

## Super D. S 2641

### Chapter 2641: Temptation

In front of the galaxy in the void, there was a figure, actually a woman, looking at the appearance and human beings are completely different, and even look sweet, inexplicable gives a sense of intimacy.

Seeing this scene, even if Ye Xuan has got the exact hint of the phagocytic system, at this moment, he is inexplicably shaken, with doubts on his face, and once again verified to the phagocytic system.

The result is still the same, the other party is indeed a demon, but the strength is not very strong, only the fifth level of the star.

However, in the case that it is impossible to determine its identity or the devil, it is only the fifth-order repair of the star nuclear environment. This woman can basically guarantee her safety in the funeral star field. The sweet and intimate people are Appearance is the best protection!

For the first time, Ye Xuan has a clear understanding of the concept of the devil!

At this moment, the devil woman is mining the origin of the star nuclear on a star that is not very large, and the location of the selection is also more secret. If Ye Xuan has a phagocytic system, it can sense indiscriminately within a certain distance, only Just flying over here, I'm afraid I can't find the other person.

Subconsciously, Ye Xuan looked at the star that the other party was mining and found that there was no star nuclear source inside the star nucleus. So, he had come out of the purple scorpion after he had read it, and after the battleship was put away, The degree of cultivation was concealed to the extent that it was only the fifth-order of the star nuclear, and then it fell to the stars below.

Here is a point to explain that the general strong, if the realm is not higher than the other side of the whole realm, basically there is no way to repair the perfect hiding.

This is why Zhao Long saw the cultivation of Xuanyuan Ziyang at a glance, although the latter has been concealed, but because it is in the same big realm, they can see each other at a glance.

But Ye Xuan is different. This difference is what he just discovered not long ago.

Not to mention the same big realm, even if it is stronger than him, there are many strong people in the big realm, there is no way to see what he hides.

Everything is because of the hole!

Even if only the shards of the first eight realms have been identified as the starry sky, the original level can be imagined.

It is precisely because of the revision of the hole, the current Ye Xuan, the actual cultivation as the realm concealed in the fifth stage of the star nuclear environment, even the black hole of the strong, there is absolutely no clue!

Ye Xuan did not find the other party, but also began to mine this star, but the location of the selection is not far, and the movement is quite large, enough to alarm the other party.

The reason why Ye Xuan is also for the sake of stability, want to test the other side, and then shot, otherwise, if the other party is not a demon, such a lovely and kind human beings die in their own hands, how much will Ye Xuan heart There are some sadness, I am afraid that it will have a certain impact on the Tao.

And if the other party still shoots himself after the temptation, then even if she is not a demon, Ye Xuan kills her, there will be no tangles.

It is very important to practice a journey. The kind of interest is only for the benefit. There is no bottom line and obedience in the heart. It may be cultivated as a rapid growth of strength. However, after reaching a certain level, the chance of encountering a demons will also be Great increase, this point, Ye Xuan is experienced, so he always has his own principles.

It's not a sentimentality. It's really a cause and effect in the dark, I have to pay attention!

"This Taoist friend, you seem to cross the border, I have dug for a long time, you suddenly inserted, is it a bit out of order?"

Just as Ye Xuan sacrificed the excavation of the 髓星星星,,,,,,,,,,,,,,  
,,,,,,,,,,,,,, He said: "There was already someone  
excavating this star. I just didn't find it before. I am really embarrassed!"

---

"but...."

As soon as the words turned, Ye Xuan pointed to the deep passage that he had dug: "But I got a best attack magic weapon six months ago. The speed of the excavation is faster than you. Just in case, let us join hands. Here are a lot of star nuclear sources, how do we divide?"

"What do you mean?" The other's brows clearly jumped, but they were forced to calm down. Obviously, the words of a large number of star nuclear sources that Ye Xuan said were shocked.

"Well, then I will just say it. In fact, I have the starry sky to devour the blood of the beast. I had inadvertently hunted a cub, so..."

Speaking of this, Ye Xuan saw the other side of the squatting out of the smuggling, knowing that she already understood, then did not continue to say, the words of the front of the transfer: "This star, there are nearly three cubic seven-level purple, There are three big eight-level blacks, seven of us one-half, eight-level ones, I take two, how? Together, I can get it as soon as possible, I just ignored the movement is also the reason."

"Otherwise, once there are other strong people coming, I am afraid of the fifth-order repair of my star's nuclear environment... In fact, you are also the same, we are all similar, and we are not afraid of whoever is black after the thing is reached, there is that time Leading other people, it's better to take each share, and make a big fortune!"

All this said is in the matter of reason, the devil woman is obviously a heartbeat, and after a little sinking, he nodded and answered.

"Well, my magic weapon is excavating fast. I am excavating in front of you. You are behind, and you can help with the magic weapon. At the same time, you will be alert to the outside situation. Once someone else passes, remember to remind me to temporarily accept it. Hands, the movement is too big to attract people!"

After that, Ye Xuan swallowed his throat and showed a look of impatience. Even if he sacrificed the sword of the scorpion, he began to dig.

The devil woman, also pretending to help the magic weapon outside, but in the midst of it, but from time to time flashed through the fine mans, apparently uncertain.

She did not even think about catching Ye Xuan live, this is a living star nuclear detector. But considering the strength of both sides is similar, the big sword in the other hand is the best, she obviously does not have that ability.

It's too late to go back and call, and the other party must be suspicious.

After thinking about it, she decided to kill the killer after all. No matter what, first get the three-level purple and three eight-level blacks in the next three cubes. With these, going back is also a great achievement. !

One thought of this, the female demon squatted at Ye Xuan, the magic weapon that was originally excavated in the right rear of his figure, suddenly turned in the direction, and straight to the back of Ye Xuan's back.

"Oh, it's really dead!"

Ye Xuan sighed, and the original hidden cultivation was breathtaking. At this moment, the star's nuclear environment was seven steps, and the gap between the two small steps was instantly revealed, and a moment of crushing was shown to the rear. Cover to go...

Chapter 2642: Big \*\*\*\* harvest

"boom....."

"call out!"

With Ye Xuan's previously concealed repairs completely dispersed, a pressure that is absolutely majestic to the devil woman is immediately covered, and she has not yet formed her body shape. The place trembled and the flower was eclipsed.

The blade was cold and chilly, and the devil woman realized the breath of death and screamed in disappointment: "What? The seventh stage of the star's nuclear environment? You are the late strong? This is impossible..."

"You know it is too late..."

Ye Xuan sneered, and when he whispered his hand, the screaming star spirit sword had already fallen.

"puff!"

A slight muffled sound came out, and the devil woman was smashed on the spot, and the head was in the sky. The beautiful eyes with the glory of the sun were still squatting, seemingly all the things happening in front of me, there was endless. Unwilling to be ordinary.

At the same time, from the neck of his headless body, there was also a \*\*\*\* rush, Ye Xuan frowned, wrapped his sleeves around the ground above the stars, and then stepped toward it. The bones of the devils who rolled to the side went to the head.

The demon family and the human appearance are exactly the same. The only difference is that there is a magic core in the head of the former. This magic core is equivalent to the knowledge of the human strong, not only the root of spiritual practice, but also has a certain A kind of amplitude effect on mental power.

The Devil's strongmen are strong in spirit. Even if the human monk sweeps his body with the knowledge of God, he can't find any abnormality. It is precisely because the magical nucleus in his mind has shaken the mental power. The outside world knows the power of exploration and sweeping.

At this moment, Ye Xuan was holding a scorpion sword, so he stood in front of the head of the devil's woman who died, and suddenly he felt a little hesitant and embarrassed.

