

Super D. S 2591

Chapter 2591: Star-level phagocytic system

"Hey, the host kills the gods to dominate, rewards the key to swallow, and can be upgraded!"

Hearing this, Ye Xuan's brow was picked.

The ruler of God is dead, he inherits the power of God's rule, then he is the new master of the gods.

Between heaven and earth, he dominates, no one can compete with it, so he does not have to worry about anything, directly upgrade the system.

"Hey, the system is starting to upgrade, the current progress is one percent!"

Ye Xuan checked the schedule and found that the upgrade time was estimated to be one day, which for him was almost between the fingers.

"Hey, the system started to upgrade, the current progress is 100%, the system is upgraded, and the host gets the star-level phagocytic system!"

Star-level phagocytic system!

Ye Xuan's eyes lit up.

It turns out that God is not the end point. This is the same as he thought. In the future, he will go to outer space, that is, the sky outside.

At the same time, he also knows why he went from the fairy world to the gods, why the system went wrong and entered the semi-shielded state.

It turns out that there is a reason!

"This phagocytic system is the product of the third race of the universe. It is used to select human geniuses and distribute them all over the universe. They do this because there is a shocking crisis in the universe."

"The first race of the universe, the celestial family, was made for human beings, and then the spirit was born, the human race was rebelled, and the self-proclaimed celestial beings were opposed to human beings. It is necessary to destroy human beings and unify the whole universe!"

"Unfortunately, the Terran and other cosmic races have established the Federation of Warra and competed with the Celestials!"

After learning about this, Ye Xuan felt a bit big.

It turns out that there is also a reason for obtaining a phagocytic system, which is chosen by the cosmic human race.

To be precise, it was chosen by a celestial family called Emperor II.

This Emperor II is the robot who was invented by the first person of the Terran "Xingbo". At the same time, Emperor II also has a mechanical brother called Emperor Yi.

It is Emperor II. Using the wisdom of the mechanical family, he invented the phagocytic system, distributed all parts of the universe, and selected human geniuses with potential.

Emperor Yi, who killed his own creator, starred, rebelled the Terran, and established the Tianji, and threatened to destroy the Terran and unify the mechanical traitors of the universe.

To put it simply, the mechanical family in the Federation of the Vatican and the first race of the universe are the same root!

After learning about this, Ye Xuan felt that the gods were too small and small, like a drop of water in the sea.

Then he continued to understand the history of the universe.

In the universe, the smallest unit is the planet, then the galaxies, stars, stars, and universe.

At the foot of Ye Xuan, this continent is a planet, divided into nine heavens, and the gods are in the ninth heaven.

Going up, it is the heavens, the universe.

When I flew from the fairy world to the realm of the gods, the phagocytic system suddenly went wrong, and the reason for entering the semi-shielded state was because the ninth heavy gods and gods were close to the heavens.

If you do not enter the semi-shielded state, it may be detected by the celestial family and then be killed along with the planet.

"Hey, the realm has changed, please check it out!"

At this time, the system prompts again.

Realm update?

Ye Xuan has a quick look.

He inherited the rule of God, and now the realm is also the master of God, but now, the system shows him as the first order of the star. Above the star, it is a meteor, a satellite, a planet, a star, and so on.

In this regard, Ye Xuan also has some understanding, he is crossing, naturally no stranger.

The earth is a planet, and the moon is a satellite that orbits the earth. As for the sun, it is a star.

Unexpectedly, the realm of the universe is divided in this way.

However, this does not matter.

What Ye Xuan cares about is the Wanaro Federation.

The cosmic Terran, and other cosmic races, established the Federation of the Faroese against the first race of the universe.

In the Federation of Wanluo, it is subdivided into two camps, one is science and technology, and the other is self-cultivation.

The science and technology camp, headed by the immortal dynasty, is mainly the establishment of science and technology, the use of mechs, warships and other interplanetary battles, they will also have genetic culture fluids, etc., to enhance human physical fitness, so they also claim to be new humans.

Like Ye Xuan, now known as the Lord of God, this is just a realm of title.

God, in fact, is only a human being that is strong enough to a certain extent.

As for the comprehension camp, it is headed by the Ten Heavenly Palace, which is the cultivation method like Ye Xuan, but they are no longer true, but a higher level of stars, so the comprehensible can also be called the star. However, they just didn't forget the book, so they named it.

Those powerful masters of star repairs can even dismantle battleships, swords and planets.

However, at this time, the system once again prompted:

"Hey, the planet where the host is located has not yet been federally certified. The system rewards the host Star Trek Traveler. Please host the nearest planet, Tianhe, for survey and certification. Otherwise, this unowned planet may be discovered by other interstellar travelers. !"

"Hey, the system has automatically generated a federated identity card for the host!"

"Hey, the system recommends that the host become an interstellar mercenary!"

Hearing this, Ye Xuan looked at it and found that his current identity is the original resident of Tianhe Star. As long as he goes to Tianhe Star for planetary survey and certification, then this planet is hung up under his name.

As long as he applies for closed management, then the alien interstellar traveler can't come in.

If it is certified by others, then the planet will not belong to him. At that time, those interstellar travelers can be arrogant here.

Here, as Ye Xuan's home, he can't allow this to happen.

At the moment, he is flying all the way up. It didn't take long before he broke through the protective layer of the planet.

At this moment, Ye Xuan is deep in space, which is also the sky outside.

The title of the interstellar traveler can reduce the chance of encountering cracks in the space. Otherwise, with his strength, when he encounters cracks in the space, he will be sucked in and then minced.

Outer space is extremely unstable and has a lot of cosmic space cracks. This interstellar traveler's title reduces the chance of Ye Xuan's survival in the space.

It is said that those powerful masters of star repairing can also use the magic weapon to carry out interstellar travel outside, and even some people can physically crack the space.

At this moment, Ye Xuan looked at the planet underneath and had a lot of thoughts.

He checked the system and found that the system's recommendation was to arrive at Tianhe Star for certification within one year.

One year, for him now, it is nothing.

However, he also found a system prompt, saying that if you do interstellar travel, you have to empty the phagocytic space, otherwise, the devour space may collapse.

In other words, those who devour the space must be released, and no one can be left.

At the same time, those exercises, magic weapons, blood, and so on, will be emptied.

Even the flow rate of the swallowing space will be unified with the universe.

Although he is now in the sky, he is still in the scope of this planet, so it is not a star travel.

"This planet, divided into nine heavens, is called the nine-day star. As for the interstellar travel, wait a while and then say."

Ye Xuan thought in his heart.

Then, he told the good friends and other friends. Then he put all the people in the swallowing space on the mainland of the gods.

By the way, the cockroaches and the flying smoke were all smashed.

Of course, it's indispensable!

Falling, but he followed the first day, this is the person who has followed him for countless years, he will naturally not forget.

At present, Ye Xuan has a total of five wives, namely Song Chong Jing, Guan Yulan, Falling, Skull and Flying Smoke.

It is a pity that his engulfing space cannot take away any one person or thing.

A month later.

"It's time to leave, and to conduct planetary survey certification, it must be early, in case someone is first discovered, it will be troublesome."

Ye Xuan thought in his heart, is to say goodbye to everyone, once again came to heaven.

Last time, he did not leave the scope of the nine stars, so it is not a star travel.

This time, he left!

Chapter 2592: Funeral star field

As Ye Xuan left the Nine Stars to start Star Trek, his star-level phagocytic system was once again reset!

After the reset, it directly triggers the ultimate mission of the system - destroying the first race of the universe!

For this day's family, Ye Xuan has already understood this moment. Among the entire Qixing River, the Tianji people occupy the vast area of the first universe, which is the first hegemon in the current Galaxy.

The Terran, due to its large population, now occupies the third universe.

