

Super D. S 2621

Chapter 2621: Genetic culture fluid

The interior of the Tianhe Auction Center is like a huge indoor stadium. The center is an extremely wide auction platform, surrounded by a stepped ring seat.

There are many layers in the seat, the lower half is open, and the top half is the box.

Of course, even the dozens of open-plan seats below are actually very luxurious. Not only do they have comfortable animal skin sofas, but they are also very wide apart. It is a distinguished place to come to this level of auction. The guests, there is no such thing as a crowded sitting scene.

The bidders entering the auction center can choose to sit in the dozens of open seats below, or enter the box above, but the boxes are locked. Before entering, you need to scan the identity, on the other hand, determine the identity of the bidder. In addition, the fee is charged, and no matter how many people enter each box, all million coins!

It was still early, there were two hours from the 8:00 pm at the beginning of the auction, so the auction hall was cold and clear, and almost no figure was visible. Ye Xuan went straight to the upper level and chose a distance from the east gate. Nearly the box, stepping out of the gods brand to pay a huge amount of box money for a million stars, then stepped into.

Behind him, the door of the box was automatically closed, and the prompt words of the local system of the auction center came from the ear, indicating that as long as someone has settled in, then, even if the person in the box handed out the brand to open the door, otherwise it is even stronger. The existence of it can not be forced into the outside, unless its cultivation has reached the level of horror that can ignore the overall defensive array of the auction center.

That basically has to be at least a legendary level that is eligible to break into the federal scorer list!

After listening to the tips, Ye Xuanton felt relieved a lot, looked at the situation inside the box, and then walked to the middle of the wide animal skin sofa and sat down on the knees.

The entire box area is over 100 square meters. Not only does it have a comfortable animal skin sofa, but also has drinks and food, spirits and the like on one side. In front of the sofa is a coffee table with buttons, red and green.

Ye Xuan reached out and pressed, and the green did not respond, but after the red press, a huge five-dimensional virtual screen appeared immediately before the coffee table, which is the scene of the central auction area below.

Familiar with the inside of the box, Ye Xuan once again looked at the progress of the integration of the system, not to be slightly disappointed, the time has passed half an hour, the progress of the third fusion is still one percent, it seems that to complete, it takes at least two days.

Taking advantage of this leisure time, Ye Xuan inquired about the situation of the immortal level of super-brain fragments in the phagocytic system, and the response was once again disappointing.

According to the reply of the phagocytic system, although Ye Xuan obtained only a piece of debris, it is completely possible to activate the star-level independent communication of the system.

But there are two prerequisites!

One is that the fragments must be stripped from the super-brain super-brain, and the second is that the fragments must be active!

The previous one is fine, but behind this, Ye Xuan's hand in this corner is obviously inconsistent with the requirements. Although it is indeed dropped from a dead star that has been shrinking and dead, and according to the identification of the phagocytic system, this Although the super brain fragments are not completely dead, the current state is deep sleep, and the distance is completely dead, just a matter of time.

Of course, if there is no room for salvation, the phagocytic system will not recommend Ye Xuan to exchange. What Ye Xuan needs to do now is to find a nourishing liquid that can make this corner of the super brain fragments come back to life and come to life. Immerse in it for a long time, after the activity is restored, it can be used!

Although the Starry Super Brain can be used as a data processing center of the Starry Sky Network after some processing, and the effect is excellent, it is not only stable, but also hardly damaged, but it is not an artificial object made by the human race in the Starry Age.

It is actually a strange species between the living matter and the non-living matter. It is like the thing of the age of the earth. It is only a few hundred million times higher than the level. It is not a layer of existence.

In the immortal dynasty, the starry sky of any administrative star is super brain, and in the process of use, it is necessary to consume a lot of nutrient solution.

This nutrient solution is the genetic culture fluid used by the tech camp's powerful to enhance their strength, tap and consolidate their potential.

Of course, different levels of starry sky super brains require different gene culture fluids.

So far, the highest level of human race technology camp has been formulated to be nine!

At the sight of Ye Xuan, there are only eight stars in the realm of the star-level powerhouse: star nucleus, meteor, satellite, planet, star, nebula, galaxy, black hole!

The first-level gene culture solution is used in the first boundary star environment.

The secondary gene culture solution must be used after entering the meteor environment, otherwise it will not be able to withstand and there is a danger of explosion!

By analogy, the eighth-order gene culture solution can be used by strong black hole!

How precious is the ninth grade, obvious!

This kind of nine-level strongest culture fluid, even the three empires have no ability to formulate, only the immortal star can do it, but the total amount obtained each year is only a hundred.

About 10 milliliters per tube is the capacity of an oral solution!

Within the vast territory of the immortal dynasty, qualified to use this ninth-grade gene culture solution, less than the hands!

The immortal star in the imperial star is super-perennial soaking, which is second only to the ninth-level gene culture solution. This horrible consumption can only be afforded by the immortal dynasty. The Great Empire is only afraid of being embarrassed.

As for the ordinary starry sky super brain in the administrative star of Tianhe, the gene culture liquid required for daily consumption is five grades!

Taking Ye Xuan's current star nuclear environment as a strength, he can use only the most common first-level gene culture solution!

The angle of the super-brain fragments that he obtained, because the main body is the top-level starry sky super-brain, the general low-grade culture liquid is useless. Therefore, in order to restore its dead wood, it is necessary to provide at least eight culture fluids. OK, and it is a long-term soaking. Once the energy in the culture solution is taken, it will be replaced immediately.

In this case, Ye Xuan also learned about it from the phagocytic system after carefully asking about it at the moment.

I thought that the eighth-grade culture fluid was provided for the use of the black hole to repair the supreme existence, and he must provide this super brain debris in a stable and long-term manner. Ye Xuan suddenly gave birth to a mistake. The feeling of the boat, the scalp is numb.

Being depressed, the box suddenly sounded the sound of the auction center's local area network, which made him feel unconscious that it had already passed two hours. Now it is eight o'clock, the auction will start...

Chapter 2622: What do you want?

Raising the hand and pressing the red button on the front coffee table, the huge five-dimensional virtual screen appeared immediately. Through the screen, Ye Xuan saw that the auction hall below was already crowded.

Around the dozens of steps of the open-plan seats around the auction platform, more than 60% of the seats are sitting at the moment, at least nearly 10,000. The above box is not visible, but the estimated number will not be less.

The official auction of an executive star in the background of the starry sky is really extraordinary.

The time soon arrived at eight o'clock and the auction officially began.

On the empty central auction platform below, a ray of light flashed through, followed by several figures and a large circular table.

Behind the ring table is a huge five-dimensional virtual screen, apparently for the bidders on the dozens of open seats below.

At the same time, the virtual screen in front of Ye Xuan has also changed, split into two, the left side is the image of the auction venue below, the right side has a list, you can flip down, read the vertical bar on the right. The top of the figure shows a number: 16380!

This is obviously the total number of all the auction items that will appear in this auction, more than 10,000 pieces.

This is actually quite normal. More than 10,000 pieces must be photographed. Although it takes at least a few days, but which is not a long life in the background of the stars? A few days, really nothing!

Ye Xuan is even less anxious. If his private warship wants to complete three integrations, it will take at least two days. Even if the hole is already in hand, he can't leave now.

Soon, the auction officially began.

There are five figures on the central auction platform below. On the main position is a gentle old man. His identity should be the auctioneer, and the four behind him are the assistant robots.

