

Super D. S 2891

Chapter 2891: Branding starry sky coordinates

The whole body of the Voids is thousands of people, but the body is condensed with the crystallization of the crystal, but only the nine-star scoop and the three-headed eight-star scoop, which is enough to illustrate the importance of this crystallization in their bodies.

The medullary crystal that the emptiness of the mother's marrow is given to the phagocytic system is the same in nature as the celestial celestial eclipse and the celestial crystal in the three heads and eight kings, but the level is higher, so it must be more precious and important.

Ye Xuan didn't know it before, but now that he knows it, he suddenly realizes it. This is clearly the rhythm of the emptiness of the mother. After all, it will eventually merge with Ye Xuan's immortal world. The hollow medullary crystal can't be used anymore, and it should be given to Ye Xuan.

For this, Ye Xuan really does not exclude, the entire Void squad is as large as tens of millions, and the giant army that appears in front of his eyes is only following the nine-star scorpion. Elite.

In this vast area of the vast black hole, there are more void soldiers scouting around.

This is simply a dreamy army that is so powerful that it is terrifying. Ye Xuanba is too late to come. How could there be a possibility of rejection?

Through the information from the brain, today's Ye Xuan is basically quite familiar with the entire Void Bronze.

In addition to the number of tens of thousands of soldiers, the strength level of this million-strong army is also included.

The Void Scoop is different from the Human Power and the Devil, and even if compared with the strange groups in the universe, they are still the most special ones.

After all, the whole body of the squad is formed by crystals. They are not only without knowledge, no spiritual power, and even have no brain fluctuations. Almost none of them can be regarded as true pure life.

For this reason, although the strength of the Void Veterans is also high or low, it is impossible to balance and divide with the level of cultivation under the starry environment.

For this reason, in the eyes of this army of millions of soldiers, although Ye Xuan can distinguish which soldiers are stronger and which are weaker, they can't judge their true combat power. What is it?

Before, Gu guessed that the realm of the emptiness of the Emperor was always mentioned in a speculative tone, which is why, because he could not clearly discern the true strength of the Emperor, only knowing Very strong, nothing more.

However, all these things, Ye Xuan through the three messages in my mind, now all have insights.

According to the analysis results of the phagocytic system, the comprehensive combat power of the empty emptiness of the Emperor should be equivalent to the existence of the starry sky beyond the original point, that is, the tenth realm. As for what is the realm, because Ye Xuan has not yet I have been exposed, so the phagocytic system does not know.

The other three heads of the whole group condensed the eight-star king's scoop of the crystallization, and its comprehensive combat power is equivalent to the ninth state of the starry sky.

The back of the three-headed eight-star king's scoop will have a seven-star scoop and a six-star scoop with a diameter of about one foot. Their combined combat power is equivalent to the eighth largest black hole in the starry sky, and Seven realms of the Star River!

Later, it is the average number of soldiers who have reached a million, and the overall combat strength is high or low, but basically they are above the fourth realm of the planet. After all, this one million army can be stationed. In the clan around the Emperor's Nest, the elite of the tribe, in terms of comprehensive combat power, naturally cannot be too weak.

The eight-star king scoop of the three original point strength!

More than a million black holes, the seven stars and six stars of the Star River will be scoop!

Millions of strengths are in the elite of the fourth world of the planet!

This data is too horrible, Ye Xuan was shocked at the first time, and then it was an excitement that rushed into his heart, letting him suddenly have a kind of meat stuff that fell into the Universiade and fell from the sky. The cake just broke into the mouth with a huge surprise!

I don't mention the existence of the whole hollow martial arts group in the middle of this black hole, just the one-million-armed army. If you can take it out and stay with you, the starry sky is big, where is it? Can't go?

Although this is a bit exaggerated, the terrorist power of this army of millions of soldiers is unquestionable.

It is a pity that Ye Xuan just thought about it. This million-million-strong army can not take it all. After all, they basically represent the most elite force of the entire squad, the black hole. Although there are nearly nine million calves in the distance, the soldiers are all the lowest-level one-star and two-star soldiers. Even Samsung has four stars, but not many.

It can be said that once this army of millions of soldiers has been taken away, this black hole star field is no longer the exclusive field of the squadrons in the near future. The strong stars and races in the stars are countless. Will there be some existence, just to see this black hole star field?

What's more, Ye Xuan is also preparing to brand his first star-studded coordinates here. After all, it is enough to be secret. In the future, he will upgrade his system title once again, and he will have a star-to-air transmission capability that ignores the distance between the planes. The crisis of life and death, directly launching the starry sky to arrive here, because in the black hole, in the crisis of Ye Xuan, obviously more protection!

Therefore, this black hole star field must be firmly held in its own hands in any case. Of course, this kind of mastery is actually realized by the countless voids and veterans who stay in the black hole star field.

Therefore, Ye Xuan must leave enough elite scoops, the power is strong enough to ensure that this black hole star field will not be lost!

