

Super D. S 2601

Chapter 2601: Tianhe Star's rewards wanted

After the decision, the exploration and excavation work will start soon!

The shovel's excavation ship looks huge, but in fact, the number of people in its hull is only the thirteen people in the master control room.

Such engineering work ships are basically automated operations. Even if there are some repairs and other work that require manpower, they are generally completed by ship-borne robots. The technology camp of the Federal Republic of Venezuela can be combined with powerful comprehension. The camp is on the same page, and it can be seen how high the level of technological development in the Federation is.

The excavation site selected by the excavation ship is also a deep and wide canyon. After descending slowly, four huge mechanical arms are extended from the bottom of the hull, and the bed is firmly grasped to stabilize the excavation work. After the expansion, the hull is stable.

Soon, the central part of the lower part of the hull opened a telescopic door. A huge special grade alloy drill bit stretched out. After touching the ground of the canyon, it began to rotate very quickly...

For a time, the sand and stone splashed, and the huge roaring noise sounded, even in the cabin control room with excellent sound insulation effect, it was clearly audible!

Such roaring noise will last for a whole day or so, because the stars that are being excavated below are relatively large. Even with the speed of such large professional digging ships, it is not a short time to allow the drill to reach the vicinity of the central star.

"Damn, this is the noise that is disturbing. I have had some migraine headaches recently..."

Among the 13 figures in the main control room, a young woman with a very sturdy body and a fascinating face raised her hand and rubbed her temples. Then she sat down on the sofa next to her laziness. However, the line of sight swept to the middle-aged man who was standing in front of the big

screen of the job and staring closely at the bald middle-aged man who had drilled into the underground rock drill bit.

Then he said: "Hey, if we really get a lot of money today, should we return to the ship? After listening to the noise of the drill bit for seven days, Lilith can really stand it, I miss the dream of the Tianhe Star." The style of the resort!"

Seeing that the bald man did not respond, Lilith snorted and raised her right hand and pressed a few of the metal bracelets worn on her left wrist.

"Hey!"

A faint noise came out. In front of her, a virtual five-dimensional stereo screen appeared. The metal bracelet worn on its left hand was actually a personal computer, passing through the star field of this large excavation work ship. The network system can be linked to the public network of the Tianhe Star.

Of course, you have to have access to the gateway. And this authority is the official citizenship of the Federation of Varo!

Lilith apparently misses the dreamy scenery of the resort area at the bottom of the Tianhe Star. At this time, the picture on the five-dimensional virtual screen in front of her eyes is exactly the scenery of the underwater resort.

The colorful and colorful brilliance wraps the whole person of Lilith, and the whole circle is transformed into a five-dimensional virtual virtual world. Her whole person is like a squatting resort, although there is no real touch, but the vision The enjoyment of the game is not bad.

In the boring exploration work life, this is indeed the best way to relax the mood and release the pressure. Everyone is obviously used to it. No one else in the total control room turns to look at this place. meaning.....

"God, the reward of tens of billions of stars? What is this guy coming to the end? Is this too big?"

Suddenly, the exclamation of the Lily line sounded. This time, the attention of the other 12 people in the total control room was finally attracted to the past. It was the bald middle-aged man who had been standing on the big screen in front of the big screen. They all looked at the past with a blank look.

Tens of billions of stars are not a small amount.

Don't look at their excavation ship. If you want to earn tens of billions of stars, you have to pay at least half a year. Except for the cost of wear and maintenance, the dividends distributed to everyone's heads are only a few hundred million. Now!

Of course, the tens of billions of stars here refer to white coins!

At this time, Lilith, has already withdrawn from the virtual scenery of the Tianhe Xinghai Resort, and there is an illustrated and wanted order on the personal terminal in front of it, which is actually released by the official Tianhe Star Administration.

Ten billion stars are just the amount of rewards. As for the reason, it is a star thief!

There is a simple portrait on the rewards wanted order, which is similar to Ye Xuan's 60%, but there is no name and specific identity information. However, the crime is very detailed. There are even two pictures under the text of the wanted order. They are the ship's dust ship and the star sword.

As for the pot-shaped magic weapon called the refining demon, it is not listed. It is obvious that this item is not low, even if it appears on the wanted order, it is not suitable for it!

"Dare to rob the white-skinned people in the funeral star field, but it is not what you and I have provoked, this one billion really earned a hand, and did not spend time, wash and sleep!"

Just a glance at the wanted order, the middle-aged man with his bald head turned and looked at the big screen of the homework. The rest of the people glanced at the face, all of them showed a disappointing look, but no one retorted.

As I said before, the funeral star field is the third universe under the control of the human race, but it is in the middle of the science camp and the cultivation camp. It belongs to the gray area.

At the two ends of this vast expanse of stars, one is the Tianhe Star, belonging to the immortal dynasty of the technology camp, and the other is the Purple Star, belonging to the Tenth Heaven Palace!

White Splash is the white robe man, the full name of Bai Shili, in the funeral star field, he is absolutely rampant existence, because his grandfather Bai Zhengjun, is the star of Tianhe.

In the immortal dynasty of the Federal Science and Technology camp of Wanluo, the subordinates have three empires and hundreds of small countries, and Tianhe Star belongs to one of the small countries.

Bai Zhengjun is sitting on a star, and it can be regarded as the general existence of the seal.

And this person has always been the most guardian, this matter is well known, dare to rob the grandson's existence in the funeral star field, and can you be an ordinary person?

One day, dazzling!

The huge drill bit has already drilled through the passage to the star's central star area in the foot, leaving only the last few hundred meters. This section must be manually excavated, otherwise it will damage the star's source.

Right now, the drill bit is retreating, and the thirteen people in the main control room are all excited.

Although there are still hundreds of meters without drilling, but such a distance can already detect the situation in the central star nucleus, they found a five-level red star nuclear source of one foot square, and a six-level blue star of half a square square. Nuclear source, this can be high-end goods, can be worth a lot of money.

"Old rules, Lilith, Monkey III, and Hong Wu, you three go with me, others stay behind!"

After that, the middle-aged man with his bald head turned out to go out of the general control room. Behind him, the other three people immediately followed up. Their task is to wait until the drill bit exits and follow the open road to enter the core of the star, which will be detected. Star nuclear source is taken back!

No one knows at this time, just on the other side of the star, Ye Xuan, close to the center of the star, is also close...

Chapter 2602: I slipped my own feet

After a long day of insomnia, Ye Xuan finally heard the system sounds in his mind.

"Hey, congratulations to the host, find the source of the star, is it charged?"

This represents his current position, very close to the center of the star's nucleus of this huge star, and the phagocytic system in his body can directly charge the source of the star.

Ye Xuan Dang even issued a command to receive, and then the system prompts in his mind will ring again.

"Hey, congratulations to the host, get a high-grade star nuclear source, five-level red one-foot square, six-level blue half to see the square!"

"Hey, the system reminds me whether to take the star nuclear source and continue to integrate!"

"Capture! Continue to merge!"

Without any hesitation, Ye Xuan immediately issued an order. Although the origin of the star in this star is that he was determined to win, but before, Ye Xuan is doing the fusion of the four treasures, because of the lack of fusion energy. Just stopped.

Now that energy has been acquired, it will naturally continue.

"Hey, start to pick up the source of the star nuclear, and get it done!"

"Hey, system reminder, integration start, progress 1... progress 2..."

As the system sounds in his mind rang again, Ye Xuan's heart hanging in the eyes of the blind man finally fell back to the chest. Then he subconsciously checked the remaining source of the star nuclear, and his heart was instantly surprised.