And in the third universe and the second universe and other small universe planes, there are many other stars and stars.

For the current stage, which is only the lowest level of the star nucleus, and the nine-day star 拥有, it is only one of the most common practice methods among the Wanluo Federation established by the Third Cosmic Terran and other universes. !

And in this big gift package that he resets the starry sky devouring system, there are only ordinary treasures such as the streamer star, the star sword, and the flying star shuttle!

In addition, there is only one source that has been reduced to the system to exchange currency!

Although Ye Xuan also has the system's own devouring hand and forced swallowing skills, but in the current situation of his low strength, these two skills, basically can not rely on...

At this moment, Ye Xuan Duan sits in the small battleship flying star shuttle, set the self-propelled mode, let the Flying Star shuttle bring him to the Tianhe Star of this star field.

Ye Xuan himself has fallen into the sinking. He is thinking about how to open the situation as soon as possible with the resources in his hands...

First of all, to authenticate the ownership of the Nine Stars, this is a matter of urgency, and now rush to Tianhe Star, Ye Xuan is also to deal with this matter.

And then the line... The system's suggestion is to let Ye Xuan take the time to go to Tianhe, and register as an interstellar mercenary. He has the title of Star Traveler. This is the advantage of Ye Xuan.

Among the Xingxing River, there are all kinds of resources and creations, but interstellar travel has a high chance of encountering space cracks. Compared with other interstellar mercenaries, the title of Ye Xuan Star Traveler will make him here. The dangers of the aspect are minimized!

However, it really made Ye Xuan accept the system's suggestion. After deciding to go to Tianhe Star, I registered it by the way and became a formal interstellar mercenary, but it was another thing.

That is the acquisition of interstellar blood!

The phagocytic system exchanges a lot of various stars and stars in the store, but he only has a point in the system that is already the source of money, and there are no good things to exchange!

With starry blood, the speed of strength improvement will be faster, so Ye Xuanzhi is sure to win.

In addition to being redeemed from the system, he has another way, that is, outside the system, from the stars in the starry sky, the inheritance.

This kind of starry bloodline obtained from the outside world, the system will also recognize, and after successful inheritance, this blood heritage will also be stored by the system, and there is still the possibility of growth and promotion.

After becoming an interstellar mercenary, Ye Xuan must enter the starry sky to hunt for all kinds of beasts, or find some minerals, which can be used to exchange the currency with the system!

In addition to being able to redeem with his star-level phagocytic system, you can exchange other items with some of the bases of the Federal Republic of Venezuela!

For example, in the Alliance Service Hall on the Tianhe Star, there is a specialized agency to deal with all this.

In addition, in the starry sky, in addition to the Alliance, there are more wild starry beasts, these starry beasts, is the source of the blood of the stars.

Of course, the types of starry beasts are different, and their blood is also good and bad. Generally speaking, even the general starry beasts, their blood, is not a source of swallowing can be exchanged in the system, or the Wanluo Alliance of.

If you are rich at hand, it doesn't matter, but now you are struggling. For Ye Xuan, the best way to get the blood of the star beast is to go to the starry sky to find the starry beast!

This matter is very difficult, and the chance of success is even smaller. However, Ye Xuan has not known how many obstacles have been crossed. It is difficult to overcome him.

After the decision, Ye Xuan will not be able to go to the Tianhe Star. On the way, he will start to view the cosmic star map in the Flying Star Shuttle, and select the star field that will be registered after the Star Mercenary!

First of all, let's talk about the location of the Tianhe star in the sky.

The Tianhe Star is located in the third universe occupied by the Terran. The Terran of the Third Universe and the other cosmic races established the Federation of Warra to counter the first race of the universe.

The two camps in the Federation of Varo, one is technology, and the other is self-cultivation.

The science and technology camp is headed by the immortal dynasty, and the comprehension camp is headed by the Ten Heavenly Palace!

The immortal dynasty and the Ten Heavenly Palace are two major forces, but each occupies half of the third universe, and the Tianhe Star is located in the central mezzanine of these two forces!

In this central mezzanine zone, there is a dark void of the universe.

This universe of voids is called the funeral star!

It is said that the universe and other wormholes, such as the second universe, can go to the depths of this funeral star.

It can be said that once the first universe and the third universe launch a truly comprehensive war, the funeral star field where the cosmic wormhole is located will surely become the front line of the battlefield.

A large number of the universe and the other universes that together with humans form the Second Universe and other universes of the universe, through the cosmic wormhole, the first to come, will also be this funeral star.

But of course, there is no large-scale war between the various races of the universe, so this funeral star is still peaceful.

However, since the cosmic wormholes connecting the major cosmic planes are at the deepest part of the star field, even in the Taiping period, this star field is the most complicated.

The cosmic and powerful people will almost enter the room, and occasionally they can even see some secret sneak peeks!

The reason for this is that this funeral star field is actually a star tomb. This funeral refers to the meaning of countless stars annihilation.

The funeral star field is not a black hole, but it is a gray cosmic star field between the normal universe void and the black hole.

Many of the stars that entered the period of silence and exhaustion were almost attracted to this star field, just as the black hole absorbed and swallowed everything... In fact, this gray area is a black hole that is slowly forming.

Since it has not yet formed, no matter whether it is a powerful universe or a variety of cosmic beasts, you can enter it, hunt for the resources in it, and the star nuclear source of those death stars!

Ye Xuan is now the lowest star state in the starry sky, and it is still the first order. These star nuclear sources are most useful for his realm improvement!

Being pushed, the system's tone sounds again:

"Hey, the stars are coming!"

As the system prompts to sound, Ye Xuan woke up from his meditation, and his eyes swept away from the window of the Flying Star Shuttle. A huge star reflected his eyes, no more than how many times he went out of the Nine Stars... ..

Chapter 2593: Owner of Jiu Tianxing

In addition, this Tianhe Star is not only big, but also gives Ye Xuan a dreamy feeling!

There is also a layer of atmosphere outside the huge star, which envelopes the star, but this atmosphere can faintly see a large number of nodes flashing. Obviously, this is both the atmosphere and the array. When needed, it has defense. Ability.

This is within the scope of the cultivation of true civilization.

In fact, Tianhe Star is not only a planet full of comprehension civilization, because Ye Xuan is in the atmosphere, but also saw several large star docks!

Similar to the docks and ports in the ocean, but docked with Star Wars.

Of course, the star warships that appear in the field of vision are not the small warships of the flying star shuttle owned by Ye Xuan. They are some super giants.

At the moment, these giant-class starship warships are all docked in several star docks opened up in the atmosphere of the nine-day star array, waiting to enter the interior of the stars.

Obviously, other areas of the atmosphere in the array are inaccessible, misunderstood, may cause a reaction to the array, and patrols will come.

Ye Xuan took the flying star shuttle in the first time, and the system's self-formed citizenship of the Wanluo Federation did not have any identity tokens, but it was verified by iris.

Ye Xuan's figure fell to a star dock, and the star dock was very large. A huge platform was built in the void outside the atmosphere. It was divided into two sides, one side was the dock area, and those large warships could not enter the Tianhe Star. At the outer star dock, it is necessary to collect rent.

This shows the benefits of a small warship, similar to the magic weapon, can be in the body, but also saves the dock.

Of course, large warships can also be included in the body, but that is not the general star-level powerhouse can do it.

After Ye Xuan fell to the platform, he walked straight to the other side of the personnel passage, and there were many figures in the queue. In addition to the ordinary human type, there were various strange and strange life bodies, among which A Ye Xuan even observed it for a long time, and did not find out which part of his head, which part of the butt.

But the atmosphere that comes out of people is very strong, and he dare not look too much, afraid of causing unnecessary trouble.

