

Abandoned Super Cutie Adopted by Billionaire Clan

Chapter 121

Chapter 121

Alex knew who was coming.

He had just been transferred here. A few days ago, he was fortunate enough to go to the party with Taylor.

He knew that Taylor's pupil was a three-year-old girl.

458

Seeing Taylor nervously come back from the laboratory to change his clothes, and looking around for candy, he knew that it was probably the little girl who was coming.

After thinking about her identity, he went to a high-end candy store and bought a small jar.

There were no more than 50 candies in such a small jar, which cost him 1000 dollars.

It was definitely not comparable to what she usually ate, but it was the candy he could buy the fastest.

He hurried back to the research institute after buying.

The door to Taylor's office was left open. He reached the door and heard voices inside, and he was attracted.

A little girl's sound came from inside. Her voice was very sweet and cute.

Alex thought, 'No wonder Taylor likes her so much!

Knocking on the door, he walked in.

"Taylor, I bought the candy back."

He opened the jar, placed it on the table, and stood quietly aside.

Taylor held the jar and handed it to Yvonne. "Try it."

A sweet smell of candy emerged from the jar.

Yvonne accurately identified her favorite strawberry flavor in it. Her eyes lit up as she reached out to grab it.

"Yvonne." Someone next to her called her.

Kelvin put down his cup and asked softly, "How much candy did you eat today?"

Yvonne couldn't remember. She put her hand in her coat pocket and fumbled for a while, then took a handful of colorful candy paper.

After placing them on the table, she started to count them one by one.

Then she turned to Kelvin and said honestly, "Five."

Kelvin glanced at the candy paper on the table and said softly, "Well, you can't eat it anymore."

"But..." The tip of Yvonne's nose moved, and her eyes looked at the candy jar reluctantly.

She added, "Taylor's candy is so delicious."

She was hungry, wanting to eat.

Taylor couldn't bear it. He knew that it was not good for children to eat too much candy, but her expression looked really pitiful.

Chapter 121

Struggling, he covered the candy jar and muttered, unsure whether to appease fromme or limit. "I's say put don't smel it."

This was similar to Kelvin's thought before.

Watching the candy jar placed on the table beyond her reach, she was eager for it

Taylor said, "Let Kelvin take it away when you leave. You can eat it when you go back tomorrow?

Taylor was still sensible and he touched the tip of her nose.

He said, "If you eat too much, you will become fat. Yvonne, you have eaten too much today

Yvonne tilted her head and looked down at her hands.

She curled her fingers, suddenly feeling that she was a little fat

However, compared to Taylor's hand, she was no longer fat

She could not judge.

Thinking to no avail, she raised her face blankly and asked, "Taylor, am I a little fatty?"

Taylor looked at her and was silent for a moment.

Facing Yvonne's big clear eyes, he said against his will, No, you just wear too many dothes?

After hearing this, Yvonne breathed a sigh of relief and patted her chest with her little hand.

She thought, 'Fortunately, I'm not a little fatty

Kelvin sat next to her, glanced up, and drank coffee calmly.

After chatting, Taylor seemed to have thought of something and waved at Alex

He whispered to Alex. Alex was shocked when he heard it

Then, he opened the door and walked out.

About ten minutes later, Alex came back with two pots of flowers.

He had just brought the flowers from the laboratory. Many people looked at him along the way.

"Taylor," he said after putting down the flowers.

The fragrance of flowers permeates the whole office, and the fragrance is pungent. Smelling it could make people feel refreshed.

When Kelvin saw the high-quality flowers, a faint surprise rose in his heart.

Compared to the two pots of flowers raised by Yvonne, except for the weakness of power, the abilities contained in them are comparable.

He looked at grizzled Taylor in shock.

Yvonne's energy was like the life force extracted from plants. After it was all gathered into her body, it could be used by her.

Then, she transmitted this life force to other plants and animals.

But Taylor was different. His method was a real scientific tool.

+58)

After repeated research and improvement, the essence was continuously concentrated to produce a better quality next pot.

It may be due to the flowers sent by Yvonne. But to be able to achieve this step through scientific means, he had already stood at the top of mortals.

Kelvin silently thought to himself, "Taylor is a really capable person. I won't use him as a shield in the future.

Taylor said, "A few days ago, I researched a total of twelve pots of flowers, handed in seven pots, and sent two more pots to an injured leader. Take these two pots back."

Taylor sipped his coffee calmly as he said as if it were some ordinary item.

He continued, "Put one pot in Yvonne's room, and the other pot in the living room. It can be opened for a long time."

Kelvin had mixed feelings.

He said, "Taylor, you can keep another pot. I'll go back and put one pot in Yvonne's room."

He originally just wanted to find a shield for Yvonne's superpower. But this made him seem a little selfish.

Taylor, unsure of what was on Kelvin's mind, shook his head and refused.

"My experimental project has now been planned as a key one. The sponsor has approved a lot of funding for me, and I can make a lot in the future. I heard from the dean that a separate experimental base will be built for me next year."

He is the only one in the country who studies this.

When he was young, he chose this major. But everyone was not optimistic about it. He often lacked funds and led a poor life.

It was only when he made some achievements that he was taken seriously. Until now, the flowers he studied attracted great attention and became the focus.

"Besides, the site of the experimental base has not been selected yet. I remember that Yvonne's school is in Blorenc City, right? She just started kindergarten?"

As soon as he mentioned it, Kelvin immediately understood what he was thinking.

"Yvonne may stay in Strate City in the future," Kelvin said.

"Alright then."

Taylor nodded and rubbed Yvonne's head.

Perhaps because he was getting older, he now felt that it would be nice to have a child by his side.