It seems that this time, although the four treasures are merged at the same time, which is equivalent to two separate integrations, it is obviously not a lot of fusion energy.

In addition to those that have been levied by the system before, the two high-level star nucleus sources that have just been acquired are only half of the five-level red, that is, half a square.

In addition, the six-level blue star nuclear source with a higher level of half a square is not moving!

This kind of energy consumption, Ye Xuan is still completely acceptable, but of course, this is only the first fusion of these four treasures, if you integrate other treasures in the future, it is equivalent to the second fusion, played Online games know that the more times the equipment is melted, the greater the success rate and consumables.

This fusion system, which has just been activated by the phagocytic system, will also occur. It is still unknown. After Ye Xuan decides to get the right fusion treasure in the future, he will try it immediately.

At the moment, the integration of these four treasures has begun. The central area of the star's nucleus has no value to continue to stay. In any case, there are still many sources of star nuclear remaining, especially the six-level square. Blue star nuclear source, Ye Xuan's expectations for it is still very large.

Don't look at him before he just collected a small pile of five-level red star nuclear source, and let it be repaired as a realm to improve two small steps, but the more energy that goes to the next step, the apparently greater.

If it is the same five-level red star nuclear source, this small pile of square feet will not allow him to be promoted from the third-order of the star nuclear to the fourth-order of the star nuclear.

However, the source of the small blue and six-star blue star nuclear is hard to say, after all, the quality is a high level.

Ye Xuan's body shape picked up and quickly flew to the stars. He decided to find a secluded retreat on this star, and all the stars in his hand would be collected, try to improve the realm of the realm, and then Go find a new star nuclear source!

At the same time, just at the other end of the 100-meter gap with Ye Xuan, the four strong men from the large engineering ship were all stupid.

Just now, they clearly saw the two small piles of star nuclear sources, but when they were ready to collect, they suddenly disappeared inexplicably.

To be precise, it was turned into a layer of light and drilled into the opposite rock formation.

"Robber! It's definitely a robber! How can the star nuclear source of the hand slip through the long legs?"

After a few moments of stupidity, the bald man snarled with his feet on his feet, and at the same time he raised his hand and waved a sword-shaped magic weapon with green fluorescent awns. When he touched the rock formation, it was like cutting tofu. Advance toward.

A hundred meters away, the blink of an eye will pass, and a straight tunneling path will be displayed in front of the four people, let them take a breath.

The words of the bald man's talent are just speculations, but now everything has been confirmed. The source of the star that has already come into view is indeed being taken away by a hundred meters of rock formation.

This kind of means is simply incredible!

"Not the guy who grabbed Bai Shili?"

Lilith's heart moved, and immediately said: "The guy said that this guy also grabbed a white star and swallowed a starry sky. This kind of star beast has always been feeding on the origin of the star nuclear. Maybe there is any talent means. A hundred meters of rock formations directly devour the origin of the star nucleus. Otherwise, when they eat, do they have to break a star every time?"

"Yes, this unscrupulous means is very similar, damn, actually grabbed my bald head!"

The bald man flashed through the fine mans, immediately opened the communication system, and issued instructions to the people who stayed behind the large-scale engineering ship on the surface of the star: "I immediately contact Tianhe Star, and we said that we found the **** star thief, and the other party just returned Grab our bunch of star nuclear sources, send the star-space coordinates directly, and request federal support!"

After that, the bald head swayed and swayed along the tunneling path in front of him: "Let's chase!"

.....

In the Qixing River, not far from the huge star where the large excavation ship is located, a huge fleet is sailing!

The fleet has a total of ten warships, all of which are large "stars", and the hulls are painted with the logo of the Federation of Warra, apparently all official battleships.

In the central flagship control room of the fleet, the white robe man Bai Shili was gloomy and stared at the big screen in front of him.

After being escaped by Ye Xuan on that day, he crossed the void in the flesh, and soon dispatched with the Tianhe Star Changbai Zhengjun, followed by the federal fleet responsible for the guards, and then contacted Tianhe Star, will be wanted. Ordered, but also in the direction of Ye Xuan escape, all the way to catch up.

Unfortunately, there has been no feedback since then.

This funeral star field is really too big, even if there are so many powerful members of the federal family in the meantime, it is no different to find the trace of the bold star thief in such a short period of time.

At this moment, Bai Shili was so frustrated that he had always been unscrupulous in the Tianhexing area. He had never eaten this kind of loss, and he simply smashed it!

It was also at this time that a major of the fleet next to him shouted in surprise: "White, there is news, the kid is on a dead star not far from the front, just snatched away from a exploration team. A batch of star nuclear sources..."

"Damn, this courage is really fat! Actually dare to grab?"

Bai Shili's whole person suddenly became a spirit, and he waved his hand: "The whole fleet, moving forward at full speed, gave me a sigh of relief. This time, I want him to escape!"

Chapter 2603: Star cannon

The star-rated warships are the entry-level warships of the immortal dynasty military of the Vatican Federal Science and Technology camp. Each ship has a length of kilometers and is equipped with a star cannon.

At the moment, ten star-rated federal warships surrounded a huge black star, fearing that a fly would not want to fly out.

The star surface, the bald Xu and Lilith have returned to the large warship.

They just chased along the opposite tunneling path, until the surface of the stars, did not find Ye Xuan's figure, and finally only reluctantly chose to return.

Of course, there is another reason for this. It is that the bald head Xu is worried that the strength of the other side is too high. After all, that is the master who dares to slap the skin in this star field.

Anyway, Tianhe Star has been reported, so there is no need to die with the other side. The Federal Fleet of Tianhe Star believes that it will come soon. At that time, as long as the star thief is caught, the origin of the stolen star will not be recovered, or even There are also 10 billion star coins!

"Head, the federal fleet of the Tianhe Star has arrived, surrounded by the entire star, there are ten star-rated military-style warships. From the speed of their coming, it is estimated that this fleet is white splash. I originally searched in this star field..."

The line of sight was taken back from the big screen, and a left-behind member turned to look at the bald head Xu and reported the news that the ten star-rated warships had just arrived.

"This time, the kid can't escape! There are ten star-rated military-style warships, but they are equipped with star guns."

The head of the bald head floated a slap in the face, and the big hand waved: "Let's stop here, immediately take off and join the fleet above. The next thing is theirs. Let's just wait for the seal." "

At the same time, in the space above the stars in the Star River.

Ten warships had just surrounded the black stars, and Bai Shili in the flagship general control room immediately issued the command of the attack: "All of them have, the stars are volleyed, and the boy is forced out!"

"but....."

A major military officer next to him was hesitant and tried to remind him: "White is small, the large engineering ship is still inside. It seems to be taking off. It should come over and join us. The little man's whereabouts, but they reported it. of!"

The implication is that we can fire the guns and wait for this engineering ship to come up and say that people also have merit.

"Bastard, a broken engineering ship. It's banged. Is it important to have a small face? Is it important to have a star face?"

Bai Shili immediately roared: "Since they are meritorious deeds, then it is a good thing to do the end, can it not be a sacrifice for the federation? If the kid is lurking in the engineering ship, when the ship breaks up, the people suddenly rush out. We can't catch up!"

It makes sense to say that all the fleet officers in the general control room are speechless.

The instructions for firing were immediately released!

The star cannon, the full name of the star-killing gun, claims to be able to smash a star. Of course, the entry-level star-rated federal military warship, equipped with the star cannon, can only blast a line on the interplanetary voyage. The big meteor encountered.

For the huge star below, with the star gun, it is absolutely impossible to blast it all.

However, if the ten stars are volleyed and the whole star is smashed to the sky, this can be done!