If there is no rumored magical nucleus in this female skull... This matter is still true.

Shaking his head and smiling, Ye Xuan's right hand waved, and the scorpion sword in the palm of his hand was drawn with a black edge, and the head of the devil woman was cut open.

Of course, considering that there may be a demon's magic core in this skull, Ye Xuan's shot is quite measured, using a cleverness, and it is not a sword to cut the magic core with his head.

"puff!"

A slight muffled sound came, and the head of the devil woman was instantly divided into two halves. In the center of the red and white object, there was a prismatic black object of the size of a peach core that reflected the sight of Ye Xuan.

"Sure enough!"

After a sigh of relief, Ye Xuan waved an invisible gas, and wrapped the black prismatic crystals in the skull. The micro-shocks wiped away the stains and blood, waiting to fall to Ye Xuan. When the palm of my hand, it is already very clean.

Although this material is only the size of a peach kernel, it falls in the palm of the hand but it has a sense of weight. It can be seen that its density is not low. Ye Xuan examined a few eyes. Without seeing any clues, he subconsciously wrapped up with the power of God.

In the next moment, the sound of the phagocytic system sounded in his mind.

"Hey, congratulations to the host, get a thousand points from the Federation of Funds!"

"Hey, congratulations to the host, get the brain of the devil, is it collected?"

Ok?

The two system prompts that suddenly sounded in my mind made Ye Xuan a glimpse. It was not unexpected that the thousand points of the federal contribution points, but the devil's brain core can still be collected?

With doubts, Ye Xuan even took a look at the detailed information about the devil in the information system of the devouring system, and soon realized it!

This demon brain nucleus can indeed be confiscated, but other strong people are obviously powerless, so things are the source of the devil's spiritual power, the devil does not cultivate the gods, the spirit is strong, since the birth of the crystal, There is a small crystal in the brain.

After that, as the devil grows step by step, he cultivates his spiritual power and constantly tempers his magical nucleus. When he reaches adulthood, this magical nucleus is equivalent to their knowledge of the sea, and it contains pure and incomparable Mental strength.

However, because of its high density and compact structure, it has the most complex genetic chain locks, so it cannot be used by others.

Ye Xuan's phagocytic system can easily decompose this material, and then extract the spiritual power contained in the magic core, so that after returning to the source, it is ideal for forging and understanding the sea.

After figuring out these situations, Ye Xuan immediately became overjoyed. The practice of forging and quenching the mind and expanding the knowledge of the sea is extremely rare. Ye Xuan is only heard and never touched. If it can be obtained through the magical core of these devils. A lot of pure spiritual power, to make your own gods more fortified and to understand the sea more broadly, this matter is absolutely tantamount to a good for any monk!

"I don't think that the magic core in this demonic brain has such a wonderful effect. In this way, hunting the devil can not only get a lot of federal contribution points, but also get the magic core, and give it to the phagocytic system to extract the contents. Spiritual strength, it's just a matter of killing it!"

In the muttering, Ye Xuan even issued a command to swallow the phagocytic system. Soon, the magic core of his palm suddenly disappeared and was collected by the phagocytic system.

It is just that the density of this object is too large, and it contains the most complicated genetic chain lock of the demon family. Even if the horror ability of the engulfing system is completely extracted from the spiritual power, it is not completed for a while.

However, Ye Xuan was not in a hurry. At the moment, he squatted out of the hole in the excavation. After he went to the ground, he searched for the woman on the devil. After confirming that there was no other valuable thing, he waved the purple shuttle. As soon as he is in shape, he has stepped into the inner cabin of the battleship.

In the following time, Ye Xuanlian couldn't take care of it, and almost spurred the purple shuttle to wander around the edge of the core of this funeral star, looking for the figure of the devil.

Whenever the sound of the phagocytic system sounds in his mind, Ye Xuan will quickly follow the guidance of the system and wait for the opportunity to hunt!

Unconsciously, the whole three months have passed.

Nearly a hundred stayed up late, Ye Xuan's harvest was gratifying, and the magic man he successfully hunted reached nearly 100 in a short period of time, almost every day.

In addition to the nearly one hundred brains of the devil, Ye Xuan has gained nearly 100,000 federal contribution points. Although the goal of 10 million points is still far away, at least it has taken a solid first step. !

This kind of harvest, even for the powerful black hole monks, is absolutely unimaginable. They simply cannot determine whether the target is a demon, and Ye Xuan, with the help of the phagocytic system, is hunting the devil. In this matter, it is simply unfavorable!

It is a pity that the situation has changed very quickly. The fourth month has just begun. Ye Xuan has discovered that the demon in this star field is even more difficult to meet...

Chapter 2643: Naboshan netting bait

In the past three months, Ye Xuan has encountered a lot of devils. On the surface, it seems completely the same as human beings, and the targets he has chosen are all single-handed.

Sometimes encountering a number of people who are more or less accompanied by a demon, due to careful consideration, Ye Xuan even if the heart is moving again, generally will not easily shot.

Everything is to be stable, and it's king to make a fortune!

It is a pity that after more than three months of hunting, the group of demon people stranded in this star field seems to be vigilant. At the moment, Ye Xuan urges the hidden purple shuttle to wander in the sky for four or five days. However, even a demon who has not placed a single order has not encountered it.

At least three or five in groups, together with each other, in this case, with Ye Xuan's current cultivation as a strength, simply can not be shot, otherwise it will leak the whereabouts!

Obviously, hundreds of ethnic groups have disappeared for no reason. This matter should have caused the attention of a devil leader or leader in this area. Ye Xuan's hunting has also become stagnant!

At the same time, when Ye Xuan was depressed and spurred the purple wandering wandering aimlessly around the periphery of the core area of the funeral star, there was a void in the depths of this star field. The 10,000-meter-diameter space fortress is also quietly sailing in the Star River.

The shape of the space fortress is like a hive. The diameter of 10,000 meters makes it look like a meteor. Although it is dull, it reveals a chilling atmosphere.

Here, it is the base of the Devils in this star field!

Space Fortress, the star-studded killer that represents the highest level of science and technology in humanity today, is not actually a patent for the third cosmic human race.

In the hostile camp of the human race, there is also such a thing.

After all, the entire ethnic group of the Tianji nationality was originally an intelligent robot that gave birth to self-awareness. To some extent, the scientific and technological power they mastered was even more advanced than the scientific camp of the human race.

For this reason, things like the first universe, battleships and space fortresses are also extremely common.

It is obviously normal for the Devils to act as a scout for the confrontation between the Celestial and the Faroese Federation.

After all, they came from the first universe to the funeral star field. In addition to the long and long interstellar travel, they finally had to enter the cosmic wormhole to reach the third universe occupied by the human race from the first universe.

Without a space fortress, you can't make a wormhole jump!

Of course, because this is the third universe occupied by the human race, the space bastions that the celestial family gave to the demon race scouts must be specially considered in the shape, and they are completely common in the human race science and technology camp. Like the ordinary space fortress, it is no different.

In fact, this 10,000-meter-diameter space fortress is not only the base camp of the Devils Scouts in the enemy's back, it is actually a mobile prison!

Inside the Battlestar, there is a million prisoner dedicated to the detainment of the human race, or the other ethnic elites of the Vatican Federation.

Everyone who is stared at these funeral stars in the funeral star field and thinks that there is a certain value of the prey will be captured by them and thrown into the Wanluo prison inside the Battlestar.

The strong people of these human races basically belong to the kind of existence that has special abilities or exclusivity in a certain field.

The significance of the celestial beings to capture these human elites is as the Wanluo Federation calls on all the powerful members of the entire federation to hunt the enemy and acquire the important resources.

