

Super D. S 2631

Chapter 2631: The only hope

The auctioneer has not announced the results, and many people have begun to leave, especially in the box area above.

Because this time, it can be proved that they have nothing to do with the existence of a large number of stars, and if they wait for the transaction to complete before they leave the box, it will certainly attract some suspicion.

That is unnecessary trouble.

Of course, there are still a lot of people still in the box, such as Ye Xuan and the purple skirt girl, obviously must be in the box, because at this moment, the two are in the process of trading.

The other party was also atmospheric, and the six-pipe pale gold october broth was placed in a space box directly, and sent to the box of Ye Xuan through the directional transmission array of the auction center.

After reviewing it, after confirming that it was correct, Ye Xuan turned it into the immortal world of the body, and then took out another space box, which contained a large nine-level nine-color star nuclear source.

Reaching out the space box into the coffee table in front of him, Ye Xuan suddenly pressed the hand before pressing the green button to send it to the other party.

Then he said: "I wonder if I can ask to talk to the other party?"

This small request quickly received a reply from the intelligent female voice of the Tianhe Auction Center. The answer is naturally yes.

Ye Xuan sighed and pressed the green button. Soon, the space box disappeared and the next moment should be in the hands of the other party.

This thought just started, the voice system of the box suddenly sounded the voice of the woman before: "In fact, Zi Yan also wants to talk with the Taoist friends, mainly to express gratitude, not only the cube of the previous seven The purple color also includes the cubic six-level blue of the purple electric shuttle. These high-grade star nuclear sources are indeed what I urgently need, and originally, it is difficult to obtain in a short time."

The other party's words are tempted, on the other hand, it is undoubtedly another meaning. It is undoubtedly saying that if it is not here, these things, she wants to obtain, is not difficult.

This is a kind of gesture, obviously seeing that Ye Xuan is asking for her.

For the savvy of this woman, Ye Xuan also sighs, since the other party is a straightforward person, he does not need to cover it too much. After a faint smile, he replied: "Sure enough, as I guessed, Zixiao Daoyou It's refreshing, in the next Ye Xuan, I also want to thank Dao's six-tube and eight-level gene culture solution, which is also what I need urgently!"

"Do you ask me to speak, just to express gratitude? First of all, I declare that the high-quality star nuclear source in my hand is enough. In fact, the nine-level nine-color is still not used at all. I intend to use To collect, after all, this kind of thing can be seen even in the Imperial Capital!"

In the sound system, Zi Yan's words came again: "Considering that this time you really meet, it will help me a lot. If there are other needs, Miss Ben can help you once. This is the river star... In fact, it is not very peaceful!"

This is already a very obvious suggestion. It is clearly telling Ye Xuan that if she is not sure of her escape, she can help her. After all, as far as her identity comes, Tian Hexing has no one to dare to easily start with her.

Of course, this woman's own cultivation must be extraordinary, otherwise how dare to come from the emperor to such a remote funeral star field alone?

The other side of this meaning, Ye Xuan naturally heard it. But he did not intend to accept it.

On the one hand, Ye Xuan did not have the habit of being favored by others. On the other hand, he himself also had the confidence to leave safely.

Of course, what's more important is that he doesn't want to waste this opportunity. He wants to use it more needed. Don't look at people's attitude now, but it is obviously a high-profile attitude. If Ye Xuan accepts his shelter, then Then, after asking about the ninth-order gene culture solution, it is really no face, no self-knowledge.

With this in mind, Ye Xuan immediately thanked him, and then he turned his head: "Zi Yudao friends, Yemou does have something to ask, if the Taoist knows, but also hope to solve, I am grateful."

"Hey, according to Ye, there is a ninth-order gene culture solution under the eight-level gene culture solution, I don't know..."

"Okay, you don't have to ask again!"

Without waiting for Ye Xuan to finish the conversation, Zi Yan has interrupted with a decisive sound: "I think you are a little crazy about dreams. The nine-level genetic culture fluid is indeed there, but only the immortal imperial emperor is immortal. The existence of a bit can be formulated, only a dozen tubes a year, most of which are consumed in the immortal star. Every year, the three emperors can only be assigned one tube. Do you think I can have this kind of thing?"

When talking about this discourse, the tone of Zi Yan is obviously different from before, and there is a shameful color in the faint, which makes Ye Xuan very puzzled.

But if he is allowed to know the Emperor of Heaven in the Heavenly Kingdom, the three big families that can formulate the eight-level gene culture solution, one of them, the Xuanyuan family, is the clan of this purple cic, he should be able to realize .

This gimmick is clearly unwilling to be able to formulate the nine-level genetic culture solution on the immortal star, but it is helpless. If you don't accept it, you will be ashamed if you mention the nine-level thing.

"Well, the dialogue is over. The nine-level genetic culture solution is not something you can hope for, so I advise you to die this heart, not to mention that this object rarely flows out of the immortal star, even if it is placed You can't exchange in front of you, at least ten or more nine-color nine colors, can you take it out?"

Just as Ye Xuan was squeezing why the other party was suddenly unhappy, the voice of the mysterious woman named Ziyang was passed again. This time, it was slightly relieved. Obviously, I also knew that it was a bit of anger before Ye Xuan. : "Of course, there is no way at all..."

"The three emperors don't think about the three tubes every year, but among the other eleven tubes that the immortal star intercepts, they take out a tube every year and hand it over to the Federation of Venero for a large number of federal contributions. The strong exchange, this is the only way to get."

"But for you, it is also out of reach, because to get a nine-level gene culture solution, the required federal contribution point is 10 million points. You can go to the world of people to check the list. How terrible is this tens of millions of points..."

Speaking of this, the other party suddenly sighed and then said: "But I advise you to think about the current crisis. To be honest, Miss is quite kind to you, but I have my principle, just give I have passed your chance, but you have already refused, so this time, I can only wish you a safe journey. I hope that in the future, you and I will have a meeting! Take care..."

After the last sentence, the other party did not wait for Ye Xuan to respond, and ended the call directly. Although it was a bit embarrassing, but Ye Xuan did not have a trace of discomfort. This woman is open-minded and very principled. He also has a good feeling. , faintly cherished!

Chapter 2632: Ways to get contribution points

For the federal contribution point, Ye Xuan naturally knows that in the Federal Republic of Venezuela, when it comes to the federal contribution point, the first thing that people think of is basically the federal standings.

The so-called points are actually the federal contribution points.

There are three in the federal standings: the list of the day, the list of the land and the list of people!

Tianbang, the first to the hundredth with the highest contribution points!

The list of places, take the hundred and tenth to the thousandth!

The list of people, take the first thousand and one, to the 10,000th!

These tens of thousands of places have basically not fluctuated any more in the past hundreds of years. The most outstanding members of the Federation are the ones who can rush to the list. The last few people in the list, their contribution points are all ten. More than 10,000 points, and repaired to strength, are all above the existence of black holes.

As for the 900 people in the list, the repairs behind the names are all question marks.

When Ye Xuan first came to Tianhe Star, he checked the list of the Federation of Heaven and Earth, and he was deeply impressed and regarded as the target.

Unexpectedly, the nine-level genetic culture fluid that he needs most now is related to the three-day list.

The last few people in the list of people have earned more than 100,000 points, and in the first half of the list, almost all of them have more than 10 million contributions.

In the points redemption section of the Federal Exchange Hall, the exchange of a 9-level gene culture solution requires a federal contribution of 10 million.

In other words, if Ye Xuan wants to use the federal contribution point to redeem a 9-level genetic culture solution from the administrative exchange hall of the executive star, he must rush to the first half of the list.

The list of people is from the first thousand to the 10,000, with the first half of the 10 million contribution points, which means 5,000.