The huge roaring sounded instantly, and on each of the ten warships surrounded by the stars, each of them fired a ten-meter-thick energy beam and blasted to the black star below.

At this moment, the large engineering ship had just left the ground, and suddenly saw such a scene, the thirteen people in the ship's general control room all changed, and then, with the roar of the bald head Xu Wei Niang, it was being manipulated. Several talents of the engineering ship finally recovered, and hurriedly changed the instructions to bring the engineering ship to the surface of the stars again.

Although staying here is still very hot, but at least it is better than flying into the star cannon directly in space to **** into the slag?

This kind of engineering ship is impossible to equip with energy shields, no financial resources!

"Abandon the ship! Abandon the ship! Bai Shili's **** is really a splash, too much something..."

After the engineering ship landed again, the bald head Xu, who was the captain, immediately issued an order to abandon the ship.

Stay in the ship, that is the live target. Since the white splash has already opened the gun, it is obviously impossible to let them leave. This is the killing. Instead of staying on the ship, it is better to find a hiding place on this star. Perhaps There is still a line of life!

A group of thirteen people, slightly packed up important items, and then hurriedly left the engineering ship, the body shape disappeared in the depths of a large canyon on the surface of the stars.

At this moment, Ye Xuan is retreating in a crypt on the other side of the star.

The blood of the stars devours the beast is not simple. With the ability of the phagocytic system, the speed of collecting the origins of the stars is simply astounding.

In such a short period of time, for a long time, the remaining two small piles of five-level red star nuclear source and six-level blue star nuclear source, the energy contained in it has been completely taken away by Ye Xuan.

Just as he ended his retreat and opened his eyes, the system sounds in his mind finally sounded.

"Hey, congratulations to the host, the level is improved, the current realm: the fourth level of the star nuclear!"

Sure enough, even with the almost equal amount of the five-level red star nuclear source, plus a small pile of six-level blue star nuclear source, this time, just let Ye Xuan rise a small step.

Presumably, it will become more and more difficult later, and when he thinks about it, he will be a little depressed.

Fortunately, now has the blood talent of the starry sky to swallow the beast, the source of the star nuclear source, it does not have to worry too much!

"Booming!"

"boom!"

.....

The whole star suddenly violently vibrated, and at the same time, there was a lot of loud bangs, so that Ye Xuan, who had just got up and ready to leave, was shocked, and a very unpleasant feeling came to his mind.

As soon as the gods extended, he quickly discovered the ten federal warships surrounded by stars.

Almost no thoughts, Ye Xuan came to realize the first time, no doubt, the white robe man chased, and this time brought a whole fleet, I do not know why, it is clear that he is here In the stars, the guns are fired together, this is the rhythm of pushing him out!

"Where is the problem? Is it a trace of the treasures that were collected before?"

The brow wrinkled, Ye Xuan thought about it, but he quickly overturned the possibility that all the treasures were collected through the phagocytic system. If this is the trace of the brand, the system could not detect it.

"No matter what, the other side's naval guns continue to keep going, not rushing out is a death!"

Thinking about nothing, Ye Xuan did not go deeper and began to check the progress of the previous integration: "I don't know what surprises after the integration of the two warships, but don't let me be too disappointed!"

Chapter 2604: The opportunity of secondary integration

"Hey, congratulations to the host, the success of the fusion, get the star shuttle!"

"Hey, congratulations to the host, the success of the fusion, get the Scorpio sword!"

As Ye Xuan took an active look at the integration of the system, the sound of the phagocytic system also resounded in his mind.

There is no doubt that both integrations have been successful.

His Flying Star Shuttle merged with the Dust Ship into a Star Shuttle. Since it is still a shuttle, it shows that the fast speed of the Flying Shuttle has been inherited. At the same time, the name of this new battleship is The word "hidden words" indicates that the perfect concealed method on the white robes of the white robes was also transplanted.

This was originally the strengths and strengths of the two warships. Since it is a fusion, it is naturally a strong combination. It is impossible to keep some of the things that belong to the chicken ribs.

Similarly, Ye Xuan's Star Sword and the red broad-sword comet sword, which is like a door panel, are also merged into the current Scorpio Sword. However, for this sword, Ye Xuan is not in a hurry to check, his attention. Force, the first time was attracted by the star-studded ship that had just merged successfully.

The Starship is still a small warship, basically retaining the streamlined hull form of the previous Flying Star Shuttle, but the surface has been slightly modified, and it has become more complicated. Of course, the hidden array method must also be branded, just This type of engraving method only shows the branding of the mark when it is activated and undone. Under normal circumstances, it cannot be seen.

The biggest difference is actually the internal structure and interior. The former Feixing Shuttle is basically based on practicality, but the dusty ship is a luxury of enjoyment. Now these luxurious interiors are all inherited. Star Shuttle.

But these are not the concerns of Ye Xuan. What he cares most is the speed of this star.

Now the whole huge black star is surrounded by ten star-rated battleships. If you want to escape, it is possible to use the perfect hidden method of hiding the stars. However, Ye Xuan is not afraid to take risks. He can only escape, then the speed of the star shuttle is very important.

In fact, only the speed is not enough, because your speed is fast, and after all, it is not as fast as the star guns of the federal battleship. If you can have a higher energy shield system, it is just a luxury.

Whether it is Ye Xuan's Flying Star Shuttle or the White Robe Man's Dust Ship, there is no such energy shield. Even if the fusion system is even more powerful, it is impossible to change out of thin air.

The star-rated federal warships are the entry-level warships of the imperial empire's three empire and hundreds of small countries. The performance and firepower can be found on the federal military website. It is not a secret, so, Xuan quickly found the speed of its interplanetary navigation through the phagocytic system.

Contrast with the star-studded ship that had just merged successfully, he was suddenly depressed.

Although the speed difference is not a lot, but after all, it is still a little worse. In this case, once the hidden array method is useless, then Ye Xuan will undoubtedly be very dangerous.

Without energy shields, the speed can't match the other side, and you can't see the vitality.

It was also at this time that Ye Xuan's extended knowledge unexpectedly captured a small warship, which was still a high-class battleship with energy shields.

And this small high-class warship is not at high altitude, but on the surface of this black star, not far from the hiding place of Ye Xuan, it seems to be rushing toward a dry trench. .

"Secondary fusion?"

Ye Xuan's eyes are bright in an instant. This warship is obviously faster than the flying shuttle. This is normal. After all, it is a high-class warship with energy shield. The speed is naturally slower than it is.

If you can grab this battleship...

If there is another integration, then the second upgrade of the current Starship will not only have energy shields, but even the speed will increase a lot.

The Flying Shuttle is just a simple warship equivalent to a walking tool. The only pursuit is speed. Even the white robe man's dusty ship does not attack the system.

Since this high-ranking warship has even energy shields, most of them will not fall into the attack system. If there is one, it is undoubtedly an unexpected surprise for Ye Xuan!

Soon, even the large-scale excavation ship that had been abandoned on the other side of the star fell into Ye Xuan's sense of consciousness. His face was suddenly gloomy. Obviously, it should be this ship that exposed his tracks. The people on the large excavation ship, the small high-class warship just flew in the direction of the large excavation ship, most of them.

In fact, this is indeed true. This small high-class warship is a bald-headed Xu. As a senior professional treasure hunter, the bald head Xu has been swaying for many years in the funeral domain. The accumulated coins are enough for him to buy one. Small advanced warships that attack systems and energy shields.

Right now, the 13 crew members, including Lilith, are all in his Fortuna. Because this warship has energy shields, they have a good chance of surviving, but no one knows the ten that surrounds the sky. When the federal warships leave, in order to save the energy of the energy shield, they must find a place to hide safely first...

