave Jiang Yu some buffer time. After saying this, she took a deep look at the girl, stood up, and left the room, leaving Jiang Yu standing alone with tears flowing down her face.

## **Chapter 394: The Competition Begins**

The next day, under the witness of the international organizing committee, this year's Mathematical Olympiad officially began.

As this competition was a national competition, the checks in all aspects were especially strict. Not only did the students who entered the venue had to have their personal information checked strictly, but even the teachers of the various universities who entered as supervisors had to show relevant certificates before they were allowed to enter.

Just as the news that was revealed previously, the competition this time was composed of two parts. The first part was a personal competition, and the second part was

teaming up to answer the questions. After removing the highest and lowest marks of the two parts, the total score was divided by the number of judges in order to obtain the final score.

This competition was valued by many countries and media, so it was broadcasted live. The official media of the various countries were present to participate in the recording, there were also the people from the various families who had spent a lot of money to enter the venue to watch the competition. All of this was done so they could take more photos of the young masters and young ladies of the families to be used in the future.

After the invigilator of Country H took his seat, on the high seat in front of the hall, he coughed twice and took the microphone to announce the official start of the competition.

Someone was in charge of blowing the whistle. After the whistle rang, the candidates from various countries who had come to participate entered the venue in an orderly manner. They sat at the table marked with their examination numbers and names. There were already staff members who had placed the test questions and draft papers on the table. After the candidates were in position, another whistle rang. The invigilator held the microphone and said in a low voice, "Start answering the questions."

The difficulty of the Mathematics competition questions today could be said to be very uniform. In order to take into account the knowledge and answering ability of every participating student, the entire exam paper was divided into four parts.

The first part was on the front of the first paper. The questions were more inclined to the basic questions. Apart from the knowledge that one had to master in high school textbooks, it only expanded a little more knowledge taught in university Mathematics.

The second part was a little more difficult. Not only did they test the expanded knowledge of university questions, but they also integrated the novel solution ideas of many top international teachers.

Those who could complete the third part were mostly the best of each country. The questions in the third part were all questions that the organizing committee of the various countries' Ministry of Education, who were specialized in mathematics, had meticulously developed and created themselves. Then, they were chosen to be sent to Country H and were edited by a professional Mathematics talent from Country H before they were added to the paper.

/ please keep reading on

The questions in the last section had been used as the finale questions for the past few years. After holding the Olympic competition for so many years, almost no student had solved the questions in this section. It was extremely difficult to understand the steps to solve the question and even roughly listing the formulas that might be used in this question, let alone complete the entire question.

When the whistle rang, all the students present rushed to pick up their pens and start answering the questions nervously.

When she saw the questions that were divided into four parts, Meng Ran's face turned pale with fright. She did not waste a single one of the practice questions that Mo Zhu had secretly set for her over the past two days. Every day, other than eating and sleeping, she would hug the question book and complete the questions to update her small question bank. After roughly glancing at the questions on the paper, she directly gave up on the third and fourth parts and chose the safest way to spend her time on the questions for the first and second parts.

On the other side, Zhang Qi had the same thoughts as the girl. Although he had accepted Mo Zhu's teaching and nurturing this week, he was definitely not an expert in Mathematics. Zhang Qi knew his place and chose to start from the first part. Although the points for the first and second parts were low, if he could get the points he had the ability to obtain firmly, he would not be a burden to Mo Zhu.

## **Chapter 395: Completing the Questions Quickly**

Time flew by. Almost all the candidates present lowered their heads in unison. In the quiet air, there was only the rustling sound of paper.

Unknowingly, an hour had passed. When the supervisors were patrolling the venue to check the answers of the candidates, Mo Zhu caught everyone off guard as she raised her hand to hand in her paper under everyone's gaze.

The time taken to answer the questions in this competition was just as important as the points. If two teams obtained the same average score in the end, the scorer would add up the time of all the members of the two teams. The group with the lowest time would win.

As it was rare for students to take the initiative to hand in their papers in the past, let alone now that only an hour had passed, the teacher-in-charge came to Mo Zhu in surprise and carefully checked the girl's name, exam number, and other personal information. After discovering that Mo Zhu had indeed finished answering all the questions on the paper, the teacher looked up and nodded at the invigilator on the stage.