The Vatican Federation is obviously very powerful. Whether it is the cultivation of civilization or the civilization of science and technology, all of them have developed to a very high level, and even have combined use.

After being discharged to Ye Xuan, an instrument on the side of the front side just flashed a light, scanned his eyes and released it.

Entering the atmosphere, it is a more dreamy world.

Since it has entered the starry sky era, it is obviously impossible for the construction of the Tianhe Star to be limited to the land only. Ye Xuan sees the passage above the sea surface on the vast ocean. At the same time, in addition to the land, there are also Some large cities like the city of the sky.

In the space inside the atmosphere of the Tianhe Star, there are a large number of small shuttles in operation, dazzling!

Although the heart is really curious, interest is not small, but Ye Xuan did not intend to explore the first interstellar city he encountered after entering the starry sky.

Because he is now a poor man, only a little bit of a source of money for the exchange of stars in the starry-level phagocytic system, and the currency of the Federal Republic of Venezuela is the star currency, he is not one.

Star Coin, in fact, is a kind of crystal, which is the source of the star nucleus in the core of the star. After the energy has been collected, the crystals of the star are exhausted, but they come from The core of the star can slowly absorb the free energy of the universe and store it.

It can be said that there is still some value. Therefore, the residue of these star nuclear sources has been collected by the Vatican Federation and polished to the size of the pigeons as the currency of circulation.

Of course, the origin of the star nucleus is also graded. After the energy is exhausted, the remaining crystals are also different in color. The darker the color, the faster the free energy is stored from the space, so even if it is polished The shape of the system, its value, is also different.

It is divided into seven kinds: white, orange, blue, green, red, blue and purple.

Ten white coins are equal to one orange coin, ten orange coins are equal to one green coin, and analogy. At the end, one purple coin is equivalent to one million white coins!

It is said that there are two kinds of star coins above the purple coin, one is black and the other is nine colors!

One black coin, equivalent to ten purple coins, that is, ten million white coins!

One of the nine colored coins, equivalent to one hundred purple coins, that is, one hundred million white coins!

Ye Xuan decided to enter the funeral star field as a star mercenary. In addition to obtaining the blood of the star beast and hunting the material of the beast, another purpose is to find the source of the star nuclear from the core of the death star inside, and devour its energy. Raise the realm, and then, the remaining crystals can be recycled to the Federation of Venus in exchange for the stars.

These stars, and any planet that travels to the Federation of the Faro in the future, are universal currency, essential, and the more the better!

After entering the atmosphere of the Tianhe Star, the star-level phagocytic system in his body has automatically connected with the internal network of the planet, and this communication is still silent, and will not be discovered by the core brain of the planet.

This is another advantage of Ye Xuan and other interstellar powerhouses.

Almost as soon as he stepped into this star, he was able to randomly find some service information in the stars through the body's engulfing system.

Soon, he found the location of the Federal Hall of the Tianhe Star, located above the vast sea of the Tianhe Star, a huge suspended building.

Whether registering for star exploration ownership or registering as an interstellar mercenary of the Vatican Federation, including many other matters, it is handled on this semi-air platform.

There are many shadows on the platform. Because Tianhe is on the outer edge of the funeral star field, the Wanluo Federation can be seen everywhere except the Terran.

Fortunately, registration as StarCraft and Star exploration ownership, do not need to pay Starcoin, otherwise, Ye Xuan is now penniless, I am afraid that these two things can not be done.

After some busy work, Ye Xuan finished the team in front of two huge windows, and then they finished all these two things. Sure enough, they entered the starry sky era. The suburban rate is not normal. The staff in the key window are all It is a high-level intelligent robot with more than 90% of the human form.

When Ye Xuan exited from the second transaction window, his body's phagocytic system also sounded a tone.

"Hey, congratulations to the host as the owner of the Nine Stars. Tip: With the improvement of the host's ability, in the future, you will have the opportunity to engulf the space in the body!"

"Hey, congratulations to the host to become the federal interstellar mercenary of the Venus. The federal mercenary registration number tha13148080, the virtual champion score card has been tied to the host federal identity, the federal points won will be automatically counted!"

Chapter 2594: Federal standings

Hearing the sound of the phagocytic system, Ye Xuan knew the identity of the so-called interstellar mercenary. The token was still bundled with the federal identity. There is no physical token. This is a lot easier.

As for the integration function of this virtual soldier token, he did not pay much attention to it before. Now he heard that he had some interest and quickly checked it in the system of the body.

The so-called federal points refer to the people of the Federation of the Vatican. The contribution to the entire federation is lifelong and can be accumulated.

Currently, Ye Xuan's federal points are 0 (0)!

These are two values. The previous zero is the official integral value and will continue to accumulate and will not be cleared.

The zero in the back brackets is the value that has been redeemed and is calculated as it is used.

For example, if this value is 1000 (200), then it means that you have made a thousand contribution points to the Federation of Wanluo, but in this one thousand points, two hundred points have been used by you. .

Yes, these contribution points can be used to exchange items in all the Union Stars and cities of the Federal Republic of Venezuela. Each Star Federal Office has a special department!

It is said that even some materials and treasures that are against the sky, or exercises, blood, and the like, can be exchanged. Of course, the premise is that you have enough federal points.

This federal score is not unique to the Terran Stars, but all citizens of the Federal Republic of Venezuela can activate this federal contribution credit system in a special window!

The Federation of Varo, in addition to the Terran, has a large number of other universes.

This federal contribution points system is universal, that is, as long as you have a high enough score, whether it is in the Terran territory or in other cosmic races, as long as the other party belongs to the Federation of Varo, you can use it!

Of course, in order to activate this federal contribution point system, you must first have sufficient strength. The first step of the star nuclear is the minimum standard. No matter whether it is a human race or other universe, many citizens do not have this strength and are not qualified.

Because of the scoring source of this integral system, its object is only limited to the enemy of the Vulcan Federation, which is the heavenly family of the first universe.

Only when you have eliminated a certain ethnic group, or its affiliated servant race, or have obtained certain special materials or minerals for the battle of the federation and the celestial beings, which are extremely important strategic materials. Will automatically give you a score.

Of course, in each way, the standard of scoring is different.

If you kill a formal tribe of the celestial family, it may be a hundred points of federal contribution points, and you are only a servant race that is vassal to the celestial family. There may be only ten or even a point.

In the same way, maybe you just got a special ore and handed it over to the Federal Office. The contribution points you get are as high as 1,000 points, 10,000 points...

Since there is a federal contribution point system, then naturally there will be a contribution list for this kind of thing.

This virtual federal contribution list can be found on any networked terminal of all members of the Vatican Federation.

Ye Xuan checked it, and then was directly scared!

This federal standings is divided into three categories: the list of the heavens, the list of the land and the list of people!

Tianbang, the first to the hundredth with the highest contribution points!

The list of places, take the hundred and tenth to the thousandth!

The list of people, take the first thousand and one, to the 10,000th!

It is not necessary to say how many people occupy the second universe. It is necessary to add other universes. This base is incredible, but there are only 10,000 places in the world.

These tens of thousands of places have basically not fluctuated any more in the past hundreds of years. The most elite of the Federation can be rushed to the list. The later ones want to replace them. The difficulty can be imagined.

Ye Xuan looked at the last few people on the list, and their contribution points were all above 100,000 points, and the cultivation of strength was also the existence of black holes.

As for the 900 people in the list, the repairs behind the names are all question marks.

And one hundred people in Tianbang, I am sorry, the information that is cultivated as a realm is also a question mark, which is obviously deliberately obscured...

In the starry environment, the realm of cultivation has been very different. Many people simply can't see all the realm levels, and Ye Xuan, in the body of the devouring system, can do it in the weakest star environment. I understand all this.