At the first time, Ye Xuan sacrificed the star shuttle, and collected all the breath, as invisible, quickly chased up.

The opponent's speed master is not very fast, and the star shuttle has not recovered any effort to catch up, and then hangs in the back, tracking all the way.

The hand of devouring can force the warship to be charged, but it must wait until the people in the cabin come out. Otherwise, the success rate of the collection is too low, which can be said to be minimal.

It is obviously impossible for the other party to hide in the battleship all the time. The energy consumed is too great. The most important thing is to save energy. No one knows whether to fight a long-term battle in this star. The white robe man will never give up easily.

Since the other party can reveal his own traces, then this must know the grievances of himself and the white robe man, so for this, they should be more clear than Ye Xuan.

What Ye Xuan needs to do is to find a suitable hiding place in the other side, and then all out of the warship, immediately shot, and forced the battleship to collect.

This opportunity is coming soon...

The battleship in front stopped at the deepest point of the dry trench. Then, Ye Xuan saw a figure coming out of the battleship that opened the hatch after landing.

The last thing that came out was a bald-headed man. After him, no one was there anymore.

Ye Xuan's heart jumped and immediately activated the forcible grasping skills of the phagocytic system.

In the next moment, when the bald man raised his hand and prepared to put the battleship away, the landing ship suddenly disappeared abruptly. Ye Xuan did not show up at all, and the star shuttle was not exposed. The battleship arrived. After that, he quickly turned to the first time.

"My...the God of Wealth? How suddenly disappeared?"

The head of the bald head Xu is still in front of him, his face is sluggish!

Chapter 2605: Hidden Almighty Battleship

Did not wait to return to the previous retreat, Ye Xuan first looked at the Fortune God just grabbed.

The surprise came so fast that Ye Xuan was in full swing.

Although the name of this warship is very earthy, the ranks of others are definitely not blown. Both offensive and defensive, not only have energy shields, but even attack systems. There is a star gun in front and back, which is the federal military star battleship. The equipped standard naval gun can directly smash a small meteor.

It seems that the bald-headed man who built this small high-class warship did spend a lot of stars, and the mines were really rich people. This is a large number of stars that are almost stacked in a cabin in the ship of the Fortuna. The nuclear source can be seen.

The only pity is that these stars are all white or two-level orange, only a small amount of four-level green and five-level red. As for the six-level blue, it is not a piece.

However, the victory is large. According to Ye Xuan's estimate, it is enough to use this ship to merge with his starship.

At the moment, his star-going ship has been extremely excellent in terms of speed of navigation. It is even more rare to see the hidden array. If it can successfully complete the second integration with the God of Wealth, then the new warships will not only be hidden, but also speed. It will be even better, and it is even more rare to have a high-quality attack system like Energy Shield and Star Cannon.

This is simply a perfect all-around warship. Ye Xuanguang is thinking about it and can't wait.

Soon, Ye Xuan returned to the previous retreat, and the star guns of the ten warships outside had been blasting all the time. Fortunately, this black star is too big, not for a short time. Was completely smashed.

But Ye Xuan's time is not much, he must complete the second integration as soon as possible.

"Hey, find the star ship, find the Fortuna, is it fusion?"

"Hey, do you find the source of the star nuclear, is it taking energy?"

With the prompting of the phagocytic system, Ye Xuan did not hesitate to directly choose the fusion, and the system did not continue to ask for the fusion energy acquisition instructions, directly from the compartment of the Fortuna.

Although the quality of this pile of stars is not high, but the victory is large, according to Ye Xuan, if all are collected, it is likely that he will be promoted from the fourth-order of the current star to the fifth-order of the star.

But that doesn't help, it can't solve the immediate crisis!

"Hey, the fusion energy is finished, the integration begins, the progress is 1...the progress 2..."

As the system's tone sounded again, Ye Xuan looked at the source of the star that was smashed out of the Fortune's cabin by the fusion system, and the result made him smile.

Although the pile of small star-like nucleus is not used up, it has also used more than 90%. The source of the nucleus that has been extracted from these energies has been reduced to a pure star crystal, except for recycling to the Federal Office. In exchange for the star currency, basically no other role.

The progress of the fusion is very slow. Ye Xuan is idle, and the remaining small pile of stars is also absorbed. Unfortunately, there is no suspense at all. He is still the fourth-order of the star, and the next one is promoted to a small one. The more the source energy of the star nucleus required by the order, the more.

Time has passed slowly, and the ten large-scale battleships at the height of the sky have been dumping gunfire. The entire black star has been shrouded in smoke, and a volley is a ten-star gun. Rolling, dozens of times down?

The surface of the whole star has changed into a pothole. This continuous strong bombardment caused the entire star to continually tremble. Under the violent shaking, some abyss and trenches collapsed, and even some huge peaks collapsed.

The place where Ye Xuan hides is located in the depths of the stars, and is close to the star nuclear area. Now it has been affected by it, which makes him worried. This huge black star has not been supported for a long time.

After two hours, the fusion is finally over.

"Hey, congratulations to the host, the success of the fusion, to get the all-round high-class battleship stealing shuttle!"

At this moment, when the system's prompt tone sounded again, Ye Xuan was just like Shutai. Just like hearing the sound of the sound of the sky, hundreds of thousands of pores were blowing cold outside, and the whole person was fast. It floated up.

All-round! And it is a high-class battleship!

Even the name of the name of the gods is quite good, and all this is perfect!

Of course, the sacred shuttle is still a small warship, and the shape still retains the streamlined shape of the flying star shuttle, but the surface of the hull has more devices, which should be the attachment of the star gun and the energy shield system.

As for the interior, there have been some changes compared to the previous ones, and the space is even larger. Now even if 20 people enter the inner cabin at the same time, they can be loaded.

Ye Xuan immediately checked the performance attributes of the sacred shuttle, and the speed has improved a lot. Compared with the federal military's star-rated warships, it has slightly exceeded.

All of this makes Ye Xuan very satisfied. The only thing that is a bit dumb is the two star guns and the energy shield system on the ship. If you need to turn it on, you need energy, and this energy is also the origin of the star.

At this point, Ye Xuan finally understood why the bald-headed man had piled up so many low-level stars in the former Fortuna cabin. It was not a safe for a long time, and the source of the star was provided to the God of Wealth. The number serves as an energy shield and the kinetic energy of the launching star gun!

But now, the only remaining point is also used by Ye Xuan while waiting for the result of the fusion.

However, this huge black star has just been excavated. The central core of the star can not have the origin of the star nuclear anyway. Ye Xuan is directly stupid, and the star cannon can not be used. Shield is a life-saving thing, you must prepare energy that can be turned on briefly.

After all, although the speed of the hidden ship is slightly higher than that of the ten star-rated federal warships, how can it be faster than the energy beam of the star cannon?

In case someone comes to a gun, there is no energy shield, it is definitely going to be finished!

Depressed, Ye Xuan suddenly remembered the bald-headed man who had been robbed of the Fortuna.

"As a professional mining, and throwing in the Fortuna, when the low-level star nuclear source can make up the hills, then how can he have no high-quality star nuclear source of five or more red? ?"

Mouth whispered in his mouth, Ye Xuan's eyes immediately lit up.

Although he also feels that he always catches the same person, it seems to be a bit too bully, but who told this guy to leak his whereabouts?

The troubles in front of him can all be found by him. It seems that the God of Wealth and the high-quality star nuclear source that will be available soon cannot be compared with him. It is enough to leave him a small life.