"Welcome everyone to the Tianhe Auction Center, I don't delay everyone's time. Now I'm starting the first lot. If you are interested, you can bid. If you are not interested, you can check other items yourself..."

During the talk, the auctioneer reached out and pointed at the huge screen. The long list of the original display disappeared, the first item was enlarged, and there were various attribute data and auction rules on one side.

This is a magic weapon of the bell type. The auction price is 50 million stars, and the price increase cannot be less than one million stars!

Ye Xuan is not interested in this lot, and he also knows that like this kind of auction, the real good things are generally behind.

So I took back my sight and raised my hand to the list of the list of the right side of the big screen in the box. I slowly turned it down...

Ye Xuan came to the Tianhe Auction Center this time. The original goal was only a hole in the virtual, but since it came, if you see useful treasures, you can just take it.

After all, this day, Hexing is not a good place for him. It may not come often in the future!

More than 10,000 items, except for the first item that has entered the official auction, all other items below the list only display information such as their unique, as for the reserve price of the auction or whether there are other special requirements. The class is obviously not displayed now.

You have to wait until the lot is officially started to bid.

Time passed slowly. Anyway, at least a few days, Ye Xuan was not in a hurry. Sometimes he paid attention to a piece of treasure that was being auctioned. At other times, he was looking down at the

right side of the screen. The list of auctions, when you are interested, often point out and carefully check the properties.

After a few hours, the number of items that entered the official bidding stage has reached 367. The previous 36 pieces are all shot. After all, it is impossible to enter this level of auction venue. Ordinary things, people who need them!

Ye Xuan has also checked down more than 2,000 items in the list of lots on the right side of the five-dimensional virtual screen.

Although there are many good things in the more than two thousand pieces, there are even small private battleships with particularly advantageous speed. Their attributes make Ye Xuan feel very excited.

However, because there is already the best level of purple electric shuttle, and they are all in the same, so the same type of warships are no longer suitable for Ye Xuan, not to mention the speed advantage of these warships is not small, but after all, it is still not as good as engraving. The purple electric shuttle of the speed array method is that, until now, Ye Xuan has not seen a treasure that really makes him particularly excited and gives birth to auction interest.

As for the murder of the hole, he also did not see that this level of treasure should still be behind, so Ye Xuan is not in a hurry, slowly reviewing...

At the same time, while looking at it, Ye Xuan's mind also began to ponder the fourth fusion of the battleship.

The phagocytic system was given to his private battleship, the Flying Star Shuttle, after upgrading to the Starry Sky, and is now undergoing a third fusion.

For the first time, the stealth method was obtained from the white-skinned dust ship.

The second time, from the bald head of the vampire Xu, I obtained the energy shield of the defense system and the star gun of the attack system.

For the third time in progress, the speed array of the Purple Shuttle is about to be obtained.

After these three integrations, the original ordinary flying star shuttle has definitely become the best of the best, and it is estimated that few small private battleships can be so perfect.

So, what should be chosen for the next fourth integration?

Ye Xuan thought of the transmission array, of course, this is also because he just saw the auction hall below, the auctioneer and the four beautiful robot assistants came to the scene through the transmission array, only suddenly thought of the idea.

Obviously, in Tianhe, the short-range transmission array inside the administrative star has already been used on a large scale.

For example, in the redemption hall, including the current box, all the redemption or the treasures were delivered through a small directional transmission array.

The reason why Ye Xuan tentatively set the fourth fusion of warships as the ability to choose a transmission array is actually some kind of consideration to prevent some accidents from being prepared for the accident.

Yes, the star-level powerhouse can be teleported, but there are a lot of space cracks in the universe, and teleportation is not a very safe thing.

The inside of the administrative star is suppressed by the power of the star defense defensive array. The space is solid, and the general strong is also unable to carry out teleportation.

Therefore, whether it is inside the administrative star or the Xingxing River outside the stars, the real security is actually a directed or undirected transmission array!

If his private warship can have this kind of transmission function, in case of a special crisis, if he can't escape, he can still leave through the transmission array, and even take the battleship together!

Thinking of this, Ye Xuan suddenly felt heart-warming, but this kind of warship that portrayed the transmission array method is rarer than the engraving and hiding method, I am afraid it is extremely difficult to find!

Just sighing, Ye Xuan's gaze was suddenly absorbed by a piece on the list, and his heart was suddenly shocked. The surprise came so fast, what did you think of...

Chapter 2623: More scorpion is not afraid of itching

Lot 3,467!

Name: Star shift number!

Type: Small private battleship!

Attributes: Advanced private battleship, branding transmission method (Note: Damage)!

Auction reserve price:?

Each increase:?

Additional requirements:?

.....

The above is all the information displayed by this high-class small private warship named Star Shift. The bidding price is the question mark. It has not been publicly shown. It is a property description that attracts Ye Xuan. This is actually a ship. The private battleship that engraved the transmission array method is the best choice for the fourth fusion that Ye Xuan needs.

The only regret is that the transmission array method engraved on this star shift seems to be damaging. If it is damaged, it cannot be used unless it is repaired.

However, Ye Xuan decided to take it down.

The small private warships with the engraving method are rare, and the engraving method is still a transmission array, and even less.

Even if a battle is ruined, if it is encountered, it should be won, at least there is still a chance to repair. Otherwise, the next time I think of the same type, I don't know what year and month.

In this way, he has already intentionally photographed the treasures, there are two in total, one is a broken piece, one is the star shift number.

The value of these two treasures is estimated to be different. Compared with the purple electric shuttle, it will definitely not go down. As a result, Ye Xuan only needs to take the shot, regardless of whether he can finally win it. He has a lot of star nuclear origins. Most of them will be exposed again or twice.

The chances of being targeted are greatly increased, and the sense of crisis is getting stronger and stronger.

But this is the end of the matter, he does not care, and the scorpion is not afraid of biting. Anyway, he has already made a bird, and he has to get a slap in the face, as much as possible to get what he needs, as long as he can escape, in the short term, It is impossible to come to the Tianhe Star again.

With this in mind, Ye Xuan gritted his teeth and wrote down the bidding number of the star, and then began to look down the list of auctions.

After half a day, when the more than 3,000 pieces of the star-shifting number are about to enter the official bidding stage, Ye Xuan has finally finished reading the entire auction list. More than 10,000 pieces are as long as they are slightly interested. He just clicked in and looked at it.

At the moment, to determine the shots of the shot, he has all kept his serial number in mind!

A total of four!

In other words, in addition to the hole and the star movement, he later saw two treasures!

Basically, the more the finished products are, the higher the value will be. The photos that Ye Xuan later saw are all after the serial number of more than 3,400. .

Of course, among all the items he fancy, the last one is actually a piece of emptiness, which is 10,786.

Of course, this is not to say that the lottery after the 10,786th is necessarily more valuable than the murder.

The key is that it is a scum. In addition, the phagocytic system can identify and evaluate it as a star-level treasure, but the experts at the Tianhe Star Auction Center may not have this vision.

In the midst of the sinking, the 3,476th lot was finally entered into the official auction. The sound of the auctioneer was heard by Ye Xuan through the sound transmission system of the box.

"The 3,470th lot is a small private warfare me named after the Stars. Its property is a general high-class private battleship, which is engraved with the transmission array method. However, this transmission method is Damaged, can no longer be used, otherwise, such a warship will not appear in today's auction, and its level will also be included in the best."