Even in the case of the phagocytic system, in the aspect of the starry sky level, the current opening of the ban is still only the first few.

They are: star nucleus, meteor, satellite, planet, star, nebula, galaxy, black hole!

It is said that this is only the first eight of the fifteen ordinary-level stars!

After fifteen ordinary-level stars and seas, it is said that there are still some high-level realms that can truly be called the strong ones in the starry sky.

But these, Ye Xuan is now ignorant!

Today, he is the weakest star nuclear rank in the eight known ordinary starry realms. The weakest person on the list is the "black hole". It can be said that this is the case for him. In terms of it, it is purely in the future!

Of course, the conditions for the list of federal contributors are only considering the federal contribution points, and they have nothing to do with strength. But if you want to get a huge contribution point, there is no strong strength corresponding to it. Is that possible?

This point, even Ye Xuan did not think about it, the artificial intelligence robot that gave him the identity of the interstellar mercenary did not think about it.

Now she never realizes that, soon after, the first federal powerhouse in history to be listed as a boarding man under the black hole is actually born in her hands now. The number of the interstellar mercenary is still very high. Good to remember: tha13148080!

.....

After completing two things at hand, Ye Xuan did not continue to stay at Tianhe Star. He returned to the space of the universe beyond the atmosphere of the Tianhe Star through the Star Dock channel at the first time.

The phagocytic system in his body has automatically downloaded a starry sky map of the funeral star field.

Although the Tianhe Star is in this funeral star field, it is on the outermost edge. To explore this star field, to obtain the beast material and various useful minerals, you must go deep.

Ye Xuan took out the flying star shuttle, and quickly rushed away even as the gray void of the endless end of the front...

The whole month passed quickly. At the beginning, the Flying Star Shuttle occasionally saw some warships passing by in the void, or flashing away in the far distance, but in the last ten days or so, he has not seen any other living things.

Not to mention the battleship, even the most common starry beast in the vast and innocent funeral star field, he has not seen one.

Just as Ye Xuan was speechless, the system's prompt tone finally sounded again.

"Hey, I found the starry sky swallowing a beast, blood: primary! Value: Jane! Is it locked!"

Chapter 2595: Lost the lady and lost the soldiers

Blood: Primary!

Value: Jane!

When I heard this sentence, Ye Xuan's heart jumped and suddenly became ecstatic!

Primary blood, indicating that this beast is still only a child, if you can catch it, once Ye Xuan is swallowed by the phagocytic system, then the blood he will get will be extremely complete!

The value of the class indicates that the blood of this beast is the type that can continue to grow. The two words are enough to show how rare it is.

Of course, let Ye Xuan surprise this beast, actually it is exactly what his favorite starry sky engulfs the beast, referred to as the star beast!

Among the stars, there are many people.

Many races are not even flesh-and-blood life. For example, Ye Xuan learned through the phagocytic system that there is a mineral life, and its body is actually a mysterious crystal.

But even with this fleshless crystal life, their race is actually one of the Federation of the Vulcan. Instead, many flesh and blood beasts in the sky are excluded from the federation, even if they are strong, they are only Prey only.

The most fundamental reason is wisdom!

The only criterion for discriminating and measuring between the higher life and the beast in the universe is wisdom!

Even if it is a crystal life, as long as the level of wisdom is up to standard, it can be regarded as a higher life, and the beast, even if it is strong, has a limited degree of wisdom, and can only be reduced to a beast that is hunted by higher life as a prey.

Among the comet's rivers, this kind of fierce beast with incomprehensible ingenuity is endless!

The starry sky engulfs the beast, which is one of the more precious ones, especially in this funeral star field, especially...

The funeral star field, in fact, is a huge cosmic black hole that is forming, and it is still at the star level.

A large number of stars have been drawn into this special star field that is dying, and even a star that is glowing and heated will be affected by the general trend of this vast expanse of stars. The land was dull and began to die.

This kind of star is no longer like horrible light and heat like the stars outside, and it is inaccessible, but they are not real dead stars. Because they are affected by the general trend of this star field, they are quickly dimmed in a short time. Deep in the star's core, there are still a large number of star nuclear sources.

Therefore, there will be great value, and the mining of these values will become very convenient and fast!

Such stars, many in the funeral star field, it is for this reason, this magical star field will attract a large number of federal powerhouses, even including the first universe of the heavenly family, and some vassal The servants of the ethnic group will also come quietly.

However, more of the funeral stars are actually the true death stars that have been exhausted by the star nucleus in the depths of the stars.

These death stars are exactly the same as other valuable stars. They don't go deep into the core of the stars. They don't know the source of the star's nucleus in the star's nucleus. How much is there, or... there is still no!

But if every time you encounter a star, try to go deep into the depths of its star, such things, tired, exhausted people.

And the stars devour the blood of the beast, you can solve this problem!

The starry sky engulfs the beast, the reason why it is simply referred to as the star beast, because they are all feeding on the star's nucleus source for life, and each starry sky engulfs the beast, which is to realize the blood evolution by swallowing a large number of star nucleus sources. growing.

Therefore, they are most sensitive to the scent of the star's nucleus, just like the sharks in the sea, bloodthirsty, so they have a particularly keen sense of blood odor!

It can be said that if you can support a star beast in your hand, or directly have the blood of a star beast, then in this funeral star field, other things will not be mentioned for the time being, at least, in the search for the origin of the star nuclear, Nothing goes wrong.

It's definitely more horrible than doing more with less!

The origin of the star nucleus is of great value and great value. For the general federal powerhouse, it can take it as a matter of convenience or absorb its energy, and then recycle the star nucleus crystal that has been smashed into energy to the Federation of Warra. They are used to polish the shape and become a federal currency.

Ye Xuan is now a star nuclear environment, and in the star nuclear environment, engulfing the origin of the star nuclear, the most powerful for the improvement of the realm of the realm, the realm of soaring, the fastest, far more than any other kind of energy!

In other words, what Ye Xuan needs most now is the origin of the star nuclear, and this starry sky engulfs the beast. For him, it is clearly the source of a large number of stars in front of you.

Starry swallowing beasts are rare, and it is even more rare in a child's life. This time, Ye Xuan must not miss it anyway!

"Lock the orientation! Hunt immediately..."

Ye Xuan did not hesitate and immediately responded.

Soon, a red dot appeared on the system's starry sky map, and the current location of Ye Xuan was not very far away, and the system could not detect it.

With a specific direction, Ye Xuan immediately spurred the Flying Star Shuttle and rushed to the past.

This kind of starry sky engulfing the beast is purely impossible to meet. When it comes to it, it can only be said to be luck. In case, just in case, he must hunt as soon as possible.

Fortunately, it is just a cub, the strength should not be very strong, and the chances of successful hunting are still great.

Really not, he also has the ability to force swallow, but the chance of success is a little bit worse. If the hand of the devour is unsuccessful, it means that its strength is obviously extraordinary. Even if it is forced to swallow, I am afraid it is a little overhang!

Soon, in front of the line of sight, there was a cyan beast of the size of the singer. The breath was not obvious, and it was extremely restrained. It was suspended in the hollow of the Galaxy, and in front of him, there was a small pile of red crystals!

Star nuclear source?

Seeing this pile of red crystals, Ye Xuan's light shrank and his heart shook.

The currency coin of the Federal Republic of Varo is made of crystals that have been depleted of energy, and its color is divided into seven kinds: white, orange, blue, green, red, blue and purple!

The red star nuclear source crystal, polished to produce the star currency, is also red, one, it is equivalent to 10,000 white coins.

The size of the star currency is only the size of the thumb. However, this small pile of red star cores in front of the eyes, even taking into account the wear and tear in the grinding, can at least get more than 10,000 red standard stars.

This is 100 million white coins, and the value of ten black coins, or one nine-color coin!

