

## Super D. S 2781

Chapter 2781: Interstellar adventurer

Seeing that Haofangfang is about to be brought into the void black hole, Ye Xuan suddenly hesitated, saving and not saving, it is difficult to decide.

At the time of the dilemma, there was a sudden sound of the phagocytic system in my mind...

"Hey, find a life-level black hole, do you explore? Tip: If the exploration is successful, there will be a chance to upgrade the Star Traveler title!"

"Star Traveler: This title comes with a certain degree of stability to the aura of the universe, reducing the chance of encountering cracks in the universe, upgradeable!"

"Next level: Star Adventurer!"

"Star Trekker: The aura effect of the title, on the original basis of the Star Traveler, will add a function to brand the wormhole coordinates, any universe void can be branded, including black holes. Once the branding is successful, as long as In the same cosmic plane, after opening the interplanetary jump function of the next level, you will be able to ignore the cosmic distance and jump in and arrive!"

Life-level black hole?

Star Adventurer?

Chewing on these words, Ye Xuan felt heartfelt in the first time.

Star Trek can upgrade this thing. He knew it before, but he didn't know what the upgrade was. He didn't expect to encounter this black hole inadvertently, and he accidentally completed the conditional activation.

The choice is no suspense, this opportunity, Ye Xuan can not miss.

Once this so-called life-level black hole is successfully explored, then when his Star Trekman title is upgraded to an interstellar adventurer, Ye Xuan will have the ability to brand the wormhole coordinates in any universe, including black holes!

The only pity is that even this time successfully upgraded to an interstellar adventurer, but Ye Xuan still can only imprint this wormhole coordinates!

As for the use, you must wait until the interstellar title attached to the system is upgraded again in the future, in order to upgrade the acquired interstellar jump function, from any area within the same cosmic plane, ignore the distance, open the wormhole jump, and instantly reach the mark. The land of coordinates.

And now Ye Xuan, even the next title after the Star Trekker, is still completely ignorant.

"No matter what, this system capability must not be missed, and the same cosmic plane will arrive at the distance without a moment of sight. This is a super back door, too cheating!"

In the muttering, Ye Xuan even made a decision, biting his teeth, and immediately spurred the hole, turning into an invisible streamer, rushing to the front of the empty black hole!

At the same time, it also made a positive reply to the system to determine the exploration!

Soon, the sound of the phagocytic system sounded again: "Hey, the life black hole exploration mission is open! Time limit: three days! Completion requirements: Before the final deadline, find the void mother in the black hole of life!"

Is it only three days?

With the sound of this sound, Ye Xuan's whole heart is suddenly sinking, such a vast hollow black hole, the system has only three days to explore, which is too difficult to be a person?

What is it that is the so-called void mother? What is the form? And why the front of this wormhole is called the black hole of life, and I still don't know it.

As soon as he read this, he suddenly smiled and smiled.

However, at the moment, it is obviously not a time to think about the situation. Because at the speed of the hole, the front of the worming cloud of the fangs is in front of you. If Ye Xuan does not shoot, then there is For more than ten years, the goods will be forcibly broken into the black hole by countless emptied beasts.

Although Ye Xuan is finally going to enter, he can enter the battleship and enter the body directly, but it is clearly two completely different concepts!

The black hole of life is also a black hole, falling into it with flesh and blood, even if it is not dead, I am afraid to have delamination!

One thought about this, Ye Xuan even turned to look at the side of the guess: "Is there any sure to rescue him before the guy was brought into the black hole?"

Although the mosquitoes returned to the black mosquitoes, the two people who had been guessed and Naboshan had been left in the cave. As for why they didn't find the Nebo Mountain, the reason was very simple. He was only in the fourth stage of the black hole. Guess, it is the nine-order great perfection!

"no problem!"

Ba guessed nodded, no nonsense, and the body shape suddenly smashed out the hole imaginary. When it appeared again, it happened to be just above the worm cloud composed of the black ladybug-like worming beast. Then, the panic-stricken Hao Fangfang caught his hand.

At the same time, there were also a few black-skinned beasts of the size of the insect cloud in the lower part of the insect cloud that leaped in a moment, biting the legs of the Gu guess, and actually hung on the body.

Although the latter suffered from pain, but did not dare to stay, directly teleported, and immediately went to the outside of the cave shuttle body, Ye Xuan opened the right to welcome the first time!

"Ahhhhh... let me go, help me..."

In the next moment, Haofangfang's exaggerated crazy roaring sound rang in the inner cabin of Dongxu Shuttle. This guy was obviously frightened, and the rush has not yet recovered!

Ye Xuan's brow wrinkled, even when he turned his eyes, he said with no anger: "Okay, there are no three-headed beasts hanging on the body, and there is no such thing as a whole body." Ghost?"

"what?"

"No jealous?"

"I am still alive? Rely! Lun home is still alive..."

"Hey? Where is this? Who are these two guys? Oops, what's the situation with this person? Is there nothing to hang on the three empty beasts?"

When I heard Ye Xuan's voice, the crazy and arrogant Hao Fangfang finally returned to the soul, and then turned to look at the environment around her body. The face was loose and soon floated again. Ye Xuan's already familiar surprise. Color, I asked endlessly on the spot.

Ye Xuan didn't pay attention to him. The first time he looked at the three empty-headed beasts still hanging on the thigh.

At the same time, the prompting sound of the phagocytic system also sounded again. It was so frequent for a while, and each time the content was out of the expectation of Ye Xuan: "Hey, congratulations to the host! Found the Void Scoop, whether to capture? "

This time is no exception, Ye Xuan directly stunned.

Void squad?

Is it the three guys hanging on the Gu guess? Obviously it is a emptied beast, how can it become a hollow squad?

With this question, Ye Xuan directly spurred the spiritual power, turned into an invisible spiritual net pocket, and rolled over to the three emptied beasts.

Soon, the three-headed emptied beasts were wrapped in a spiritual net, leaving the body of the Gu guess, tearing a small piece of flesh and blood, while being dragged by Ye Xuan to the front.

At a closer look, this kind of devourer is called the emptiness of the scoop, and its shape is basically the same as that of the general ladybug. It is just a big size, it has a square and a full circle, and the whole body is black.

What is even more strange is that, according to the results of Ye Xuan's spiritual contact and perception, although these three guys have a substantial body, they are obviously not flesh-and-blood, hard-bones, and icy as a kind of inanimate metal mineral...

Chapter 2782: Shun

After some research, I finally did not figure out anything. When Ye Xuan made an immediate response to the system, since he couldn't name himself, he simply let the engulfing system get into the body and then authenticated!

Soon, the three hollow squads that were wrapped by his spiritual power nets disappeared silently. The next moment, the tone of Ye Xuan's mind rang again.

"Hey, congratulations to the host! Capture the Void Scoop three! Level: two stars and two scoops, two scoops!"

Ye Xuan discovered that he had received the three emptiness soldiers who had been handed over to the phagocytic system in the body. The scoops had different imprints on their backs. They were extremely

complicated, and they looked cold and stunned. Grimace is average, but it is extremely bleak, which is why Ye Xuan has ignored it before.

Although the identification results of the system are not very detailed, except for the grades of the three emptiness soldiers, there is nothing else, but Ye Xuan does not give up, but in the information library attached to the phagocytic system. Start the search, and directly search with the hollow squad as the key word.

Generally speaking, as long as it is an item or life that has been touched by the phagocytic system, even if there is no data in the database attached to the system, it will be replenished as soon as possible after the first contact.

This is obviously the same.

Ye Xuan wished to search for the information that the system had just added to the database. Based on this, he finally got a general understanding of this so-called virtual squad.