"Although it is a bit regrettable, it is not very good as a collection. The auction price is 200 million yuan, and the price increase is not less than 5 million. There are no other additional requirements. Interested friends can start to bid now..."

After the auctioneer's words were finished, the entire conference hall was silent, not only did the sound of the price sound, but even the virtual screen did not have any movements. Right, the existence of the box can be directly passed. The call system uses the voice to call the price, and can also directly pass the brand of the gods, and hit the virtual screen.

There is no response to the virtual now, indicating that the bidders in the box are not interested in it.

This ranking of more than 3,400 lots, there will be a trend that will become the first thing to shoot.

This is actually very normal. Can you come to the existence of such an auction venue, who will not have a private warship that you are satisfied with?

Although this star shift is a ship warfare that has been engraved with the array, the formation has been damaged. What is the use? Spend 200 million stars to buy a warship light collection, unless the brain is sick.

Of course, the damaged array can also be repaired, but those who have this ability are the refiners of the comprehension camp, and they have to be the refiners who are proficient in the formation. If you can please this kind of existence, and repair it. It is better to brand a private battleship for your own battleship...

In a word, it's too tasteless, and the reserve price is high, it can't touch people's hearts.

Two minutes passed, and it was silent. Ye Xuan was still waiting, but I thought that if I really missed it, I would miss it, so I played a brand of gods and the same price of 200 million.

Soon, the huge virtual screen below shows the information of Ye Xuan's price, which makes some people feel surprised. There are dozens of open seats below, and many eyes cast on the box of Ye Xuan. But it is not too much attention. There are indeed a lot of 200 million stars, but it is not too surprising for the strong players who can enter this auction.

The result is no suspense, and it is only Ye Xuan who is the only one. The round of bidding is coming to an end. Ye Xuan's mind has a system sound, which has been deducted 200 million stars, and the box's sound system He also gave a reminder to tell Ye Xuan that the transaction has been successful. If he is willing to accept it now, he can press the green button on the coffee table in front of him. At that time, the battleship will be transferred in a space box.

Sure enough, it is a transmission array method. In this kind of star, there is a suppression of the star defense defensive array, and only the Tianhe Star official has this ability.

Ye Xuan heart sighed, Ye Xuan even when pressed the green button, soon, a space box appeared, Ye Xuan took the hand, the gods swept to confirm that there is indeed a black battleship, this I was relieved, and I didn't get the rewards right away. I received the immortal world in my hands.

Then, Ye Xuan tried to make a sound: "Can you take out the items and entrust your auction house to auction? Of course, I am referring to this auction, adding it in the middle or at the end, not the next one!"

Sure enough, Ye Xuan's words just fell, and the sound system in the box once again sounded the previous beautiful female voice, and it was indeed a reply to Ye Xuan's inquiry...

Chapter 2624: sensation

"Delegating an auction is a normal business, but it is generally not possible to temporarily add a new lot to an auction that has already taken place."

Inside the sound transmission system of the box, the intelligent female voice of the main brain of the auction center sounded and responded to Ye Xuan's inquiry: "However, if it is a rare treasure, temporary insertion is not impossible, but there is a condition that the original commission charged is 10%. Doubled, and regardless of whether the auction was successful, this commission must be paid."

Ye Xuan frowned and asked again: "That is... if I take out the treasure of the auction and estimate it for 100 million, then at the beginning of the commission auction, I have to pay 20 million, and 20 million. Regardless of whether the auction is successful or not, will it not be retired?"

"Yes! But the premise is: the treasures you commissioned are indeed of a rare level. Otherwise, don't say two things, double it, we won't accept it!"

The meaning of the words is no different than saying that the rules can be broken, but if we want to break the rules, we must have enough benefits!

Treasures are worthless, how much can you charge for the 20% commission?

At this point, Ye Xuan knew that the darkness was dark, and then he asked: "The last question, if the value of the treasure cannot be estimated, or is it inconvenient to estimate?"

"This problem does not generally exist, but there have been such cases. In this case, we have set an upper limit. All the treasures that cannot be estimated or inconveniently estimated. If the consignor agrees, it means that you can charge 200 million commission. It!"

200 million stars? Still just mean?

Ye Xuan almost wanted to spray old blood, which is too dark.

Even so, considering that if you can revitalize the fragments of the starry sky super brain, then once the star-level independent communication system attached to the phagocytic system is activated, he will not need to pass the administrative star super brain. In the case of self-access to the upper level, or even a higher level of the star network, the information surface obtained at that time is undoubtedly a geometrical outbreak, and the possibility of finding the source of engulfing is no longer necessary to worry...

Therefore, after Ye Xuan had a few words in the abdomen, he finally took out a nine-level nine-color star nuclear source from the immortal world and put it on the coffee table in front of him.

The star nuclear source, whether it is a comprehension camp or a strong player in the technology camp, can absorb the energy boosting power within it, so it is very popular.

But basically there are only one to seven levels. In fact, even the seven-level purple is rarely seen.

Eight-level black and nine-level nine-colored are legendary, although they have not been seen before, but they are extremely rare.

In addition, the higher the level of cultivation, the more the source level of the star is needed, and the lower the level, the effect is slowly negligible.

For example, Ye Xuan is now the fifth-order of the star nuclear environment. When he absorbs the primary white star nuclear source, the effect is small, but at least there is.

However, after reaching a higher realm, this effect is getting weaker and weaker. If it reaches the eighth realm of the starry sky, it is a black hole, let alone a white level. It is estimated that even the third and fourth grades The origin of the star nuclear is completely waste, and they need at least a star of the five-level red or more.

This is also the reason why Ye Xuan decided to come up with a nine-level nine-color. The fragment of the star-level super-brain in his corner requires at least eight or more genetic culture fluids to regain vitality, and the more The less, because this kind of thing is also a consumable, the ghost knows how long it takes to soak?

In the immortal dynasty, the nine-stage gene culture solution can be formulated in a year or so, all of which are only the size of oral liquid.

There may be many more in the eighth grade, but it is also a rare thing. If you don't come up with the same level of things, it's basically impossible to trade. Even Ye Xuan suspects that in the administrative star of Tianhe, will anyone have it? Eight grades of gene culture fluid.

Of course, other administrative stars may not really exist, but the Tianhe Star is adjacent to the funeral star field. The strong people of the federations all come together to get the origin of the star nuclear. The proportion of foreign strong people here is still very high, so It is still possible to obtain an eight-stage gene culture solution.

In order to activate the star-space independent communication system of the phagocytic system, even if this is a great risk, Ye Xuan will not hesitate!

In the last crazy mining, the eight-level black star nuclear source Ye Xuan extracted a total of two cubes, and the top nine nine-color, are the size of the fist block, a total of one hundred and eight.

He just took out one piece at the moment, and it won't hurt at all!

At this moment, the intelligent female voice of the main brain of the auction center has given an estimate: "The nine-level nine-color star nuclear source? This is indeed a rare thing in the legendary level, and the value is indeed impossible to estimate, please put away the treasure, and say Your transaction request, if you agree, the system will automatically deduct 200 million commission from

your account, and the first time for you to auction information for the cloth! If the auction is successful, please take out the treasure for trading."

"Agree to deduct!"

Ye Xuan nodded, raised his hand and regained the immortal world of the star nuclear source, and then he said: "My nine-color star nuclear source only changes one thing, and the quantity must match its value. If it is small, it must add other treasures. And I have the right to choose, this kind of thing is: the genetic culture solution of the eighth grade or above!"

