

Super D. S 115

Chapter 115: mission completed

Ye Xuan had this idea before, but he tried many times, but he could not combine the Starburst and the Starbolt.

But then he found out that he was doing more than one thing, because the phagocytic system could be exchanged.

This riot is also spent on Ye Xuan's 100 points of devouring points, very expensive. However, it is definitely worth the money.

"boom!"

"boom!"

"boom!"

The sound of a series of explosions spread, and the vigorous King Kong who had just climbed up suddenly fell down.

The nine-pointed star-shaped arrow has already blown it up beyond recognition, and the entire upper body is full of flesh and blood.

"The power is enough, but the consumption is too big. The spiritual power consumed at one time is bigger than the ten-pointed star arrow plus ten chaotic arrows."

Ye Xuan reluctantly sighed, and then walked over. At this time, his hand has already had a top-grade sword.

"Roar....."

This vigorous King Kong has been hit hard and can only make a low noise.

"The natural choice, go on the road!"

Ye Xuan whispered, that is, a sword stabbed in the wound of the vigorous King Kong chest, piercing its heart.

dead!

It is comparable to the strongest King Kong in the mid-tenth of the martial arts. It was easily killed by Ye Xuan. At this time, if there are other people here, it will be a big surprise.

Then, Ye Xuan pulled out a special hair from the strong diamond, and then swallowed the body.

"Hey, the host swallowed a monster body and got three points to swallow points!"

"Hey, the beast blood tank is raised a little."

"The trough, this corpse, is worth three million and two silver. If you kill a few more, can you upgrade?"

Ye Xuan was shocked. He had swallowed some ten-order monsters before, but his strengths were weak, at most one or two million. However, this vigorous King Kong turned out to be three million.

"Haha, cool, find an upgrade treasure." Ye Xuan is very happy.

Now that he is the tenth initial stage of the martial arts, it has already reached the embarrassment. As long as he kills two or thirty, he will probably be able to break through the middle tenth of the martial arts.

However, at this time he directly swallowed the last piece of the spar.

"Hey, the host broke through to the tenth middle of the martial arts!"

In order to hunt this vigorous King Kong faster, Ye Xuan did not hesitate to choose an upgrade. At this time, he is already the same level as the son of Nanlin County.

He is sixteen years old, and Deng Yang is twenty-two years old. His age is six years old, but he is a grade.

In front of Ye Xuan, that Deng Yang didn't even have a fart.

But Ye Xuan is not proud of this, because he is going to participate in the Imperial Capital Competition.

The sixteen patrols of the Xuanyang Empire are probably the same as the recommended ones. Let Ye Xuan be jealous of the young talents who live in the Imperial Capital.

"Well, knowing the strength of King Kong, the next step is simple. Go find the token first."

At the moment, Ye Xuan is continuing to climb.

After breaking through to the middle tenth of the martial arts, his spiritual strength has improved by a level, so the power and speed of the riots are much stronger than before.

After the breakthrough, he encountered the second strong King Kong, but this time, he only used the riot of the riot, he killed the only King Kong, and even the knife is not used.

"Hey, the host swallowed a monster body and got three points to swallow points!"

"Hey, the host swallowed a monster body and got three points to swallow points!"

"Hey, the host swallowed a monster body and got three points to swallow points!"

Adult strong King Kong, the strength is similar, so the body is unified into three points to swallow points.

Ye Xuan has not climbed to the top of the mountain, it has already killed more than a dozen vigorous King Kong, earning 50 points to swallow points, and also obtained the unique white hair of ten strong diamonds.

In order to improve efficiency, he spent dozens of points to devour points and exchanged a bottle of quick-recovering medicinal herbs.

He had a hundred flowers, the recovery of physical strength and spiritual strength, and with this bottle of medicinal herbs, he can kill a good time.

After killing more than 30 strong King Kong, he finally reached the top of the mountain.

"Is that banyan tree?"

The top of the mountain was a bit desolate, so Ye Xuan saw the tallest and largest banyan tree at a glance. At the moment, he flew past.

There is a large stone under the banyan tree. According to the instructions on the sheepskin roll, the iron box with the token is buried under the big stone.

Ye Xuan ran over and kicked the stone with one foot, and then he dug it by hand.

Sure enough, under the stone buried a tin box, Ye Xuan directly opened it, lying inside a bronze token.

Ouyang!

After seeing this token, Ye Xuan was also surprised, but he quickly calmed down, because this token is not the token of the imperial empire inspection, but the token of Ouyang House.

"Ouyang adults really value me. I even handed the imperial inspection to me as a token. If I took the token of the inspection to make a fuss, then it was him."

Unconsciously, Ouyang Ming's position in Ye Xuan's mind has also improved.

Since he got the token, Ye Xuan did not stop and left immediately.

"There are two target locations on the sheepskin roll. There are two tokens in total. The mountain under my feet is relatively close. If my opponent wants to win me, I have to go to another place to get the token. It seems that my time is still relatively Ample."

Ye Xuan went down the mountain and thought about it.

He had estimated that he had been leading for three days on the way alone, and he had to go three days ahead, and he took the token away from the first target. The other party wanted to complete the task, unless he took the token from him. Otherwise, it will only continue to penetrate the 18th Mountain Range. It is estimated that it will take another day or two.

Therefore, he probably has a week to kill the monster upgrade.

Immediately, he began a long killing.

Now he has the riot of a violent squad that can kill a ten-order monster. He can take away the life of a powerful King Kong every time he starts.

A strong King Kong has three points to devour points, and on this mountain, there are few thousands of King Kong, so Ye Xuan is very happy.

However, he suddenly remembered that he could get more time.

"How can I be so stupid, go to the second place and take another token away, then my opponent can't complete the task unless I take a token from me."

At the moment, Ye Xuan is quickly going down the mountain and heading for another location.

After spending a day, he arrived at the second place directly. If it is someone else, I will probably spend two or three days.

Most importantly, this second location is much more dangerous than the mountain of King Kong, while the token is on the top of the cliff.