After a tumultuous fall, he soon had the final decision. In front of this one million soldiers, it is enough to take away 100,000!

The original eight-star king scoop three of them!

The seven-star and six-star scoops of the Black Cave and the Star River will take half of the scoop, that is, five thousand!

The 90,000 on the way is selected from the nearly one million soldiers!

The 100,000 soldiers scoop is already the limit of a Devil's Battlestar. At that time, the Devils in the Black Wind and the Black Mosquito will all be transferred to the same space fortress, and the other, except on the third floor. In addition to the devils who are responsible for the operation of the fortress in the engine room area, other spaces have to be vacated for the 100,000 Void Scoops to be used as a shelter.

Otherwise, Ye Xuan simply can't get them all in the body. Can't just take it around behind him?

After the decision, Ye Xuan even announced the decision to the phagocytic system, let the system communicate with the hollow medullary crystal in his mind, through the hollow medullary crystal, and finally passed to the three heads and eight stars in front. Let them quickly select and determine this 100,000 elite.

As for Ye Xuan himself, I intend to take advantage of this time, alone into the deepest corner of the black hole in front, looking for a suitable location, branding his first starry sky coordinates...

Chapter 2892: Going to the magic star

Soon, Ye Xuan's decision was successfully conveyed through the phagocytic system and the emptiness of the nucleus in his mind. After two rounds of transit, he successfully communicated.

It is a bit too much trouble, but this is no way. Before Ye Xuan tried to communicate with the Nether Crystal, but the other party did not take care of him, and Ye Xuan could not directly and the Void Smooth communication is all that is possible.

After all this was arranged properly, Ye Xuan did not even guess, he indicated that he would stay with the army and wait for himself. After all, what he is going to do this is to brand his first star-space coordinates. At present, it seems that there is no great use, but in the future, it will definitely become one of Ye Xuan's most important life-saving new reserves.

It is really important, so even if it is a magic slave, he does not dare to easily leak specific coordinates!

Soon, he started his body alone and swiftly swept away toward the endless void of the darkness of this star-hole.

Time passed slowly, and blink of an eye passed, Ye Xuan still kept the speed, and has been rushing to the end of this black hole star.

The starry coordinates he branded are at the juncture of the crisis of life and death. The destination for the escape is too close to the entrance of this black hole star. It is obviously not suitable.

With this in mind, Ye Xuan has been in the air for almost two days, from the beginning to the end of the imaginary darkness. Until the end of the scene, even if it is not the end of this black hole. It is estimated that it will not be too far away, and this has finally stopped.

It is too boring, even if it is not far from the front is the end, Ye Xuan is not willing to continue. Usually, you can swim alone in the sky of the comet. At least there are countless stars and stars appearing along the way. But there is nothing in this black hole in the void. For a long time, even if you just want to change your horizons, you can only see different scenes. It is a luxury, not less than two days, Ye Xuan has felt a whole two months!

In order to be safe, Ye Xuan turned around the void around him, and determined that there was no abnormality. Even after a hollow veil, there was no such thing as it. Then it fell into the shape, communicated with the body's engulfing system, and understood the branding of the starry sky coordinates. Specific steps and methods.

In less than half an hour, Ye Xuan has all the insights.

Although he is now selected in this black hole in the void, as the target location for the future sky, but since it is said to be the coordinates of the sky, then all other conditions and arrangements required for the transmission, such as the transmission array, Things like the banned array are naturally not needed.

After all, it is the unique ability of the starry sky title attached to the phagocytic system.

The starry sky coordinates that he branded is actually a mark of the gods. Once the brand is imprinted, then the mark of the **** of Ye Xuan will be integrated into the void in his eyes, fixed and permanently existed here. And there is no trace to follow, and there is no slightest scent, because it has completely integrated into a certain point in this void.

Only when Ye Xuan initiates interstellar transmission in a distant star field, the role of this **** brand will appear in an instant. In the same cosmic plane, ignoring the distance, the moment can be with Ye Xuan. The Yuanshen formed a kind of invisible induction in the darkness, and then, like a navigation mark, guided his starry sky transmission, reaching this place!

After understanding all this, Ye Xuan was completely relieved. Before, he was worried that the starry coordinates of the brand would last for a long time. It is difficult to ensure that it will not be discovered by some coincidences. But now it seems that this kind of worry is completely absent. Necessary, the gods of the gods have been thoroughly integrated into the void, even if deliberately explored, obviously will not have any results!

Under the heart of the mind, Ye Xuan even issued an instruction to immediately mark the starry sky coordinates to the phagocytic system.

Soon, the system's prompt sounded in his mind, guiding Ye Xuan step by step to expand the coordinates of the branding step.

The whole process is basically not too complicated, just to refine the Yuanshen, which has been processed through various means, into a special brand. Then, the brand is branded with some extremely mysterious complex. The way, shoot out of the body, let it connect with the void, match, until the final thorough integration!