Void Scoop: It is divided into nine grades according to the number of imprints on the back of the scoop, from the lowest level scoop to the highest nine scoop. This object is between the living body and the non-living body. It is the subsidiary of the void mother's marrow. It can engulf the universe's void and be absorbed into the body, and it will be the mother of the void. It will grow and evolve!

After seeing this information, Ye Xuan was suddenly awakened. It turned out that these hollow squads were only the subsidiary products of the emptiness of the mother, although Ye Xuan did not find any relationship with the shape and function of the emptiness. Information, but one thing is now ok.

That is, since these emptiness soldiers are all attached to the so-called emptiness of the mother tongue, even the energy that is acquired by the universe's voids and whose state is unknown is all fed back to the emptiness of the mother. Then, Ye Xuan only needs Going through the vines, you will eventually find the voided mothers to which they depend.

It seems that the three-day time limit given by the system seems to be completely sufficient.

One thought of this, Ye Xuan suddenly spirited, not too much delay, directly ignited the hole in the mind, like a meteor meteor in the void, quickly plunged into the front of the hollow black hole!

In the next moment, the boundless darkness came to the surface. The original environment that could see a little weak star in the distance was changed all the time. There was no such thing as a faint light source in all directions. It really turned out to be a black hole, and even the light could be swallowed up. Mystery!

In addition, this dark and infinite black hole in the hole, apparently engulfed a large number of hollow squad, the hole squid just rushed into it, and the hull was constantly screaming in a dense sound.

Fortunately, this ship is also extraordinary. It has been merged with a wormhole ship. This ship can resist the force of the nucleus crushing when the wormhole jumps. This feature has been perfectly integrated into the ship of the cave. In the body, according to Ye Xuan's estimation, this shuttle should be able to withstand the power of this kind of hollow weapon. Otherwise, he can only helplessly turn around and return, and escape this dark destruction as soon as possible. Ground.

After careful observation, the final result confirmed Ye Xuan's speculation, and he immediately let him put the suspended heart back into the chest.

Under the sudden drop of pressure, Ye Xuan fully urged the cave to go all the way, and also extended the knowledge of the gods out of the cabin, paying close attention to the general trend of the vast number of empty veil.

After deduction and analysis, after about half an hour of touch, Ye Xuan was keenly aware of some faint signs, just like the undercurrents in the depths of the ocean. If you don't confess, you will not be able to perceive it.

Although all the Void Scoops seem to be chaotic, on the whole, their general direction of movement is basically the same. Ye Xuan adjusted the direction of the hole shuttle, and went straight!

"Nothing, are you looking for something? Here is a void black hole, except for the Void, nothing..."

"In addition, where did the three empty beasts go? Before you were wrapped up with spiritual strength, why didn't you blink?"

"And, what is the grade of your small private warship? Not only can you resist the erosive power of the black hole, but even the sharp teeth of the empty beast are not afraid, and all come to the home base camp!"

"Great brother, Lun found that he can't see you more and more. You are like a distant and mysterious unknown nebula. Everywhere, there is an inexplicable attraction. If you are in a muddy foot, you can swollen. where....."

At this moment, after the startle, Hao Fangfang seems to have completely recovered. Seeing that Ye Xuan has always been alone and boring, it seems to have forgotten his existence, and the other two powerful and horrible guys, It turned into a direct access to other cabins. This product, in order to show the sense of existence, twisted the waist and directly hit the side of Ye Xuan, and began a natural chatter.

"Get out of the way! Then disgusting, I immediately throw you out to feed the scoop!"

Ye Xuan frowned, and the whole body of the goose bumps came out, and the cold eyes slammed into the mans, and the voice was lightly sipped!

The voice just fell, and Hao Fangfang next to him had raised his hand to cover his thick lips and wide mouth, his face was full of surprise, his expression exaggerated, and his voice exclaimed with exultation: "Wow, my Heaven, a big animal, isn't it the ancestors of these empty beasts?"

Its line of sight clearly shows that it has passed through a huge transparent crystal string window at the head of the tunnel.

Ye Xuan stunned, subconsciously turned around and looked around, and then followed his mouth without a suspense.

In the line of sight, a black and bright object that is bigger than the Black Bass Space Fortress appears in the endless darkness at the end of the line of sight. Although it looks like a small meteor, its shape is clearly a standard ellipse. A glimpse, it really looks like a strange black giant egg!

In the next moment, Ye Xuan's mind once again sounded the prompt of the phagocytic system: "Hey, congratulations to the host! Discover the empty mother pulp!"

"Hey, congratulations to the Lord! The life black hole exploration is completed, the title is upgraded! The current title: Star Adventurer!"

"Hey, congratulations to the host! Star adventurer with the ability to activate! Is it immediately branded star-studded coordinates? Is it immediately charged with the void of the mother? Is it immediately arresting the starry squad? Is it immediately..."

With this series of system query prompts resounding in my mind, Ye Xuan was completely shocked by the earthquake, and the surprise came so suddenly!

Chapter 2783: Fusion virtual mother

This time, the system sounds that suddenly appeared in Ye Xuan's mind were a bit more. The more terrible thing was that the last sentence was followed by a series of inquiries, which made him feel awkward.

After a few moments, Ye Xuan suddenly returned to God, but did not rush to give a reply immediately, after all, there is still some confusion in the brain, the clue has not been sorted out.

After fixing the gods, Ye Xuan once again thought about the system prompts heard by the talents. After careful analysis, the thinking was quickly and clearly accessible.

The first thing that can be determined is that the huge oval-shaped giant egg that stands in the depths of the dark black hole in front of it, no accident, should be the virtual mother of the system mentioned.

It is because of its appearance that Ye Xuan's mission of exploring this black hole of life will be completed with great surprise in a short period of time. Right now, his system title has been promoted by the former star traveler. To the current star adventurer.

That is to say, today's Ye Xuan already has the ability to brand the starry sky coordinates, but how to do it specifically, you have to check the relevant information in the system to determine it.

As for the present, Ye Xuan is most concerned about two issues.

First, this giant black egg, which is at least 10,000 meters in diameter and fatter than the Black Bass Space Fortress, is the virtual empty mother of the system. How should it be collected? And what can I do after this item is collected?

Second, in addition to this voided mother's marrow, what is the meaning of the system prompting the final question about whether to immediately arrest the Void Soldier? This kind of strange insect not only has a sharp tip, but even the universe can eat away. In addition to the amazing destructive power, Ye Xuan really did not see other advantages!

If you really want to catch it, just how to place them is a very difficult problem. Ye Xuan doesn't even dare to dump them into the immortal world. This is clearly a nest of white ants!

Thinking of this, Ye Xuanton shook his head and smiled, and then issued a conditional search command to the body's engulfment system. This time, he limited the search keywords to two, namely the void mother and the hollow scorpion!

The same search command, Ye Xuan has not yet entered this life black hole, in fact, has already tried once, but that time did not get any words about the virtual mother. It is the relevant information of the Void Soldiers, which is not exhaustive.

At the moment, as this voided mother's marrow is discovered, by convention, the internal information base of the phagocytic system should have been supplemented with all relevant information as early as possible.

The search results came out very quickly, not as expected by Ye Xuan. Compared with the recent one, the amount of information was much larger. Not only was the information about the void and the mother's marrow no longer a blank, even the relevant The information is more detailed.

Under the slightest sigh of the heart, Ye Xuan even read it carefully and quickly realized everything.

Simply put, the so-called void mother pulp is actually an energy crystal with infinite density, which is formed by an infinite amount of cosmic voids, after a high degree of compression.