The 10,000-meter-long space fortress belongs to the Milky Way level, and there is no one in the Tianhe Star. In this vast and devastating funeral star field, there are a total of ten Devils in the Galaxy-class space fortress like this!

In every Star River-class space bastion, there are 10,000 ordinary magic strongmen. Of course, the strength is strong and weak.

The tens of thousands of ordinary devils who dominate the squad are the heads of a demon group.

Ten star-rated space fortresses, ten small heads, and ten thousand magicians... This is the striker's scout camp in the funeral star field.

Of course, among the demonics, in addition to the small head, there are big bosses, a big boss, who controls the ten little heads and the ten thousand magicians who are under them.

As for the general commander, his majesty has ten big heads, and the devil is a strong one and becomes a tribe.

The top ten tribes and ten great leaders formed the entire demonic group, with a total population of over ten million...

However, among the devils who have been stationed in the funeral star field for many years, the most powerful and noblest, there is only one big boss. The small leaders who control the ten Taixing Fortress are all obeying him. .

This person is the supreme commander of the celestial scout in the third universe. It is called the tyrant, but it is a supreme powerhouse with a black hole.

Among the ten space bastions of the Mozu tribe, the one that was personally seated by Ba Gu was the headquarters of the demon scout, but the flagship-like space bastion has always been hidden in the core of the funeral star. In the deepest part, it will not leave easily.

At the moment, the space fortress, which is slowly coming from the distant sky, is called the Nebo Mountain, and the nearly 100 devils who are hunted by Ye Xuan are all his majesty. .

The entire space fortress has only a thousand demons, and has disappeared in a short period of time. This ratio has never been seen before. If the truth is not ascertained, Neboshan cannot tell the tyrant. Must be punished.

For this reason, he decided to come in person, sit in this star field, and thoroughly investigate the truth!

The entire space fortress is like a peak nest, divided into many layers, the bottom is the Wanluo prison, and the uppermost layer is the private territory of the Nebo Mountain.

At this moment, this area is vast enough to be in the inner tank of the top of the fortress. At the top of the fort, the Nabo Mountain is sitting on a luxurious beastly leather sofa, surrounded by magic guards.

Not far from his side, there are several demon-minded demonic strongmen who are holding hands cautiously. These guys have just reported the general situation of the demon's disappearance, and they are now stunned. With.

"Do you want to pick up the people who have left the order? So, the guy who is hidden in the dark, it should not be too strong for the realm, hey, I have to see, who is it, dare to take my devil A family sees prey..."

In the middle of the flash, a cold and sullen gaze, Nebo Mountain sighed with a long breath, as if to want to vent all the suffocation and annoyance in the chest, and then turned to the first few confidants, Shen Shen Ordered: "Bag bait, all the tribes, who can move, all move, in this star field, the sky and the net, in any case, must be the magic man hunter out, remember, to catch the living... .."

Soon, with the order of Nabo Mountain, the space fortress stopped at the back of a huge star, and then a large number of the devil strong, they rushed out like a locust, sprinkling This star field!

Chapter 2644: Devil's trap

For a whole month, Ye Xuan never encountered a demon who was placed alone.

During this time, the team of the devils he met, even the lowest number, is about three or five people. Although the ordinary devils are generally in the territory of the star, the number is more than one. Ye Xuan still can't easily rush to take the shot when he can't ensure that he will leave the other side.

He has been waiting for the opportunity, the devil is obviously already alert, but as time goes by, their tight spirit will eventually relax, and then, Ye Xuan will take the opportunity to start hunting again. .

Unconsciously, it was three months passed by. For the monks, the time of a few months is really dazzling. In many cases, it is often closed for a period of time, which will take several hours or even longer. Months, really nothing.

But in the past few months, Ye Xuan felt quite tormented. Under the boring, he even urged Zisuo to go to the remoteness of this star field to extract the inner core of a star. The star nuclear source to pass the time.

Until this day, when Ye Xuan basically digs out a small piece of star power that can be mined in the void, the long-lost sound of the Assassin system finally sounded again in his mind.

"Hey, find the individual of the devil, position: left front star!"

Devil individual?

Ye Xuan's eyes suddenly brightened, and the whole person was excited. In the past six months, the assassin system occasionally gave tips such as the discovery of the Devil's Squad, as it is now. In the case, Ye Xuan even felt a little distant and strange, only appeared in the first three months.

For the whole half of the year, I have not hunted even a demon person. Presumably, their vigilance has gradually relaxed. Otherwise, the situation of acting like this demon alone has basically disappeared in the past six months. .

Without any hesitation, Ye Xuan provoked the purple shuttle at the first time, quietly but quickly and quickly chased the direction pointed out by the Assassin system...

In front of the star river, there is a figure of a demon person in the sky, and the figure looks extremely strong. Although there is only one back, it is basically judged that the other party is in the prime of life, and the strength is not bad. The same, it is also the seventh order of the star nuclear!

Although it is the same-order powerhouse, but Ye Xuan did not pay attention to it. In the first three months, among the hundreds of devils who he killed, there are even several eight-order stars. presence.

As for the seventh order of the star nuclear environment, there are more than a dozen.

Since Ye Xuan stepped into the way of practice, all the way to killing and growing, whether it is fighting experience or heart will, is far from being comparable to the general strong, plus the purple sneak stealing all the breath, suddenly shot under the sneak attack, even It is the ninth-order demon of the star nuclear world, and he also has the confidence to fight and kill.

At this moment, the demon person in front of him did not know what kind of state he had encountered. He had been burying his head in the road, and the repair of the late stage of the star's nuclear environment was under full force. His body shape was almost changed to a star-shaped river. The front star field rushed away.

Unfortunately, his speed is fast, and after all, he still can't compare with Zisuo.

Ye Xuan only used the time when he didn't have half a cup of tea, and he was close to the other side. This is because he was cautious, and he followed the observation behind him for a long time. Otherwise, if Ye Xuan fully urged purple Hidden, a few breaths will be able to intercept it.

"call out!"

A sharp sound of breaking the air suddenly sounded abruptly, and after confirming that everything was as usual and there was no difference, Ye Xuan took the initiative and took the shot. The figure was shot from the purple stalk. Turned into a black mass, dysentery like electricity, blink of an eye has turned to the front of the devil's neck!

"Hey..."

It was also at this moment that a whistling sound like a buzzing sound suddenly appeared. The surrounding a large star river was empty, and the steep place trembled fiercely. Under the defense, Ye Xuan felt that the gods were shocked and immediately The meaning of dizziness.

This scene, and when he rushed out of the black star after killing Bai Shili, the latter took off ten star-rated federal military-style warships and simultaneously launched the space oscillator, which made the feeling of disturbing one side empty.

"Booming..."

Not waiting for him to respond in time, the original right in front of the empty star river, there has suddenly been a thunderous sound, a huge as a meteor, a 10,000-meter-diameter honeycomb warships come crashing.

This is clearly a space fortress, and it is still a star-level, more than a five-kilometer diameter nebula.

Ye Xuan's face changed greatly, and the whole heart sank into the bottom of the valley.

In the line of sight, the demon in the front of the sky, who is burying his head in the sky, will look at the front of his head when he sees the sword in the eyes of the star, and his body shape has been turned

into a stream of light, by this sudden appearance of the space fortress. I shot a black beam of light and disappeared instantly.

Bait!

trap!

These thoughts flashed through my mind. Ye Xuan's heart jumped wildly and raised his hand without hesitation. He wanted to sacrifice the purple shuttle, and he took it away for the first time.

"Since it is here, don't go! The human race is really talented. I can't think of anyone who can accurately distinguish the difference between our devil and human being. It's really curious how you did it..."