.....

The central auction platform, the next lot after the moving star has just been shot, the bidder was originally trying to announce the next lot, but the virtual big screen behind him flashed a bit, and a light shot, not into the auctioneer. The forehead was actually changing his look in an instant.

"I have delayed everyone's time, there is a temporary addition of the lot, because the request of the commissioner is special, plus this item is not in the previous list of the lot, so we decided to release the information first, so that interested bidders can There is plenty of time to prepare, and this lot will be auctioned at the end!"

After taking a deep breath, the auctioneer's look quickly returned to normal, but there was always a faint trembling in the tone, which was a great shock: "This lot belongs to the legendary treasure, one The nine-level nine-color star nuclear source of the boxing, the energy is full, is the best..."

Without waiting for him to finish the words, the entire auction venue immediately exploded the pot and was completely sensational.

"What? Nine-level nine-color star nuclear source? Or the best of energy? Tianhe Star can actually reproduce this kind of thing? Did I come to the emperor star?"

"Even if it is an immortal star, this kind of thing is rare or not? I don't know who it is, it is such a big hand..."

"Don't be awkward, and quickly say that the bidding requirements, this star nuclear source, the old man is determined to win, not a black hole friend, don't rob me..."

This old man who claims to be a must-see is indeed a supreme existence of a black hole. The general source of the star nuclear has not been of much use to him. Usually, he basically uses five or more, but at most, it is seven. Level purple, this time I was shocked by the ninth level, let him see the hope of realm breakthrough...

Chapter 2625: Star-level sputum iron essence

The auctioneer is not surprised at the sensation in the auction house. In fact, this level of things appears, and if it is not sensational, then it is strange.

After all the people stopped the words, he coughed and said: "The things required for the Taoist auction are eight grades of genetic culture fluid. Of course, the amount matches the origin of the star. Value, if the amount is not enough, you can add other treasure compensation, the commissioner will choose and decide whether to trade..."

This time, when the auctioneer finished speaking, the auction site did not make another sensation, but it was a tidal sound.

Eight-level genetic nutrient solution?

This kind of thing is possible to the national capital, how can I find the administrative star under the small country like Tianhexing?

The energy consumed by the executive star's starry sky super brain is only a five-level gene culture solution. Although there may be more than five grades, at most, it is seven grades!

Then, the disappointing sighs began to sound in succession, and the old man in the black hole who claimed to be willing to win, after a few silly moments, did not know what to mind, the look on his face was quickly gloomy. In the middle of it, there is a hidden glory, but there is no more words.

The atmosphere in the auction house quickly recovered as usual, and the auctioneer also started the official auction of the next auction. On the surface, it seems that the turmoil brought by this nine-level

nine-color star nuclear source has passed, but in fact everyone's heart There are counts, secrets, and the torrents are already surging.

Even in the open-plan area below, there are quite a few strong people who have opened their own personal communication terminals, either to see if they can get the eighth-grade gene culture solution, or to make other arrangements. The box area, let alone say more.

One of the boxes, it is from the platform of the Tianhexing Federal Exchange Hall, has been eyeing Ye Xuan of Ye Xuan, this person has also opened a personal communication terminal, and once again contacted Zhao Long.

"What's the situation? Is there something unexpected?" The latter's half-length image appeared and immediately frowned unpleasantly.

"Good news for the great generals, the auction will have a legendary lot, the nine-level nine-color star nuclear source of the boxing, and the best of the energy, I suspect that the kid took out the bidding, he I am not in the public area, but I have also checked this client. It is indeed the people in the box area who commissioned the auction..."

"What? Nine grades and nine colors?"

Zhao Long's tone suddenly rushed: "In any case, you must take it. As for the kid's indifferent, he can't escape anyway. Have you fixed it for his arrangement?"

"No problem general, this time, we have arranged the double power of the week outside the Tianhe, as long as he goes out, he can't escape, unless he is hiding in the Tianhe Star forever!"

Nodded, Zou Hong said that the look on his face suddenly stagnate, and some slyly answered: "But the general, this nine-star star nuclear source... we may not be able to shoot, people want eight genes Culture fluid!"

"damn it!"

Zhao Long changed his face and immediately cursed: "I have gotten the eight-level gene culture solution from Tianchenxing, but I have to send it in a short time. I must use the stars of the Tianhe Star to transmit the array. The authority of the super brain, Bai Zhengjun will not agree, but he himself, most of them will use this way to get the eight-level gene culture solution from Tianchenxing, and then exchange for this nine-level nine color, it seems that things are a bit troublesome..."

"what?"

Zou Hong took a sigh of relief: "If you are going to be Bai Zhengjun, I am afraid that he will also send it to the country to do the management. If this is the case, can we not move him this time?"

Speaking of this, Zou Hong's whole heart is cool, and there is a kind of unsuccessful loss of a huge loss of wealth!

"If Bai Zhengjun got the eighth-grade gene culture solution, we wouldn't do anything about it. As a general, there is no way to shoot him in the Tianhe Star."

Zhao Long's tone gradually became sullen: "But it's not completely hopeless. This nine-level nine-color is probably the one you stared at, and you can take out one. There must be more on him. As long as he wins this person, Bai Zhengjun gets a small nine-level nine-color, what is the use?"

"The wise, the general is wise."

Zou Hong saw the hope again, and he did not mind to wait for the auction venue again. When he even said: "There is no later, general, I will go out and arrange it now, as long as the kid leaves Tianhe, this will happen!" "

At the same time, in the luxury bureaucracy of the Tianhe Star Changbai Zhengjun, Bai Zhengjun, who just received the news, suddenly exclaimed: "What? The nine-level nine-color star nuclear source is actually the best of energy?"

"Ha ha ha... really help me!"

"This time the crisis finally no longer has to worry, even if Zhao Long jumps up and down, a nine-level nine color is enough to crush his plot."

"Contact Tian Tianxing immediately, so that I have to get some eight-level gene culture solution anyway, and send it to the first time with the star-level transmission array."

"In addition, apply to the starry sky super brain of Tianhe, and obtain the permission to activate the star-level transmission array. Of course, it is only the transmission of goods, not the living body!"

"It seems that it will cost a batch of five-stage gene culture fluid, but for the source of the nine-level nine-color star nuclear, this energy consumption is still worthwhile..."

.....

Just as the entire Tianhe star was undercurrent, even the two giants, Bai Changjun and Zhaolong, who were in charge of the military and political affairs, were both calculating, and the time passed slowly. I don't know, one day passed. .

During this time, Ye Xuan spent a total of 600 million stars, and finally succeeded in collecting the second treasure he saw.

At this point, the original 1.4 billion star coins, and now only about 400 million more, is simply spending money like water.

This lot is not a treasure, but a material, the essence of the star-level ferroniobium, which is also a rare item, but because it is used to blend into the attack magic weapon or defense armor, enhance it. The grades used, and the ones who can do this are generally the refiners of the comprehension camp, because the essence of this kind of iron is difficult to melt, so that people who are interested in this kind of star-level material on the scientific camp side , really not much.

Even so, it is only the essence of four star-sized stars and stars, and it costs Ye Xuan a full 600 million stars, an average of 150 million yuan per piece. Only then can it be seen that its preciousness.

At this point, Ye Xuan's treasures are only the last two.

One is a hole in the vain, and the other is a defensive treasure. Ye Xuan intends to get it, put it with his streamer star, let the phagocytic system make the first fusion!