The entire Wanluo Federation is so big that it is difficult to imagine the difficulty of rushing to the top 5,000.

As for the way to obtain the federal contribution points, there are two ways: one is to kill the enemy of the Faroese Federation, or to rely on the strong of some slave groups of the Heavenly Family.

The second is to obtain some special items or resources and hand them over to the Federation of the Vulcan. Of course, these things must have something that has a great effect on the federal opposition to the celestial family and its affiliated slave race.

The Federation of Viro will appraise it, give an estimate and a corresponding federal contribution point!

"It seems that I have to leave the Tianhe Star and enter the depths of the funeral star!"

Ye Xuan shook his head and sighed. He knew that because of its particularity, the funeral star field not only attracted the entire ethnic group of the whole of the Vatican Federation, but even the heavenly family of the first universe and the africa belonging to the heavenly family. The strong among the many slave groups came.

In the depths of the funeral star, there are cosmic wormholes that communicate the three universes.

The strong people from other universes are basically in the depths of the funeral star field. When they get there, they have the opportunity to meet the Tianji people and the strong people of the many slave groups attached to the Tianzu people.

And kill them, you can get the federal contribution point!

Of course, all this is still a little far away from Ye Xuan. What he needs to do now is to safely leave Tianhe.

Considering that the trap has already been laid out outside, I am waiting for myself to jump, and although his private warship has successfully completed the third integration, the speed has been extremely excellent, but in terms of personal strength, it is completely possible to go further. .

The fifth-order of the star nuclear environment is still in the middle of the star's nuclear environment.

Although the sixth-order of the star's nuclear environment is also in the medium term, it is close to the later stage. In terms of manipulating the warship, it must be different from the fifth-order of the star's nuclear environment.

However, if the financial sector continues to break through, there will really be a worry about the instability of the realm. Therefore, Ye Xuan decided to first break the personal strength into the sixth stage of the star nuclear environment and then leave.

Although it is only a small step improvement, the chance of escape can be increased.

Yes, here is a point. Although the auction is over, the strong players who enter the box can stay in the auction before the next auction, which is also because of the auction. Due to special characteristics.

Many strong people, because they take some extremely sensitive treasures, it is dangerous to leave the auction hall out of the box, so it takes a little time to prepare in the box.

From this point of view, the Tianhe auction center is still very human.

At the moment, Ye Xuan has taken up other minds, taking a large number of red five-level star nuclear sources from the immortal world, and ordered the phagocytic system to let the system start to extract its energy.

Time passed slowly, unconsciously, and two days passed. When the system sounds in my mind rang again, Ye Xuan's eyes finally opened.

"Hey, congratulations to the host breakthrough, the current level is the sixth level of the star nuclear!"

Sixth order!

Ye Xuan was uplifted and shook hands and felt the power of the body. His self-confidence was a lot stronger.

Calculating the time, the next auction seems to start tomorrow, that is to say, even if Ye Xuan does not want to leave, there is no way to stop here.

When he got up, he raised his hand and made a brand of gods. The door of the box suddenly opened, and Ye Xuan stepped out...

In the past two days, the surrounding of this huge castle-like building where the Tianhe Auction Center is located, everything is as usual.

But under the normal surface, it is actually an undercurrent.

Under some thoughtful investigations, Ye Xuan's identity has long been exposed, and some people, even his federal identity, are already known.

After learning that the guy with a large number of star nuclear sources is actually a federal citizen of the star nuclear environment called Ye Xuan, after the strength is not strong, many people have started their minds and intend to plunder.

Among them, the old man with a black hole and no cultivation.

He also checked the identity of Xuanyuan Zijing, but he couldn't find anything at all, but he was able to confirm that the other party was indeed the star of heaven.

In this way, the people who dare to move the Xuanyuan purple are gone. The ones who can come here from the emperor are not ordinary. Even if the strength is not strong, there must be a strong background behind them, and they will not be offended.

What's more, the realm of Xuanyuan Zijing itself has reached the second stage of the black hole, and it is also a powerful existence. Those who dare to think about her are even less likely to exist.

In the past two days, the guys who had the heart to start with Ye Xuan were all staying around the Tianhe auction center, paying close attention to his movements.

At the moment, when Ye Xuan's figure emerged from the Tianhe Auction Center and appeared in the eyes of everyone, the guys were all excited.

Some people even have a small piece of stars in their eyes. In their view, Ye Xuan is completely a mobile treasure house with a large number of star nuclear sources!

However, inside the Tianhe Star, they are not daring to do it. The Star Defense ban is forbidden to kill. Once it is shot, it will be very tragic after being touched by the defensive array. Even the strong existence of the black hole can't resist.

Chapter 2633: Black heart two giants

Ye Xuan is not a girl. In fact, from an ordinary person to the present, the life and death he experienced far exceeds the life experience of most of the strong people in the Federation.

As soon as he walked out of the Tianhe auction center, he gave birth to a sense. This is a feeling of ignorance. He knows that he has been stared by many people.

These guys are hiding their breath, and they don't even look at Ye Xuan's side, but Ye Xuan is inductive, but he doesn't care.

The corner of the mouth outlines a fascinating smile, and Ye Xuan Teng rushes to the sky channel that came before.

Not long after he left, the distance around him, the figure was chasing down.

For these existences, Ye Xuan simply did not mind, because he knew that he would not have any intersection with them, and the other party had no chance to shoot him.

Although he did not know the arrangement of Zhao Long, he decided that Bai Zhengxing would not let him go. The star of the nine-level nine-color color is very useful to Bai Zhengjun, but it falls on the girl named Ziwei. In the hands, he has no way at all. In this case, he can only find a breakthrough from Ye Xuan.

Of course, even Bai Zhengjun does not dare to do it in the Tianhe Star. He is only a star long. The Tianhe Stars and Airs are supervised by him, not by him. Some instructions, the starry sky can be rejected. his.

For example, an administrative star's star defense defensive array, this is an independent system, also controlled by the starry sky in the administrative star, but this part, even the star length, can not intervene.

This is also why Zhao Long's way of making money in this area must only be to determine the target of the prey in the Tianhe Star, and then wait until the Tianhe Star to do it again!

It's not just about shunning, it's really impossible to start here!

Of course, this is not to say that Ye Xuan can stay in the Tianhe Star for refuge. If resources are needed, he must go out. What's more, if he stays in the administrative star, Bai Zhengjun, as the star of the star, can finally find it. The opportunity to start with him.

In fact, even Bai Zhengjun did not expect Ye Xuan to leave so soon. When he received Ye Xuan from the Tianhe Auction Center, he rushed to the exit of the sky defense defensive array. It was a great surprise, and the first time it passed a signal to the forces that had been laid out outside the Tianhe.

A long-standing star, actually counts an ordinary federal citizen, has to say that the heart of this white army is really dark.

The same black heart is also a Zhao Long, Ye Xuan is ready to leave the Tianhe Star news, he also received the first time, the original thing he gave to the following Zou Hong to do, but now matters, leaves Xuan's body is likely to have a large number of high-grade star nuclear sources, and Bai Zhengjun may also shoot him. Zhao Long is only able to take his own shots.

He is a strong black hole, but only a first order.

In this respect, even Bai Zhengjun is not as good as him. Tianhe Star's black hole is only one person, Zhao Long.

Even the old man who appeared in the center of Tianhe was a strong foreigner!

After leaving the access channel of the Tianhe Star Sky Defense Defence, Ye Xuan did not sacrifice the Zisuo Shuttle for the first time, and then immediately fled, because he knew that there must be an arrangement outside, but what is it, in which direction, he It is not clear at all, it is not wise to leave at this time.

At least wait until all the other parties' arrangements have appeared, and then make targeted choices, so that the chances of successfully losing the birth day will be even greater.