Suddenly sneer, the shape of the Nebo Mountain appears in the sky in front of the star river in the right front, and the steps seem to be calm, but the blink of an eye has already come to the front, the look is so fierce, even the magic weapon is too lazy to sacrifice, raising the hand The right palm turned into a giant peak of the sky, wrapped in the thunder of the thunder, and directed to Ye Xuan.

"Black hole?"

Ye Xuan whispered, and the light was gloomy to the extreme, but the movements on his hands did not stagnate. He had already sang the purple shuttle, and his body shape shook into it, urging him to flee.

It is a pity that since the space-level bastion in the distant Star River has already opened the space oscillator in advance, the surrounding a large star field has been shrouded, and the occult method on the purple squid body has completely failed, revealing traces and even Even the speed has been greatly affected.

At this moment, in the full force of Mercedes-Benz, if it is a leaf boat in the raging waves, the waves are ups and downs. Before breaking through the turbulent starry sky, it is impossible to enter the normal sailing state.

The same is to start the space oscillator, but the effect of the ten star-rated warships combined with each other is far from being comparable to the Star River-class space fortress, and it does not belong to the same level.

"How about a small star-shaped ant ant, there is a super-small small warship? Faced with the space ban of the Star River-class space bastion, you can't escape today..."

The corner of the mouth floated out of the meaning of the mouth. The Nebo Mountain strode forward, and it was an instant across a thousand miles. The blink of an eye came to the front, raising the hand to transform a mountain-like giant, and slamming into the purple sky.

Chapter 2645: That battleship is well-known

"Miss, the purple warship in front is so familiar, it won't be the guy we are looking for?"

In the Xuanyuan boat, the green lord responsible for manipulating the battleship suddenly sounded, and there was a thick confusion in the tone: "It's strange, what is this guy coming to the end? Some people are eager to use the Star River-class space fortress to kill him. This is just to kill the chicken with a knife, it's..."

Before she finished, the Xuanyuan Ziyan, who was closing her eyes, had already opened her eyes abruptly.

The scene inside the big screen is extremely dangerous. The whole piece of the starry sky in front of the sky reveals a very strange high-frequency oscillation. Even on the starry sky screen of Xuanyuanzhou, it is extremely turbulent and the picture is very unstable.

The other side apparently opened up a large space oscillator, otherwise it would never be able to cover such a vast starry sky.

Willing to spend such a large price, the owner of the Star Fortress is determined to be Ye Xuanxian!

Realizing this, even Xuanyuan Ziyan was speechless, and the first time in my mind flashed the idea of the same meaning as the green radish: This guy, who offended someone?

Space Fortress is no stranger to Xuanyuan Zizhen. As a direct descendant of the Xuanyuan family, one of the three great families of the Emperor of Heaven, the Xuanyuan Ziyan can even enter and exit the family's space fortress.

But because of this, she understands the horror of this Galaxy-class space castle better than the general strong. With her Xuanyuan boat, she can't help but bombard a main gun in front of the space fortress.

The main artillery of the Battlestar is far from the kind of star guns equipped on the star-rated military warships. The ultimate weapon known as the devastating class is shot out, and a small planet will be under its fierce energy beam. , completely turned into nothing!

"Miss, you don't want to save him?"

See Xuanyuan Ziyan's face is cloudy and uncertain. It seems to be thinking and hesitating. The green radish on the side screamed: "That is the Star River-class space fortress. Don't say that we don't have this ability at all, even if there is... now I am afraid. It's too late!"

"boom....."

The turbulent enthusiasm of a tent swelled in the void in front, and suddenly the sound could not be transmitted through the endless distance, but through the monitor screen of Xuanyuan's boat, the turbulent and frantic picture in the line of sight However, it clearly shows the illusion that the ear bangs in the ear.

On the screen, the middle-aged man in the gray robe who had stopped Ye Xuan to go between the swaying body, just a blow, the giant palm of the mountain that was revealed by the magical powers, would have been like a boat in the waves. The purple battleship smashed the void, completely lost control, and turned around and turned to the void of the space fortress farther away...

The supreme power of the black hole can even smash a small meteor that rushes through the stars. At the moment, just flying a small private battleship is naturally more important.

"call out!"

A black light shot from below the Battlestar, completely shrouded the purple warship flying in the face of the whirlwind. Then, with the sudden retreat of this black light column, the purple warship disappeared without a trace, apparently being The black light column was taken into the interior of the space fortress.

Seeing this scene, Xuanyuan Ziyang's heart was once again changing, but unfortunately, without waiting for her to react, the black hole in front of the sky was already in the shape of a body. Stepping into the bastion, he entered the space fortress.

"Hey..."

As the buzzing sound of the buzzing sound suddenly made a big impact, the universe's void around the entire space fortress seemed to be blurred. In just three seconds, a huge spaceguard has disappeared completely.

This kind of space jumping technology can't be done by ordinary warships. Only this kind of honeycomb type space fortress can barely resist the force of space tearing when jumping because of its extremely stable and stable structure.

Once the Space Fortress start space jumps and disappears, and wants to find it again in a short time, this is basically waiting for someone to say a dream!

For this, Xuanyuan Zijiang is naturally clear, so that when she looked at the empty screen of the Xuanyuan boat from the sight, she realized that Ye Xuan had been taken away by the other party, I was afraid that there would be no sense of surviving, a thick sense of loss. Suddenly, I suddenly sighed, and sighed: "It's a pity that Ye Daoyou is not ordinary. It's just that the luck is really bad. It's actually provoked this kind of existence, hehe..."

"Miss, what do we do now? Is it the national dust star that returns to the dusty country? Master Xu can't stay there for too long, depending on me..."

On the side, Green Roy took over the words and uttered a voice: "I see that we are still on the road immediately, first return to the Tianhe Star, and by the small artificial wormhole in the Tianhe Star, it can be rushed back at the fastest speed. If Master Xu leaves, he will lose his hand!"

Hearing the words, Xuanyuan Ziyan, who was obviously in a low mood, did not say much. He nodded and decided to settle the matter. Soon, Xuanyuanzhou was turned under the control of the green radish and turned into a pale gold. Mang, across the void, galloping toward the Tianhe Star outside the edge of the funeral star!

.....

Ye Xuan knows that the black hole is very powerful, but never thought that it could be so powerful. The guy who was suspected of the devil's head, actually slaps his purple shuttle to fly back, uncontrollably slamming into the distant space fortress.

With the loss of control of the purple shuttle, Ye Xuan's figure also stumbled in the inner cabin of the battleship. Then, waiting for him to react, the bottom area of the space fortress in front of it suddenly shot a huge black light column. Cover the purple stalk directly in it.

This black light column does not know what a mystery, but inexplicably came an extremely powerful sucking force, Ye Xuan even gave birth to an illusion, it seems that the purple shuttle is about to be controlled by this force. Passively throw yourself out of the cabin.

In contrast, Ye Xuan took the initiative to take out the purple shuttle, and at the same time he was included in the immortal world of the body. Only this is safe. This battleship is, after all, a treasure that he has undergone three hardships before and after the hard work, and the growth space is huge. Lost!

As the purple snail was taken up, Ye Xuan's figure was directly exposed to the power of this huge black light column. Without resistance, it was like a leaf in the hurricane, which was transmitted from the black light column. The power of terror is directly ingested into the bottom space of the Battlestar. It enters a very strange place with a strange space of Sen Han and despair.

When the black light column disappeared and the consciousness of Ye Xuan's dizziness gradually returned to Qingming, he turned his head and looked around, only to find that his place at the moment was actually a huge cage of more than 100 square meters.