Chapter 2626: Trial from the emperor

When Ye Xuan's engulfing system was promoted to the starry sky level, the system was reset, and all his abilities and attributes were cleared. He then presented his star-level treasures, armor and weapons of battleship, attack and defense.

But now, his warships are about to complete the third fusion, and the Star-killing sword has undergone the first fusion. Now it is the comet sword. This time he gets the essence of the star-level iron and iron, and will immediately destroy it. Star Sword carried out the second fusion. After all, it is difficult for others to melt, but he is directly handed over to the fusion system. There is no such problem at all.

As a result, in the three treasures presented by the system, only the armor of the individual defense, that is, the streamer star has not been upgraded.

This time, as long as he puts his defensive treasures in hand, and adds the essence of the starry sky, Ye Xuan's streamer star can be continually merged twice, presumably its attributes will be greatly improved.

After another half day, this defensive treasure, which is the third treasure that Ye Xuan saw, finally officially entered the auction link...

"The ninth six hundred and eighty-fourth item is a defensive treasure, named glazed jade phoenix, and its grade is the best! The auction requirement is to accept only the blue hexagram core of the sixth grade or above. Interested friends can start shouting now..."

After the auctioneer's words were finished, the entire conference hall was silent, there was no sound at the price, and there was no movement on the virtual screen. All the faces were full of weird meaning!

Although the six-level blue star nuclear source is not a legendary item, it is a cultivation resource, and it is not very easy to obtain. This treasure is indeed good. It can be evaluated as the best, but it is a

problem. To use a large number of six-level blue star nuclear source to exchange, the general strong will not do.

If it is less, obviously it will not be changed.

In short, this is a very tangled thing, so the faces of these bidders will be so weird.

At the same time, Ye Xuan's face in the box is already full of weird meaning!

Suddenly he was a bit suspicious that this piece of glazed jade phoenix and the previously obtained purple electric shuttle were the treasures of the same person. Otherwise, why should they be the star of the six-level blue or more?

Of course, the value of the purple electric shuttle is not as good as this glass jade, so he placed it in the exchange hall, while the latter got the Tianhe auction center.

It seems that this person is really in need of a large number of six-level blue or more quality of the star nuclear source, otherwise this treasure of the best, are all practical, and the average person is basically impossible to come up with.

The sound of the bidding soon appeared. After all, people did not say how many six-level blue star nuclear source, in case a small amount of this thing would be a big bargain?

Therefore, the first few price-for-money sounds are actually with temptation!

"One foot square!"

"Two feet!"

"Two feet and one point!"

"I am two feet and five points!"

"Two feet and six points!"

.....

After several trials of the price of the price, the other fare increasers began to add one point and one point, one point, one tenth of a foot cube!

Ye Xuan in the box is all happy, these guys are shameless, and they see that people are in desperate need of six-level blue and above the quality of the star nuclear, so it's so bad that it's not incomprehensible, but Adding one point at a time is a bit too dark!

At the same time, among the other boxes, a female voice with great resentment also sounded at this moment. Of course, the voice was only in the box and was not passed out: "Miss, these guys are shameless, too bully. !"

A total of two figures in the box, standing in the green skirt next to the sofa, it is also beautiful, is a young girl, should be the identity of a female son-in-law, the person who complains at this moment is her.

Sitting in the middle of the sofa is also a young woman, a faint sleek dress, face-to-face and dignified, facing the same thing, but no anger at the face, revealing a kind of insult Extraordinary!

This glass of jade phoenix, which is being auctioned, is exactly hers, including the purple electric shuttle that Ye Xuan got before!

"Green Luo, the auction is originally yours, I want, how do people bid, that is something for people, why bother?"

Turning the first look at the green skirt woman standing by the sofa, the beauty of this pale purple dress smiled lightly: "Not to mention, if they are willing to come up with too few sources of star nuclear, this

lady does not allow approval, cancel the auction is Anyway, the purple electric shuttle had already raised a cubic blue level with me, plus the nine-level nine color, but basically there are not many missing!"

The meaning of the words seems to have been the source of the legendary star nuclear that has long been identified as the color of the nine-level nine colors. It is already destined to be in her bag.

What is even more strange is that for this discourse, the green skirt of the green skirt is not unexpected at all. Instead, it is considered to be so general, the color of resentment on the face has gradually eased: "Yes, true. To say so, Green Luo hopes that these guys have been so shamelessly added, then, in the end, Miss, your glass, jade and phoenix will not have to endure love."

"Although this treasure is only what you used to use, but after all, it is the girl's personal treasure, if it is taken by a wretched stinky man... Miss you, but the glass leader on the list of the leader of the league, Even in the entire Wanluo Federation, it is the glory of the younger generation, can you tolerate the poor and sour monks in the corner of the small Tianhe Star?"

"Green radish, you are getting more and more arrogant now!"

The purple skirt woman frowned and her face was faintly dissatisfied: "Yes, we are indeed from the imperial capital, but the starry sky is big, where there is no real strongman? Your mentality really disappoints me. It seems that this time the family trial, I really should not bring you out..."

"Miss I..."

There was still a little convincing look on the face of the green radish, but the words stopped and did not continue.

"Don't say anything else, just the star of the nine-level nine-color color, even in the emperor's immortal star, is a rare thing in a hundred years, but today in this day, the river appeared, you still What do you mean by saying that people are the corners of the poor and sour?"

While talking, the purple skirt woman suddenly turned to look at the virtual screen in front of her, smirked: "Look, except for the one who took out the nine-level nine-color, is this not another one? Hey,

it's really big. Ah, a cubic seven-level purple? This guy's pride, it is estimated that the people who just bid will be ashamed and self-confident!"

Wen Yan, Green Luo also turned to look at the virtual screen, and then took a sigh of relief, exclaimed: "Really a cubic seven-level purple? God, this is slightly beyond your glass of purple phoenix A, miss, let's trade quickly..."

Chapter 2627: Last lot

A cube of seven-level purple star nuclear source, no matter where it is placed, is absolutely shocking. Although it is not a legendary black and nine colors, it is already the most top-notch of the common star nuclear source. It is not difficult to see a little bit at a time. It is hard to imagine an entire cube.

Even just said that she did not want to trade the glazed jade phoenix, so as not to be defiled by a stinky man, the green radish of her mother's image, so eagerly urged at this moment, thus showing everything!

This cubic meter of the seven-level purple star nuclear source is indeed the price of Ye Xuanbao!

In the last crazy excavation, the seven-level purple star nuclear source, Ye Xuan got a total of more than 20 cubes, so now come up with a cube, he does not feel bad.

Although even he himself feels that the cube of the seven-level star nucleus seems to be a little more faint than the value of this glazed jade phoenix, but because there are not many, and the other party is indeed his noble, he is allowed to obtain purple electricity. Shuttle and this superb treasure, now people have difficulties, even if it is a good relationship, Ye Xuan should be like this.

I believe that the other party will see the quotation of this cubic seven-level purple star nuclear source.

After all, who is willing to squander this precious thing?

At this moment, with a cube of seven-level purple star nuclear source was installed by Ye Xuan with a star nucleus, placed on the front coffee table with a transmission array, a small space box was also passed over.

The power of the gods sweeps inward, and there is a stream of light inside, and you can see the extraordinary treasures at a glance.

However, the smile of Ye Xuan's mouth has just been outlined, but it immediately stagnate!

This treasure is actually a female model, and ... looks like it is not a foreign armor, but a personal thing worn inside!