Therefore, after Ye Xuan came out of the Tianhe Star, he simply crossed the empty body of the Galaxy by the flesh and gradually swept away in the distance.

In this case, with the strength of the sixth-order repair of his star's nuclear environment, the speed must not be fast. After two hours, Ye Xuan has not left the Tianhe Star, as long as he looks back, the huge Tianhe Star, Judah Still in the field of vision.

In this case, I have already let the nearly one hundred strong people behind him secretly swear by her mother!

The stinky boy is simply ignorant of life and death, and it is clearly a girl.

This has been stared at by hundreds of people, and it is still not too slow to cross the body in the void.

But then again, even if he sacrificed a private battleship, it is obviously impossible to escape, but it is really irritating to catch the road without delay.

Behind the group of guys, Ye Xuan did not pay attention to it, and passed an hour. When Ye Xuan felt a little intolerant, four warships finally appeared in the starry sky ahead.

These four warships are all star-rated, but they are not the standard warships of the federal military. Moreover, these four warships are also clearly engraved with the hidden array, because no one has found their existence until Ye Xuan. After they got close, they suddenly appeared.

Perhaps, they have been waiting outside the channel of the Tianhe Star Sky Defense from the very beginning, but they have remained in a state of concealment, and it is not known to follow Ye Xuan quietly.

Until now, when people feel that they are far enough away from the Tianhe Star, this shows the figure, this is the rhythm of ready to start!

With the appearance of these four star-rated hidden warships, not only did Ye Xuan's eyelids jump straight, but even behind him, the nearly 100 strong men who had lost their body shape also collectively took a sigh of relief.

The vast majority of people did not hesitate, turned around and left, and gave up.

Only the old man with the second-order cultivation of the black hole, after a short hesitation, finally stayed, obviously not willing to let go.

These four warships are all private battleships of Bai Zhengjun. There has been a rumor in the Tianhexing area. It is said that there are four such hidden warships in the surrounding area, and they are robbed and rumored that they are related to Xing Changbai Zhengjun. Therefore, now these four As soon as the battleship appeared, those who followed Ye Xuan understood that since it was Bai Zhengjun's shot, basically they didn't have anything to do with it. Instead of staying behind, it's better to turn around and go back to wash and sleep.

It is also a star rating, but the value of these four warships is clearly far beyond the federal military's star-rated warships.

Light is the value of the hidden array, so that they are too much for the military's standard warships.

Don't look at the same concealed method, but it is engraved on a small private battleship, and it is engraved on this kind of star-rated warship. The effect is the same, but the value is obviously different. The four warships are worthy. Absolutely spent a lot of financial resources to be equipped.

But in the same way, with such four hidden warships, they are far away from the Tianhe Star on weekdays. They obviously have a lot of wealth to help Bai Zhengjun.

From this point of view, Tianhe Star's star length and the military commander, there is no good thing, all doing this dark work.

At this moment, when the four warships appeared, they had already opened up the formation, and all of Ye Xuan's way was blocked. In the back, the figure of the old man who had been repaired by the black hole has also appeared.

There are wolves in front, and there are tigers in the back.

Chapter 2634: Loach in the sky

"Bad boy, I advise you to come to me on the sidelines, at least you can make a small life..."

After the figure appeared, the black hole old man in a black robe even sneered, and said to Ye Xuan: "I must have heard the rumors of the Tianhe Star. The four hidden warships are all stars and whites. You fall. In their hands, they will definitely be ruined, but the old man is different. I am a black loyalty, a mess, a loner, and a reputation. It doesn't matter to me, as long as you get me enough benefits, leave you one. Life is also possible!"

Almost at the same time, there were two figures on the four star-rated warships opposite. It was Bai Hong and Bai Hong, but the face was obviously hidden.

At this moment, even when Bai Hongyu, whose voice has changed, appeared, he laughed up in the first time: "Ye Xuan, you better come to us, know who the old man is behind? The famous star thief Black Luoying..."

"The old goods are notoriously hot, all the strong people who fall in his hands, the final endings are all washed away, and then smashed out, and it is for this reason that although he has been rumored to be a star thief outside, Because he has no live mouth, he can always go unpunished. Even if he comes to Tianhe, the official can't start with him!"

"Although we are also star thieves, at least we have never revealed the truth in front of anyone, so as long as we can get enough benefits from you, how can we put you away?"

"This has no effect on our defensive!"

"So, life here is here, you better not make your own mistakes, but this is a small life..."

Ye Xuan currently has eight known star-level powerhouses: star nucleus, meteor, satellite, planet, star, nebula, galaxy, black hole!

Behind the star thief, Black Luoying is a strong black hole, but Bai Hong and Bai Hao on the battleship are only repaired by the planetary environment. They are different from each other in four realms, but they are not afraid, obviously It is the reason for relying on the power of the four hidden warships.

Ye Xuan's heart broke open early. These guys, there really isn't a good thing. It's sighing that he is now too low to be a realm, and he has fallen to the point where he was threatened by the two guys.

A huge sense of anger transpires in Ye Xuan's chest. After entering the starry sky, this is the first time he is angry at his own cultivation.

It is also at this moment that he has an incomparably clear consciousness. The world in the background of the stars is actually no different from what he has experienced before. Don't look at the seemingly orderly appearance of the Federation of the Vatican. The ethnic groups are closely united and together they fight against the heavenly family.

But in fact, all this is the appearance, the entire starry world, not just the battle between the Vatican Federation and the Tianzu, even in any small camp, it is the same as the weak meat!

At this moment, Ye Xuan felt that his mood had improved, and the infinite anger of the transpiration in his chest seemed to be full of pride.

To talk about the strength of hegemony, he Ye Xuan came all the way, why have you ever feared anyone?

As soon as I read this, Ye Xuan was not angry. After a sudden sigh, he laughed loudly: "Ha ha ha... A bunch of things that fly the shit, rely on you, and also in front of me Ye people?"

After finishing this sentence, Ye Xuan did not hesitate any more, screaming at the back of the black Luoying grotesque and the strongmen on the four hidden warships in front, still screaming at the gods, he directly sacrificed the purple shuttle. The body shape disappeared, and then it turned into a purple streamer to the right side of the void, and the blink of an eye disappeared into the end of the line of sight.

Its speed has surpassed the star-rated federal military warship!

It all happened so fast that all the people could not return to God, and the purple stream of light disappeared.

Star Thief Black Luoying directly opened his mouth: "Rely! What kind of battleship is this kid? It is simply muddy in the sky, the speed is too fast, and the hull is small, this is definitely an escape artifact!"

On the other side, the faces of Bai Hong and Bai Hao were also gloomy to the extreme.

The four hidden warships of Bai Zhengjun are indeed faster than the average star-rated federal military warships, but they are definitely not comparable to the three-kilometer captain's star rating.

Just a small warship that turned into a purple light, its speed exceeds the ordinary star rating, how can this be chased?

"I care about it! I am afraid that I can't make a difference!"

"Hey, this kid is too powerful. Where did you get such a super-private small private battleship?"

With the unwillingness, the four warships under the two men gradually disappeared from their bodies. Obviously they quickly went away. They had never seen the light. In this void, they have already passed away and must be transferred immediately.

The star thief, Black Luoying, was stunned after he was unwilling to stare at Ye Xuanyuan's direction. His body shape was also quickly disappeared and he left.

The void was once again empty, until ten minutes later, in the far corner, only two figures appeared slowly, it was Xuanyuan Ziyang and her close-knit maid.

At this moment, the look of these two women's faces are all eccentric, and their body shape has shook, and they have already chased the past in the direction of Ye Xuan's departure.