In fact, this is an ironclad proof. The vast black hole that Ye Xuan is in now is the result of the original universe's void being eaten by countless empty veil. The virtual mother's marrow in front is actually the universe that has been eaten away. The void is condensed.

That is to say, this whole piece of vast space is actually equivalent to being transformed into the black crystal in front of you after being extremely compressed!

This is the essence of it.

As for its use, the opposite is true: through a special means, this voided mother's marrow can be transformed from the current state of extreme condensation to another state of extreme expansion. The ultimate result of this extreme expansion is the birth of a new cosmic plane.

Of course, its expansion effect can also be used as an auxiliary force, such as Ye Xuan's immortal world, to get this void mother, and after perfect integration with it, one day in the future, when the starry sky is congested. When it is at its peak, once the ultimate expansion to the other extreme occurs, then Ye Xuan's immortal world will immediately become a new cosmic plane.

All this sounds like a mysterious, but after Ye Xuan slightly pondered, he quickly realized it.

This is clearly the theory of the Big Bang!

According to the theory of the big bang, the entire universe was actually a very small and small point hundreds of millions of years ago.

Later, this tiny point exploded and began to expand at an extreme speed. The time and space, mass and energy were slowly born, and the small particles of matter aggregated into a large mass of matter, eventually forming stars and galaxies. The universe until now!

However, as the universe becomes more and more vast, it will slow down and spread more and more slowly. In the end, it will stop completely, and then decay, and the ultimate expansion of the big bang will come to an end!

Then, it slowly condenses inward, and eventually, the whole universe will turn into a tiny point. Waiting for the next big bang!

Repeatedly, the cycle of immortality!

Of course, the front of the void is not a product of the natural condensation of the entire universe, it is only the emptiness of a small galaxies in the universe.

Therefore, even if its body shape eventually condenses to a weak point, and then explodes again, it is absolutely impossible to truly evolve a complete cosmic plane.

But at least it will allow Ye Xuan's immortal world to grow to the extent of a whole universe of galaxies!

that's enough!

At least before this, Ye Xuan has never heard of anyone who has a vast universe of galaxy as if he had a private magic weapon.

From this point of view, the emptiness of the mother tongue in front of the sky is simply the best!

One thought of this, Ye Xuan even if excited, even breathing is a little rush, lest he will be born later, almost without hesitation, immediately issued a command to forcefully grab the system.

This kind of treasure to the treasure, the size is so huge, with Ye Xuan's current cultivation as the realm, obviously it is completely incapable of shaking, only the swallowing system forcibly grasping skills, there is a chance of success!

"Hey, congratulations to the host! Grab success, get the void of the mother! Is it immediately integrated into the immortal world?"

Is this successful?

Ye Xuan suddenly surprised, even if given a positive reply: "Immediately merge, start at full speed!"

"Hey, congratulations to the host! The beginning of integration: progress is unknown..."

This time, with the official launch of the integration, the system's prompt did not give detailed integration progress data, which was early in Ye Xuan's expectation.

With such a level of heavy treasure and the entire immortal world, the progress can be blamed!

This matter can only be put on hold for the time being!

Shaking his head and smiling, Ye Xuan turned to the front of the ship's body and looked far away. The next moment, his face suddenly changed wildly...

Chapter 2784: Jiuxing

At the end of the black hole of the black hole outside the battleship, at this moment, there was a quietly empty army of emptiness and arrogance. The momentum was sorrowful and mourning, and it was clearly locked in the position of the hole shuttle. Here comes straight to the bang...

This is not surprising. Although the virtual shuttle has opened the hidden array, it is still in a state of concealment. However, before Ye Xuan's phagocytic system started to force the grasping power, the giant void in the distant sky. When the mother's marrow crystal is taken from the air, there will still be some traces left along the way.

With the familiarity of the emptiness of the mother's crystal, even if it is only a little weak energy of the mother's marrow, they must be sensitive to the first time, and quickly lock the position of the hole. !

The reason why Ye Xuan was eclipsed was not because of the accidental exposure of the hole in the hidden state. The reason for this was that he had realized it between his minds.

What really shocked him was the emptiness of the emptiness that came to this place!

At first glance, the dense hollow stalks in the line of sight almost gathered into a black, majestic sea, rushing into the raging waves and pouring out.

The number is definitely over one million!

Once they are rushing to the front, this army of violent raging waves, in the blink of an eye, can completely drown the hole in the air, and then crush, the consequences are simply unimaginable!

What is even worse is that in the forefront of this army of millions of soldiers, there are clearly a giant squad that touches more than a thousand.

These giant squadrons should be the leader of the entire squad and the leader of the squad, and the most inconspicuous of them are nearly two meters!

Ye Xuan even saw a body like a small hill, at least a dozen meters above and below the horror, this largest hollow skeleton is obviously unique, behind him, even the most exaggerated squad leader, only about seven or eight meters, there is no comparability!

You must know that the ordinary hollow squad is only a small size. This is a giant who is suspected of being a royal sergeant. I don't know how long it is, but it can be exaggerated to such an extent!

Just as Ye Xuan was shocked by the sight of this in his sight, the familiar system sounds had once again appeared in his mind.

"Hey, congratulations to the host! Found a nine-star void, do you want to grab it?"

Void eagle?

Sure enough!

The size of the body has grown to such a terrible degree, and it is really strange if it has not climbed to the high position of the entire Emperor of the Warrior.

As for the so-called nine-star two words, it should refer to the number of ghost faces on the back of this empty scorpion.

The one-star sergeant is the weakest, and the nine-star squad is already the peak of the blood of this species. It is a matter of course for the elites of the ethnic group!

At this time, as Ye Xuan turned to look at the moment, his face changed greatly, and Hao Fangfang behind him realized that it was not good. He followed the turn of the head and only took a few eyes, and he was scared and exclaimed.

"God!"

"What happened? How can these guys come straight here?"

"wrong!"

"Even the black to shiny dome is gone, it won't be related to you? How do you do it?"

"What are you still swearing? How do you steal it and go back? The giant egg just disappeared. These guys appeared immediately at the first time. They are clearly directed at the giant egg..."

"To shut up!"

Ye Xuan was upset and opened his mouth. The guy's broken thoughts were really unbearable. He even began to regret the impulse to save the guy.

"Shut up and shut up, and the family has already reminded you anyway..."

Being stunned by Ye Xuan, Hao Fangfang almost scared, and then he widened his mouth, his face grievances, his mouth squatting, and he turned to the rest area on the other side of the ship. In the past, the sissy girl, almost even the temper of the lady!

Ye Xuan smiled bitterly, but he did not pay attention to him again. It was rare to be quiet!

After a brief hesitation, Ye Xuan quickly made a decision, even if he gave instructions to the swallowing system to forcefully grab it immediately.

Although the time is very hasty, but Ye Xuan made this decision, but it is also deeply thought through.

With the speed of the hole, if you turn around now, Ye Xuan has at least 80% of the grasp to be able to get rid of the aftermath of this million soldiers.

As a result, Ye Xuan will lose the opportunity to brand his first starry sky coordinates in this black hole of life!

Previously, after he accidentally discovered the virtual core of the egg, and successfully completed the title upgrade exploration task, the system promptly sent a series of prompts to indicate whether it was immediately Star the starry coordinates in this black hole of life.

Starry coordinates can be branded everywhere, but the phagocytic system has been chosen here, with Ye Xuan's understanding of the system, which obviously has a reason!

In addition, Ye Xuan has a very strong interest in this group of hollow weapons that can be swallowed up by the universe.