"boom!"

A burst of sound in his mind, Ye Xuan immediately dumbfounded.

Could it be that the purple power shuttle and the mysterious strongman of this glass jade phoenix are actually a woman?

And look at the style of this close-fitting treasure, this woman's age is not too big!

When I thought that I was actually a woman's personal treasure, Ye Xuan suddenly felt that the whole person was not good, quite depressed!

After a long time, he shook his head and smiled and took the space box into the immortal world. Although it was a female model, and it was still close-fitting, but it was not directly used to equip it, but it was a fusion. If you think about it, it is not unacceptable.

It's just that there are some things that make him feel weird and embarrassed, but no one knows.

Even the original owner of this glazed treasure is not aware that the person who photographed her personal treasure is himself, otherwise, it is really embarrassing!

The appearance of this cubic seven-level purple star nuclear source made the entire auction venue once again awkward, especially those who had previously quoted only the sixth-level blue star nuclear source, but actually got a share. They are even more incomparable.

However, since there has been a nine-level nine-color star nuclear source, the seven-level is amazing, but the bidders who are present today have a psychological comparison. It is not too surprising, this small storm quickly passed.

After half an hour, Ye Xuan's last item, which was the reason why he came to the Tianhe Auction Center, was finally auctioned.

"This lot is a practice of the comprehension camp. It is called Dongxu, but it is a ruin. Therefore, the name is called the murder."

"This practice is a scum, but the seven realms before the black hole are perfect, but the lack of black holes and the cultivation practices after them..."

Just hearing this, Ye Xuan's eyes are bright, and it's really worthwhile to be evaluated by the phagocytic system as a star-level invaluable treasure. Although there are only seven big realms in the front, for Ye Xuan, this is enough. It is.

Although the comprehension camp is on the other side of the third universe, as long as the seven realms in front of the cultivation are completed and the road is far away, Ye Xuan also has the confidence to arrive. At that time, there may not be a chance to find the subsequent damaged parts.

After all, he is only the first big star in the world. This hole is full of pieces, enough for him to use for a long time!

If this is the case, then this thing is a must, and must be photographed anyway!

Also at this time, the following auctioneers also began to introduce the auction requirements for this item: "The bidding requirements for this object are also very simple, do not accept the stars, do not accept the exchange of things, the only need for the owner is the source of the star nuclear, and must be above the quality of the seven-level purple."

"Hey..."

The entire auction venue was picked up again in an instant.

Also want the star nuclear source?

what is it today? How do you do this kind of thing?

It is important to know that the origin of the star nuclear is one of the best cultivation resources. The entire slave group of the Wanluo Federation and even the Tianji nationality are all swarming into the funeral domain, in order to obtain the origin of the star.

In this case, who will easily hand over the star nuclear source?

Like this special bidding requirement, although there will be in the weekdays, basically it is necessary to have some star-level nuclear sources below the five-level red, and there are not many occurrences.

But today, it has appeared several times in succession, and all of them are the core of the five-level red or more.

It's just the last one. This time it's even more outrageous. Actually, it's going to have seven levels of purple and above. That's eight black and nine colors. This piece of murder is precious, but it's ruined. In exchange for a nine-level nine-color star nuclear source, it is simply an idiotic dream.

In other words, the other party is just a hint of concealment. What is required is the black of the eighth grade.

With the quality and rareness of the eight-level black, the core of a big star, you should be able to exchange this hole, but the key is the kind of thing, how can the average person have?

"Miss, the high-quality star nuclear source we need is enough. In fact, just that nine-color nine color is enough, not to mention that several items have been exchanged for a number of seven and six. Otherwise, do we apply to cancel this auction?"

Still in the box, the green radish turned to look at the green skirt woman, some said with a painful saying: "This hole is a piece of the sky to the treasure level of the cultivation of the practice, although you have branded a copy, but this Things can be circulated, naturally it is the best."

"No!"

The green skirt girl shook her head: "Although the genetic culture fluid is nothing for us at all, even if it is eight, there are a lot of hands now, and that nine or nine colors will not be a problem, but Everything must be prepared in case, so this lot can't be canceled, but I don't know if anyone in this auction is able to come up with an eight-level black star source..."

Chapter 2628: Horrible purple shuttle

"Isn't that an eight-level black? There will definitely be, haven't the nine-level nine colors appeared before?"

Green Luo snorted: "Maybe I just took out a cube of seven-level purple, and there will be eight blacks in my hands. After all, there are so many purples in his hands!"

"Do you think they are two people?"

The purple skirt girl's face floated a touch of laughter, the words in her mouth seemed to explain, and it seemed to be self-talking: "I suspect that they are simply a person, including the previous exchange hall in the Tianhexing Federation. The guy who took the purple electric shuttle is also his, really strange..."

"Since the purple electric shuttle branded the speed array method, it is not too precious. Even the purple electric shuttle has not let go, indicating that this person's cultivation is not very strong."

"But in this case, how can he have so many high-quality star nuclear sources? Is it like the young lady of the three great emperors who came out to try out?"

"Even... from the emperor?"

"Oh my God, look, eight blacks really appear!"

It was also at this time that the green radish suddenly exclaimed: "Our imaginary piece was originally taken away. I don't know who the eight-level black star nucleus was, but it was full. The best of energy!"

The green skirt girl smiled a little, and the mouth was quite fascinating, and it became more and more intense!

For the emergence of this eight-level black star nuclear source, all the bidders in the entire auction venue are now completely numb.

This time the auction was really weird. There was a cubic seven-level purple, and then the size of the fist, the energy, and the eight-level black of the highest quality, plus the previous nine-color, Hey, it feels like this top-level star nuclear source is already bad, it's worthless!

This is obviously impossible!

Then the only explanation is simple: whether it is the seven-level purple of that cube, or the eight-level black and nine-color nine of the size of two fists, if there is no accident, it is taken by one person.

This person, either hit the Universiade, dug a star with a large number of high-quality star nuclear sources, or it is extraordinary, strong background, these resources are obtained from the family behind.

This kind of existence may be rarely encountered in other stars, but in the funeral domain, the chances of encounter are obviously greater.

However, judging from the action of the glazed jade phoenix, the person is really noble, but his cultivation is definitely not too high. After all, this glazed jade phoenix is actually purple. The skirt woman used to use it!

Because of this, the current auction has not ended, there are already many people who are secretly concerned about this matter, but these guys know that the guy with a lot of high-quality star nuclear source is in the box area, but specifically Which box is inside, but it has not been checked.

When the people in the box bid for the auction, the serial number of the box will not be displayed on the big screen. Only the people in the auction center can know that the strong people in the venue are all using their own. Relationship, inquire about this intelligence clue.

It is foreseeable that although Ye Xuan has not been exposed yet, it is a matter of time.

The entire Tianhe auction center is so large that the number of staff inside is difficult to count. It is impossible for all people to resist the temptation. His exposure is only a matter of time.

For this, Ye Xuan himself knows well, but he really doesn't care.

Because when he handed over an eight-level black star nuclear source, in exchange for a vain, and looked at the immortal world in his body, his mind finally sounded a long-lost sound of the phagocytic system. .

"Hey, congratulations to the host, the third fusion is completed, and you get the best battleship purple shuttle!"

Ye Xuan sighed with relief, and the heart hanging over the eyes of the blind man fell half way.

With a strong expectation, Ye Xuan looked at the purple squid that completed the three fusions: its shape is different from that of the previous sacred, and it has become a very expensive purple warship.