There was only one person in the cage, but looking through the gaps in the cage, Ye Xuan suddenly found that all around, it was all such cages, almost all of them were held in a shadow...

## Chapter 2646: Wan Luo Prison

At this moment, Ye Xuan still does not know, he is now being held in the Wanluo prison at the bottom of the Battlestar.

In order to inquire about the intelligence of the third universe of human races, the Tianji people also obtained the most abundant star nuclear source in the funeral star field, and specially created ten special Star River-class space fortresses for the demon people who were scouted by them as forwards.

The cutting-edge technologies used in these ten space bastions have even surpassed the technological camp of the human race in the third universe.

After all, all the tribes of the entire celestial family were originally evolved after the self-awareness of intelligent robots. In the field of scientific research and innovation, they are robots that have inherent advantages over human beings.

The huge black light column that Ye Xuan ingested in this space fortress was one of the cutting-edge technologies unique to the Tianzu people.

In addition, the geniuses of the Heavenly Engines who are proficient in warship manufacturing techniques have even used space folding technology inside the ten Star River-class space fort.

Don't look at the ten space fortresses, which are just a huge hive with a diameter of only 10,000 meters, but the internal space is far from the diameter of 10,000 meters.

Otherwise, it is impossible to settle tens of thousands of devils scouts.

In fact, among the entire space fortress, the most used space folding technology is the bottom of the Wanluo prison.

Wan Luo Prison, as the name suggests, is meant to imprison the prison of the Wan Luo federal strong. The top of the ten space bastions that the celestial family gave to the devils, each had a 10,000 prison.

All of them were detained by the federal forces of the Faro, who were arrested in the funeral domain.

The entire Wanluo prison has a vast area. At this moment, there are at least tens of thousands of independent cages of 100 square meters that are held by Ye Xuan. If there is no space folding technology, they are just tens of thousands of cages like closed houses. Don't think about stuffing into the space fortress, the space is not enough.

There are tens of thousands of cages, each with an area of about 100 meters square, scattered throughout the Wanluo prison, some are quite close, and some are a little far away, looking at it, densely packed, simply can not see At the end.

Of course, this is also because the light of the bottom of the space fortress where the entire Wanluo prison is located is extremely dark. This kind of darkness seems to be similar to the breath of the black light column that Ye Xuan took to hold here. Weird meaning.

In fact, in the vast space of the vast Wolo Prison area, there are still some faint black mists. It is these fogs that obscure Ye Xuan's line of sight, so that he can't even look too far, even The extension of the gods has become more difficult, as if they have fallen into the mud.

This is obviously caused by the black fog. The purpose should be to prohibit the federal powers who are being held in the prison of Wanluo from communicating with each other.

After cleaning up the thoughts, Ye Xuan even turned around in the cage, and even tried to study the column of the cage, but unfortunately it could not be shaken. It was not only hard and abnormal, but also seemed to be connected with the entire space fortress. One, it is difficult to damage.

After trying nothing, Ye Xuan temporarily threw the matter behind his head. When he came, he was safe. Even if he had the chance to escape, it is not the best time.

After sitting cross-legged, Ye Xuan tried to extend the knowledge of the gods. After discovering that the cage was experiencing the faint black mist floating in the outer space, the gods who had extended the exhibition immediately lost their sense. These strange blacks The fog has the horrible effect of engulfing the monks.

From this point of view, even if it does not have any blocking effect on the power of the monk's knowledge, the general strong basically does not dare to move easily, not worth the candle!

Fortunately, although the gods can not be extended, the line of sight can not see too far, but the situation around this area within a square of Ye Xuan, but he can still be seen by him, although the black fog is strange, but not very Rich, everything within a kilometer, it is still clearly visible!

After a detailed count, Ye Xuan found that there were forty-five cages in the area around the square of this kilometer. Each cage had a figure on the ground and closed its eyes. As for the generalization, the arrival of Ye Xuan is completely unmoved.

These forty-five people have men and women, old and young, basically human beings, but there are also federal strongmen of other races. The atmosphere is all restrained, and they can't see the cultivation. They sit like dead people.

"Little doll, your small warship is not bad. At the same time, it has engraved both the concealment and speed. The refiner who can have this kind of formation superposition is rare in the immortal dynasty. Can talk to the old man, who helped you refine it?"

Just as Ye Xuan fell into indulging, the right side of him was in the last, only a hundred meters away from the cage, a green old man who had closed his eyes on the ground, suddenly opened his eyes and took the initiative. Talk to him.

Obviously, when Ye Xuan was forcibly invaded by the black light column, the whole process was seen by the figure in the cage. The old man might be close to Ye Xuan and did not use God. The reason why you can talk easily is to open your mouth.

Wrinkled, Ye Xuan casually said: "This warship is a gift from a predecessor. It is said that it was the old thing he used in the past. Now it is not used, so it is cheaper. So, this refining I really don't know who the system is."

"lie!"

Ye Xuan's words just fell, and the scorn of the old man's voice has already come, revealing a sense of dissatisfaction: "Is it really impossible for the old man to be blind? Your battleship was clearly refining not long ago. , no more than three or five years of age, can you survive the old man?"

"Oh, don't mention anything else, just the two superimposed hidden and speed array methods, the rune's lines clearly reveal a new brand of breath, the old man's life research method, any small The small rune rune, in my eyes, can reveal a lot of information..."

Speaking of this, the old man who saw the green sorcerer did not continue to defend himself. The tone could not help but sigh, and he sighed. This is how he said: "Oh, in fact, the old man has no other meaning, and the eyes are in the hands of the celestial family. Basically, I have been hopeless, but I suddenly saw your battleship. Only then did I discover that there is still one in the world that is not weaker than the old man."

"The thought of heart and soul is just a matter of asking, and you don't have to be too nervous. In this million prisons, no one will marry any of your treasures, because it makes no sense..."

Ye Xuan understands the meaning of the other party. After all, he has been trapped in the cage, and he will soon bring them all back to the first universe where the Tianji people are located. In this case, the treasures Things like that are really not important anymore.

What surprised him was that the green and old man in front of him was still a master of the research, which made Ye Xuan immediately go to the branding of the transmission method, but it was already damaged. Asterisk.....

Chapter 2647: Condensed magic

For the way of the law, Ye Xuan was quite involved in the past, and he had a lot of experience. However, after entering the universe, the laws of heaven and earth are completely different. The way he has mastered the law before is no longer applicable. Therefore, Ye Xuan could not start from the brand-named damage transmission method on the Star Warship. The only hope is to find a master of the formation in the future and ask him to repair it.

The masters of the formation can not please, they are all from the ten-day palace of the comprehension camp. In the immortal dynasty of the science and technology camp here, any one of the masters of the formation is in a state of detachment, and there are few opportunities to be lucky.

Ye Xuan originally thought that the repair of this star shift number would be far away, and he did not want to be locked into the cage by the devil. He accidentally met a strong person who was well versed in the way.

And listening to the voice of the old man, his accomplishments in the way of the law seems to be extraordinary, at least repairing Ye Xuan's star shift should be completely no problem.

At present, they are already trapped in cages. This kind of thing, the other party should not swear words, and this matter has more than 60% credibility.

With this in mind, Ye Xuan couldn't help but be moved!

The transmission array method is also divided into several types. The transmission array method, which is engraved on the battleship hull, can be divided into two types. One is to start the transmission array, and then you can bring the battleship together and transmit it together. Go out.

The other is relatively unsatisfactory. Once the launching of the battleship hull is carried out, only the warship's controller can be transmitted and left, and the battleship itself is equivalent to abandon!