The more I thought more and more reasonably, Ye Xuan suddenly became excited, and sacrificed the gods, and directly rushed out of the retreat...

Chapter 2606: Want to live, to charge!

At high altitude, the ten flagship federal military mounted the battleship's central flagship master control room.

Bai Bai Li, a white robe man, stared blankly at the big screen in front of him.

What appears on the screen is the black star below. The surface of the whole star is now a dust, but the starships of the ten warships continue to volley. It is estimated that the following earth has been completely Plowed over again, but the distance from the entire star into the cosmic dust, but still out of reach.

More importantly, even if this can be done, the energy consumption of the ten warships will not keep up.

The energy beam of the star cannon is not shot out of the air. Each cannon represents a large amount of star nuclear energy.

Bai Shili's grandfather, Bai Zhengjun, is the star of Tianhe, but there is another giant in Tianhe, that is, the commander-in-chief of the Tianchen National Army stationed in Tianhe, a major general named Zhao Long.

The Federation of the Vatican is very large, and the immortal dynasty of the tech camp and the ten heavenly palaces of the comprehension camp each occupy half of the territory of the third universe.

There are three great empires and hundreds of small countries under the immortal dynasty. The dusty country is a small country affiliated with one of the empire.

Tianhe Star is an administrative planet among the stars controlled by Tianchen.

The reason why Bai Zhengjun was able to be a star in Tianhe Star was because he had a good son, the father of Bai Shili, who served in the capital of Tianchen.

Even so, this day, the river is not the one that Bai Zhengjun said. The federal system has always been separated by military and political affairs. Bai Zhengjun is the executive leader, and Zhao Long is the leader of the military in Tianhe.

Zhao Long's family is also in the capital city of Tianchen, and the background is strong, and it seems that he does not deal with Bai Shili's father.

Therefore, Bai Zhengjun and Zhao Long are just seemingly harmonious!

However, although the military power is in the hands of Zhao Long, Bai Zhengjun, as a star of the star, is also qualified to dispatch some warships as guards. The total amount he can control is 50 star ratings and three star ratings.

The ten ships brought by Bai Shili are part of the 50 stars that the Tianhe Star military allocated to Bai Zhengjun.

Although these warships are used by Bai Zhengjun, they are still the military's establishment. If the energy reserves are too large, let alone Bai Shili, even Bai Zhengjun is very difficult to cross. Zhao Long will take the opportunity to make trouble!

Therefore, even if these ten warships have the ability to completely destroy the huge stars below, Bai Shili does not dare to consume energy in such an unrestrained manner, let alone with the volley of ten star guns, this is simply difficult to achieve.

"That kid must have dared to take the lead. It should be hidden in the depths of the stars. Maybe the rock that had been collapsed is now crushed into meat."

Biting his teeth, Bai Shili screamed: "Order, the star guns are finished, and ten small landing ships are dispatched. I have to personally find out the body of the kid. I hope that the starry sky will swallow the beast."

A row of officers at the back of the station had already begun to stunned. After listening to it, they no longer had to volley and consume energy. Everyone looked at each other and all of them sighed with relief.

Although it seems that it is a little too risky to let Bai Shili go down and search for himself, in order to avoid this guy staying in the general control room, if he orders the volley again, I am afraid that I will not be able to go back if I go back...

Therefore, they hesitated a little, and finally nodded.

Ten small landing ships quickly flew out of the central flagship rear cabin and headed for the star below.

Bai Shili is in one of the ships.

This kind of small landing ship and Ye Xuan's hidden soul shuttle are not mostly small, they are more than ten meters wide and tens of meters long, but although they have an attack system, they have no energy shield at all.

As for the smuggling method of the hull, it is even more unnecessary.

And its attack system is not very powerful, at least not the two star guns loaded on the gods shuttle.

Therefore, no matter which aspect is compared, the performance of these ten small landing ships is far less than that of Ye Xuan. If Bai Shili knows that Ye Xuan actually has such a perfect all-round battleship, he will not leave easily. Central flagship.

It is a pity that there is no such thing in the world, and this is doomed that Bai Shili will have no return!

.....

The starry surface, the deepest part of the deep dry sea ditch.

Thirteen people, such as the bald head Xu and Lilith, and Hong Wu, are sullenly crushed in a natural cave cave deep in a trench.

The inexplicable disappearance of the God of Wealth has caused the entire team to fall into a cloud.

The other twelve people, such as Lilith and Hongwu, although they all have a small warship, but they are far from being able to compare with the God of Wealth.

Not to mention the weapon system, their private warships are not even with energy shields. In the face of this sky star's rumbling rumbling, it is dead to go out and take a head!

At this moment, as the volley of the star gun stopped, the whole huge star became quiet.

Lilith looked up and glanced at the exit direction of the cave. The language was suspicious: "The movement outside seems to have stopped. Willn't it be gone?"

"Impossible! How precious is the starry sky engulfing the beast? You don't know it, don't mention the face, just to recapture the beast, and the white splash is never easy to stop."

The bald head shook his head and shook his head. "If I guessed it, they should send a small landing ship and search for it. The carpet has been bombarded for so long, and the surface of the whole star has been plowed again." No one can guarantee that the **** star thief is already hanging."

"I look at the hanging, the head, the difference between your God of Wealth, most of the hand of the star thief, this guy, too dark!"

Aside, Hong Wu took over the words, and his face showed a confused color at the same time: "However, the original nuclear powers that were lost before will be counted. Now even the Fortuna is so bizarrely lost, is it the starry sky? The beast can even directly devour the battleship? Didn't hear it!"

"Now is not the time to ponder these things..."

The bald head waved his hand and sighed again: "The landing ship sent by Bai Popi will soon find us. At that time, most of it will be directly destroyed. Therefore, even if this hard rock cave does not collapse, we can't wait any longer. Now that the bombing has temporarily stopped, it is the best opportunity to open the sneak. The Fortuna is lost again. I don't mention the energy shield. Your private warships are not as fast as speed. They simply can't escape the ten lines. The pursuit of star-rated warships, we seem to be really finished this time!"

"In fact, you really have the last chance!"

Just after the words of the bald head Xu finished, the entrance to the cave screamed the voice of Ye Xuan very loudly. He still stayed in the hidden gods, so he only heard the sound and did not see his person: "Although you have lost to me." First of all, but I don't care about the villain, I can help you to take Bai Shili away, but this is for a fee!"

Chapter 2607: Ancient monk's cave house

"Who?"

"Who is there?"

"get out!"

.....

With the sound of Ye Xuan suddenly sounding, the thirteen people in the cave of Jianyan were immediately alerted. When the screams came out, the knowledge of God was the first time to sweep the past. Many of them even sacrificed the magic weapon directly. ,ready.

It is a pity that under the sweeping of the gods, the entrance and the outside of the cave are nothing but empty, and there is no abnormal space fluctuation. Let the people inside the cave suddenly have an illusion.

However, at this time, Ye Xuan's voice rang again: "I will leave if I grind again, but the white splash you said seems to be coming here. Since it's a splash, even if you gave him a message. The possibility of killing people is still very big..."

"Is it you? Are you the star thief?"

The bald head Xu finally reacted, and his face became extremely ugly: "Give me my God of Wealth, and I will forget the source of our star nuclear before, but you must come back to the Fortuna, otherwise this is not over!"

"What is the God of Wealth? Battleship? Do you think that I have this warship that has been engraved with the hidden method, and will you need your Fortune?"

Ye Xuan's sneer's voice came: "As for the origins of the stars, it's really what I took, but that is the thing of the Lord. You can explore and excavate. Why can't I? I finally fell into my hands. It can only show that you are not as good as people, and you are slower than me. Is this a problem?"