This is not more important!

More importantly... This pile of red-level star nucleus sources, the singular star nucleus energy is still distinct. Otherwise, this starry sky engulfs the beast, and it is impossible to give birth to it, and it is approaching carefully and step by step. It's gone.

bait!

Ye Xuan's mind flashed the word, and his face made his face eccentric.

Who is such a big handwriting, but he did not hesitate to take out so many red-level star nuclear sources to trap this starry sky to engulf the beast?

I met Ye Xuan, which is clearly the rhythm of losing my wife and folding soldiers...

Chapter 2596: escape

"The hand of devouring!"

In shock, Ye Xuan's heart leaps wildly, but without hesitation, he directly spurred the hand of engulfing, swallowing the starry sky not far from the front and the small red star source, all swallowed up. in vivo.

Then I will not turn back and flee!

The trapping of this starry sky engulfs the existence of the beast, even if it retreats to a distant place, its attention must always be paid attention to here. Ye Xuan has already known the other party and must immediately take it away!

"What? In this Wanluo Federation, there are people who dare to grab something less? This is... it is just the opposite!"

Almost at the same time as Ye Xuan started, in a warship, a young man screamed with an incredulous exclamation. Then, in the empty void in the distance, a small warship slowly appeared. come out.

Although the size of this warship is not large, it is similar to Ye Xuan's flying shuttle, but its grade is obviously much higher.

This point can be seen from the hull of the hull.

The scientific and technological civilization of the Starry Age and the self-cultivation of civilizations are in keeping with each other. Many times, they have long been separated from each other. You have me and I have you.

Even the warships are the same. This kind of thing that belongs to the top products of the scientific and technological civilization has already applied the method of comprehending the true civilization.

The arrays engraved on the inside and outside of the ship generally work in three ways: attack, defense, or speed!

The warships that deliberately branded this hidden array method are not without, but they are generally the important official strategic ships of the federal government. The private warships branded this array of methods. There is only one explanation: more stars, burning hands!

Obviously, the young people who own this small warship must have an unparalleled identity. Otherwise, it is impossible to have such a discourse before, and it is even more impossible to throw a bunch of red-level star nuclear sources to trap a child. The starry sky swallows the beast...

But all this, now all cheaper Ye Xuan!

In fact, before the hands-on, Ye Xuan had already predicted the consequences, but even so, even if he came again, he is still the same choice now.

Practice, originally was to fight against the sky, this opportunity to fall off the pie is not much, encountered if not well grasped, Ye Xuan himself will feel too failed.

"No matter who you are, this little will definitely cramp your skin, you can't escape..."

When the angry roaring sounds behind him, Ye Xuan glanced back and subconsciously, only to find an empty space in the void, without any warning, a battleship, the elliptical mask on the surface, there is still a battle The light of the French pattern is flashing, which is clearly a high-end goods that have been engraved with the array.

It is the flying star shuttle that was given to Ye Xuan in the form of a spree, and there was no engraving!

However, the characteristics of the Flying Star Shuttle is that it is fast, although it can not be compared with the higher-level warships, but in the same level of warships, the speed can be stronger than it, basically less.

After all, it is just entering the starry sky, the phagocytic system in order to protect the host, this kind of escape is still not too embarrassing.

"Damn, you can't run..."

Seeing that Ye Xuan summoned the flying star shuttle, it turned into a stream of light and directly slammed into the depths of the starry sky of this funeral place. The young masculine teeth in the small battleship behind it were gnashing their teeth and their faces were full of enthusiasm. The warships went straight to the past.

His warships are many, and there are even strategic star-class giant ships. Other warships with arrays of speed, defense, attack power, etc., each has several ships!

This time, in order to capture the starry sky and engulf the beast, the warship he brought out was only this deliberately blessed the top hidden array method, and even the sensitive touch of the beasts could not sense the "dark ship", and the other side Although the small and inconspicuous small warship is old-fashioned, the speed is not slower than that of his "dark ship", which is engraved with the law, and it's always impossible to pull the distance. near.....

This situation makes the young people in the "Dust Ship" violently thunderous, roaring from time to time, the heart of the killing has been strong to the extreme!

The two warships, one after the other, chased one and escaped, and soon rushed into the depths of the funeral star field, getting deeper and deeper...

Three days passed!

For the first two days, the two warships that chased one escape, the distance between them was almost unchanged, but from the third day, Ye Xuan clearly found that the warship chasing after him was getting closer and closer!

The other party did not know what method to use, but the speed of its warships was obviously improved a lot. If it continues this way, within three days, the flying star shuttle must be caught up by the other party.

Ye Xuan's strength is now the first step of the star nuclear, in the starry level of the realm of strength, is the lowest level of the bottom, he does not think that the guy who chasing the back is also like him, belongs to this kind of cultivation is the bottom of the existence of strength.

In other words, once caught up by the other party, Ye Xuan will face, I am afraid it is a real life and death crisis!

"Hurry up, hurry up..."

Under the crisis of life and death, Ye Xuan at this moment can be said to be extremely tense, even the muttering of his mouth came out...

What he urged is the phagocytic system in the body!

From the first moment when the starry sky swallowed the beast, the phagocytic system in Ye Xuan began to extract and devour the beast, and the process was obviously long. The next three days have passed, and there is no End.

This incident, taking up the system's energy consumption, let Ye Xuan innocently pull out to pick up a small pile of red-level star nuclear source, so he was in a hurry...

Since you can't escape it, then in Ye Xuan, the most urgent thing at the moment is naturally to improve your own strength as much as possible.

Even if he only promoted from the first step of the star nuclear to the second order of the star nuclear, for him, in the next battle with the attackers in the latter battleship, Ye Xuan's survival probability will also be greatly Soaring!

Just as Ye Xuan's heart was anxious, his body's engulfment system completed the purification process of the blood of the child's starry sky, and finally completed it. Ye Xuan's mind sounded a system sound that made him feel intimate: "Hey, congratulations Host, get the rare starry sky to swallow the blood of the beast, is it taken?"

Without any hesitation, Ye Xuan immediately responded: "I will take it immediately!"

"Hey, congratulations to the host, get the blood of the rare starry sky to swallow the beast, level: primary!"

"This blood is a growing blood!"

"Evolutionary requirements: devour the blood of the same kind of starry sky to engulf the beast, and through the continuous purification and purification of the blood to obtain a level of promotion!"

"Blood and blood speciality: the most sensitive to the origin of the star nucleus, within a certain range, can sense the atmosphere of all the core of the star! Perceptual range: augment with the blood level!"

"Hey, congratulations to the host, the blood of the rare starry sky engulfs the beast!"

"Hey, I feel the breath of the red star's nuclear source, whether it takes energy..."

Chapter 2597: Horrible star beast blood

Obviously, the red-level star nuclear source sensed by the system is actually the small pile of star nuclear source that Ye Xuan has just collected into the body when he took the starry sky to swallow the beast.

The original source of the star nuclear is originally the main promotion energy to enhance the realm of strength after entering the starry sky. It may be poor afterwards. If you want to advance, you need something better, but in Ye Xuan, the lowest level of the star, the star The effect of the nuclear source is absolutely optimal.

There are really good things. Because of his current realm strength, although it is because of the phagocytic system, it must be swallowed up, but the efficiency of absorption and utilization will obviously be greatly reduced.

This kind of discount does not mean the effect, but the speed of immediate results!

For Ye Xuan, who is facing a crisis at the moment, it is exactly what he needs urgently. It is as fast as possible. The battleships behind are getting closer and closer...

Therefore, Ye Xuan almost did not hesitate, immediately issued instructions to the system:
"Immediately, take full speed!"

"Hey, I found the source of the red star nuclear, I am learning!"

"Progress 1... Progress 30..."