After instructing the timekeeper to record the amount of time the girl took in detail, a dedicated staff member came forward and sealed Mo Zhu's paper in an envelope.

After answering the questions, Mo Zhu was brought to a resting seat at the side. Her speed at answering the questions was too fast, and she had imperceptibly exerted a lot of pressure on the other students.

Hence, the supervisors discovered a phenomenon. Under the influence of Mo Zhu, almost every student accelerated the speed at which they solved the answers in their hands and wrote quickly on the papers.

A few minutes later, the invigilator from Country H informed the examination team of the competition to come to the scene from backstage.

After handing everyone the test papers that Mo Zhu had just sealed in the envelope with her personal information written on top, the professional teachers from the various countries who were in charge of marking the papers in the special office widened their eyes when they saw the formulas that were filled up on the papers.

What was unexpected was that although Mo Zhu answered this paper very quickly, be it the first or fourth part of the paper, the calculation steps and the results of each question were written in detail and listed very clearly. Therefore, the teachers could clearly determine Mo Zhu's strength with just a glance.

/ please keep reading on

The teachers divided the work and double-checked all the answers on Mo Zhu's paper. After a while, everyone reported the results in shock.

When the news reached the invigilator's ears, even he, who was on the high platform, could not remain calm. He looked up coldly at the girl who was sitting quietly in the resting seat. The invigilator did not expect Country Z to have such a strong student. She had only used an hour to answer all four questions and had even gotten full marks!

At the same time, Huo Xuan was attending a dinner.

They didn't know who but someone had released the news that Huo Xuan had arrived in the country. In just a day, all the leaders of the organizations in Southeast Asia knew that he had come to Country N personally. Now, in the name of Mi Lai, almost all the influential people who were active in this area attended today's dinner.

"Mr. Huo, you can't let this matter rest like this. Back then, when we allowed your subordinates to be stationed in Southeast Asia, we clearly agreed that the East District could be yours, but the West District had to be under our jurisdiction. This time, it was your people who refused to listen to us and insisted on barging into the West District, which led to today's misunderstanding!"

"That's right, Mr. Huo. The East and West Regions haven't been split up for so many years. We've been getting along and earning money together. Ever since you took over the East District, many conflicts have happened. I'm afraid we can't even count them on one hand. We can't continue like this. If the East and West Regions don't develop well, it will definitely affect the foreign exchange of our North District!"

"I agree with this point of view too. Mr. Huo, in my opinion, as a citizen of Country Z, you should place all your energy and power in your country. Why do you have to get involved in the mess of Southeast Asia?"

"Mr. Huo, you can't be so domineering. After all, we still have a lot of subordinates to support. You have to give us an explanation for this!"

Huo Xuan sat on the chair expressionlessly and glanced at everyone present coldly.

His fingers tapped the table lightly. After a while, he looked coldly at Mi Lai, who had not spoken up for him, and said in a low voice, "Tell me your opinion."

## Chapter 396: Confrontation and Battle

Upon hearing Huo Xuan mention that he wanted to listen to his opinion, Mi Lai rubbed his palms nervously. Then, he looked up into the man's eyes and explained indifferently, "Mr. Huo, the conflict between our subordinates and you this time was really an accident. It's all because of the pressure from other organizations in Southeast Asia that we had no choice but to do this. I think you should consider everyone's sincere suggestion just now. In that case, it's more beneficial for everyone's future development. After all, harmony makes money!"

When Huo Xuan heard this, his fingers continued to knock rhythmically on the wooden dining table in front of him. He raised his eyes and glanced at Mi Lai coldly. He smiled and said, "Sure, since you've already asked, it's impossible for me not to give you face. How about this? We'll split the business in Southeast Asia into two. I don't care about the four regions. After you've divided the geographical location, give me a map of the area. I want half of the business. You can distribute the rest according to the original arrangements!"