If you can take away the tens of millions of black mosquitoes, and take away the entire squad, take them hard to the mouth and body of the teeth, and once you encounter difficult hard bones, put the

soldiers directly into the army. Going out on the line, and the existence of the cockroaches will have a headache!

When I thought of it, Ye Xuan was excited. When the line of sight swept away from the far side of the ship, such as the black raging army, the heart unexpectedly gave birth to an appreciation.

It is a pity that without waiting for the happiness of his sly to be completely rendered, a cold water will suddenly fall from the heart of Ye Xuan without any warning, so that he can be instantly stunned and completely dumbfounded.

This basin of cold water is exactly the system sound that echoed in his mind: "Hey, forced crawling failed! Analysis results: the target blood level is too high to be grasped!"

Failed?

After flashing these three words in my mind, Ye Xuan suddenly realized that she seemed to be a bit too optimistic!

The forcible ability of the phagocytic system has always been limited, but Ye Xuan has never encountered a situation of failure in the past. Over time, he has neglected this matter under the habit of habit.

Realizing this, Ye Xuan couldn't help but smile. Since the blood of this empty emptiness is too high, even after the phagocytic system tried to shoot, the final result is that the tone is extremely uncertain and cannot grasp these four. word!

Then this matter... I am afraid I can only do this!

In addition to the enthusiasm of the phagocytic system, Ye Xuan really couldn't think of any other better way to deal with this horrible emptiness.

As for the slain that helped him to conquer a large number of demons, Ye Xuan also could not count on this time...

## Chapter 2785: Stealing the day

The Void Scoop is different from the Devil and Warcraft. They are not flesh and blood at all, and they are not even real life species. Their body is actually a very special energy crystal! Even if there are no organs in the brain, let alone the core of the mind.

In other words, Ye Xuan used to conquer the slaves of the Devil and the Warcraft Powers. It is useless to these void soldiers, and there is no effect...

The system can't force it!

The slave print is also invalid!

Then, in order to conquer this huge void of the empty king, Ye Xuan's only choice is to forcefully suppress it by force.

But is this possible?

Let's not mention how the strength of this empty emptiness is repaired. It is just like the strong body of a small hill, and the whole body is condensed by a special energy crystal. Ye Xuan is completely helpless.

If there is no accident, even if it is the eighth-biggest black hole, the ninth-order big perfect strength of the Gu guess, and the more horrible \*\*\*\* team together, I am afraid that it can not shake the other side of this super-hard body.

Moreover, this emptiness of the Emperor, as the supreme emperor of the entire terracotta group, is a realm of refinement and weakness, and where can it be weak?

What's more, in addition to this emptiness, which is eye-catching by Ye Xuan, there is a huge army of soldiers who are millions of giants, and they are also coming!

Under this circumstance, with the inability of the swallowing system to force the crawling ability, Ye Xuan wants to conquer the plan of this empty emptiness, basically no hope!

Just as Ye Xuan was disappointed with this, the sound of the engulfment system in his mind unexpectedly re-emerged.

"Hey, congratulations to the host! The fusion of the virtual mother's marrow and the engulfing space is on the right track and fits perfectly! The initial realization of resource sharing! Get one of the void crystals, is it refining?"

Suddenly heard this prompt tone, Ye Xuan initially sneaked a glimpse, but quickly responded, only to feel that the surprise came so fast, the whole person is almost stunned!

Without hesitation, he even ordered the refining process to the phagocytic system.

After getting his exact reply, the phagocytic system immediately began to refine and refine. After only a dozen seconds, Ye Xuan only realized that Haitang had a slight tremor.

After the internal view, he discovered that there was a yellow bean-sized black crystal appearing out of thin air. It should be directly inserted into the phagocytic system after refining.

This thing should be the so-called void crystal that the system gets from the virtual mother's marrow!

At the moment, after entering the sea of Ye Xuan, this hollow medullary crystal flew to the sea in the first time, echoing the spiritual core of Ye Xuan. The two are separated on both sides of the sea, silently slowing down. Rotating!

A black and purple, it also reflects the interest, inexplicable gives a feeling of perfect harmony.

The only difference is that the spiritual source core is the reserve center of Ye Xuan's spiritual power. At this moment, even if it is silently suspended in the sea, there is no change, but it still exudes a very strong spiritual strength.

And the emptiness of the medullary crystal that echoes the half of the sea area, the atmosphere that is diffused inside is extremely ethereal and illusory. Ye Xuan clearly can feel the existence of this breath, but when it is carefully sensed, it captures everything. No, there is a strange mystery that makes people unpredictable and has no trace!

After a little thought, Ye Xuan tried to spur a force of spiritual origin to extend the past, touch the hollow crystal that suspended from the sea, but did not receive any response, as in exploring a stubborn stone!

Unwilling to take heart, Ye Xuan took back the power of the spirit and tried it out with the power of God. The result was still the same.

From this point of view, although the breath of this hollow medullary crystal is mysterious and agile, it obviously does not have the ability to think independently.

It is more like the temperament of some kind of avenue law is flowing, mysterious and unpredictable, mysterious and powerful!

Ye Xuan even suspects that this void medullary crystal will be the condensed thing of the core law of the universe's void. If it is, its value will be incalculable. With it, Ye Xuan will realize the darkness of this starry universe in the future. When you are on the avenue, you will get twice the result!

However, these are all words. Now, he has just entered the starry world. Even he has been repaired into a realm. He has broken through to the second starry sky before he is in front of him. The roots of this starry universe.

However, it is the most urgent issue at the moment that he is now in a hurry. Whether it can be successfully conquered, this virtual hollow crystal is the only hope of Ye Xuan...

After all, the entire Nether Vulture group, in fact, is completely a subsidiary product of the self-evolution of the Void Mother Heart. They are not the real life body like the Void Mother Pulp.

Even the actions that include them to devour the universe's voids should be just an instinct that is just a matter of urging. Just like a computer program, after the instructions are set, the program can run autonomously in sequence!

The atmosphere of the void mother tongue, for all members of the entire squad, is equivalent to the core source code of the computer program.

No program, no matter how complex or powerful it is, it is impossible to rebel to create its source kernel source!

At the moment, as the hollow medullary crystal slowly rotates in the sea of Ye Xuan, it constantly exudes a mysterious atmosphere. Ye Xuan clearly feels that he has a little different, very weak changes, no way to grasp, but Real existence!

After all, this void crystal has been successfully refining, and he has entered his knowledge of the sea, basically as a whole with Ye Xuan, regardless of each other!

The Bingxu family was originally a derivative of the process of the vague mother's marrow evolution. Facing the leafy scent of Ye Xuan, even if they have the power of crushing, it is absolutely impossible to produce even the slightest resistance.

They are not intelligent life, and they are not even true living bodies. They do not have the ability and consciousness of self-thinking. In the face of the mother's breath, the only thing that can be achieved is the obedience and obedience of nature!

In this way, he can conquer all the soldiers with almost no effort, instead of the void of the mother, the gorgeous and transformed, and instantly solve everything.

This is clearly a blatant attempt to steal the day, and the key to the result is that there is no suspense. Just thinking about it, it is already very exciting.

With this kind of slightly anticipated expectation, Ye Xuan's self-consciousness quickly withdrew from the sea!

When looking around, Naibo Mountain and Ba Guzhen just came out of their respective cabins, apparently because they saw the distant emptiness in front of the ship and the millions of soldiers who were rushing in the air.

On the face, there is a very obvious worry!

Even so, after the two came, they still just waited for nothing, waiting for the words, not asking for advice...

Chapter 2786: Thousands of troops

This point, Ye Xuan is still quite satisfied, after all, is the magic slave that he conquered, and Haofangfang is naturally different!