"I don't think we all look at it. The kid can actually have such a stunning small private battleship. The speed is faster than the Miss Xuanyuan boat."

"However, how do I always feel that his warship has a familiar feeling? The appearance is so strange, is it just because of its purple hull that it gives me the illusion of seeing the purple electric shuttle? This is not reasonable!"

"Yes, Miss, where are we going now? Wouldn't it be to chase the kid? Now that the star nuclear source is in place, we should..."

"Shut up! Do you think we are here?"

As the last sentence of Xuanyuan Ziyang was lightly heard, the maid of the maid was no longer spoken, and the two figures quickly disappeared and disappeared at the end of the starry sky.

Until this time, Zhao Long's figure appeared from a remote corner of the distance, and the singer flashed with sorrow and gaze, watching the direction of Ye Xuan and Xuanyuan Ziyang's master and servant, and muttered: "Good. The powerful girl, really worthy of being the second-order powerhouse of the black

hole, is indeed the arrogant woman from the Emperor Xuanyuan family. It really is the enchanting existence of the federal contributor on the list of 5,000 years ago..."

"There is still a kid, although the repair is too much, but this heart is really powerful. What is even more rare is its transport. Hey, a small star, can sit on such a massive star. The source, and the super-strong warship!"

"Fortunately, this time the general did not show up, I don't believe that he will not come to Tianhe in the future, then... oh!"

Having said that, Zhao Long's mouth is filled with a sly smile, and his figure is like a phantom, slowly disappearing...

Chapter 2635: That is the purple shuttle

Xuanyuanzhou is actually a small private battleship, but it is quite special.

From the name of its warship, there is Xuanyuan, you can analyze that this warship is a unique warship of the Emperor of Heaven.

The immortal dynasty is the scientific and technological camp of the third cosmic human race. Although there are also comprehension exercises, the general trend is to use the genetic culture fluid to break through the realm.

The gene culture fluid does not need to continuously extract and accumulate like the energy of the star nucleus.

The same level of gene culture fluid, the tech camp's strong players are no longer needed after the breakthrough. Of course, the specific amount of genetic culture fluid required for this breakthrough depends on the individual's talent.

The first-level gene culture solution corresponds to the first state in the eight realms known to Ye Xuan, the star nuclear environment.

Level 2, corresponding to the meteor!

Level 3, corresponding to the satellite!

Four levels, corresponding to the planet!

And so on, eight levels, corresponding to the black hole!

As for the nine levels, the corresponding nature is a stronger state after the black hole!

If a federal citizen of the science and technology camp wants to become a practitioner, he must inject a first-level gene culture solution. Upon success, he will become a first-order star.

Of course, if you want to succeed, some people can break through with one tube, and some people, with ten tubes and one tube of first-level gene culture solution, may not be able to successfully break through and become the first-order powerhouse of the star.

After a successful breakthrough, the first-order gene culture fluid is no longer needed, and the improvement of the realm can be taken in other ways, such as the energy of the source of the star.

It is only necessary to use the secondary gene culture solution again until the ninth order of the star's nuclear environment needs to break through to the next big boundary meteorological environment.

Then, when it comes to the ninth stage of the meteor, it is necessary to use the tertiary gene culture solution again.

That is to say, in the science and technology camp, the genetic culture fluid is used to break through the bottleneck of the big realm, just as the meaning of upgrading the life level is the same.

Small steps in the same big realm do not need to be, even if multiple injections, it will not have any effect.

Because of this, the family of gene culture fluids can be formulated, and in the science and technology camp, they are all true local tyrants.

Ordinary one to three gene culture fluids, some pharmacists can prepare, not precious, to the fourth grade or above, it is not what ordinary people can do.

The eight-level gene culture solution, in the Tianming Empire, can only be formulated by the three major families of Emperor Tianxing.

Xuanyuan home is one of them!

From this, we can see how deep the bottom is. This kind of monster, some refining divisions of the comprehension camp, cooperate with a warship manufacturing base of the science and technology camp to create a unique set for the descendants of the family. Private warships are not difficult.

Xuanyuanzhou represents the Xuanyuan family of the Imperial Capital!

This is also a kind of protection. After all, the bigger the family, the more disciples in the family, the more they are released outside, and the more powerful the Xuanyuan boat is both a life-saving means and a rival. Deterrence and warning!

At this moment, Xuanyuan Zijing and Lulu two women gave up a Xuanyuan boat representing the Emperor Xuanyuan family, and quickly chased away in the direction of Ye Xuan's departure.

However, although the speed of this Xuanyuan boat is also very amazing, it is basically no weaker than the general three-kilometer star-rated large-scale military warship, but it is still a grade lower than Ye Xuan's purple shuttle.

Even the warships owned by Xuanyuan Ziyan, which has a black hole and is from the Imperial Capital, are only comparable to the three-star star-rated large-scale warships in speed.

From this, we can see how rare it is for Ye Xuan's Zisuo Shuttle. Of course, it is even more rare. In fact, it is still a fusion system!

"Miss, we have already gathered the origin of the star nuclear that Master Xu has requested. You are not going to find him to refine the Xuanyuan boat? He is a famous refining master in the comprehension camp. It is rare to meet and promised our request. Now, don't hurry up, if someone goes away..."

Carefully glanced at the Xuanyuan Ziyan next to him, the maid green radish asked inexplicably: "Look at the direction we are going now, this is clearly to chase the Ye Xuan, that kid has a good battleship Even your Xuanyuan boat can't be compared, but... as long as Master Xu will help us refine it once and improve its performance, it will be stronger than his ship."

"This is a safe move. It's better than us to grab it, or find the other side, and ask for a more reliable deal. Don't say we can't catch up. If you catch up, people may not agree to let it go." !and so....."

"You just didn't say his purple warship. Although the appearance is different, but I feel that there is an illusion of seeing the purple electric shuttle?"

After waiting for the green radish to finish the words, Xuanyuan Ziyan interrupted her words. She grew up with the green radish and said that she was a maid. In fact, she was very sister-in-law. Therefore, the temper of this girl is very clear, and some things are not. Let her fully understand that in the days to come, I am afraid that I will continue to linger on it.

Xuanyuan Ziyan is also no way, in order to calm the ears, can only explain the words: "I can tell you very surely, very seriously, that battleship, is purple electric shuttle! Accurately speaking, purple electric shuttle... Just integrated into the battleship!"

"What? Miss, this... how is it possible?"

Green Luo's face was sluggish, and a cold breath was taken, and the little hand was lightly covered on the delicate lips.

"When I left the Imperial Capital, before the owner gave this Xuanyuan boat, how many years did the purple electric shuttle have been used? Until I got the Xuanyuan boat, I erased the brand of the brand that was branded when refining and refining. You said Can I admit my mistake?"

Turning his head and squinting at the green stalk next to him, Xuanyuan Zijing seems to suddenly think of something, suddenly sighed: "This time I really looked away. I did not expect this person to be much more powerful than Master Xu. Master, how long has he got the purple electric shuttle? If I didn't guess wrong, this person should have successfully refining his original warship in the days of the auction, and in this In the process, the purple electric shuttle is integrated!"

"You must know that the purple electric shuttle is the best small private warship that has engraved the speed array method. If it is not, I will not keep it for many years. The same is also the point to explain the battleship he now has. Why is there such a horrible speed?"

"The private warship used by a master of refining equipment would not have been too ordinary, plus the speed array of the purple electric shuttle. This person can auction while in a few days. By the way, the refining of the warships is simply shocking. Even if Master Xu, the refining equipment is to be resected, there can be no external interference!"

"In this case, you said, should we go to Master Xu or find him?"

Speaking of this, Xuanyuan Ziyan has a look at the green radish, the latter, has long been dull!