In terms of attributes, the intensity of energy protection has improved, and the star guns are the same, and the hidden array method still exists, and the various mysterious runes that originally covered the entire surface of the ship have changed, adding the speed array. The rune of the law is more complicated and difficult to understand.

The most obvious improvement is the speed. The previous sacred shuttle has been very fast. Even the large-scale battleships with star ratings can't catch up. Now it has doubled the speed based on the previous speed.

This result made Ye Xuan never think of it, and was surprised.

"It seems that the quality of the purple electric shuttle is still above my original expectations. Otherwise, the purple silk shuttle obtained after three times of integration is almost impossible to reach this level..."

Nodded, and muttered to himself, Ye Xuan's success after the auction ended, and confidence was even better!

But he still can't leave now!

Because of his nine-level nine-color color star nuclear source, it will be officially entered into the auction at the end of the entire auction, and the commission of 200 million stars has already been paid, not to mention the eighth-level gene culture solution for him. Important, Ye Xuan can't give up on this.

Right now, there are thousands of pieces waiting for the official auction, and Ye Xuan counts the time. It is estimated that it will take another day.

If you continue to merge the warship four times, it will be too late in time. He now has two choices, or a second fusion of the comet sword that has completed a fusion, and the addition of the star-red red iron essence.

Either a fusion of his streamer star, of course, there are also two choices, one is to join the first fusion of sputum iron essence. One is to join the glazed jade phoenix for the first fusion.

After some sinking, Ye Xuan made a choice.

Now is the time of crisis, with his cultivation as the realm, the most need to perfect now, obviously still defense, so, Ye Xuan decided to merge the streamer star!

As for the treasure that was added to the first fusion, Ye Xuan chose the scorpion iron essence. Although this star-level refiner is extremely difficult to melt, it does not exist for the fusion system.

And his other main feature is extremely hard. Ye Xuan has just taken four shots. If you add two to the streamer, its solidity will obviously increase.

In the unlikely event of an accident, this is also a layer of defense!

After the decision, he even took the streamer and two star-level scorpions and put them into the small space of the fusion system. So, the system's prompt tone sounded the first time.

"Hey, find a fusion of treasures: streamer star! Starry class iron core essence! Is it fusion?"

Ye Xuan immediately made a positive reply, and at the same time threw a bunch of five-level red star nuclear source into it, as the energy needed for fusion, and then, the fusion began...

Chapter 2629:

Nearly one day later, the first fusion of the streamer star was finally completed, and Ye Xuan's mind sounded a familiar system sound.

"Hey, congratulations to the host! The success of the fusion, get the starlight!"

Ye Xuan took a sigh of relief and looked at a sacred star scorpion that was obtained after the first fusion. It found that its defensive ability has indeed improved a lot, and its shape has also changed. The whole body is dark, the shape is bold, and the body surface is changed. Sometimes there is a little starlight, flickering, and then hidden in the body again.

In short, this is a very practical and protective armor with a windy appearance.

Ye Xuan is very satisfied, and he is directly equipped with the body, but when it is not activated, it is hidden in the body. Only when it is fighting, will it become apparent and become an external armor!

At this point, all the preparations that Ye Xuan quickly fled after the auction ended have been completed. In fact, there is not much preparation. After all, the cultivation of the realm is here, and there is not much that can be done.

It is also a fusion of armor and a small private warship with speed and horror.

Although simple, it should be enough under the circumstance.

At this time, the last lot of the auction was finally completed, and then it was Ye Xuan's star of the nine-color nine-color.

When the auctioneer below announced that the star nuclear source officially entered the auction, all the bidders in the entire venue were suddenly nervous.

In fact, even outside the venue, there are many people watching, including the two giants of this day, Star Changbai Zhengjun, and the federal military commander Zhao Long.

"Next, it is the last lot of our auction, that is, the nine-level nine-color star nuclear source that has already announced the bidding requirements. The commissioner requires that the bidder must have more than eight genes. Liquid, in line with this condition, can now start auctioning..."

As the auctioneer's words are finished, the whole meeting is a voice of discussion, but none of the people who are asking for the price.

In the box where the purple skirt girl is located, the close-fitting maid named Green Luo seems to be in a hurry, urging: "Miss, why don't you ask for the price? The genetic culture fluid is nothing for us at all, the whole One of the three gene families of the empire has our Xuanyuan family. We are also one of the families in the entire empire that have the ability to formulate eight grades of genetic culture fluid. You also have a lot of weight on your body, which will surely satisfy the other party!"

"If that's the case, what are you worried about? Wait a minute, don't worry..."

The purple skirt girl smiled faintly, and there was no more words. The dawn was somewhat restrained and seemed to be thinking about something.

In the other box, two men came in the middle of the auction yesterday. Both of them were white, one Bai Hao and one Bai Hong, all of whom were the confidants of Bai Zhengjun.

This time, the two brought in the two tubes of eight-stage gene culture liquid that Bai Zhengjun temporarily transferred from the national capital Tianchenxing. The purpose was to exchange the star-nuclear source of the nine-level nine-color color.

Both of these eight-stage genomic culture solutions are only twenty milliliters, which is similar to the amount of an oral liquid. In fact, all the broths are in such a tube and tube, and the amount is the same, the only difference. The energy contained in the liquid in the tube is different.

Don't look at the two tubes and eight levels of gene culture fluid is too small, but its value is amazing.

In the dusty country of the dusty country, although the sky dust star can get this kind of thing, in fact, this kind of eight-level gene culture liquid cannot be formulated by the small country. It is only among the emperors of the three emperors under the immortal dynasty. There will be a few families with this ability.

Therefore, the eight-level gene culture solution in the sky dust star is actually distributed by the emperor every year, and the quantity is fixed. For this reason, even if Bai Zhengjun has a good son, he holds a key position in the national capital Tianchenxing, but in such a short period of time, The eight-stage gene culture solution that he can get is only two tubes at most.

Two tube and eight-stage gene culture fluids are not enough to exchange the nine-level nine-color color of the star nuclear source. Therefore, under the authorization of Bai Zhengjun, Bai Hao and Bai Hong have brought other Less treasure, as an affiliated additive, for the owner of the star nuclear source to choose!

"It seems that none of these guys can come up with eight grades of genetic culture fluid..."

After waiting for a minute, I saw that there was no sound of the price of the price. Bai Hong's face suddenly showed a smug color: "Thinking is also true. Within the entire Tianhe Star, there is strength from the national dust. When Star got the eighth-grade gene culture solution, only Star Long and Zhao Long were smashed, but now it is at the auction. Even if Zhao Long has this ability, but the road is far away, he can't get it immediately. It seems that this nine-level nine-color is already destined to be our star..."

"Ha ha ha... If this is the case, then it will be delayed. This time we have made a great contribution. End the matter early, go back and enjoy the reward!"

Aside, Bai Hao looked up and laughed, and then passed the voice out. This guy was in the box, and the original brand could be used to mark the price. Now it is deliberately so, obviously with the meaning of display and display.

In addition, it was deliberately provocative and demonstrating to Zhao Long: "Since there is no friend to pay for the price, then my Bai Hao is not welcome: I have two tubes of eight-stage gene culture!"

"In addition, there are still ten best warships, armor, magic treasures and other treasures to choose from."

"Of course, ten of the best, at most you can only take away five, but in addition, Tianhe Xingbaijia, you can also promise a favor!"