However, although Gu guessed and Naiboshan did not make a sound inquiry, but Ye Xuan did not dare to delay too much. The army of millions of soldiers in the sky in front of the sky has become closer and closer, and time is extremely urgent. Before the formal action, he must finally verify his speculation.

Between the thoughts, not long ago, I just got into the body and gave it to the three emptiness soldiers who were identified by the phagocytic system. When he was taken out by him, the wave fell in front of Ye Xuan's figure...

The soldiers are not living species, they have no self-consciousness, and everything they do is actually an instinctual expression.

Including swallowing the void!

Including the previous attack on the black hole star field, which was provoked by a special wave that made them extremely uncomfortable, and launched an attack.

In the same way, this vast area of the devour system called the black hole of life, in the consciousness of all the soldiers in the entire group, is just like the homeland, the nest, and all the existence of this black hole star. They will be instinctively regarded as intruders, so that they will attack the Gu guess, which is actually an instinct in driving.

At this moment, this instinct is once again revealed.

Just been released by Ye Xuan from the immortal world, these three heads are only a small size, and they look a little smaller than the washbasin. The body shape is still not falling, but it is the first time At the same time, I rushed over to Ye Xuan.

"squeak!"

"squeak!"

.....

Its sound is sharp and reveals a dull meaning, just like a nightingale.

The whole body is black and inky, even the eyelids are the same. Let Ye Xuan look at each other and inexplicably give birth to a strange and strange feeling.

What is even more striking is that these three soldiers are sharp and unparalleled, and even the sharp mouthparts of the cold and cold, and the eight limbs like the blade!

At this moment, the three-headed squad also screamed at the same time. The long sharp sharp mouth of the screaming screaming had already opened wide, like a pair of sharp cuts, wanting to choose people and ruin.

The blade-like legs and legs were also swaying, and there was a faint sound of breaking through the vagueness.

The mouthpieces and limbs of the Void's scoops, even the hard hull of the murderous spaceship, can't resist it. The typhoon is the supreme existence of the ninth order of the black hole, and it is still the body of the main body. .

Even so, it was still under the slap of the face, and the three short-skinned soldiers tore off a few pieces of flesh and blood.

With Ye Xuan's current realm, I really want to be hit by their mouthparts and bladed limbs. How can I imagine it?

For this reason, after seeing this scene in abrupt years, the Nebo Mountain and the Paigu who were waiting for the moment were even stunned, and they were ready to shoot.

"Don't panic, I'm fine!"

Ye Xuan is really afraid that these two guys will directly kill the three empty squadrons that are coming to the face. After all, they are the supreme power of the black hole, and the strongest among the three emptiness soldiers. However, it is only a two-star squad, and it is definitely the weakest existence among the entire squad.

Even if the body is hard, in the face of absolute strength, the same can only be crushed.

Now, Ye Xuan has to rely on these three soldiers to verify whether his previous speculation is indeed no problem. Therefore, he will hurry when he realizes that Ba Gu and Naboshan want to shoot. I waved my hand and did not hesitate to stop drinking!

Wen Yan, Nabo Mountain and Ba Gu's body shape suddenly stagnate, although it feels so wrong, but as Ye Xuan's demon slave, the two of them can't have any doubts about any of his words. resist.

While vocalizing and drinking, the mysterious atmosphere of the hollow medullary crystal in the brain, also under the deliberate urging of Ye Xuan, quietly spread out from his body, although invisible and inferior It's even hard to perceive, but the three empty heads that Ye Xuan's indignation rushed into, were extremely keenly captured in the first place.

"hiss!"

"hiss....."

.....

With a few short-sounding buzzing sounds, the three heads are rushing in the air, and the emptiness of the squad, which is just a few feet away, is actually like an appointment. Without any warning, he suddenly fell to the ground.

Then he went down and took advantage of it. Not only did the eight limbs like the sharp edge of the blade indented into the belly of the cabin floor, even the strange triangle head fell as much as possible, the low eyebrow The pleasing gestures clearly reveal a strong sense of surrender and obedience.

Seeing this scene, the two sides of Nabo Mountain and Ba Gui were suddenly open their mouths and their faces were dull and confused.

As for the rest area on the other side of the cabin hall, Hao Fangfang seems to have suddenly seen the ghost, and the exaggeration of the exaggeration is incomparably exclaimed: "God! Even the fierce emptied beasts are scared like this, Nothing, can you tell Lunjia what you did to them?"

In the discourse, there is a clear meaning of awkwardness.

Ye Xuan was dumbfounded and ignorant, wisely chose to ignore it directly, as if he did not hear the general, and turned to the Gu guess and Naboshan two people looked at the past: "Naboshan left, Gu guess Go out with me, if there is no accident..."

Speaking of this, suddenly suddenly thought of something, with a flash of light in the brain, the words in the mouth immediately stopped, the shoulders swayed, directly pulled out the hole, the body was just in the ship The black hole outside appears in the void, and the Gu guessing has followed.

"call out!"

With Ye Xuan raising his hand, the virtual shuttle was instantly turned into a beautiful figure, wrapped in a faint faint sound of breaking into the body, and he was born into the immortal world.

Since entering the black hole of life, only half a day before the work, Ye Xuan has exposed a lot of secret in front of Hao Fangfang, this matter, let Ye Xuan feel uneasy.

And the two things that he will do next, whether it is to conquer the entire Void Buddhism group, or to brand his own interstellar coordinates in this black hole star field, are extremely important secrets, and there is absolutely no loss.

Therefore, Hao Fangfang must evade and can only avoid it. Otherwise, everyone will be embarrassed in the future. Why then?

After doing all this, Ye Xuan urging the brain to know the emptiness of the medlar in the sea, and the body shape is a turn of the body, striding forward, and calmly rushing toward the front. Millions of soldiers scolded the army.

Actually there is a kind of opposite to the thousands of troops to see, I feel like the breeze of free and easy!

Because of the scene that happened in the cave of the cave, the tying of the mind has been vaguely speculated. At this moment, seeing Ye Xuan rushing to the powerful army of the soldiers, the face suddenly appeared a touch. The color of enlightenment...

Chapter 2787: Big black horn

At the same time as the mind is ignorant, the tying of the foot is not a delay, and the first time has already caught up with Ye Xuan, only separated by the distance, and the whole \*\*\*\* is on alert.

After all, the empty squad that is coming from the opposite side is not a few, and there are millions of giants. If there is a change, even if he is, he can only do his best to protect Ye Xuan's death and squander. Relaxed?

"Booming..."

"Hey!"

It was also at this time that the opposite side of Ye Xuan and Ba Gu was at least a thousand miles from the top of the army, and the huge size of the mountain was empty. At this moment, there was no sign of a sudden scream. .

Its horror and horror, the vast black hole of the dark hole was shaken, and the sound of thunder and screams rang out in an instant, overwhelming, sweeping...

Nearly step by step, it is also closely followed by Ye Xuan's post-guessing momentary discoloration, and the voice is exclaimed.

"This breath... Is it the power of the void?"

"I was able to use the sound and whistle as a guide. In a moment, I turned the force of the void in a large black hole area and turned it into a cage. It was invisibly crushed in all directions..."

"This means, even if it is not a supernatural power, it will not be far behind! It is possible to grasp the law of the void and motivate the power of the void. Its cultivation is definitely not a black hole, at least the origin..."

As the road came out with a scream of exclamation, the look on the face of Gu guessed at a speed that was visible to the naked eye, and the voice had not yet fallen, and it was completely paralyzed.