Chapter 2636: Everything starts from scratch

At this moment, Ye Xuan controlled the purple shuttle to fly all the way, quickly rushed to the depths of the funeral star field, has not stopped.

But his mood is quite bad.

He felt that he was caught in a strange circle!

This time, the purple squirrel that has just completed three fusions seems to be exposed again. The ship's external type is seen by many people, but there is no way. He can't start the sneak peek of the purple scorpion before taking it out. You must enter the battleship before you can do it.

That is to say, if he wants to return to the Tianhe Star, either the purple shuttle will not be taken out, or it will have to go through the fourth fusion.

Of course, with the speed of the purple shuttle, even if it is exposed, it doesn't matter. Under normal circumstances, as long as it is not a trap, it can basically escape.

The problem is that if Ye Xuan hides his appearance and returns to Tianhe, he must have something to go back. Can he just flee?

To put it bluntly, this is forced to merge the warships once and for all to dare to go out to meet people. It is because the strength is too weak. Ye Xuan has decided to change the strength to cross the astral environment and enter the meteor. Never return to the Tianhe Star.

Of course, then again, it is not a bad thing to be forced to merge warships again and again. At least, if there is no such pressure, he now estimates that there is no purple shuttle.

However, the next fourth integration is clearly still problematic.

The warship he chose for the fourth fusion was the moving star from the auction. The warship branded the transmission method, but it was awful.

If the array is not a damaged thing, Ye Xuan now wants to find a place to start merging.

At that time, his private warships will have the hidden array method, the speed array method, and the transmission array method. If you combine two warships that have engraved the defensive and attacking methods, then it will be a The best ship in the best of the pieces, it is estimated that the entire dusty country can not find the second ship!

But now obviously not enough, you have to fix the transfer array method on the moving star before you say it!

Besides, the purple shuttle is still in use, and Ye Xuan is driving it to the depths of the funeral. Therefore, there is no time to go to the fourth fusion of the battleship.

In this case, then integrate other treasures, the way in the sky, was originally boring!

As Ye Xuan put his four star treasures and the precious materials of his last comet sword, the last two star-level scorpion iron scorpions, and the sacred scorpion star glaze and glazed jade phoenix into the system, he immediately came to his mind. The tone of the phagocytic system.

"Hey, I found that I can fuse the treasures of the comet sword, the starry sky, the iron core essence! Whether it is fusion!"

"Hey, I found that I can fuse the treasures, the starlight, the glaze, the phoenix, and the phoenix!"

Ye Xuan did not hesitate, and immediately made a positive reply, while throwing out a large number of star nuclear sources, as the energy of the two simultaneous fusions.

Soon, the fusion begins and the progress is slowly read.

Although these two treasures are only the second fusion, but because of the two separate integrations at the same time, the progress is actually a lot slower than the previous third integration of the battleship alone, it is estimated to be several days. Time will come to an end. Fortunately, Ye Xuan is not in a hurry. He has no other business now, but he is only going to the depths of the funeral star field.

Of course, the funeral star field is vast and innocent. Even with the horror speed of his current purple shuttle, it will take a few years to reach the true end. However, Ye Xuan originally had no destination, just try to be as close as possible. It's fine in the depths, because the closer you are, the greater the chances of encountering the Celestial and the slaves attached to the Celestial family.

This time he came out to earn a joint contribution!

When you mention the contribution point, you have to talk about the fragment of the starry sky and super brain.

This time, Ye Xuan's various treasures from Tianhe Star have not been processed yet, and there are only four pieces: super brain fragments, eight-level gene culture fluid, moving stars, and the last hole!

Others such as the purple electric shuttle, such as sputum iron core, have been consumed.

There is no way to move the asterisk, only to find the opportunity to repair it later, and the hole is ruined, Ye Xuan has not had time to study.

As for the fragment of the immortal starry sky super brain, Ye Xuan has already used the eight-level gene culture solution to soak it up, and it is all used in the six tubes!

This corner of the immortal level of super-brain fragments, only the size of table tennis, thin, looks like a slice of a walnut, and is dry, the material is similar to the plant, if it is thrown into a dish of dried walnuts In the slice, the package can not recognize it!

Now, it is placed in a sealed container by Ye Xuan, and the six tube and eight-stage gene culture solution is more than one hundred liters, pale gold, and the super brain fragments are soaked in it.

But there is no reaction!

Of course, it is definitely absorbing the energy of those eight-stage gene culture fluids, but this process is too slow, and Ye Xuan has a hunch, eight-level, may not be enough.

After all, in the immortal star of the immortal dynasty, the immortal starry sky super brain debris, usually consumes nine grades of genetic culture fluid.

Ye Xuan now uses the eight-level to soak this corner of the film, it is completely human, but he actually made two preparations, that is to earn a large number of federal contributions, after filling 10 million points, and then exchange a tube Nine-grade gene culture solution.

The nine-level one will definitely revitalize this corner piece. Once the star-level independent communication system attached to the phagocytic system is activated, then even if you don't pass the starry sky on the executive star, Ye Xuan can Under the premise of paying a certain price, we will actively access the upper-level national network and even the higher-level Imperial Metropolis network.

As a result, the chances of consuming the source are so numerous that it is soaring!

Now, his federal contribution point, the value is still zero, everything can be said to start from scratch!

With Ye Xuan's current cultivation as the realm, it is basically unnecessary to kill the real Tianji. His goal is to set up the slaves who are attached to the Tianzu nationality. From weak to strong, try to touch these. It was established as an enemy by the Federation of the Bandar, and it grew rapidly.

He believes that as time goes by slowly, as his cultivation continues to improve, one day, he will definitely have the ability to kill the real strong.

With such a beautiful expectation, Ye Xuan took a look at the mood, and between the waves, he took out a lot of star nuclear sources from the immortal world.

Now he is already the sixth stage of the star nuclear environment, but before he escaped from the Tianhe star, Ye Xuan had a feeling of state of mind. He felt that his mood had a small breakthrough at that time, so Now, we can continue to improve our strength. In the short term, we don't have to worry about the instability of the realm!

Taking advantage of the two treasures still in the fusion, holding the purple shuttle is on the road, Ye Xuan closed the eyes, regardless of the consumption, began a crazy practice...

Chapter 2637: Today is not the same

Time passed slowly, and unconsciously, Zisuoshu kept the speed of the starry sky in the depths of the funeral star field. It has been two months!

On this day, Ye Xuan, who has been in the state of cultivation for the most recent period of time, finally opened his eyes.

At the same time, the system sounds in my mind finally sounded for a long time.

"Hey, congratulations to the host! The realm of the realm, the current realm: the seventh level of the star nuclear!"

Hearing this system prompt, Ye Xuan relieved with a sigh of relief, this small step breakthrough, it is not easy!

Every big realm, one to three orders, is the early stage, the fourth to sixth order is the medium term, and the seventh to the ninth order is the later stage.

Before Ye Xuan from the first stage of the star nuclear environment to the sixth stage of the star nuclear environment, the total time spent on cultivation was not two months. This is because the more difficult it is to improve the realm, the more it needs to consume a lot. Star nuclear source energy.

On the other hand, it is because the sixth order of the star nucleus is the mid-term of the star's nuclear environment, and the seventh order is the late stage of the star's nuclear environment. Therefore, from the sixth to the seventh order, it is particularly difficult.

But it is harder, Ye Xuan is still over the end, and it is precisely because of this difficulty, once it is over, his personal strength, compared with before, the change is even greater.

After all, it is the difference between the mid-term and the later period. The so-called late stage is already in this big realm, and it is already full and complete, and will go to the next big realm.

In this case, the powerful aspects of strength can be the same as in the medium term?

In a word, after entering the late stage of the star nuclear environment, the current Ye Xuan, in terms of personal strength, is now the same!