In a word, the thirteen people in the cave said nothing.

Regarding the original source of the star nuclear, Ye Xuan said that it is indeed reasonable, and there is nothing to refute.

As for the Caishen in the back, the warships of this family are even engraved with such a perfect concealed method. It is possible to see the level and use it to greet the God of Wealth.

It should be known that although the human races of the Federation of Venezuela are divided into a comprehension camp and a science and technology camp, and the cooperation between the two camps is also very close, even in the camp of comprehension, this master of formation is also a super-existent existence. They burned the battlefield for the battleship, which is absolutely valuable.

You can't even have people with money.

In this case, there is such an opportunity. The average person is a method of engraving speed or attacking. Even if it is a defense, it is better than a concealed method.

People's warships have hidden methods, and others will be worse?

Besides, since the things of the original star nuclear sources have been acknowledged, there is no reason not to admit the facts of the God of Wealth.

I thought about it for a while, even the bald head Xu was not sure. After all, his fortune disappeared at that time, and there was no trace of it.

"I have seen the white splash and searched, just taking advantage of this opportunity to leave, passing through here to hear your words, but also want to do a small business by the way."

Just as the bald head Xu and others were hesitating, Ye Xuan's voice passed again. This time, it sounds like it's really going to go away: "But it's like you're not interested, or I'll leave first, lest The delay is too long. If you are caught by a white splash, you can be in trouble!"

"Step on one foot!"

The bald head Xu is really anxious, biting his teeth, and his heart is horizontal: "Okay, the deal is over! We have some blood, after you have surrounded the circle, deliberately revealing the figure, helping us to pour the white and the outer battleship." Leading, to the level of your warship, presumably the speed is not slow, this is not dangerous for you, we will fight once, bet a bet on your character!"

"That's right. Actually, I am a businessman. Otherwise, I will not be thinking about making small sales at this time. The merchants are reluctant, this is credibility, rest assured, and will not hang you."

As soon as I heard this, the thirteen people in the cave almost smoked their mouths together. I only heard that the merchants were profitable. What kind of ghosts are the merchants?

Reputation? Now even who you are, don't know what it looks like, is this a half-credit relationship with credibility?

Even so, they can only gamble if they have no choice. Of course, the most important thing is that the bald Xu believes that Ye Xuan's warship is powerful. Since he will not be in danger, he will help him, as long as the character is not too bad, he will still do it.

At the moment, including the bald head Xu, the other 12 people each have a small pile of star nuclear sources, and they are not low-grade goods, the small part is five-level red, most of them are four-level green, only Lilith on the side frowned, and there was no movement.

"Are you arguing about Hanako? Is it true that your own life is worth a little? At least ten times. In addition, there seems to be no personal payment? This can make me embarrassed..."

"Ten times? You might as well grab it!"

"No, he was robbing!"

"This is clearly the robbery of the red fruit..."

"Is it really good for people to be a star thief? It's strange to not grab it. Everyone recognizes it, it's important!"

.....

These guys followed the bald heads for many years of star nuclear mining operations. In fact, everyone's net worth is not cheap. At this moment, the situation is urgent, and the temptations just now show that Ye Xuan is not so good to deal with the existence. After some grievances, after all, they have once again pulled out some of the star nuclear sources.

Although the quantity is still similar to the previous one, the grade is one level higher, most of which are five red, and even a small part of six blue.

In addition to the original sources of the stars that have been extracted before, the total amount has exceeded the income of Ye Xuan in the central star of the black star, and the harvest is very high.

However, this time, the origin of the star nuclear is still the other 12 people including the bald head Xu, Lilith alone, still no movement.

"Even if you go to Tianhe Star's Undersea Dream City, two adult tickets can bring a child for free. We have bought 12 tickets. Handsome guy, why don't you give me away?"

Lilith's face showed a pleading look: "The harvest that I came out this time has all been lost to them. Now it's a star nuclear source that can't be found. If you really want it... then you must take me with you. I know that there is a cave house of an ancient monk on a star. I found it during the last exploration, but I didn't say anything. What about half of us inside? That's the cave house of a monk in the comprehension camp, the treasure inside, buy My little life is definitely enough."

In fact, for a long time, the latter part is the focus, the side of the bald Xu and others listened, the eyelids are a light jump, deep fear Ye Xuan refused on the spot.

However, after Lilith's words were finished, the outside of the cave was filled with silence. After a few moments, Ye Xuan's voice came again: "The cave house of a strong man in the camp? This is not a small creation. However, you better not lie to me, otherwise I promise you will regret it!"

"No, no!"

Lilith was overjoyed, and the bald head Xu and others also sighed with relief. What he didn't know was that Ye Xuan, who was hiding in the gods, was sneer at the moment!

Chapter 2608: Don't insult my IQ

"Hey, find the source of the star nuclear, is it charged?"

"Receive immediately!"

With Ye Xuan responding, the phagocytic system was immediately activated, and the twelve small piles of star nucleus in the cave immediately turned into twelve weak mils, lasing away from the cave, and the blink of an eye disappeared.

In the process, several of the thirteen people in Dongfu almost couldn't resist the direct action. After all, he had already sacrificed his own magic weapon. He could chase the ten with only one thought. The faint fascination of the two piles of star nuclear sources went to find the location of Ye Xuan.

But that doesn't make much use. The warships of others are so high-end. With their magic weapon, they can't open the energy shield. In the end, they will offend each other and miss the opportunity to live.

Therefore, a few guys, including the bald head Xu, finally endured hard to bite their teeth.

"You can come over, but you can only be alone..."

After the star nuclear source was put away, Ye Xuan completely let go of his heart, but he did not leave, but once again. It's obviously Lilith.

The latter exchanged a look with the bald head Xu, and nodded in no way. She thought that all this was done seamlessly, but she did not know that Ye Xuan, who had been hiding in the shuttle, had seen it.

Therefore, the sneer of his mouth is even stronger.

Originally, Ye Xuan really planned to rush out of the encirclement of the ten star-rated warships, and took the initiative to reveal his face in the distant starry sky. It was also a good way to save the guys.

After all, at the speed of stealing the gods, the ten star-rated warships can't catch up at all. Even if they launch a star gun, the source of the star that has just been acquired by Shensuo is enough to shield it. Supporting for a short period of time, there is no fear at all.

Unfortunately, these guys are looking for death, so no wonder they are!

Although Lilith is a beautiful woman, in fact, among the thirteen people, he is only second to the bald head, and has reached the sixth stage of the star.

This point, from the previous bald Xu with three people leaving the ship, one of them is that she can see it.

The latter is the seventh order of the star.

She really does not have a single star source, but if Ye Xuan is not dead, she can borrow from other people, but she does not.

Instead, I found an excuse to mix in the interior of Ye Xuan's Hidden Shuttle, which is already the heart of the sword.

This girl is completely a cultivation madman. Every time she comes out to work in mining, the source of the star nuclear is basically taken out and exchanged with other people for high-quality star nuclear source, and then the next target star in the large mining ship. On the way, she was taken away by her.

Of course, the average person, there is no such speed in the source of the stars, otherwise, as long as there are enough stars in the core, isn't it a realm of rocketing all the way to the top?

The reason why Lilith was able to collect the star nuclear source at such a fast speed was because she had bought a lot of stars and exchanged a blood in the Tianhe Star Federal Affairs Office.

Of course, the blood is also very rare, not a star currency can be changed, she was also a leak.