Although Ye Xuan still does not know which type of transmission method is engraved on the hull of the star, but one thing is completely certain.

That is, as long as it can repair the array of engravings on the stellar hull, then for him, the escape from the space fortress of this demon is at least absolutely guaranteed.

The purple shuttle is more important than its own. Besides, after the star shift is repaired, whether it is integrated into the purple shuttle, this matter is completely decided by Ye Xuan.

If the transmission array engraved on the hull belongs to the type that can only transmit the warship controller, then the transmission array is directly activated, the star shift number is set off, and it is left alone.

In the future, it is not a chance to encounter such a small warship that has been branded with a transmission array.

It's just that Ye Xuan's calculations are good, but there is still a key premise to achieve this, that is, the green and old man in the cage 100 meters away, can promise Ye Xuan's request and help him move the stars. The transmission array engraved on the number is fully repaired.

Leaving this premise, everything is empty talk!

With this in mind, Ye Xuan did not easily talk to the other party about the matter, but fell into sinking. After careful calculation, this was tempted to mention: "Predecessors, since you are a master of the martial arts, I don't know... Can I repair the damaged transmission array? I have a warship, which is engraved with a transmission array method, but it is damaged. If it can be repaired, it may be transmitted directly and fleeing from here."

"Ha ha ha... really a joke!"

The old man of the green man laughed even if he looked up: "The old man is the top master of the martial arts. Can you not have some treasures that have been branded?" Is that okay? But if you want to leave this Wanluo prison in this way, the old man advises you to die early."

"This black prison should be faced by a certain genius of the celestial family, using space folding technology. In this environment, the effect of the transmission array is greatly reduced, even if the husband is a few good things, only Can help me out of this cage."

"But does it make sense? I left the small cage, but I am still in the big cage of this Wanluo prison. Once I was found by the jailer here, I am afraid that it will lead to more unpredictable crises. ...."

"Not to mention the whole piece of Wanluo prison outside the cage is full of such strange black fog, the gods can not be extended, and it is difficult to go after going out, why bother?"

As he said, the old man of the green man shook his head and sighed, and waved his hands again and again, his face was desperate.

Ye Xuan even fell into sinking.

The situation is more trouble than he expected. If he can't leave without relying on the transmission array, he can only send it outside the small cage, but he is still in this Wanluo prison. This is really meaningless.

It is no wonder that the nearly tens of thousands of people imprisoned in the entire Wanluo prison are so depressed and desperate that even the transmission line can't count on it. What better way to get out of here?

A huge sense of loss came to my heart, and Ye Xuan's mood gradually declined. It was at this time that his mind was ringing again with the sound of the phagocytic system.

"Hey, all the magic cores have been broken down, and you have gained a lot of spiritual strength. Are you starting to condense the spiritual core?"

Spiritual source nuclear?

Condensed?

Ye Xuan was caught off guard and stopped on the spot.

According to the meaning of the phagocytic system, it is clear that he wants to use the source of spiritual power extracted from more than one hundred demons, and also condenses one in his own knowledge. The same spiritual source core as the devil!

In this way, isn't he and the devils the same? Can it be considered a pure human?

This thought just floated from his mind. Ye Xuan shook his head and smiled at the first time. At this point, he seemed to be a bit too pedantic and cautious, even if he really condensed a spiritual source in the sea. how is it?

You are still yourself, as long as you keep your heart, why should everything else be too tangled?

The most important thing is that if you can really condense a spiritual source core in the sea of knowledge, then Ye Xuan can be like the jailer who is faintly visible at the moment, no longer subject to the strange black fog in this Wanluo prison. The impact, as a result, as long as Ye Xuan can get out of the cage, there will be a chance to get out of Wanluo!

Everything can be described as a peak turn!

Surprise came so fast, Ye Xuan did not delay too much, the first time to the devouring system issued a command to condense the spiritual core. Then he sat down in the cage and returned to the inner view of the gods and entered the state of cultivation.

"Oh la la..."

The sound like a tidal sound rang in Ye Xuan's mind, just as he entered the state, the phagocytic system will decompose a large number of spiritual power sources from the brains of more than one hundred human brains. Released, turned into a torrent, like a big river, rushing in the sea of Ye Xuan, and instantly let him shocked, almost lost.

The torrent that has evolved from a large number of spiritual power sources is too strong. As they continue to swell and roar, Ye Xuan's knowledge of the sea is like setting off waves and waves, and the sea is gradually being expanded. In this painful forging and quenching, it becomes more and more solid and stable...

Chapter 2648: Repair star shift

Time passed slowly, unconsciously, and a blink of an eye passed!

During this month's time, the entire Wanluo prison was calm, and no one was there except for the occasional appearance of the demon guards who were responsible for the patrol.

Neboshan, the head of the demon who dominated the space bastion, seems to have forgotten Ye Xuan, and after throwing it into Wanluo, he did not intend to pay attention to it.

In fact, this is normal. The whole piece of Wanluo prison at the bottom of the Battle Fortress is imprisoned with thousands of nearly tens of thousands of federal strongmen. All of them are amazingly talented, or have a unique place in a certain field. Ye Xuan Xiaoxiao One of the star nuclear humans, thrown in this and the guy is really too inconspicuous, simply not enough to cause the attention of Nabo Mountain.

But for this reason, Ye Xuan was able to close the gap once and for all without any interference. For a whole month, the source of the large amount of spiritual power released by the phagocytic system was finally completely confiscated by him.

At this moment, when Ye Xuan suddenly opened his eyes, his bottom of the scorpion clearly had a smattering of the fine mans, and the powerful spiritual power made him look like a whole, and his temperament and breath were completely different.

One month, Ye Xuan is a huge harvest!

Not only is the tempering of the gods more solid and stable, but even the sea of knowledge has expanded a lot, but these are not the key points. The most crucial thing is that Ye Xuan has successfully condensed in the sea of knowledge. There is a spiritual core that belongs to him alone.

Different from the magic core in the minds of other demons, the spiritual core of Ye Xuan's condensed spirit is smaller, only comparable to soybeans, and its color is not dark black, but black and purple, giving a kind of More compact and mysterious!

This kind of difference is actually reasonable. After all, Ye Xuan knows this spiritual source core in the sea, but it is formed by condensing and compressing the brain nucleus of more than 100 devil strong people. The quantitative change is accumulated to a certain extent. Naturally, it will lead to qualitative changes!

"Bad boy, you are a big heart, this time, and in danger, you can still calm down and practice, the old man was full of anxiety for more than a month, and gradually accepted his life!"

Not waiting for Ye Xuan to speak out, the old green man in the cage in the recent 100 meters is taking the initiative to speak out, just to say that later, it seems to think of the situation in front of him, can not

help but sigh: "Hey, It's a pity that it's useless to practice again. As long as these demons scout to return to the Tianji clan, our destiny is completely doomed, and there is no possibility of surviving. It's really unwilling to think about it..."

"If I am not willing, then how can I fix the transmission method on the battleship?"

Ye Xuanyuan's fine mang flashes, taking advantage of this opportunity to formally propose the matter of repairing the star shifting array method. While talking, it is also secretly stimulating the purple and black spiritual source that has just been condensed in the brain. Nuclear, will extend the spirit of the spirit as a \*\*\*\* to the outside of the cage: "As long as the transmission array can be repaired, maybe we still have a chance!"

The voice is still not falling, and Ye Xuan's face has already had a smug smile. Sure enough, the cage is outside the strange black fog of the vast space of the Manor, and there is no spiritual power for the devil. The slightest impact.

Even Ye Xuan still faintly felt that the mental strength of the extension seemed to be slightly solidified, which gave him the illusion that these black mists had some kind of spiritual power to the devil. Unique nourishment effect.