Upon hearing Huo Xuan shamelessly make such an excessive request in their territory in Country N, someone immediately slammed the table and stood up, loudly expressing his displeasure with the man's words. "Mr. Huo! What do you mean by this? Your suggestion is too much. I hope you have some self-awareness and see whose territory you're in now! If we can't reach an agreement now and we part on bad terms, I believe the subsequent development of the matter is not what you and I are willing to see!"

These threatening words came one after another, but Huo Xuan didn't take them to heart at all. He picked up the glass in front of him as if nothing had happened and took a sip of the red wine that emitted a mellow fragrance. He looked up coldly at the man who had slammed the table and stood up. "Why? Do you think you can threaten me in Southeast Asia and Country N?"

After a pause, Huo Xuan placed the wine glass back on the table and gently raised his hand to move his wrist bone. His entire body emitted a cold aura as he continued unhappily, "If anyone wants to take action, you can try. I, Huo Xuan, have been doing

business in Southeast Asia for the past few years. There are really many people who say that they want to take my life. As the saying goes, don't bite off more than you can chew!"

"You!" That person's anger instantly surged to the top of his head after being provoked by Huo Xuan. His face was red as he said anxiously, "Don't go too far!"

Seeing that they were about to fight as they spoke, Mi Lai stood up nervously and quickly walked two steps in front of the man. He looked at Huo Xuan respectfully and asked in a low voice, "Mr. Huo, we naturally know how powerful you are. However, is there any room for discussion on this matter? Can you be magnanimous and give us more benefits?"

Upon hearing this, Huo Xuan looked at Mi Lai coldly and frowned tightly. "What I said just now is already a suggestion after I take a step back. In Southeast Asia, you guys have hurt my brothers. If I take a step back, how can I face them?"

"You should be glad that I didn't ask you to pay with your lives for hurting my brother. Otherwise, if we don't come to an agreement today, you can forget about profiting from the resources and business I have in my hands in the future!"

When Huo Xuan said this, the expressions of everyone present changed drastically. Although Huo Xuan hadn't been in the Southeast Asia market for long, his actions were swift and decisive. In just a few years, he had expanded the Huo family's business to the four regions.

/ please keep reading on

Therefore, no matter how dissatisfied these people were with Huo Xuan's domineering actions, they didn't dare to openly clash with him.

Mi Lai lowered his eyes and pondered for a moment. A few minutes later, he seemed to have thought of something and looked straight into Huo Xuan's eyes. He threatened in a low voice, "Mr. Huo, you and your subordinates are indeed very capable. However, now that the matter has come to this, although we can't do anything to you, we can attack the little girl who came with you yesterday!"

"Mr. Huo, do you not care about her safety anymore?"

## **Chapter 397: Provoking Mo Zhu**

After wandering in the business world for so many years, Mi Lai had naturally developed a pair of sharp eyes that could see through people quickly. Just by taking a hurried glance at Mo Zhu yesterday, he could tell that this little girl had a high status in Huo Xuan's heart.

Now that they couldn't do anything to Huo Xuan, couldn't they take down a young lady who looked like she was only in her teens? Although they weren't as strong as the Huo family in all aspects in the past few years, they had started in Southeast Asia after all. If they really wanted to fight, it was very easy to control a little girl!

After saying this, Xu Huan and Mo Wu, who had been standing quietly behind Huo Xuan, immediately frowned slightly and took two steps forward to surround Mi Lai.

From the looks of the two of them, it was as if they were going to skin the man alive in the next second.

When Mi Lai saw this, he wasn't angry. He stood on the ground with his arms crossed expressionlessly. He raised his eyes indifferently and glanced at Huo Xuan. He smiled and said, "It seems like my judgment of people is quite accurate. That girl indeed has an unusual identity. However, everyone, don't be anxious. If Mr. Huo agrees to our conditions, we definitely won't be rude to our 'guest'!"

When Huo Xuan heard this, he sat in his seat with a normal expression. He lowered his eyes, seemingly thinking about something. A few seconds later, he looked up at Mi Lai and laughed softly. "Haha, since you want to attack that girl, we'll wait and see."

After saying this, Huo Xuan couldn't even be bothered to share his gaze with the others present. He immediately waved his hand and neatly left the private room with Xu Huan and Mo Wu.