After he entered the background of the stars, his personal strength has always been a short-board. After all, he has just started to start. Instead, he is assisting other than his own strength. However, he is far ahead of the stars and even exceeds the stars. Many other powerful people in the background.

This is also the gift of the phagocytic system.

Of course, this kind of personal cultivation is an auxiliary force outside the realm, but it is also an aspect of personal strength!

If you combine all of this, in fact, Ye Xuan is not too weak now. At least, if the black hole is not prepared, such as laying traps and trapping the array, in general, it is basically Can't live with him.

In the past two months, Ye Xuan has been immersed in cultivation, impacting the bottleneck of the sixth and seventh stages of the astral environment, and simply did not have to look at the situation of the fusion system.

According to time, the second fusion of his defense and attacking treasures should have already been completed.

Now finally succeeded in breaking through the seventh stage of the star nuclear environment, Ye Xuan's entire atmosphere changed greatly, and his mood was completely relaxed. It was the first time to start to see the second fusion of the two treasures of the fusion system.

The thought just touched the body's phagocytic system, and the long-lost tone sounded in his mind.

"Hey, congratulations to the host, the success of the fusion! Get the scorpion sword!"

"Hey, congratulations to the host, the success of the event! Get the glass starlight!"

After the second successful integration, his comet sword became the current scorpion sword, the appearance is dark, but there is no front, giving a simple and heavy feeling, Ye Xuan likes it very much.

As for the original sacred starlight, it has become the current glazed starlight. Before the heroic and mighty shape, it may be because of the glazed jade phoenix, the lines have changed a lot, and there is no such thing. A kind of mighty power, it seems to be a lot lighter, revealing the soft meaning.

Moreover, the glare of the armor that blooms from time to time, and then disappears, has become the color of the beautiful glass.

The cold armor has a glimpse of it. This armor has a little neutral and soft feeling. Before I saw it, I knew that it was a male and used the armor of the strongman.

But now, it seems to be a woman's heroic shackles.

This is really to make Ye Xuan a little bit sorrowful, but think about this kind of defensive guilt is not always revealed on the body, usually hidden in the body, only activated in the battle, blessed to the figure, He only felt a little bit better.

However, although the shape is a bit feminine, its defensive ability has been significantly improved. After all, it has been integrated into a glass of fine jade phoenix, which is the second successful fusion of the system. It's weird.

Not only is this glass starlight, but even Ye Xuan's attacking weapon, which is now the same, is even more powerful.

With these two treasures, one attack and one defense, together with the breakthrough of Ye Xuan's own realm strength, in addition to the third integration has already been completed, it has become the ultra-small small private battleship of the purple shuttle, now Ye Xuan Compared with when I first entered the Tianhe Auction Center, I can only use the word "three-day" to describe it.

After full play, Ye Xuan entered the starry world, a total of less than three months, but its cultivation as a realm, but has entered the seventh seventh stage in the first big realm, this speed in the entire third universe The human race is absolutely shocking.

However, now, suddenly entered the late stage of the star nuclear environment, Ye Xuan discovered that he has no way to continue to break through. Recently, the income of the sentimental sentiment has been filled by the strength of this time. Eighty-eight, if it continues to break through, he will face the embarrassing problem of instability.

Realizing this, Ye Xuan suddenly smiled, is this related to his practice of cultivation?

In the mind and heart, Ye Xuan took out a space box from the immortal world, and the one contained in it was the one that was evaluated as a star-level to treasure after being identified by the phagocytic system.

This martial art comes from the comprehension camp of the third universe human race. It is a mastery of the stars to the treasure level. Unfortunately, it is only a ruin. Only the cultivation methods of the first eight realms have reached the black hole, and then, There is no more.

But for Ye Xuan, this is completely enough. Eight big realms can support him for a long time.

Before, Ye Xuan's practice was a nine-day star, or the name of the law was really atmospheric, but in fact, this practice is only the most common, most common, and universal in the third universe. The most basic kind of basic exercise.

It can be said that there is nothing to be done.

Don't look at Ye Xuan's current cultivation speed is quite fast, it can even be said to be amazing, but it is entirely because he does not lack the star nucleus source, but also has a phagocytic system and starry sky to devour the blood of the beast, and the speed of the source energy of the star is super Fast reason.

And this nine-day star, there is no relationship between the half-money.

In view of this, after Ye Xuan indulged in a bit, after all, he decided to make a decision, to change a practice, to abandon the nine-day star, to renovate the hole, and everything, starting from the first stage of the star, and coming back...

Chapter 2638: East window incident

If the cultivation of one's own realm is already high, and suddenly it is necessary to change a martial art and rebuild it, Ye Xuan may be extremely hesitant. After all, repairing is the foundation, and rebuilding is done. Many times it means to set himself up. In a dangerous place.

But now the environment is safe, and the repair is not high, so Ye Xuan did not hesitate too much, and made the final decision.

The hole is not a book, nor a sheepskin scroll, but a broken tortoiseshell. It looks very simple and has a lot of scratches on it. It doesn't look like a practice. Inherited heritage.

However, after Ye Xuan invaded the gods, he immediately received the inheritance information of the practice called Dongxu.

The first is a picture, a quaint giant tortoise bigger than the stars, so as to swim in the Milky Way in the flesh, and screaming, a black energy rushes out from the wide mouth under the turtle's head, like the same A small meteor rushes to the endless horizon.

It was first a small star nucleus, and then it grew into a meteor, slowly growing up, turning into a satellite, a planet, and then a star. In the end, it grew into a nebula, a vast galaxy, and then suddenly fried. Open, the ultimate condensation, turned into a black hole in the comet, swallowing everything...

This whole process is the first eight realms of the background practice of the starry sky, and then there will be no more, because the tortoise shell is only damaged, broken the inheritance!

When Ye Xuan took back his knowledge, he had already had eight sacred meditations in his mind. The first major boundary of the nucleus of the nucleus was especially clear, and he had a deep understanding of it.

What makes him amazed is that this whole set of practice methods of sham practice is only a big starry sky turtle screaming and giving birth, then, the horrible starry giant turtle, it should be What a powerful presence?

Is this hole empty, is it created and passed down?

If this is the case, where is the giant tortoise, now?

In these divergent thinkings, Ye Xuan has been indulging for a while. After a long time, he realized that he seems to think a little too much. No matter what the origin of the giant tortoise is, where he is, it seems that he does not have any Relationship.

In the bitter smile, Ye Xuan consolidates his mentality, and his consciousness sinks into the star-shaped core of the hole, converging his mind, and starting cultivation from the first layer of the star nuclear...

At the same time, in the Tianhe Star, the luxurious official residence of the star Changbai Zhengjun!

Bai Hong and Bai Hao are accompanying them with care, while Bai Zhengjun, who is a national character face, sits alone on the sofa. The living room is awkward, can be embarrassed, can not be embarrassed, and has all been almost stunned by him.

"Homeowner, I always feel a little familiar with this kid..."

Seeing that Bai Zhengjun's fire seemed to be a little smaller, Bai Hao lost his attention and went forward. "The picture that was sent back before Bai Shao's picture looks like this guy who is called Ye Xuan. It's like me."

"Yes, I feel suspicious about this matter!"

Aside, Bai Hong took over the words: "The guy who killed Bai Shao robbed a starry sky to swallow the beast. It is said that this starry beast is most sensitive to the scent of the star nucleus, without having to dig the stars. Can you smell out the star's nucleus in the star's nucleus that has not been exhausted!"

"This guy is only a star nuclear environment, but has such a large number of star nuclear sources, this thing is not scientific!"

"So, we have every reason to believe that this Ye Xuan is mostly the murderer who has ruined the whites. The source of the star nucleus in his hand is obtained by relying on the starry sky to engulf the beast's blood talent!"