"Hey, congratulations to the host! The level of the realm is improved!"

"Current realm: the second order of the star nuclear!"

"I am drawing the red star nuclear source: progress 50... progress 70..."

"Hey, congratulations to the host! The level of the realm is improved!"

"Current realm: the third level of the star nuclear environment!"

"Hey, the red-level star nuclear source has been taken!"

With the hint of the engulfing system in my mind, for Ye Xuan, the surprise is just coming one after another. Although he has already determined that this small pile of red-level star nuclear resources will definitely improve his realm, even It is Ye Xuan, and I never thought about it. This small pile of red-level star nuclear origins, the energy contained in it is so huge, actually let him promote the realm twice.

Within a short period of ten interest, he actually made his cultivation a realm, and directly upgraded from the star nuclear layer to the third floor of the star nuclear!

Although it was only the third layer of the first star, but the kind of powerful feeling that Ye Xuan captured from the body at that time made him feel a sense of reincarnation.

It is so wonderful.

For the monk, the improvement of the realm, even if it is a small stage, feels like entering a new world, and like this, in a short period of ten breaks, successively promoted two small levels of refreshment. Feeling, if you don't experience it yourself, you can't describe it in words...

It can be said that the current Ye Xuan, feels completely a completely new self, his self-confidence has never been firm!

However, all this is just a curtain, the real huge surprise, obviously still behind!

Just as Ye Xuan was delighted by the successive breakthroughs in the realm of cultivation, the sound of the phagocytic system that had just stopped in his mind was suddenly abruptly reappeared...

"Hey, the stars devour the blood of the beast to activate!"

"The blood is merging!"

"Congratulations to the host, the perfect integration of the stars to engulf the blood of the beast!"

"Hey, blood talent starts! Capture the atmosphere of the star nuclear! Position: right front! Level: Cyan medium! Quantity: Federal volume measurement, one square meter!"

"Hey, capture the breath of the star's source! Orientation: straight ahead! Level: Orange, etc. Quantity: Federal volumetric measurement, 2.5 square meters!"

"Hey, capture the breath of the star's source! Method: Left front! Level: Green inferior! Quantity: Federal volumetric measurement, 0.3 square meters!"

"Hey, capture the breath of the star's source..."

.....

With the blood of the starry venom that was captured before was extracted by the power of the phagocytic system and successfully and perfectly integrated into Ye Xuan's body, the phagocytic system succeeded in activating the **** talent of Ye Xuangang's fusion of the starry sky to engulf the beast. In the first time, I captured a large amount of the origin of the star nuclear from the surrounding starry sky.

Then, the system's monotonous and mechanical sounds repeatedly rang in Ye Xuan's mind...

All this came too suddenly, and suddenly it was so unprepared for Ye Xuan, such as the happiness in the dream!

Looking at it, he can see a lot of stars through the porthole of the flying shuttle.

These stars are big and small, but without exception, they are all dull and dull, giving people a sense of lifelessness. Even if they use the power of the gods to explore and sweep, they will not feel any between them. The difference.

Obviously, among the stars, some of the inner stars are still in existence.

But more, the star nucleus at the central star of the star has already been exhausted!

The general monk, the only way to collect this source of the star, is to break away from the surface of these stars, all the way down to the center of the star.

At that time, you will either get some of the origins of the star that still contain energy, or you can only get a small pile of energy that can only be recycled to the Federation of the Faro, polished to become the raw material of the federal standard.

If the obtained star crystal is more than the red level, there are some values, but if it is the general color below the red level, its value is simply not enough to cover the surface from the star into its central core. It took a lot of effort.

It's just that you can't make ends meet!

But now, Ye Xuan does not need to be close to these stars. Within a certain range, he only needs to activate the blood of the newly merged starry sky to swallow the beast. The effect is like opening a level-detecting radar specifically for the origin of the star nuclear... ..

Not only can we instantly determine whether the central core of a star still has the origin of the star nuclear with energy, even the grades and volume of these stars are clear!

In this case, Ye Xuan can completely detect the data, selectively excavate, a small number, poor grade, and give up directly.

Only choose those high-grade, and a large number of stars to start...

In this sense, this starry sky engulfs the beast's blood talent, which is the ability to detect the origin of the star nuclear, which is simply terrible!

With it, how many star nuclear sources Ye Xuan wants can be realized.

With it, Ye Xuan's cultivation is undoubtedly soaring like a rocket...

Of course, all this must be based on the premise that Ye Xuan can successfully get rid of the tail that has been tightly biting behind for three days.

Or say... kill it directly!

Otherwise, even if he was the next moment, he was pleasantly surprised to detect a star with a large number of purple-level stars. In the end, he could only hope to sigh, and he could not get it in his hands!

Realizing this, Ye Xuan's smashing flashed a slap in the face, and after biting his teeth, as the mind moved, he even stopped the flying shuttle shuttle...

This battle has been avoided!

Chapter 2598: Forcibly swallowed

As the flying shuttle stopped, Ye Xuan's figure took the battleship, and then waved his hand and the meteor shuttle was picked up.

At this time, the whole person stood in the empty space of the Galaxy without any cover, faceless, facing the small warship that was chasing after the rear.

Seeing that Ye Xuan did not seem to be ready to run again, the small warships chased after the rear also slowed down, and then a slight glimmer of light, a sly man wearing a white robes appeared in the starry sky, but for prevention Under the swindle, this person did not put away the small warship that had blessed the hidden array.

This person is red and white, looks quite extraordinary, but the light in the eyes is obviously erratic, and the above color and whiteness are a little morbid. At first glance, I know that it must be hollowed out by the wine. The reason.

For this reason, his cultivation is not very high, just the fourth stage of the star nuclear environment, and Ye Xuan is equivalent, a little higher.

From this person, you can have such a small warship that has engraved the hidden array method, and casually a shot is a small pile of red-level star nuclear sources. This kind of big-handed, its identity is obviously extraordinary, perhaps for this reason. In the capacity of his son, he is naturally not interested in cultivation.

At a young age, there can be a fourth-order repair of the star's nuclear environment. It is estimated that they are all piled up in various treasures.

Although the other side's cultivation was a little higher than the realm, but after seeing it, Ye Xuan sighed with a sigh of relief, a small step, the flowers in this greenhouse could fill him and Ye Xuan all the way. What is the gap between the strengths of the growing up?

To say that the other side has strengthened a big realm, Ye Xuan estimates that only the U-turn escapes, but it is only a small gap in the same realm... This can really be ignored.

It is a pity that the other party obviously does not have this kind of consciousness. At this moment, after the physical form appeared, he looked at Ye Xuan's repairing breath, and his white cheeks appeared on the pathologically pale cheeks, even when there was a sneer sneer: It's no wonder that there was a sudden stop of fear and fear. It turned out to be the reason for hiding it..."

"Unfortunately, only the third stage of the star nuclear, it is still a dead..."

Having said that, the white robe man's face suddenly sinks, and he reprimands like a slap in the face: "In this Wanluo Federation, you dare to grab this little thing, you are really the first one. See you for your courage to find death. , hand over the starry sky to engulf the beast, this less give you a whole body!"

The meaning of the words, the other party's concern, is clearly only the starry sky to engulf the beast. As for the small pile of red-level star nuclear origin, people did not mention it, apparently not in the eyes.

Sure enough, rich people!

Ye Xuan secretly sighed, and then his hands spread, his face was helpless: "It doesn't matter, the starry sky swallowed the beast has been used by me... including the red-level star nuclear source is the same, to be If it is, it will definitely not come out!"

"What? Used? You won't treat it as a meat wrapper? Damn you know how precious a starry devouring beast in a young age? This is a small collection of half a million francs that inadvertently met. After two years, I was actually treated as a meaty belly?"