Mi Lai had been carefully observing Huo Xuan's reaction. He didn't expect that even after his figure completely disappeared from the corner of the corridor, there wasn't a hint of nervousness or worry on his face.

After leaving the hotel and getting into the car, Mo Wu consciously went to the driver's seat and started the car.

He turned to look at Huo Xuan, who was sitting in the back seat with Xu Huan. He looked up and asked indifferently, "Young Master, where are we going next? Are we going to deal with our matters first?"

/ please keep reading on

Huo Xuan shook his head and lazily placed his hand on the armrest beside his chair. He raised his eyebrows and said, "There's no hurry to deal with the matters here. Let's go and see how Xiao Zhu's competition is going!"

Upon hearing this, Mo Wu instantly understood what Huo Xuan meant. He replied to the man softly and directly changed the navigation to the venue where Country N was holding the competition.

The car sped along the road. A few minutes later, Xu Huan suddenly thought of something. He turned his head and touched Huo Xuan's arm with his arm. He said in a low voice, "Brother Huo, will those people really attack Little Bamboo? She's unfamiliar with Southeast Asia. I'm really worried about her safety!"

Upon hearing this, Huo Xuan's fingers gently knocked on the armrest as he replied nonchalantly, "That girl is very capable. Besides, I had already arranged for people to protect Xiao Zhu before we came to Southeast Asia. Not to mention Mi Lai, even if these people in the room attacked together, our people have the ability to fight them!"

With Huo Xuan's explanation, Xu Huan nodded in understanding. "I was wondering why you guys turned a deaf ear to that group of people's threat. So you were already prepared. That's good then. In that case, we don't have to worry too much about Little Bamboo!"

At the venue.

By the time Huo Xuan arrived with Xu Huan and Mo Wu, the Mathematics competition had already entered the second round.

## **Chapter 398: The Second Round of the Competition**

The three of them looked around the venue and casually found seats in the audience. They all turned their gazes to Mo Zhu, who was gathering the group members below the stage and giving orders seriously.

At this moment, Mo Zhu was discussing the tactics of the second round with the other four members of the group with a serious expression.

After the first round of the individual competition, Mo Zhu had undoubtedly gotten the first place in the entire competition with her extremely fast answering time and accurate answering steps. Furthermore, according to the news revealed by the teacher in the marking group, she was the only one who had gotten full marks.

As for the second round of the team competition, which was different from the individual competition, it did not only test everyone's mathematics knowledge and thinking when solving questions. After careful research by special teachers from various countries, every member of the group had to participate. If any step was missing, it would delay the calculation time of the entire group and there was a high chance that they would fall behind the other groups.

It was precisely because of this that so many groups had applied for a temporary reshuffle before the examination. After all, the Mathematics competition was held especially formally and the rewards were generous. Everyone wanted to return to their country with good results and contribute to the future development of the country's Mathematics field.

After calling the others in the group to her side, Mo Zhu looked up and glanced at Meng Ran and Zhang Qi. She said indifferently, "When the bell rings for the questions to be answered later, the three of us will be responsible for writing the steps to solve the questions. The two of you only need to calculate the final results and arrange the correct order of steps and answers on the paper."

After a pause, Mo Zhu raised her eyebrows and continued asking, "How is it? Do you understand my arrangements?"

After completing the first round of high-intensity questions and as they were about to enter the second round of the competition, Meng Ran and Zhang Qi were in a daze at that moment.

The two of them had a weaker foundation than the other top students. They had never done so many difficult questions in one go before.

Now that he was suddenly asked by Mo Zhu to plan for the following competition arrangements, Zhang Qi was stunned for a long time before he scratched his head and replied, "Sure, I can calculate the data and organize the answers. Although my brain is indeed a little tired and dizzy now, it's not to the extent that I can't even calculate a few numbers!"

/ please keep reading on

Upon hearing Zhang Qi's words, Meng Ran touched her chin and came back to her senses. She nodded vigorously and replied, "No problem, Sister Mo. Just list your formulas. As long as it's knowledge I've come into contact with before, I'll definitely give you a 100% correct answer!"