Lilith and the bald head Xu are now betting, gambling Ye Xuan's repair is not as strong as Lilith, if so, as long as Lilith enters the other ship's battleship, there is a chance to kill each other and grab the battleship.

Instead of putting their lives on the other side of the bet, they are more inclined to gamble their luck!

The reason why Lilith is chosen instead of the more powerful bald head Xu is obviously because she is a woman and she is young and beautiful, so that the other party can put down the warning as much as possible!

At this moment, as Lilith walked toward the entrance of the Jianyan Cave, the hidden gods that had been open to the hidden array method finally showed up in the form of a layer of halo.

The twelve people in the cave immediately took a sigh of coolness, and the scorpion shot a greedy sacred man.

The smooth sense of lines, at a glance, knows that the speed is extremely fast.

There is also a star cannon outside the hull body and the vicinity of the energy shield, which is silently telling its powerful defense and attack power.

More importantly, the hidden array method engraved on the hull of Shensuo will appear in the short time of each activation and release. This is the case now.

The large number of sly and mysterious runes all over the outer layer of the ship almost did not sway the eyes of the people inside the cave.

After all, it is a warship that has undergone a second integration. Whether it is selling or real strength, it is absolutely first-class.

Even the bald head Xu sighed in his heart. Now he really believes that his own **** of wealth is not captured by the other party. Everyone has this kind of best warship, and he can still see that his top is a high-class light warship. The Fortuna?

In fact, Lilith, who is walking closer to Shensuo, is the most shocking moment at the moment. The battleship in front of her is a dream. She dreams of having it. If she hasn't seen the owner of the battleship yet, she can't determine the strength of the other side. She wants to start now.

Soon, there was a general passage on the hull of Shensuo, but no one appeared. Lilith did not hesitate to sneak in.

"Hey!"

The micro-sounds initiated by the concealed array method came out, a flash of light flashed, and the streamlined hull disappeared again. Even if it was swept back and forth with the gods, there was no breath.

Even in the process of starting the propeller quickly and flying away, there was no leak of even a single voice, all absorbed by the hidden array.

After three minutes, the bald head in the cave of Jianyan walked to the entrance of the cave with a suspicious look. He looked around and muttered: "Already... gone? Rely! There is no movement at all. This best warship, I must get it!"

At the same time, somewhere more than a hundred miles away from the deep cave in the depths of the trench, the sacred shuttle was quietly sailing but extremely fast.

There are quite a few cabins in the ship, Ye Xuan is in the general control room, and Lilith, at this moment, is imprisoned in a cabin at the end of the ship.

As the owner of the sacred shuttle, Ye Xuan was able to control any part of the entire battleship as he wished. At the moment, Lilith was imprisoned by him. Ye Xuan could not let her see her appearance. From him, he knew the white robe. From the moment of the real identity of the man, even Bai Shili has been designated as a killing target.

The other party is not returning to the Tianhe Star now, so he can only rely on the memory to ease the approximate picture, but once the Tianhe Star, he must be able to find Ye Xuan from the Tianhexing federal citizenship database through certain channels.

Therefore, Bai Shili must die, and Lilith, did not have a chance to see the true meaning of Ye Xuan.

Forbearing to anger, Lilith as much as I can see the politeness of the tone: "You guy, you are too careful? It is rude to treat a beautiful woman with this attitude..."

Responding to him is Ye Xuan's sneer: "Don't insult my IQ!"

Chapter 2609: Bombing white splash

Lilith's face changed immediately, and she suddenly had a very bad feeling, such as a thief boat: "What do you mean?"

"literal meaning!"

Ye Xuan's voice is still transmitted through the cabin's sound system: "In addition, I can tell you the truth, my cultivation is a realm, it is not as good as you, only the fourth stage of the star nuclear, but unfortunately, in this battleship. You have no chance, because I will not meet you at all."

"Handsome, I admit, I did have the idea of robbing the battleship at first, but it was all bald and forced me to do it!"

This time, Lilith was completely panicked, and the other party clarified the words. Obviously, there is no room for manoeuvre. In this case, if the other party will meet her, then it will be strange.

However, he clearly saw the plan of himself and the bald head Xu, why did he still push the boat to let himself go to the battleship?

Could it be...

Thinking of this, Lilith seems to see hope again, and the tone becomes more delicate: "You guy, you don't want to shut me up here as a slave? I admit, I was wrong before, but this kind of thing I am I won't do it, okay, I promise you to take you to the cave house of the ancient monk. After that, we will take a shot and we will not owe each other. How?"

This is clearly to retreat, Ye Xuan madly smiled: "Ha ha ha, this time ... please do not insult your own IQ?"

Lilith: "..."

.....

At the low altitude of the stars, the ten landing ships of the federal army are cruising around.

Because the surface of the stars still floats a thick layer, because of the dust mites that were raised by the previous carpet bombing, all the ten landing ships have opened the shipboard searchlights, the first ship, one below the hull. The glare searchlight has a strong penetrating power, and even in a dusty environment, it can still shine everything under the surface.

But in the same way, due to the presence of these glare searchlights, the location of the ten landing ships is also like the fireflies in the night sky, and they are clearly separated from each other.

Right now, Hidden Shuttle is quietly approaching the location where the ten landing ships are located...

For all of this, Lilith saw the real thing through the ship's porthole, which also arranged the array.

An ominous premonition floated on her heart, and Lilith even trembled with a tone: "Handsome guy, you... is it in the wrong direction? We should fly up and rush out of the blockade of the ten star-rated battleships. Then run far, and then reveal a face or something, you are wrong!"

"Yes, I will send you a ride first. I will go back later. I am relieved. I am the most credible person. I will say that I will lead these guys away, so I will definitely open them!"

Ye Xuan's words reveal a strange saying: "But, since you have added some material to me under the bright side, then, under the premise of leading the guys, I naturally have to retaliate with you." By the way, do you have a personal battleship?"

"There are some, what's wrong? Hey... handsome guy, don't we play?"

"Why don't you play? You don't want to play? I also feel very fun, this is just the beginning, don't worry, let's play slowly!"

"Right, get your private battleship ready, use it when you escape!"

"Hey..."

Lilith scared her face white, and there was a sob of voice in the microphone. I don't know if it was true or false, but Ye Xuan did not pay attention to it, and directly turned off the microphone.

He did decide to throw Lilith out, but not because of the anger of his heart, but to kill Bai Shili.

Originally, if Lilith and the bald head Xu did not move their minds, Ye Xuan would help them to lead the people and then look for a chance to start. Anyway, his hidden ship is now faster than the ten star-rated warships, and There are also energy shields and star guns, and more importantly, they can be perfectly hidden.

Hanging behind the other's fleet, as long as Bai Shili walked out of the battleship, he would definitely have the opportunity to kill him.

But now, since Lilith and the bald head Xu are killing themselves, it is obviously easier for Ye Xuan to kill Bai Shili.

Soon, Hidden Shuttle rushed to the area where the ten landing ships were located. Then, with Ye Xuan's thoughts, the door automatically opened, and a soft force would still plead with Lilith pushed it out.

Throughout the process, there was no change in the hidden array of the sacred shuttle, and there was no obvious trace of it. It was as if Lilith was directly teleported here.

After doing all this, Ye Xuan urged the gods to retreat to the distance, and began to order the ship's star guns to start charging. Of course, the energy shield system also began to recharge.

The original source of the star nuclear that I had just snatched, Ye Xuan did not intercept one piece, all piled up in the energy room of Shensuo Shuttle. As for the cost of improving the realm, he waited for him to solve the Bai Shili thing and left this one. After the stars, it is really not difficult to get a lot of star nuclear resources based on the talents of the stars in the sky.