Just as human beings pass through, it is a truth to draw aura from the outside world!

"Bad boy, don't dream, even if you let you out of the cage is meaningless, the monk can't use the gods, just wait for the ordinary people to abolish the limbs, so underground, you can't get out of Wanluo!"

For Ye Xuan's words, the old man of the green scorpion was extremely disapproving, and he poured a cold water again without any politeness.

"If I can fear these strange black fog outside the cage?"

Ye Xuan's mouth slowly outlines a touch of laughter. The speech directly extends the spiritual power and goes straight into the cage 100 meters away, hovering around the green man's body. In a circle, this is recovered.

The whole process is extremely fast, and there is no obvious delay. Although it has never been affected by the strange black fog outside the cage, it is like ignoring the general!

"This... God, how do you do it?"

The green old man's eyes narrowed, and he took a sigh of coolness and whispered. Then he suddenly realized what he was suddenly changing. His face suddenly changed: "No, the power you have just extended is not the knowledge of human monks. , but the spiritual power of the Devil's Power, is it you..."

"You shouldn't doubt that I am a demon?"

Ye Xuan shook his head and smiled: "I just hunt some demons, collected some of the brains of the devil, and took the mental power into their own use. If not, they will not be locked here now. "

"Do you have the spiritual power of the devil? Doesn't that mean... As long as you find the opportunity, can your kid pretend that the devil is mixed into the other's camp?"

The green eyes of the old man's eyes became more and more bright, and his body shape shook slightly because of his excitement. Then he turned around and took the initiative to urge Ye Xuan: "What are you waiting for? Stinky boy, quickly use your spiritual strength to The warship was sent over, and the old man repaired the transmission method as soon as possible, so that you could leave the cage early."

"Hey, since you can fear the strange black fog outside the cage, you can even pretend that the devil is mixed into the other camp. This is a great thing!"

At this time, Ye Xuan is naturally not polite. At the moment, he smiles lightly. The hand is taken from the immortal world of the body and the space box containing the small warship is taken out. He is wrapped in spiritual strength and sent directly to the cage. It was in the hands of the old man who was a hundred meters away.

"Fast three days, slow for ten days, the old man will be a ship that is intact and complete, the kid, wait!"

Raised his hand and took the space box. At this time, the old man of the green man had already been full of red light because of his excitement. He confidently patted his chest and made a testimony to Ye Xuan. Then he turned and returned to the corner of the cage and sat down.

Three days later, the space box returned to the hands of Ye Xuan.

Without waiting for him to check the situation of the warships inside, the old man of the green singer has already said: "The transmission method engraved on this battleship is not bad, and the proportion of the damaged part is not very large. Now it has been repaired as it is, you You can use it with confidence. But..."

As soon as the words turned, the old man suddenly sighed: "But this transmission method originally had two defects, but it will not affect the transmission, but it will not allow you to send and leave at the same time. It will be used later. Quite trouble!"

"The old man could have been perfected, but it is a pity that the consumables needed at the moment are not enough. It is difficult for a clever woman to be without rice. This matter can only be dealt with after getting out of trouble..."

Chapter 2649: Get out of trouble

Is there enough material?

Ye Xuan frowned and glanced at the cage 100 meters away, but did not dismantle the other side.

This green old man is obviously worried that Ye Xuan will disregard it after he got out of trouble. It is only because of this, although it is a little villain, but it can be understood.

When Ye Xuan once again extended the spiritual strength, wrapped in the space box with the star shift, and returned to the palm of the hand.

After some indulgence, he finally gave up the idea of handing over the star to the system and blending it with the purple shuttle.

Since the transmission array method on the ship's hull is still flawed, although Ye Xuan can be sent out, but the warship itself can only be left in the cage, then he must be cautious.

After all, he lost a star and he was barely able to accept it. If even the purple shuttle was lost together, Ye Xuan could be really depressed!

Reaching out to open the space box, a small silver battleship is in the eye, Ye Xuan will reveal the gods into the small box, directly take out the already fixed star shift number, but it is the first time to earn the body!

The space in the cage is only about one hundred square meters, and although the star movement is only a small warship, it still cannot be placed.

What Ye Xuan has to do now is to refine the star's number, so that it can make its size free.

The whole process was very quick. Just a few minutes later, the star shift was successfully refining by Ye Xuan. Then, with his wave, the Starship battleship appeared on the ground of the cage, and its size was reduced to several. The length of about ten meters, Ye Xuan did not have too much delay, and directly activated the transmission array method engraved on the stellar hull.

"Hey..."

The faint humming sounds, and the densely-colored transmission pattern embossed on the surface of the stellar hull is all bright, emitting a faint white light, and suddenly it will be imprisoned in some cages. The eyes are all attracted.

There are nearly 10,000 prisoners in the entire Wanluo prison, and more than 80% of them are closed. These are impossible to have all the treasures that can be transmitted. Before Ye Xuan came here, it is estimated that many people have tried, but ultimately The result should be the same as the old man said.

Although the transmission array can make him get out of the cage, he can't leave this Wanluo prison. Once he is found by the jailer who is patrolling this, I am afraid that it will cause a bitter pain.

For this reason, almost all of this gaze cast by Ye Xuan at the moment is accompanied by a kind of ridicule. It is obviously not optimistic about Ye Xuan.

Some guys even laughed and laughed.

Such a scene made Ye Xuan quite annoyed. He swept through the cages in the light and cold, especially to the cages of the screaming laughter, and secretly recorded his position in his heart.

Was the old green man not talking about the lack of materials to completely repair the star shift? OK, no problem, less material, I will help you get it!

Throughout Wanluo prison, there are so many federal powerhouses, and Ye Xuan does not believe that their storage magic weapon will not be able to repair the materials of a star-shifting array.

If it was before, Ye Xuan may not be very embarrassed to shoot, but what about it now... Hey, this is what you are looking for!

With this kind of thinking, Ye Xuan's mouth suddenly outlined a fascinating smile that was quite interesting, and then he stepped into the white light of the awning that was lit up on the hull of the Star.

"call out!"

The transmission of the mangling flashed, the cage instantly restored to its original state, but Ye Xuan's figure disappeared, only the star moved to the ground of the cage.

Almost at the same moment, the area where Ye Xuan's cage was about a few hundred meters touched, the space filled with mysterious black fog suddenly shook like a ripple of water, and then Ye Xuan stepped from this piece. The shackles came out, and there was a hint of excitement and excitement on his face!

In any case, at least it has come out of the cage, and with a good start, it is not far from the ultimate escape from this starry sky!

Turning around and looking around for a few eyes, Ye Xuan soon discovered the position that appeared after the transfer, not far from his cage, and the cage of the old man was closer, just over two hundred meters. Outside.

When he walked over, he stopped at the other side's cage and arched his hand: "Thank you for the predecessors to repair the star shift. If Yemou has a way out of this Wanluo prison, then he will never give up his predecessors!"

"It's rare that you have the heart, and the old man is really not looking at the wrong person!"

The old man of the green scorpion smiled first, then he looked at it, and the tone became serious: "But although you can fear these mysterious black fog outside the cage, the jailer who is patrolling in this Wanluo prison is not Simple, all things are cautious. If you don't have absolute control, it's best not to take it. Remember, chances are only once, and you can see it again!"

Ye Xuan nodded, and did not continue to say anything more. Turned to the area where the prisoner was relatively sparsely located, and the first time there was a corner where he lurked!