The white robe man violently thundered, and the screaming screaming of the savage, but after a few words of roaring, he immediately responded: "No! The red-level star nucleus has a huge internal energy, even if it is small. It can't be squandered in a short time. Just how can you do it in just three days? You are lying!"

"Believe it or not, in short, I really can't come out. Besides, I didn't know that they all had the Lord's things before, but you won't be able to do it in the future..."

Ye Xuan's face once again showed helplessness, his brows were slightly wrinkled, and he was impatient.

"Do you dare to play with me?"

The white robe man was furious and suddenly violently screamed: "It's just looking for death, comet sword, hey!"

"call out!"

A red brilliance flashed, and as the roar of the white robe man rang, the red brilliance of the brilliance rose, and instantly turned into a wide broad sword like a door panel, with a strong prestige. Pressing the momentum, if the meteor is fast, slammed into Ye Xuan.

The latter's eyelids jumped wildly!

This white robe man is really uncommon, and the level of the red broad sword is obviously not low. With Ye Xuan now only the repair of the star nuclear environment, it is impossible to resist.

It's impossible to turn around and walk away. His speed is fast, but it's not too fast.

The crisis is coming, in Ye Xuan, the only solution is to...

"The hand of devouring!"

Without any hesitation, Ye Xuan immediately spurred the devouring skills of the engulfing system. In a moment, a huge giant palm looming looming, grabbed the red broad sword that was rushing!

"Oh..."

The next moment, like a slight abnormal sound of cracks, the illusory swallowing of the giant palm was actually opened by the red broad sword, its unimpeded, still roaring.

Ye Xuan's face is condensed, and the level is not low, which is beyond the scope of the hand that the swallowing hand can grab. In this way, you can only force a try.

Biting his teeth, Ye Xuan's heart quickly meditated: "The phagocytic system, forcibly charged!"

"call out!"

The sound of the emptiness suddenly appeared, and the illusory giant palm opened by the red broad sword was a roundabout. The original cracked palm was closed in the roundabout, and it seemed to be more solid, and then it was easy to find a way on the way to swing. For example, if the bag is taken, the red broad sword wrapped in the handle will not enter Ye Xuan's body.

Forcibly tried, and finally managed to succeed, but Ye Xuan paid a lot of money, he felt the consumption of the body's engulfing system.

"What? You actually received a small number of comet swords? What is this means?"

The white robe man was shocked, his eyes were round and his face was unbelievable.

When I talked, I slammed my teeth and raised my hand again. "You have received a small magic weapon. You have collected it for a while... Refining the demon pot, collecting!"

"Booming..."

The roar of the thunder and the roar of the thunder suddenly broke out without any warning. With the wave of the white robe man's hand, a green awning was made from the palm of his hand, turning into a sleek, long-mouthed flat pot, which seemed to be full of The infinite Thunder is generally the sound of the roaring sound, which is from the long-mouthed flat pot.

There is also a heart-rending sense of pressure and spreading. It instantly envelopes a vast expanse of the galaxy.

The level of this magic weapon is still above the red broad sword before it appears, and it has already made him feel a sense of heart-breaking!

It was also at this time that the sneer of the white robe man opposite was already heard again: "This pot is called a refining demon, and it can collect all things in the heavens and the earth, so it is enough to repair it, and the stars can also accept it. Not refining, but accepting a small ants in the third-order of the star nuclear, but it is a hand to come..."

Not refining?

Chewing on this message, Ye Xuan couldn't help but move...

Chapter 2599: Huge harvest

Since it has not been refined, it will wait for the things of the Lord, even if the grade of the refining pot is higher, the hand of the devouring will be more relaxed than the red sword before.

The thought flashed through my mind, and Ye Xuan did not hesitate. He raised his hand and screamed: "The hand of devouring! The star sword... Hey!"

The huge illusory palm reappears again. This time, Ye Xuan did not provoke the ability to "force the charge", but it was equally easy to collect the smashing demon pot. The powerful pressure in the galactic sky is no longer, even The sound of thunderous roars disappeared completely.

In addition, the huge illusory palm under the urging of Ye Xuan, it was a chance to fish a small warship that was not taken up by the white robe man. At the same time, the starry sword that was shot by the wave was successfully collected. It was also turned into a touch of mans, and after a hover, it slammed into the back of the other side!

"What? This is impossible!"

The white robe man's eyes almost came out, his face was full of shock, and finally he jumped his feet and snarled in the void: "You are definitely not the third-order of the star nuclear, **** it, but it's still hidden! Liar! Robber! You still devour my beast, my mysterious sword, and my refining pot... God, there are too few dusty ships, you **** robber!"

I don't know, if I count, this white robe man finds that he has unwittingly taken away a lot of good things by the other party. His position in the Federation of the Faro, especially in the human race, has always been Only he looks at other people's things, and then either forcibly seizes them, or designs the shares they have taken. Why have they been so robbed?

The anger of Haotian came to my heart. At this moment, the man in the white robe was violently gone. It was the starry sword that even came back from the neck, and it seemed to be completely unrecognizable.

It is naturally impossible without sensing it.

The reason why he did not pay attention to it was because the whole mind was indeed covered by a raging anger at the moment, and no one else was concerned.

On the other hand, it is because of the breath and power of the star sword he sensed, he simply can't shake him, and there is no need to pay attention!

In his capacity, there is no shortage of defensive powerful magic weapons.

This time I came to the funeral star field to find the starry sky to devour the beast. The white robe man is actually not single. He even brought a huge **** fleet. Only recently, he left the fleet alone and went out of the search without any intention. It was discovered that the starry sky that followed this two years ago swallowed the beast, and it was difficult to find a trace for the other party to escape.

Even if the rush is coming, many treasures are not carried on the body, but a few personal defense treasures, for him, never leave.

The star's sword fell, and one of several defensive treasures in the white robe man's body was activated autonomously, and a layer of glazed glare was formed to completely cover the figure.

"Ding!"

The star's sword slammed on the glazed glare and made a crisp sound. Not only did it fail to move, but the colored light of the glazed glaze did not even rise.

Ye Xuan's face was gloomy in an instant. With the handwriting of the other party, I was afraid that there were also a lot of defensive treasures on the body. Just like the random activation, it has made him helpless. So, if you want to kill this person today, It is simply not possible!

Since there is no hope of killing and gaining a lot of benefits, then you will take it away. This small speed warship of this person has already been collected by Ye Xuan with the engulfing hand, and it should not be able to catch up.

Coldly swept the other side, Ye Xuan took back the Star Sword, not much to say, worship the Flying Star Shuttle, turn around and go!

"The liar! The robber! This will not let you go..."

Behind him, the sorrowful roar of the white robe man was faintly heard, but he did not take out other battleships again. Obviously, there was no other small warship on the other side, facing Ye Xuan who had left the flying shuttle. I can only hope to sigh.

A brilliance flashed, the flying star shuttle cut through the starry sky, and quickly went away, and the blink of an eye disappeared at the end of the starry sky!

"I don't remember your appearance. I won't let you go. In the Federation of the Vulcan, especially in the human race, no one dares to do this to me..."

In the middle of the sigh, a mad, cold and sturdy man, the white robe man turned and walked in one direction. His **** fleet was far ahead, even if he crossed the void in the flesh, it would be more than two or three months. Convergence with it.

At that time, he will try his best to search for the entire fleet. Even if the funeral star field is turned to the bottom, you must find the **** robber!

One day later, the depths of the funeral star field.

Ye Xuan urged the flying star to fall to the front of a huge star.

He decided to make a temporary stay here. On the one hand, he cleaned up the harvest. On the other hand, when he approached this hugely huge giant planet, he also gave hints about the blood talent of

the starry sky swallowing the beast. This star Deep in the star's core, there are not only a considerable number of red-level star nuclear sources.