"Xingchang, our wanted order can be modified. There is no targeted information before. Now, you can completely disclose this personal information of Ye Xuan. In this case, the other party can no longer enter any one. The executive star, once he enters other administrative stars, will immediately be killed by the Star Defense!"

"What? Is there such a thing?"

Bai Zhengjun, who had just calmed his anger, suddenly became angry again. Think about it. There are many doubts about this matter. If there is no accident, this Ye Xuan is really the murderer of Bai Shili!

"The **** little beast, my white Zhengjun does not give birth to your living skin, you are a self!"

Growing his teeth and snarling, Bai Zhengjun calmed down and re-sit back to the sofa and fell into sinking.

After a short period of time, he re-voiced: "Two things, first, in the name of the official name of the Tianhe Star, issued a wanted order, announced Ye Xuan's personal information, and fully seized. Second, the experts from the country to deal with the black hole incident Should it be coming soon? You are going outside to wait, as soon as the person arrives, immediately invite me in my name, and say that there is a major report. Oh, this time, the Zhao family will not let go of the opportunity, want to take me. The white family was defeated, but the sudden appearance of the surname Ye gave the star a chance to win the battle and go to work!"

Aside, Bai Hong and Bai Hao looked at each other, and they all felt a sense of fog. They quickly retired and did not dare to continue to say more.

Two days later, a huge fleet came to the Tianhe Star.

This fleet was arrived from the dusty country of the dusty country. The reason why it arrived in two months was because of several wormhole jumps along the way.

In the immortal dynasty, in the star field of each small country, some jumping wormholes were built on the basis of individual stars, but these jumping wormholes would not normally open, only the official in some urgent special circumstances, The countries of a small country will only have the authority to let the dispatched fleet have the authority to jump the wormhole.

Otherwise, it will take at least a year to reach Tianhe Star from the country of Tianchen.

The entire fleet has a 10,000-meter-diameter star-level space defense, two five-kilometer-diameter nebula-level spaceguards, and a hundred star-rated federal military-style warships as scouts.

This is definitely a powerful fleet. Even in the federal military branch of the Tianhe Star, the power of the commander Zhao Long's hands can't be compared with it. Nothing else, just the space security, Zhao Long In the hands of only a five-kilometer-diameter nebula level, and this time from the dusty country of the dusty country sent to the fleet of the dust, there are two such protections, but also only for the use of guards.

The flagship of the fleet is the Star River-level spaceguard with a diameter of 10,000 meters!

Such a presence, the numerous powers of the Tianhe Star have never been seen before, so that when the entire fleet appeared outside the Tianhe, the entire Tianhe star was sensational, and the star Changbai Zhengjun and the military commander Zhao Longji People, even personally walked out of the Tianhe Star, and came to meet outside the Star Defense Array...

With the opening of the space barrier, a large number of figures walked out of the security barrier. The two leading men, one wearing a federal uniform, was a major general, and the other was a black robe, actually an old man...

Chapter 2639: Master Xu's promise

"Oh, Master Xu, I can't think of you coming..."

Seeing the old man in the black robe, Bai Zhengjun was in the middle of the light, and immediately ran to greet him, his face full of smiles, called enthusiasm.

In fact, the shoulder of Zhao Long standing on his side is also a sway, originally wanted to greet the past, but was dominated by Bai Zhengjun, suddenly his face was unhappy, but it quickly converges, and quietly goes to the other The famous general of the dusty country ushered in the past: "General Li, no one has seen it, don't come innocent!"

After a chill, the guest and the host entered the Tianhe Star, and the huge fleet with a 10,000-meter straight-track space protection stayed outside the Tianhe, attracting a large number of strong people.

This fleet is the monarch of the Tianchen country to solve the problem of the black hole in the funeral star. The general named Li is only the accompanying guard. The real master is the master of the surname Xu.

This person is not the strongest of the immortal dynasty of the science and technology camp, but the ten heavenly palaces from the comprehension camp. It is the top master of the martial arts and refining.

Xu Xuan, previously referred to by Xuanyuan Ziyang, is this person.

At the moment, I am afraid that Xuanyuan Ziyang does not know that this Master Xu has come to Tianchenxing at the request of the Tianchen Guojun. He wants to use this method to suddenly bury this funeral star field. The black hole that appears and is slowly expanding is temporarily banned by the force of the array method, and other good strategies will be resolved in the future.

Of course, to do all this, it is impossible to achieve it by relying solely on personal strength. What's more, although the master Xu said that he is known as a double in the refining and the martial arts, his cultivation is not very good. It is only the stellar environment, which is the fifth realm of the practice world in the background of the stars!

Even so, the master Xu, in the dusty country, even some of the black hole's strong, must be treated with care. In the technology camp, a master of refining and tactics is not good. Look for even the monarch of the dusty country to be polite.

This is not to say how much the comprehension camp is, the science and technology camp is inferior, but because in the science and technology camp, once you can invite such a master, the elements of the comprehension of the realm are integrated into their magic weapon, It is once again refining, and the final result can often break through the limits of today's technology camp.

This point has already become a consensus. Therefore, although Master Xu's ability to cultivate is not strong, his status in Tianchen is still very high due to his special status.

At this moment, the star of the Tianhe Star, Bai Zhengjun, is welcoming the two masters of the Tianhe Star, including Zhao Long, in the official residence of the Star.

Bai Zhengjun took advantage of this opportunity, by saying that the black hole formed the passing of the head, and the fact that Bai Shili was killed and Ye Xuan's things were all poured out.

Zhao Long frowned directly, but there was no way. Although he was a strong black hole, he couldn't really stand in front of Master Xu.

"What? Is there such a murderer? Bai Shizhen followed a starry sky to engulf the beast, and found a large number of stars in the black star, but in the end, this guy named Ye Xuan not only took away all the origins of the star. Designed to capture the starry sky and engulf the beast, but also murdered Bai Shizhen, bombarded the shock space with a star gun, which caused the appearance of the void black hole?"

After listening to Bai Zhengjun's remarks and arbitrarily adapted rhetoric, Master Xu was furious at the scene: "So a murderer, can you let him go unpunished?"

"Oh, no way, the kid has a super-strong warship. This time, it is a disguise to enter the Tianhe Star. With a large number of seven, eight or even nine-level star nuclear sources, I changed from the auction of my Tianhe Star. A lot of resources, when I was shocked to chase, this son has already escaped to the stars of the Tianhe..."

Bai Zhengjun sighed and sighed, and then he said: "Master Xu, although this child is innocent, but after all, because of him, now, I have issued a wanted order, I believe that I will be able to take this person in the near future, now only Master Xu can preside over justice. After returning, I will say a few words in front of the monarch for me. I don't want the monarch to listen to other rumors. I am grateful..."

"Of course, this time in order to deal with this void black hole, it also caused the country to lose a lot of financial resources. In any case, my white family is responsible for some of the responsibility!"

"So, after catching the guy named Ye Xuan, all the income, including a large number of eight-level and nine-level star nuclear source, then Bai will be handed over to Master Xu, brought back to the capital by Master Xu, also considered my white home. For the dog's mistakes, I will be downset!"

"Ha ha ha... White Star is reassuring, this thing is wrapped in Xu, in front of the monarch, I can still say a few words!"

Master Xu heard the words Yue Yue, although Bai Zhengjun said that although concealed, but his heart is clear, by then, these eight-level nine-level star nuclear source, after handing it to him, at least can be deducted by half.

At the thought of this, even if he couldn't help himself, even the eight-level and nine-level things, even he had never had it.