In this black prison, the patrol missions are actually some ordinary devils. The strength is not high. After all, all the prisoners are detained in the cage, even if a few existence can be sent out through the transfer method. Cage, but can not leave this Wan Luo prison, they simply do not dare to chaos, otherwise it will die.

For this reason, the whole piece of Wanluo Prison is extremely safe for those patrolling demon jailers, and there is no need to send a master to sit down!

The entire demon prisoner responsible for patrolling in Wanluo prison has a total of 100 people. The realm of repairing is on the fifth floor of the star nuclear environment. Only one jailer is commanded, and the repair is higher than several small steps. Eight layers of nuclear environment.

Bi Qi Ye Xuan, but also a strong little order.

The latter has grown up all the way, almost all relying on killing and clearing the way. The leapfrog fight has long been a commonplace for him. As long as he finds the opportunity, killing this demon prisoner is completely inconsequential!

It's just that this person is the commander. Although it is impossible to walk alone in the cage area of Wanluo Prison, it is occasional to come out and look at it with arrogance, and there are also many jailers behind him.

The only way to kill this person is to kill a demon jailer, pretend to be in the jailer's ranks, and then wait for an opportunity to provoke and create a chance to kill him.

Only in this case, when Ye Xuan started, the other devil jailers would not interfere too much. After all, in the world of the devil, the weak meat is originally a matter of course, and it is not uncommon for subordinates to challenge the superiors!

Just thinking, the far right direction of the open space on the right side suddenly heard clear and audible footsteps. It seems that there are not many people listening to the statics. There should be only two or three, Ye Xuan's fine flash I am ready to do it in an instant...

Chapter 2650: One call

In Wanluo Prison, the task of patrolling the demon jailers is very loose. Just go out and wander around every day. Even the number of patrols is not particularly harsh. Although a patrol squad is five people, if anyone wants to steal If you are lazy or not, you don't even have to call one.

At the moment, the demon prisoner patrol squad that is coming to the place where Ye Xuan is hiding, the number is even less than only three devils, and the strength of the seven-level repair of Ye Xuanxing's nuclear environment is completely beyond the defense. Grasp them and kill them all!

The footsteps gradually became clear, and the three devils' jailers were finally near. At this moment, Ye Xuan was only over 20 meters away.

"call out!"

With the faint sound of breaking the air, when the demon patrol squad passed by, the left side suddenly took out a black brilliance without any warning, and it was almost instantaneous, and it was approaching, and it was very flexible. After a hovering, the heads of the three devil's jailers fell silently to the ground.

This black smelt is the result of Ye Xuan's smashing star spirit sword. At this moment, after the three devils jailers were killed under the Thunder, they were reinstated even if they were recruited by Ye Xuan.

Then, the latter's figure quickly popped out, waved the three heads of the devil who rolled to the ground, took out the brain nucleus, and took down the jailer black robe that was worn by one of them. They searched on the three bodies. Once, after confirming that there were no such things as the waist card, I raised my hand and fired a fireworks. Soon, I burned the damaged body on the ground!

After doing all this, Ye Xuan put on the robes of the jailer who had been stripped off, and squinted a few eyes, then swayed and swayed to the rest of the Wanluo prison.

After the tea time, Ye Xuan met a patrolling demon prisoner team. There were only four people. After hesitating, he greeted him directly and enthusiastically raised his hand and made a sound. .

Sure enough, the four devil jailers did not have any abnormal reaction after seeing Ye Xuan, but they still grinned and chilled with him.

The reason why this strange situation occurs is actually because Ye Xuan has fully motivated the spiritual source of the brain, and the body has always exuded the unique spiritual strength of the devil.

In fact, from the beginning of Ye Xuan's understanding of the small spiritual source in the sea, he and all the devils have no difference in their breath, even if they are the realm of the realm. The strong, absolutely can not see anything wrong.

A few words down, Ye Xuan and the four devils jailers have become very familiar with each other, simply joined their team, while chatting, while patrolling in the Wanluo prison!

With Ye Xuan's deliberate harassment in words, the four devils' jailers impressed him very well. The five people walked in Wanluo prison, talking and laughing, just like the friends who have known for many years.

In the process, Ye Xuan quickly attacked the situation of the Wanlu prison jail team by knocking the side.

There is an unwritten rule in Wanluo Prison: all patrolling jailers, as long as they have the ability to obtain resources from the prisoners who are detained in the cage, then only 70% of them will be turned over after the thing is reached, and the remaining 30% , it belongs to the individual!

The four devil jailers that Ye Xuan encountered at the moment, today had to discuss the prisoners in a certain cage, Ye Xuan meets his meeting, and these four jailers feel that they are quite involved. It is to warmly invite Ye Xuan to go hand in hand.

Even the final harvest, they all said that they can be divided equally with Ye Xuan. Everyone is a good brother in the future. This time, Ye Xuan happened to pick up a ready-made cheap, and he should cultivate his feelings.

What made him completely speechless was that the four guys led him in the same direction, just in the cage area where he and the old man were held.

Even if Ye Xuan is a little embarrassed, the four guys' desire to do this is not exactly what they are?

After a quarter of an hour, the four heads of the current leader, the jailer, were standing outside the cage where the old man was shackled. Ye Xuan already had no idea how to describe his feelings now. .

In fact, the green old man in the cage is more dumbfounded than Ye Xuan!

Calculating the time, Ye Xuan has only two or three hours before and after leaving here. Who can think that when he appears again, he is actually trying to confess his own confession?

"Ye Laodi, this green beard old ghost is not simple, you don't look at his seemingly pitiful, there are many good things in the hands of people, this old thing is the humanity group famous master of the law Lu Wenxuan, finally was We caught it!"

Just as Ye Xuan and the green squatter in the cage were squinting at the big eyes, one of the four devils' jailers smiled and glanced at Ye Xuan, and the hands kept moving. It was extremely exciting: "There have been some guys who have served this old ghost before, but nothing has come out!"

"You are new, maybe you don't know that there is actually a rule in Wanluo Prison: all the cages, each jailer squad can only shoot once. If not, there will be no chance in the future, so this time It is necessary for the brothers to make the skills of the housekeeping, and the old goods are hard bones!"

"After a while, we have four rounds of outflows. With our means, this old thing can't stand up. Any good baby has to be honestly honoured!"

"Of course, if the four of us are unsuccessful, the Ye brothers can try it out if they are itchy. The right to accumulate experience. After a while, my brother, I will start by, and you will learn from the side, talking about torture prisoners, old. Brother's means are at the forefront of the entire Wanluo prison..."

After that, the thin man turned to the old green man Lu Wenxuan in the cage and looked at it. He smiled with a big eye: "Old guy, know that your bones are hard, but today is not the same, Lao Tzu is this. The third-ranked prisoner of Wanluo Prison, if you want to be free from the flesh and blood, you should honestly hand over the treasures, otherwise you should not blame me!"

"Bao!"

After that, the thin right hand shook a wave, and a red long whip that was suspected to be refining in a certain starry beast was suddenly crossed over the void, giving a crisp and harsh sound.

Ye Xuan's face immediately went down. If it really made this thin face to face the old man, he would not be able to resist the direct shot, or he would look back and see no one. These two situations are not Ye Xuan want to see Arrived.

"Hey... Would you like me to try it first? I am good at a technique of spiritual charm, and focus on the heart. If the soldiers can not give up the old goods, can the brothers save some strength?"

Slightly stunned for a few moments, Ye Xuan secretly bite his teeth, squeaking his scalp and taking the initiative to invite Sakura. After talking, he turned to the old man in the cage and looked at it: "Look at the old-fashioned eyes, most of them are not If you live too big to toss, if you really want to punish, if you are killed, a few brothers are afraid that it is not good to tell them..."