There is even a small blue-scale star source that is half a foot square.

Open the black and the color of the star, the source of the star is not mentioned, the ordinary white orange green, blue, blue and purple, among the seven star nuclear sources, the red level is considered to be high quality, and the blue level of the star core is more It is only under the purple level, even if it is only a half-foot square, Ye Xuan may not easily miss it.

What's more, with the small blue-level star nuclear source mixed together, there are a lot of red-level star nuclear sources that are full of feet.

This wealth, anyone will be tempted!

After plucking the Flying Star Shuttle, Ye Xuan searched for a Grand Canyon on the back of this huge planet. After setting up the ban, he began to clean up the harvest.

In addition to the previous starry sky engulfing the beast and the small red-level star nuclear source, his harvest also has a small warship named Dust, and a magical red broad sword of attacking. In addition, it is that The refining pot that made the thunder and roar.

This pot is called a demon, plus the words of the white robe man. It must be the kind of space magic that contains a certain amount of space. It can not only be used for storage, but also can collect living things into it and carry out some Refinery.

As for the thunderous sounds that appeared after this treasure, it shows that in addition to the above auxiliary functions, it is still a multi-function magic weapon with an attack mode. It is really a rare thing!

At the moment, Ye Xuan's cultivation is limited, and he wants to survive in this strange funeral star field. In the early days, he had to rely on the help of external forces such as magic weapons. Therefore, he decided to use this in the first time. All the treasures that Fan has earned are all refining, and they are all part of his comprehensive combat power!

With this kind of thinking, Ye Xuan even contacted the body's phagocytic system, and then, the system's prompt tone, it is easy for his mind to ring out...

Chapter 2600: Activate the fusion system

"Hey, congratulations to the host, find out the origin of the star, is it collected?"

"Hey, congratulations to the host, the star of the nine-day star, whether to activate the fusion system?"

It is not surprising that the star nucleus source, the white robe man can easily throw a small pile of red-level star nuclear source to trap the starry sky to swallow the beast, to say that he has no other inventory in this dusty ship, then it is strange It.

But what happened to the nine days of the star? Was it also found in that dusty ship?

This is not surprising. With the other hand's handwriting, the status is obviously extraordinary. Most of them are descendants of a core giant of the Federal Humanity Group of Wanluo. In this case, there are nine days of star marrow that Lian Yexuan has never heard of. Things are naturally normal.

However, this thing actually activates the fusion system of the phagocytic system, which is definitely a good thing.

Although the fusion system has not yet been activated, the system is waiting for Ye Xuan's reply, so what is the specific function of this system, he is not very clear, but just the fusion of these two words, it is enough to make people think again and again.

Ye Xuan did not hesitate to hesitate, even if he ordered the phagocytic system to devour the nine-day star, and immediately activated the instructions of the fusion system.

As for the origin of the star nuclear system in the dusty ship, Ye Xuan looked at it, and its quantity is not much. It is also the source of the cyan and green 3rd and 4th stars, and the 5th grade of the red star. It's not a little bit worse.

It seems that even this white robe man, the source of the five-level red star nuclear in his hand is not a lot, or that there are not many people in the body, but in order to trap the starry sky to engulf the beast, he has a five-level red star nucleus in his hand. The source has been all out.

Of course, in the end it is still cheaper!

"Hey, congratulations to the host, the fusion system is activated."

"Hey, I found that I can fuse the same kind of treasures, whether the Flying Star Shuttle and the Dust Ship, the Star Sword and the Star Sword are merged?"

As the system prompts the engulfing system in his mind to ring again, Ye Xuan completely stopped, and then there was a huge surprise that quietly emerged.

Can similar treasures blend together?

This is obviously no doubt. After all, the system has given specific tips. There are always four items that he can use to fuse. That is to say, these four treasures can be merged into two pieces. .

They are the Flying Star Shuttle and the Dust Ship, as well as the Star Sword and the Star Sword, which is the red broad sword.

The former belong to small warships, while the latter belong to the sword-shaped magic weapon in the attacking magic weapon.

Before Ye Xuan was worried about getting this dusty ship, he had no chance at all because of the identity and status of the white robe man in the Federation of the Faroese, especially the human race. This rare battleship engraved with the hidden method. Use, because once you take it out, you will definitely reveal your identity.

Now that there is a converged system, this problem is clearly solved.

Whether it is the Flying Star Shuttle and the Dust Ship, or the Star Sword and the Star Sword, it will not be the same as before, so even if Ye Xuan is free to take it out, he is not afraid to be recognized immediately. It is.

After some sensation, Ye Xuan even gave the system a command to determine the fusion. After thinking that he was determined here, the swallowing system could immediately combine the two warships and the two sword-type attack magic weapons.

I didn't expect the result to make Ye Xuan disappointed...

"Hey, make sure the fusion!"

"Hey, I found the source of the cyan three-level star nuclear, and collected it!"

"Hey, find the source of the green four-level star nuclear, and collect it!"

"Hey, warning! The fusion energy is not enough, please provide the host!"

Ye Xuan suddenly stunned, and then he looked at the two small piles of cyan and green star nuclear sources in the dust ship. It was discovered that the energy inside had disappeared, apparently being taken away by the phagocytic system. Now, they are just two small clusters of cyan and green stars.

At most, it was recycled to the hall of the Federal Government of Varo for exchange of some standard stars.

That is to say, the fusion system that has just been activated requires energy for each fusion, and this energy may be other resources, but the star nuclear source is also a usable one.

However, just a small pile of three-level cyan and four-level green star nuclear source is obviously not enough to support these two integrations.

Need more energy.

Ye Xuan immediately thought of the treasure at the star's core in the depths of this huge star.

Half a foot to see the side of a small six-level blue star nuclear source!

A small pile of five-level red star nuclear source!

This is a high-grade goods of five and six, should it be enough?

If this is not enough, then this newly activated fusion system is too disappointing. It just combines the things of the Flying Star Shuttle and the Dust Ship, and it needs such a huge amount of fusion energy. What?

When Ye Xuan grows up and needs to integrate higher-quality treasures, isn't he going to catch it?

In any case, first get the high-level star nuclear source of the five and six levels and hand it over to the system for collection. Try it again.

This star is very large, from the surface to the core area of the center of the star, it needs to go all the way, but it is really not too easy.

However, Ye Xuan knows that there is indeed a star nuclear source in his star nucleus, and after the high-quality five-level red and six-level blue, even if the excavation process is hard, the enthusiasm is absolutely not lacking.

Immediately, he sneaked into the bottom of the abyss hiding in the hiding place, and then took out the star sword, and continued to rotate at the extreme speed in front of him, turning into a sharp object like a drill bit, and going straight down all the way...

At the same time, on the other side of this huge black star, at this time, a huge battleship has just slowed down, slowly falling towards the surface of the stars!

This warship is a bit special in appearance. It is not like a kind of combat ship. It is like a large engineering ship. Of course, this kind of engineering refers to the exploration and excavation of stars.

In this funeral star field, there are indeed some such exploration and excavation ships. Their operational goal is to find the star nuclear source of the inner core of a star.

Compared with Ye Xuan alone, the person is urging the magic weapon, and the action of exhausting the true gas alone is not only more professional, but also an exploration group. Even the speed of the excavation is completely different. After all, even the specialized exploration and excavation ships are open, and they are still large!

At this moment, in the general control room of this exploration and excavation ship, more than a dozen figures are standing in front of the big screen. Among them, there are men and women, and they are all in different, all within the ninth order of the star.

"This is already the seventh star we decided to dig in a week. It has been empty for six times. This time, we have chosen such a big guy. I have a hunch, this time... will be rewarding!"