Lilith was such a big living person that she was soon discovered.

She just took out her private battleship and didn't jump in. The ten landing ships came round from all directions. Ten strong glare columns gathered together and illuminate Lilith. She closed directly. With my eyes closed, there was no way to open it. I was so scared that I was urinating.

I am really afraid that the other party will not say anything, so come directly to such a shot.

But Bai Shili obviously cannot do this.

Suddenly I saw a big living person. Although it is very likely that it was only a miner in the large engineering ship, they were the first to discover the star thief. Maybe there are some clues related to the other side.

Therefore, Bai Shili issued the order to stay alive at the first time.

Moreover, he also walked out directly from a landing ship, his body slowly descended, approaching Lilith to the past, followed by two seven-level federal major officers.

The reason why it is so big is that no matter whether it is the battleship of the Star Pirate or the ship that he was robbed, there is no weapon system on it, and the star thief is even worse, even if he still hides it. As a repair, at most, it is the appearance of the five-sixth order of the star's nuclear environment.

He was followed by two stars in the seventh world, and nothing happened.

This is the time for Ye Xuan to wait. He expects that Bai Shili will appear for the first time after seeing Lilith. Of course, Ye Xuan will not give Lilith a chance to speak.

But the latter, apparently suddenly realized this at the moment, her face turned pale and screaming, "Don't come over, don't come over, I don't want to die..."

At this moment, Bai Shili, in her eyes, is the **** of death!

The latter's face sank immediately. He obviously didn't realize it was wrong. He thought that Lilith was afraid that he would take his life.

Not waiting for Bai Shili to blame, not far away, a bright star gun energy light column suddenly appeared, and instantly came, the four body shape, all enveloped...

Chapter 2610: Space oscillator

"boom!"

"boom....."

A ten-meter-thick white light beam suddenly appeared in the void without warning. Along the way, all the dust that floated in the air was turned into nothingness, and almost arrived in a moment, and surrounded by Bai Shili, Lilith and the two former Federal Majors behind the former.

The first time, these four guys turned into a gray fly.

However, the energy beam of the star gun that was shot by Shensuoshu was not exhausted and continued to blast. Under the impact, the landing ship that Bai Shili had just stepped out was also pierced in an instant, making a huge explosion. sound.

In an instant, the fire was shining, and the landing ship turned directly into a huge fireball and fell to the ground.

Only one shot was destroyed, and a landing ship was destroyed. At the same time, there were four strong men including Bai Shili. Among them, there were even two strong stars in the seventh world.

However, under the energy beam of this star gun, it is still turned into fly ash, and there is no one left in the hair.

In the distance, Ye Xuan's heart hanging in the eyes of the blind man finally fell completely.

Now even Bai Shili has been hung up. Those who have seen him really have no more. Even if they return to Tianhe, there is no need to worry about Ye Xuan.

Before Bai Shili, although he left a portrait similar to his original appearance of six or seven points, but the number of federal citizens of Tianhe Star is so much, the appearance looks more similar, and Ye Xuan can be foolproof with a little joke. .

However, although the worries of the worries have been resolved, the immediate troubles are clearly not over.

Almost at the same moment that the sacred energy beam of the Shensuo was blasted, the other nine landing ships around him had already blasted a small energy beam, swept over Ye Xuan, intertwined in the air, the network of bright beams of light is formed, but it is beautiful.

However, Ye Xuan first urged the gods to change the orientation. At this moment, it is no longer in the area of the interweaving energy beam.

It was only at this moment that he realized the high-level existence of the hidden squad that had been engraved on the ghetto of Bai Shili, because before the launch of the cannon, Ye Xuan was still worried that the launch of the star gun would not It will affect the hidden array of the gods, and make its hull appear.

But now it seems that this point does not exist at all, only to see the best of this hidden array method.

The remaining nine landing ships were not equipped with star guns. There were only a few small energy light cannons. The energy beam of the star guns was ten meters in diameter, and the diameter of these small energy light cannons was only about half a meter. Not a grade.

Even if you hit the gods, you can't shake your energy shield.

However, the ten star-rated federal warships at high altitude are also equipped with star guns. The energy beam that they shoot is also the diameter of ten meters. Even if the energy shield of the gods can withstand the bombardment of one or two guns, This kind of defense against the spent star nuclear star is obviously also very scary.

Ye Xuan added that there is not a lot of star nuclear power in the hidden energy cabin. He is also not sure enough of his energy shield to support several shots. Therefore, for him, the most important thing at the moment is to escape!

Bai Shili is dead. He has lost his mind and entangled with the nine landing ships. With Ye Xuan's heart, the gods have lost their heads. After a small circle, they quickly rushed to the sky.

The direction that is facing is the flagship between the flagship of the ten star-rated federal warships at high altitude and the space between another warship.

The stars below are so huge that even if ten warships can surround it, the gap between every two warships is obviously wide, and it is entirely possible to rush directly out without revealing the traces. .

Just like the fish swimming in the net, as long as this line of defense breaks through, it is the sky!

At the same time, in the central flagship of the ten warships at high altitude, a major officer was roaring palely.

For the scene that happened on the surface of the stars below, everyone in the flagship general control room saw all through the big screen.

The destruction of a landing ship and the death of two federal mid- and low-level officers were enough for them to go back and drink a pot. Now even the white splashes have been smashed into slag. This is a terrible thing.

It is clear that at the same time bear the rhythm of Bai Zhengjun and Tianhexing military commander Zhao Long anger, can you save your life, it is already two things.

At this moment, the crisis of life and death has already caused the left-looking major officer to pick up his entire face, screaming with his feet and giving orders.

"Kill him! Must kill him! Otherwise we must be dead and dead..."

"Damn, the white splashes are hanging, this is over."

"Open the space oscillator, do not hesitate to consume energy, all ten warships are open, forming a space shock network, and forcing the guy's hidden warship!"

"God, what is this guy coming to the end? I didn't expect here, except for the white-skinned goods, there is still a second person to sneak a hidden array on a private small warship. If not, how can we be so careless?"

"It's too extravagant to kill a thousand knives. Isn't it a private small warship? In addition to the engraving of the hidden array, there are still star guns? It's going to be a human life!"

"Hey!"

"Hey..."

As the officer of the major was resounding with desperate intentions and arrogant grievances, the flagship at his feet suddenly shook, and there was a low-pitched voice that was small but very fast.

In fact, the same is true of the nine warships in other directions, which is exactly what the space oscillator is activated to begin to produce.

This kind of device can't be equipped on small and medium-sized warships, because its energy consumption is too large, and because it is a shock effect for space, it also has a certain impact on the ship itself. Only a strong large warship can be prepared!

At this time, ten entry-level large-scale warships did not hesitate to consume energy, and at the same time, the space oscillator was turned on. In an instant, over the huge black star, an invisible big net was constructed. This large net covered the planet. The entire space made it violently shaken.

Although the hull of the sacred shuttle is engraved with the occult method, the special role of this spatial turbulence is also powerless.

In the next moment, just after the speed of the two warships in the central gap area of the hidden gods shuttle, it is no suspense to show the shape of the hull, captured by ten star-rated warships, and immediately locked.

"fire!"

"Ten warships, star guns volley!"

"Give me a fly ash..."

In the midst of the madness of the shackles, the major officers in the flagship master control room stared closely at the hidden gods appearing on the big screen in front of them, and gnashed their teeth to reach the command of the attack.

At this moment, an unprecedented sense of crisis suddenly hit the heart of Ye Xuan, causing him to change his face and suddenly become sharp: "Turn off the energy shield, regardless of defense... Break through at full speed!"