Seeing the split, I turned to Ye Xuan and took a look at it. "This kind of magical power that uses the power of the void to form a repression is almost unsolvable, and can only forcibly tear open the void with absolute power. The imprisonment cage formed by force."

"At the moment, the vast void of a thousand miles away has been spurred, and the invisible force of the void has condensed inwardly. The closer it is, the stronger it will be. If it is near, the whole condensed void cage It will become extremely tight, and it will be the self-destructive power of the black hole, which is absolutely perfect, and it is absolutely impossible to shake the points, so..."

"Looking at all this has just begun, the barriers to the banned cages are still far away. We must immediately raided outwards. At least for now, the black hole's ninth-order spurt of self-destruction should work!"

The implication is that it is intended to be self-destructive, and to fight to death, we must also protect the rhythm of Ye Xuan's escape from the storm!

Although Ye Xuan's heart is inexplicable, he did not hesitate to shake his head and negated the suggestion of Ba Gu's guess. At the same time, he also turned to the army of the squad in the distance of the void. The words were full of unwillingness: "Only a thousand miles away. Can't you sense it? Time is still too hasty, the marrow crystal is diffused to the mysterious atmosphere in the sea, the amount is too small..."

"If this is the case, then you can only approach it!"

During the speech, Ye Xuan's body shape has suddenly plucked out, and the position remains the same. The army of millions of soldiers who came to the bang came to face.

"call out!"

In the wave, a black mang rushed out from Ye Xuan's left wrist. When he was not landing, it was already black and red. In the end, it turned into a \*\*\*\* mosquito that was breathless and violent. It was bloody.

"How is it possible? It's a breath of breath... is it the original point?"

Seeing this scene, the unpredictable tyrant guessed again and again, and his face was full of sorrow. Although he knew that Ye Xuan had a mosquito, he had always cultivated it as a black hole only.

At this moment, the reason why the \*\*\*\* cockroaches appeared will reveal the hidden real repairs, which is obviously the result of Ye Xuan's temporary inspiration!

"Ha ha ha..."

"An original point, a black hole, a ninth-order grand perfection, plus my magic blood marrow sword, if this is not enough, it will not break the empty cage barrier that has just begun to condense, it is simply no reason. !"

Looking up and laughing, Ye Xuan's figure is still on the opposite side. On both sides, the \*\*\*\* and the tyrants are also closely followed. The master and the servant are all on the way, plus the opposite

army's army. All the time, the invisible void cage was rolled out. In an instant, the distance between the two sides was quickly brought closer.

Right now, it's just a hundred miles away!

"call out!"

"Hey..."

It was also at this time that Ye Xuan once again believed in the hand, and the tears of the demon star in the immortal world were instantly sacrificed, and turned into a \*\*\*\* rush to the sky. Along with the spirit of the sword, the joyful plundering of the circling force, the magic blood sword spirit inside, but issued a fierce and fierce voice, it seems strange.

However, the reason why Ye Xuan is offering the Devil's Blood Tears at this moment is actually not the reason why the blood of the sword is born in the sword.

But because of this sword's fourth fusion, the fusion of Ye Xuan's choice is a small blue chisel called the broken barrier.

This treasure has the magical effect of ignoring the space, and it also has a strong penetrating ability for the banned isolation barrier of various arrays.

After the completion of the fourth fusion, these attributes are all perfectly inherited by the Devil's Blood Sword, and this situation is the best chance to try!

In the devil's blood, the tears of the sword were sacrificed by Ye Xuan, turned into a \*\*\*\* color, and in the whistle of the whistling rushing to the sky, an unexpected accident that made Ye Xuan unexpected, but at the moment, There was no sign of sudden occurrence.

"Hey..."

A fierce whistling sound with a strong sigh of sorrow appeared at the same time, and at the same time, there was a black awn that was tiny to the tip of the needle. With the tremor of this humming sound, it instantly slammed from Ye Xuan. And out, the wind will rise.

When I whizzed away, it was more than ten miles away from the blink of an eye. It skyrocketed into a black diameter with a diameter of one foot and a length of more than one meter, and the swelling of this skyrocketing is obviously continuing. Crazy soaring...

"Isn't that \*\*\*\* horn? What is the situation?"

Such a strange scene, on the spot, I was shocked by Ye Xuan, and suddenly lost his voice.

This is the mysterious giant horn that he obtained from the depths of the underground sacred caves of the Black Mountain. Not even the phagocytic system has identified its attributes and origins. Later, it was thrown into the body by Ye Xuan. boundary.

At the moment, this mysterious \*\*\*\* horn can not only become bigger and smaller, but even easily and easily rushed out of the immortal world. What is even more strange is that in this process, not only Ye Xuan did not notice it. Even the phagocytic system seems to be completely ignorant, otherwise the system's prompt tone has already appeared.

"Booming..."

Just as Ye Xuan's heart suddenly began to stun, the whole brain smashed into a group. The \*\*\*\* horn that whizzed away in the extreme speed had soared, like a huge black arrow, rushing to the sky.

Then, a huge thunder blast came, and the invisible void cage was actually penetrated without any effort and completely collapsed.

In the next moment, the \*\*\*\* horn, which is like a power, suddenly sinks downwards, and the apex points directly to the empty sky, from the air to the sky, squatting...

Chapter 2788: Fierce

"call out....."

With the huge black scorpion's horn spurting toward the ground below, the black hole along the way seems to be torn apart, giving off a sharp, piercing sound, and it is becoming more and more urgent. This represents the speed of the soul of the soul, but it has been climbing rapidly.

This scene, unlike the previous emptiness of the Emperor's display of the emptiness of the law of the void, caused a huge scene of thunderous thunder, there is no such awe-inspiring momentum.

But this sharp and rushing, strange and empty voice, but inexplicably gives people a sense of extreme danger of tension, inexplicably a feeling of inability to face!

At this moment, Ye Xuan and even the whole person was a little lost. At this moment, he suddenly had a very strong intuition, that is, the empty head of the ground, I am afraid that this time I really have to escape.

This black screaming giant horn is so fierce and violent that it can't hide, can't hold it, one sentence: one is over!

"Hey!"

Just as Ye Xuan's thought flashed through this thought, a screaming scream in front of him also came out, and a small piece of black hole was emptied, revealing endless despair and sorrow.

This screaming screaming is the empty scorpion that has at least the original point of view and is as big as a hill.

Ye Xuan was immediately shocked.

Although he is not optimistic about this empty emptiness, he even intuitively believes that the other party must be escaping this time. But in any case, this emptiness is the supreme imperial person of the whole emptiness of the squad, with at least its original point. The supreme repair, and the hard-to-

extreme energy crystal body, is the weak offensive that screams at the corner of the black soul at the moment, is it so weak?

Not only did there not be a willingness to fight, but even the roar of anger!

Although there was a long scream, but the whistle of the whistle, in addition to despair, sorrow and so on, full of disappointing emotions, there is no trace of resistance!

Everything about this is too strange, and the Void Emperor simply does not show the attitude and reaction that should exist as an original point of existence!

The feeling of giving people is like a scorpion ant in a star's nuclear environment. When faced with the full force of the existence of the black hole, it completely gave up the struggle, only despair!

As the supreme emperor of the Void squad, this emptiness of the Emperor, it should not be like this, at least, the dignity of the emperor should always have a little bit?

These thoughts flashed through my mind, and Ye Xuan suddenly jumped in a sudden, a speculative and unbelievable guess appeared in my mind.

Could it be that the strength of this black scorpion giant horn has reached the point where even the original point is strong, when faced, it can only be reduced to ants, and there is no sense of resistance, even dare not even dare So what is the level of anger?