When Mo Zhu heard this, she pursed her lips and turned her head to look at Xing Meng and Jiang Yu on the other side. Although these two people did not have as much knowledge as her, they had also obtained high marks in the first round of questions.

After coughing lightly twice, Mo Zhu said in a low voice, "When we get the test questions later, I'll arrange the steps and knowledge used to solve the questions on the draft paper. The two of you will be in charge of listing the specific formulas. Then, leave the rest to Meng Ran and Zhang Qi."

After a few seconds of pause, before the two of them could reply, Mo Zhu frowned slightly and added, "If there are no special situations and accidents, answering the questions like this will save the most time and be the most efficient. Do the few of you have any better ideas?"

Everyone usually listened to Mo Zhu, so they had no objections now. At this moment, even Xing Meng was united with them.

After the tactical discussion, a few minutes later, under the lead of the teacher at the venue, the various groups arrived at the round table that the organizing committee had specially prepared for everyone to answer questions more conveniently.

After distributing the exam papers and draft papers for the second round of the competition which was to be done in teams, the invigilator announced the official start of the team competition.

## **Chapter 399: The Release of Results**

Just as Mo Zhu had expected, the method she had thought of was indeed the fastest. The test papers were handed to her and she sorted out the thoughts and directions for the questions. Xing Meng and Jiang Yu were responsible for listing the steps needed to solve each question on the paper in detail. Finally, Meng Ran and Zhang Qi would complete the calculations.

Time passed minute by minute. Under everyone's concerted efforts, Mo Zhu's group answered the questions of the competition very quickly. In just half an hour, they finished the questions that the organizing committee had originally set to take three hours.

Raising her hand to signal the invigilator that they were prepared to hand in the paper, Mo Zhu raised her eyebrows confidently and put down the pen in her hand.

Seeing the girl's confident appearance, although Huo Xuan knew that Mo Zhu's Mathematics wasn't very good, he was still very touched by the girl's attitude of coming from afar to participate in the competition and win honor for the country and the school.

The competition format of the team competition was different from the individual competition. For the individual competition, the teacher-in-charge will release the results of all the participating students at the same time after they have finished reviewing them and tabulating the results. As for the team competition, the team would hand in their papers on the spot after they have completed them and the teacher-in-charge will check the steps and answers for each question. Thereafter, their scores would be announced right away.

When Mo Zhu's group announced the submission of the papers, a staff member immediately went forward to take away their answer sheet. A few minutes later, the results were announced on the spot. Apart from some small details that were not handled well, the formulas and answers for every question in the entire paper were correct!

Then, the judges of the various countries displayed the results they had in mind.

Hence, the people in the audience, be it the media who were holding the cameras or the subordinates sent by the various families, all saw the perfect score written in bright red in the judges' hands.

The results were announced on the big screen at the same time. When the number 100 appeared, Luo Nan and Li Xiao immediately laughed happily.

With such a high score in the team competition, as long as everyone's total score in the individual competition did not act as a burden, the first place in the Mathematical Olympiad this time would definitely be Country Z!

/ please keep reading on

Thinking of this, the two of them were so excited that tears welled up in their eyes. Li Xiao was satisfied with winning glory for Jingyang High School. He had always wanted the children to bring glory to the school.

In comparison, Luo Nan's concern was much larger. In the past few years, the new generation of young geniuses from various overseas countries has become increasingly stronger. In the past two years, they had held many similar competitions one after another, but be it physics, chemistry, or Mathematics, Country Z had never gotten the top three results. With such high marks in the Mathematics competition this time, with a rough look, there was really a possibility for them to obtain the top three.

Ten minutes later, groups began to hand in their papers one after another. The papers were handed to the judges one by one, and the scores were announced on the big screen one after another.

Seeing that everyone's scores were generally much lower than Mo Zhu's group, Li Xiao clenched his fists excitedly, and a thin layer of sweat appeared on his palms.

This time, when he came to Country N to participate in the finals, he did not have high hopes for Class Eight, the group that had rushed into the finals by luck at the last minute. He only hoped that everyone could learn some knowledge and get to know the top students of the various universities in Beijing. Now that he saw such high results in the team competition, he could not believe that these high-spirited youths on the field were actually from Class Eight!