I thought about it. After Master Xu sneaked a few words, he borrowed a loophole. Even if he said: "The white star is long, and it is not too late to take the matter of the Ye Xuan murderer, in order to make the strong people of the Tianhexing area With some motivation, Xu will be in a state today!"

Bai Xing long back can spread the news out. Anyone who can catch the Ye Xuan live, I Xu promised to refine it twice, including the transmission array method, which can be branded. Xu is the best I have. It was originally space. The line of the department, otherwise it will not be the Tianchen Guojun, please handle this void black hole incident..."

.....

With the arrival of Master Xu, Bai Zhengjun succeeded in resolving his own crisis by offering flowers to the Buddha. All this made Zhao Long depressed, but there was no way. He could only secretly sigh Jiang or the old spicy. He never thought of it anyway. This can be seized by Bai Zhengjun.

With the promise of Master Xu's two refinements, the news was advertised by Bai Zhengjun, and the entire Tianhe Star and its surrounding stars suddenly boiled.

Before, whether it was Baijia private, or Bai Zhengjun's wanted order issued by the official Tianhe Star, the reward was only the star currency, and it could not make all the strong people feel excited, but this time, a refiner and master With two promises, almost no one can resist the temptation.

I realized that Ye Xuan is also a master of refining, even before the master of this master, even Xuanyuan Ziyao from Tiandi Emperor, when staying in this star field, when you have what you need, you have to Master Xu's request, thus showing its prestige and prestige.

In an instant, a large number of strong people poured into the depths of the funeral star, turned into a large net, and shrouded toward Ye Xuan.

At this time, Ye Xuan, however, also encountered new opportunities in the depths of the funeral star field, an opportunity that allowed him to obtain a large number of federal contributions...

Chapter 2640: Scout of the celestial family

There are currently three cosmic planes found, the first universe, the second universe, and the third universe!

The third universe, occupied by the human race, has a variety of starry races in the second universe, and they are basically members of the Federation of the Faro.

Only the first universe is occupied by the heavenly family.

The celestial family is actually a robot. The leader is the emperor, but they claim to be the celestial family.

In addition, in the science and technology camp of the third cosmic human race, there are actually such robots, but they have nothing to do with the Tianji people. They are called the mechanical family, and the leader is the emperor, but the national teacher of the immortal dynasty!

In the depths of the funeral star field, there are two natural cosmic wormholes connecting the first universe and the second universe.

From these two natural wormholes, there are often some extraterrestrial visitors coming across the border, including alliances with the human race to form the universe of the Vatican Federation, including the celestial people from the First Universe, and Other slave races of the Tianzu nationality.

Of course, the people of the Tianzu nationality came to the funeral star field, but some of the slave races attached to the Tianji nationality were not in the minority.

Because even the Tianji family needs the origin of the star nuclear.

Every moment, in the depths of the funeral star field, there are strong men of the Federation of the Vatican, who are strangled with the heavenly races from the first universe, or some slavery races attached to the heavenly race.

Once the other party is annihilated, the federal contribution points can be harvested. If you can collect some special resources from the other party, you can also obtain a number of federal contribution points based on the value.

At the moment, Ye Xuan, who is close to the edge of the core area of the funeral star, has encountered such an opportunity!

"Hey, find the Devils, are you hunting?"

Just as Ye Xuan just finished practicing, gave up the nine-day star 诀, re-cultivated to the seventh level of the star nuclear environment, and then opened his eyes, his mind, the abruptly loud reminder of the phagocytic system.

On this road, the sound of the phagocytic system has been constantly ringing, and basically it is some tips for discovering the origin of the star nucleus. However, due to the general grade, there are not many reserves, so Ye Xuan simply stopped the interest in mining. nothing.

For the first time, it is the case that he is prompted to discover the prey and ask whether he is hunting.

Therefore, under the curiosity of Ye Xuan, he carefully inquired about it subconsciously. Soon, he obtained all kinds of intelligence information about the devil from the phagocytic system...

Demon people: from the first universe, the vassal slave race of the Philippine public enemies, the sacred slave race of the celestial family, the squad of the celestial beings, the genus of all ethnic groups, the shape is the same as human beings, the only difference is their minds There is a magic core in it.

This magic core is the root of the cultivation of the devil!

All the devils are proficient in illusion and have strong spiritual power. Therefore, even if the general strongs are swept by the power of the gods, they cannot discover their devil's identity. They must scan the soul fluctuations with the star of the administrative star. In order to successfully distinguish.

In the depths of the funeral star field, a large number of democrats are active. They and the Terran of the Third Universe are in no way to distinguish. For this reason, they are often scouted by the Celestials, active in this star field, and spying on the Federation of the Bandar. Intelligence, killing a common demon, will receive a thousand points of federal contribution, a small leader of 10,000, a big leader of 100,000, the devil dominates a million...

Note: The Devils have ten major tribes, each tribe of millions of people, a large commander! Above the top ten commanders are the devils, if you can kill, millions of federal contributions!

Ye Xuan's breathing immediately rushed.

The devil's commander and the devil's emperor, who are worth millions and millions of federal contributors, don't want to. The existence of this level cannot come from the first universe to the funeral star, but only the ordinary devil, 斩 Killing a person can have a thousand federal contributions, but this is what makes him excited.

The federal contribution from the Federal Government of Varo in exchange for a nine-level genetic culture solution is 10 million, which means that he only needs to kill 10,000 ordinary demons.

Now that I have already encountered the first one, is it far from the 10,000th?

This is not that Ye Xuan is overconfident, but because he has realized his strengths!

This advantage is the phagocytic system!

The advantage of Ye Xuan has already appeared when the sound of the phagocytic system sounded just now.

The contribution of the Federation of Varo is not so profitable. It kills other slave races attached to the Celestial family. If they are ordinary people, they usually have a maximum of 100 points, some even have only a few points, or Dozens of points.

The devil, the reason why he killed an ordinary tribe, can have up to a thousand terrorist contributions. The most fundamental reason is that the devil is difficult to discern!

Unless the soul of a superstar is scanned by the starry sky of an administrative star, even if the powerful of the Federation of the Vatican is swept by the gods, there is no way to see any clues.

This is also understandable. There is a magic core in the brain of the devil, and it is generally a strong spiritual existence!

But in the depths of the funeral star field, where do you go to find the starry sky super brain of the administrative star?

This directly leads to the situation in which real humans and demons often appear in teams. You don't even know that the other person is a demon, so you unwittingly leaked a lot of information about the Federation of the Venezue. Aspect intelligence.

In history, major leaks have occurred several times, causing heavy losses to the human race and even the Federation.

However, this problem cannot be solved at all. It is impossible to order the federal strongs to form a team in the depths of the funeral star field, forcing them to single-handedly to prevent the disclosure of information.

If you really want that, it will be too much windy, and then, those starry mercenaries and federal powerhouses will not comply, you have to say two!

For this reason, the federal contribution points that will kill the devil will be so high.

Even so, the number of devils who have been successfully killed every year is still very small, because to determine whether the other is a demon, in the depths of the funeral, the only way is to kill them, dig up the brain and see Whether there is a magic core in it, if any, can get the points of contribution.

Each federal powerhouse or star mercenary and identity-assigned virtual mercenary card has the ability to identify and record changes in contribution points.

For others, killing a demon person is simple, but to determine his identity, there is no way to do it. You can't kill anyone when you can't see it. Would you rather miss it?

If that is the case, the human race will be chaotic.

But Ye Xuan is different. He hasn't seen the demon here yet. The engulfing system has given clear hints. This is simply cheating. It is simply hanging. If this is the case, he will not be allowed to succeed in this film. It is too inferior to accumulate 10 million federal contributions in the depths of the funeral.

With this excitement, Ye Xuan did not hesitate to push the purple shuttle, and immediately approached the past...