As soon as I heard this, the entire venue suddenly became noisy again.

The two-pipe eight-stage gene culture solution is indeed not as good as the star-level nuclear source of the nine-color nine-color color, but with the five best treasures, although it is still not enough, the difference is actually not much.

If it is finally added to the humanity promised by the Tianhe Star White House, then this amount is obviously a little over.

Tianhe Xingbaijia, this is just a kind of concealed statement. In fact, it is completely a promise of Tianhe Star. Because I dare to call it Baijia here, can there be anything other than the person sent by Xing Changbai Zhengjun? ?

The meaning of the promise of an executive star, at some point, can be reflected in the value of the star nuclear power of the nine-color nine colors.

It seems that Bai Zhengxing is determined to be the source of this star nuclear.

Realizing this, many of the original sorrowful sighs suddenly sighed, even the red-haired old man who had a black hole to repair, who had previously claimed not to rob him under the black hole, at the moment Not frowning, his cultivation is high, but the other is a star of an administrative star. If you really want to grab it, it is quite dangerous.

Chapter 2630: White family is a fart

White home?

Ye Xuan frowned at the first time, but at the same time it was caught in a dilemma!

No one had a voice for a whole minute before. At that time, his whole heart sank to the bottom of the valley, and the two hundred million stars were thrown away in vain. The key is that the required eight-stage gene culture solution was not obtained.

You know, after this time, he didn't plan to return to Tianhe in a short time. In this case, if you want to get the eighth-grade gene culture solution, it will basically be impossible in the near future.

Tianhui's nearest administrative star to Tianhe is in the far-flung Xinghe's void. With the speed of the purple shuttle he just got, he may not be able to arrive for several years.

Therefore, Ye Xuan is quite unwilling.

Later, Bai Hao made a sound response, and Ye Xuan was still very surprised at first. But when he heard that he claimed to be surnamed Bai, Ye Xuan's heart had already had a bad feeling, until he heard the words behind him, the whole heart. It is completely sinking into the bottom again.

Although he needs these two tubes of eight-stage gene culture solution, if the nine-level nine-color is traded like this, the result is no different from the enemy. This kind of thing, no one wants to do it.

Although these two tubes and eight-stage gene culture fluids are missing, they are the hope of reviving the vitality of the immortal level of super-brain fragments in his hand, and it is the hope that Ye Xuan will get more sources of engulfment.

Because of this, he will be so entangled!

In the end, I still can't change it. For a while, Ye Xuan is completely uncertain.

Just when he was hesitant, the second price was like an accident, and it suddenly sounded at this moment, and it was still a woman.

Its sound, with a kind of cold, a light, and more intense pride: "eight-level gene culture fluid, I am out ... six tubes!"

"Hey..."

The entire auction venue was once again stunned, one because of the accident of this kind of peak turn, and the other because of the price of the six pipes reported by the other party.

Even in the national dust sky, a legendary star nuclear source of nine colors and nine colors, the market price is equivalent to the value of the five-tube and eight-level gene culture solution. This woman can hold this kind of thing in her hand. It is impossible to be ignorant of this, but it has only reported one more.

This aspect shows that she is determined to win this nine-level nine-color. On the other hand, it is also a hint to some of the misconducted people in the venue: I am not easy to come, you should not make your own mistakes.

In fact, the effect has indeed come out.

When I heard someone complaining again, the old man who had no black-faced repairs had suddenly become a bright spot, but then he heard that the quotation was actually six tubes, and his brow was the first time. Wrinkled again and fell into thought.

In addition, in fact, Ye Xuan also heard the other party's third meaning from this sentence.

And this third layer of meaning, in fact, is only specifically for Ye Xuan alone!

When I photographed the glazed jade phoenix before, Ye Xuan also paid some seven-level purple star nucleus for the sake of various reasons. Now, he has encountered the same thing.

The other party is also a woman, which is one of the conditions for the identity of the owner of the glass.

Therefore, now Ye Xuan is extremely skeptical that this woman who took six tubes and eight grades of genetic culture fluid, in all likelihood, is the owner of the glass jade and the purple shuttle.

The reason why the other party took out six tubes, in addition to Ye Xuan's previous actions, should be more suggestive of him: I can take out six tubes at the level of eight, then, above level eight, I Why can't you have it?

This is ridiculous. After all, the nine-level genetic culture fluid, the entire immortal dynasty, only the emperor's immortal star can have a family to be able to formulate it. There are more than a dozen tubes in a year, and generally will not flow out of the emperor.

But it may not be completely impossible. For example, Ye Xuan himself, who knows that there are two cubes in his eight-level black, nine colors and nine colors, and there are still a total of one hundred and seven?

With his own personality, Ye Xuan suddenly gave birth to a very strong interest in this woman.

Just as Ye Xuan's heart was sinking, the voice of Bai Hong actually sounded again.

This time, it is obviously impossible for him to continue to pay the price, because in Tianhe, it is impossible for someone to come up with more eight-level gene culture solution than six tubes.

Bai Hong's voice was because he was angry and angry because he believed that the white Zheng Xing he represented was a local snake. He threatened himself in public. Although this did not meet the rules of the Tianhe auction center, his reputation would be damaged, but the auction center was originally It is the official institution, and even if the person in charge is dissatisfied, he will not dare to say anything.

"Shantou, you'd better consider the price, don't look at the four-tube and eight-level gene culture solution, but we also have a commitment to ten treasures and a white house. Especially this promise, the value is hard to estimate. Maybe it's on your six- and eight-stage genetic culture solution!"

"Since the value is not as good as Bai's price, and you are behind Bai's, is this not intentional disorder?"

This is also shameless. The people want to be the eighth-level gene culture solution, naturally choose the six-pipe price applicant, but this Bai Hong is entangled, not on the total value of the article, this is simply the red fruit The strong buy and sell.

In fact, although he said this to the woman who made the follow-up bid, there is no need for a warning to Ye Xuan!

The latter apparently heard it, and the sneer on his face instantly appeared, and he immediately wanted to speak out.

However, without waiting for Ye Xuan's teeth, the woman's voice has already spread again: "The white family's human feelings? Bai Jia is a fart? This lady is from the emperor, this sentence, enough weight?"

Emperor?

A large sound of cool air sounded, this time, even the old man with a black hole and no repair has changed color.

This so-called emperor, naturally refers to the sky, the three empires under the immortal dynasty, one is the celestial empire, its emperor, is the heavenly star.

The Tianchen country is just a small country under the Tianming Empire.

Many of the strong people in the room, even the national dust stars have not been to, this coldly heard the emperor, there is a feeling of being frightened.

That Bai Hong and Bai Hao, even more thoroughly dumb fire, fart did not dare to put it.

The reason why Baijia can be very beautiful in Tianhe, is that because Bai Zhengjun has a good son in the national capital Tianchenxing as a key position, even if he is, he can not afford the giant-level existence from the Imperial Capital.

No one doubts the woman's words, because the eight-level gene culture fluid is not a small country that can be formulated by Tianchenxing. It is from the Imperial Capital, and there are quantitative quotas issued every year.

This woman is six pipes, not the emperor. Is it because of the dusty country? If this is the case, I can hold six tubes of eight-level gene culture solution. At least it must be the Princess County of the Tianchen country.

Until then, the talents in the venue suddenly realized, suddenly realized the meaning of the six-tube gene culture solution, and before that, because they were caught off guard, for a time, they really ignored this point.