One hand after another was raised. Almost an hour later, the bell rang in the venue. The invigilator held the microphone and announced loudly that the time for the team competition was up. Immediately after, a staff member neatly collected the answers from the remaining teams that had yet to complete the questions.

## **Chapter 400: Announcing the Results**

After announcing the results of these groups, the scores of the team competition were displayed on the big screen. The competition was already approaching the end. The scorers who had been specially invited by the organizing committee to notarize the scores began to go on stage one by one to calculate the total score and average score for the two rounds of questions for the participating groups of the various countries.

Then, the scores of the students were recorded on the big screen one after another. Li Xiao stared at the names that appeared on the screen excitedly. His pupils widened slightly and his hands were clasped together nervously.

The rankings were tabulated. Under the arrangement of the organizing committee, the rankings and results of this competition were announced in the order from low to high.

A staff member had already placed the list of the last few hundred names on the screen. Luo Nan and Li Xiao only took a glance at these people's total score and did not look at it any longer. These marks were too different from the marks of Mo Zhu and the others in the team competition. Therefore, it was impossible for them to be in this range.

Not only were these two people so excited, but under the influence of the tense atmosphere, even Huo Xuan, Xu Huan, and the others in the audience rubbed their palms anxiously and worriedly.

At this moment, it was Mo Zhu who was sitting in her seat calmly and nonchalantly. Her gaze swept across the people in the venue indifferently. It was obvious that she did not treat these elites from various countries as true competitors.

The rankings to the 100th place were announced. Unexpectedly, there was not a single person from Country Z in the 50th to 100th place. Luo Nan and Li Xiao stared intently at the screen, afraid that they would miss any familiar names.

Two minutes passed and they showed the next page of the name list. The names and scores of the elites who had won the top 50 in the competition appeared on the big screen one after another.

Almost at the same time as the names of these 50 people appeared, the crowd started chattering.

"Look, look! A student from Jingyang High School is in the top 50! Oh my god, there's more than one!"

/ please keep reading on

"One, two, three, four, five. Jingyang High School is really amazing! They're already so amazing. Usually, the students from Cloud City can't even pass the preliminaries. I didn't expect that they would be able to get such good results for Country Z in this Mathematics competition!"

After saying this, everyone's gazes slowly moved up and fixed on the name of the first place. The crowd instantly erupted into exclamations of disbelief!

"No way! The person who won the first place is actually a student from Country Z, Mo Zhu from Jingyang High School? What kind of genius is this? Why haven't I heard of this person before!"

"Oh my god, this name? If my eyes aren't playing tricks on me, isn't this girl the student who was late yesterday and was personally brought by Professor Luo to check in? No wonder she received special treatment from the teachers. So she's a genius seedling specially nurtured to win the championship!"

When they saw Mo Zhu's results, everyone below the stage was stunned, especially the group of people who had ruthlessly mocked Mo Zhu in the hotel lobby yesterday. Under such circumstances, they wished they could find a hole to hide in.

Huo Xuan and the other two were also stunned by Mo Zhu's heaven-defying points and ranking. The three men stared at each other in disbelief.

She did not expect that a person who usually did not like to study could improve her results so quickly in such a short period of time!

Thinking of this, Huo Xuan's eyes darkened. He turned his head and looked at Luo Nan, who was grinning from ear to ear. He frowned slightly and rubbed his palms. He seemed to understand what Professor Luo had said when he left the Huo family.

Mo Zhu actually had the ability to get first place in the international competition. Indeed, there was no need for him and Chen Man to hire a tutor for her.

He felt so proud of her!

Li Xiao and Luo Nan looked at each other. The two of them were so excited that they kept muttering to themselves.

They had thought that Mo Zhu might lead this inconspicuous team from Jingyang High School to achieve good results, but they did not expect her to have such heaven-defying results.

In the end, the organizing committee combined the average results of each group. After three notarizations, the group Mo Zhu was in had won the first place in this competition with an absolute and overwhelming advantage!