If this is the case, then what is the level of terror that the body of this black sorcerer's horn is cultivated as a realm?

Then, Ye Xuan suddenly remembered the small black horn formed by a large number of sacred beasts that had been collected by the immortal world.

Those sorcerers are similar in size to the average monkey, but the black horns are only the size of the thumb. According to this ratio, the body of this black scorpion giant must have at least one small meteor.

In this way, the supreme existence of the original point is generally crushed as an ant, and it is said that it has passed.

"Hey..."

Just as Ye Xuan's thoughts turned a hundred turns, the black hole in front of the dark air, once again came a scream of shouting, still from the mouth of the empty Emperor, but this time, but clearly more shocking, There was a thick and devastating death!

Ye Xuan stared at him, his face could not change again in an instant.

The scene captured in the line of sight, and indeed, just like his instincts, this head has the emptiness of the original point of the sky, and in front of the black scorpion giant horn that is shot from the sky, it is indeed vulnerable!

At this moment, the body of the black energy crystal, which is as big as a small bag, has been shackled from the back of the scoop back by the black horn of the soul.

The black scorpion giant horn that has been around for a long time is still only about a few feet away from the back of the scoop. The other major horns are all plunged into the body of the empty scorpion.

The body of this guy can all be condensed by a mysterious crystal that is repelled by the cosmic void in the inward condensing, hard to the extreme, but under this black scorpion giant horn, it is almost like a thin Soft tofu in general, only on this point, can basically prove that this black soul is extraordinary!

At this moment, with the black scorpion giant horn coming from the middle of the vamp, the emptiness of the emptiness of the emptiness of the singer was quickly received, and no breath!

What is even more bizarre is that from this moment on, even the huge black crystal body like a small hill has shrunk rapidly, and the speed is very fast, and the naked eye is instantly smaller. Big circle.

The black horn of the black scorpion that is plunged into the body is clearly capturing the body energy of the starry sky, and the whole body of the latter was originally formed by pure black energy crystals. So it seems that this kind of smashing In the end, I am afraid that only one hair will not be able to stay.

The facts also prove this point, just less than a minute in a short time, the empty body like a small bag of a small bag will disappear completely.

Undoubtedly, the capture of this black scorpion giant horn is extremely horrible, not only is the speed of the people stunned, but also more efficient than Ye Xuan's previous illusion of the illusory body.

After the latter was finished by Ye Xuan, at least a small black horn was left, but the head was empty, but nothing left.

And as the huge body of the Void Emperor was taken away, the black scorpion giant horn appeared again again. After a slight tremor, it was directly vacated and flew to the black soul. The accident of the giant horn appeared, thus stopping the army of millions of soldiers scouting toward the rushing.

"call out....."

The sharp sound of the emptiness came, and after the black scorpion giant horns flew over the sky above the army of the million soldiers, it was not able to stay, and the circle of the circle circled rapidly, giving people a choice. The next prey, but because there are too many choices, I don't know how to start.

Below, with the rapid circling of the black horns, the emptiness of the emptiness of at least a million, all of them trembled without exception. reaction.

Even the tens of thousands of large-scale squad leaders at the forefront of the entire army of squadrons are all the same, without exception...

Chapter 2889: Arrogant

The body shape of the 10,000-headed squad is also large and large. The largest one has a diameter of more than ten meters. The existence of this is about ten heads, while the others are all about Zhang. The number is much more than a million.

"call out....."

In the constant speed hovering, the black scorpion giant horn in the upper half of the army of the 10,000-strong squad seems to be unable to decide. It took more than ten seconds to pass, and it is still circling constantly.

In the face of all this, the army of the million soldiers scolded and did not dare to shake, but Ye Xuan and his side's hegemony were also the same. He had already stopped his body shape, looked at the front with a look of shock and vigilance. The brain is indiscriminate.

After all, it's too sudden, and the result is so strange, a black horn, it's so unbelievable that it's so fierce.

As for the \*\*\*\* mosquitoes, the \*\*\*\* scorpion, at the same moment that the black scorpion giant horns plunged to the back of the emptiness, has been taken by Ye Xuan in the pet beast ring.

On the one hand, I was worried that the black scorpion giant horn had an interest in blood scorpion. After sucking the empty scorpion, I turned around and went to the side to clean up the blood. After all, the latter is at least the supreme existence of the original point.

On the other hand, it is worried that \*\*\*\* madness will take the initiative to provoke the other party. I am afraid that it will be really troublesome at that time!

It is a pity that when you really want to come, you can't hide it.

What's more, this so-called big trouble is actually from the body of Ye Xuan.

When people finish things, they may not come back!

This is also the case at the moment!

In the line of sight, in the black hole in front of the black hole, the black screaming giant horns, after hesitating and smashing, finally did not shoot again, and suddenly turned a corner, and it turned into a black streamer in the blink of an eye. The U-turn spurred in the direction of Ye Xuan and Ba Gu's master servant.

The speed of coming seems to be three points faster than when he left, and, at the same time of rapid approach, the huge size of his master is the same as before, in the process of lasing, quickly Changed.

The only difference is that this black scorpion giant horn was previously spurred from Ye Xuan's body. It was a black smudge of black dust, and then it rose in the wind and expanded rapidly.

But now, as it turns back and rushes back, its shape changes just like the previous reversal. The black corners of the original giants are also at a speed visible to the naked eye. Suddenly shrinking rapidly...

This is clearly intended to be turned into a black dust like a grain of dust, and then re-enter the rhythm of Ye Xuan's immortal world!

"Damn! What does this guy think of me? Free old nest or Dongfu?"

Ye Xuan saw the black scorpion giant horn at a glance, and the face was completely changed in an instant, and the gloomy water was shining. The cave in the body was sacrificed: "We will leave immediately, and we must never let this dead black corner be wrapped up!"

The latter sentence seems to be said to be on the side of his guess, but in fact, this is actually the true intention of Ye Xuan at the moment!

Previously, he took this black soul to the immortal world, but because it was considered extraordinary, even if it is extraordinary, in the eyes of Ye Xuan, this black horn is only a dead thing. !

But now it is totally different!

When I thought of the other side, even the horrible emptiness of the Emperor could easily kill in an instant. Ye Xuan had a feeling of fear after a cold sweat on his back. A terrible existence, for a while, has been hidden in the past. The immortal world in his body is simply creepy!

Because of this, the black horns of the black scorpion actually saw a roundabout and came to their side. Ye Xuan almost scared the past, and the only thought at the moment was to quickly and immediately leave here, the sooner the more it is good!

"call out....."

Just as he and the tyrants guessed the shoulders of the two men, and the body shape directly rushed into the interior of the cave shuttle cabin that was escorted by Ye Xuan, the black horns that roared from the distance, at this moment, were also extremely fast. When the land came to the front, it happened to be the same as the black awning of the grain-like dust at the same time as Ye Xuan's figure, and it broke into his body and disappeared instantly!

"Hey!"

With the sight of the afterglow just catching this scene, Ye Xuan's heart suddenly trembled, and the shape of the inner cabin that had just stepped into the cave was almost fell to the ground.

"Damn black horn, you get me out..."

In the blink of an eye, Ye Xuan's face was completely pale as paper, and his teeth screamed and screamed, and the Fang Fangfang in the cabin was shocked, and he subconsciously hurried back: Call me to go out?"

"How come you have your own things? Play while you..."

Ye Xuan almost broke his breath, and he stunned Hao Fangfang with a sigh of relief. He turned and rushed out of the hole. He didn't ask much, and he also followed closely.

The reason why the warship was sacrificed and quickly swept into it, in order to escape from this place, to avoid the entanglement of the black scorpion giant horn, but now everyone has successfully entered the immortal, and then stay in the cave It makes no sense.

After all, the trouble of this black scorpion giant horn is not solved for a while, and the black hole outside is empty, but there are still a lot of emptiness soldiers to deal with!

"call out!"

After the suspicion followed by the rushing out of the hole, Ye Xuan gloomy and suddenly waved his hand, and immediately it was in the body.

Then, after a little indulging, even if you ask the body's phagocytic system a lot, the natural question is the black scorpion giant horn.

Unfortunately, the final result made him disappointed.

The black scorpion giant horn has walked back and forth in this black hole void and the immortal world in the leaf turn, but the phagocytic system still knows nothing about it.

What's more, whether it is the phagocytic system or Ye Xuan himself, the black giant horn is not visible at the moment!

The goods are clearly in the body of Ye Xuan, but now, as if completely disappeared, no matter how hard Ye Xuan tried, he could not find the whereabouts of the other party.

Such a strange situation made Ye Xuan unacceptable, and he was mad at the scene. After all, after the refining of the immortal world, the immortal world has long been connected to his blood.

But this black scorpion giant horn has ruthlessly ignored all of this, and it is only a strong and arbitrarily in and out. The key is that the other party clearly depends on his own body, but Ye Xuan is how to toss it all. Traces, it's so embarrassing!

One thought of this, Ye Xuan's whole heart is a cold half, this dead angle is not only the strength of terror, the key is quite arrogant and shameless, wrapped up by this shameless and powerful existence, I am afraid that there is no good life in the future!

Chapter 2890: Crystal and medullary crystal

After a tumultuous entanglement, Ye Xuan gradually calmed down, and the ups and downs of the mood also tend to calm down!

With the terrible strength of the black scorpion giant horn, if it is really unfavorable to oneself, then worry is also stunned, and it is simply unable to resist. In this case, it would be better to throw this in front of it and then slowly try to solve it.

At least from the current situation, the other party seems to have not revealed any bad intentions to himself. The reason why this black horn is in the immortal world in one's own body is that it is hard to move the nest. There may be other reasons for this. If you look back and think carefully, you may not be able to find the crux of the problem. , solve this matter!

Thinking of this, Ye Xuan-teng felt a big heart, and finally it was the time to throw this broken thing thoroughly behind his head!

After the peace of mind was settled, he turned his head and swept to the hollow army of the dark hole in the distance, and the body shape quickly swept away.

Although the Void Emperor hangs, but the forefront of the army of the millions of soldiers, there are still more than a thousand giant squad leaders, and three of them have reached the size of three feet, although they can't Compared with the empty space of nearly 20 meters in diameter, but in the eyes of Ye Xuan, the temptation of these three giant squad leaders is still quite small.

The Void Emperor is gone, then it will only be the second best, and it will be good to bring these three giant sergeants together.

With such an idea, Ye Xuan, who once again expressed his hopes, quickly passed down to the front of the army of millions of soldiers.

What makes him amazed is that all the soldiers in the entire army of millions, at this moment, seeing him plucking and plucking, all without exception, all of them are moving and swaying, just like the black horns. The performance of the black holes above them is hovering like a whirlpool, which is clearly a performance that is in great fear!

Ye Xuan thought a little, and soon realized it!

Obviously, the fear of these emptiness soldiers is not their own, but the black scorpion giant horn that killed the emptiness of the emptiness!

Before, the black giant horn rushed out of the body, these emptiness soldiers can all see it with their own eyes. In addition, the black horn will smash the empty scorpion, and finally screaming into one's body.

This scene was also seen by all the Void soldiers.

In this case, it is okay to say that the black giant horn and Ye Xuan are not related to it. I am afraid that he may not be able to believe it, let alone these hollow squads?

The reason why these hollow squadrons showed such a fearful reaction immediately after Ye Xuan approached, the roots are here!

To put it bluntly, it is a word. Now, in the eyes of these void soldiers, Ye Xuan is completely a fox and a tiger, regardless of whether he has this meaning or not. Anyway, the effect is absolutely not adulterated!

After realizing this, Ye Xuan suddenly shook his head and smiled, and did not go too far into it. When he even knew the mysterious atmosphere of the hollow crystal in the sea, he tried his best to force it out.

This breath is mysterious and invisible. Ye Xuan has never touched it before. It is obviously unique to the emptiness of the mother tongue. Absolutely can't do it. At this point, no one can fool the hollow squad. They are originally the void. The accessory products of the mother's marrow are said to be the same source.

For this reason, the keen sense of the emptiness of this kind of breath is obviously unquestionable.

Before Ye Xuan was too far away, and the amount of mysterious air that was scattered in the sea of his mind was not very large, which led to the fact that even the emptiness of the emptiness of the Emperor The strong, did not feel the breath of his body.

At the moment, Ye Xuan stands in front of this army of millions of soldiers, and fully motivates the mysterious atmosphere in the brain to be swayed out of the body. In this case, the original is most familiar with this atmosphere. Sensitive Void Scouts were almost all the first time they were sensed.

In a short period of time, all the void soldiers in the entire army of millions of people, all of them all looked up and looked at Ye Xuan. In the beginning, all of them were confused and incomprehensible, but gradually, with With their recognition of this breath, the dawn of all the hollow squad began to heat up quickly, and even the trepidation of the figure was completely disappeared without knowing it!

Obviously, they have already approved Ye Xuan, treating him as the same as the virtual mother, or the approximate existence! This kind of recognition, let all the emptiness soldiers take Ye Xuan as the closest and most dependent existence, the original extreme fear of the heart, naturally quietly dissipated!

“Hey, capture the volatility of the crystal, do you receive it?”

Just as Ye Xuan’s heart suddenly succumbed to the change of these hollow squad, the scent of the phagocytic system suddenly rang in his mind at this moment.

What is the volatility?

Is it from these void soldiers in front?

Ye Xuan immediately stunned, and his mind flashed a guess. After a little sinking, even when the system immediately received a reply command.

Immediately afterwards, Ye Xuan felt that there was a faint tremor in the mind of the sea. It seemed to be the emptiness of the medullary crystal that was separated from the spiritual source by the sea.

The whole process lasted for a short time, only about a dozen seconds, and the meaning of the tremor from the brain to the sea completely disappeared.

Presumably it is the so-called crystallization of the crystal, it has all been received.

This thought has just just floated up, Ye Xuan found that there was suddenly more information in his mind. Under the slightest sigh, he even came to realize it. Obviously, this should be the one received by the hollow medullary crystal in the sea. The crystallization is fluctuating.

The void medullary crystals and these hollow scorpions are originally the same source. From the emptiness of the hollow squad, only the hollow medulla can receive and analyze.

The information after the analysis of the hollow medullary crystal is directly burned into the mind of Ye Xuan through the phagocytic system, and he can understand everything immediately after reading it.

In just a few seconds, Ye Xuan has completely realized the clarity of these morphological fluctuations transmitted through the phagocytic system.

What surprised him was that there were three volatility fluctuations received, and it was the three giant scoops whose diameters were about three feet behind him. Among the entire emptiness of the squadrons, only the three octopus kings and the nine-star scorpion king who had fallen down had a small crystallization in the body, and thus they had the urge to read. The crystal forms a special fluctuation, which is the ability to communicate with the virtual mother's marrow.

It is worth mentioning that in the body of the void mother, there is actually a similar crystallization, but the grade is different, so it is called the marrow crystal.

It is Ye Xuan's brain that knows the little black crystals hanging in the sea!