However, a few words are simple to say, but in the process of specific operations, it is obviously not the case.

First of all, the pain of the hard-seated separation of one's own gods from the small one is already difficult to describe in words, and then, after separating the gods, Ye Xuan can't immediately adjust. Restoring the interest, repairing the mind, must resist the discomfort of the gods, and fight the spirit, and use the different means and methods to condense the gods again and again. This process is consumed. For a long time.

Later, in the process of incorporating this successful condensed gods into the void, Ye Xuan has to concentrate on the whole process, from the emptiness of the emptiness to the integration of the gods and the final integration. In the end, I didn't dare to slack off from the beginning to the end, and even the whole person had a bit of a fearful taste.

After all, if the integration fails, everything has to start again. If it is true, it will not be a pain to experience the separation of the gods. The key is that the time has passed two days, and then dragged down, the black of the magic star. The mosquito sacred trial can't catch up, and Ye Xuan must not miss it anyway.

Fortunately, the final result is finally shocking.

Just one time, Ye Xuan's first starry sky coordinates were successfully integrated into the selected black hole void.

After all this was completed, the whole piece of void was completely different from that before. Even Ye Xuan himself could not feel the existence of the 缕元神神印, so the result could not help but marvel at him, the last one in his heart. I am worried, and finally completely dissipated!

Subsequently, even if Ye Xuan left the void, and swept toward the road for a long time, then he raised his hand and waved the hole in the body.

After all, when he came, he spent a full day and a half on the way. If he continued to do so, he would have to waste a day in the road. If he urged the hole to return quickly, he could arrive in the past halfway and break up with the tyrant. Where.

At that time, it takes only a little more time to settle the 100,000 Void Scoops into a space fortress. Then, Ye Xuan can leave this black hole and go to full speed, and immediately rush to the Emperor Star. !

In the mind, flashing through these calculations, Ye Xuan directly plunged into the hole in the step of the step, and then, under his full force, the hole in the hidden state instantly turned into an invisible flow vector, blinking Crossing the distant black hole void, disappeared instantly...

Chapter 2893: Zuo Licheng, who is proud of the spring breeze

Previously, the fierce mosquito number carrying the ten sacred sons to the magic emperor to carry out the trial of the black mosquito tribe was to start from the black mosquito star field ten days in advance.

When you vacated the black hole in the middle of the road, it took half a mile to lie behind it.

It was also at this time that the murderous mosquito number was destroyed. More than 10,000 demons in the space fortress were damaged by a small half, while the other ones and more were all entered into a star-rated battleship prepared by Zuo Hongwu. .

This warship is a big commander of the black mosquito tribe. Zuo Fengtai has spent a lot of money. From the outside of the devil's field, not only can the space fortress jump in the long distance, but also inside the hull. It also uses the perfect space folding technology of the Tianji family.

Therefore, do not look at the appearance of the battleship and the general star rating, the captain is only three kilometers, but the internal space is very large, more than 10,000 devil strong, or can absolutely accommodate.

On the same day, this special star-rated warship named Fengteng successfully launched the long-distance starry sky jump at the same moment of the disintegration of the murderous space fortress. Zuo Hongwu and Zuo Licheng uncle and niece also I have laughed and celebrated privately.

Although thousands of devils have been lost, this is not the case for their uncles or the black mosquito tribes, Zuo Fengtai. In fact, they don't care at all.

It's the murderous mosquito number and some of the resources in it that make them feel a pity, but in Zuo Fengtai's view, this is not a problem. After all, on the surface, the murderous mosquito number is accidentally met with a normal accident. In this case, he can apply to apply for another space fort to replenish.

In this way, their father and son actually did not have any loss. Instead, they removed Zhang Wuji, the only one that was only a meteor, and they had a super-metamorphism of the horrible five-level spiritual source. The feeling of being big.

After all, their father and son are obviously having a bad relationship with Zhang Wuji. If they don't get rid of it early, they will be metamorphosed to a heinous spiritual strength. Once they grow up, then the end of their father and son will come. It is.

What's more, don't get rid of this person, with his horrible spiritual strength, this time the other people of the black mosquito tribe to carry out the trial of the Son, including Zuo Licheng who originally thought that he was a reading prince, no With one exception, all of them have to be found in the bookboys who accompany him to study.

The new Son of the Black Mosquito will not be this person.

Now, the name of this saint, with the fall of Zhang Wuji, has returned to the hands of Zuo Licheng without any suspense, this is extremely determined, there is no suspense!

Although the space bastion of the Black Mosquito tribe started ten days earlier, before the murderous mosquitoes collapsed, half of the star road behind them had been spent for three full days, that is, the far side of the other half, The Fengteng battleship has a full seven days.

Although its space jumping ability can't compete with a real space fortress, the difference is not to be more than half of the degree. According to Zuo Hongwu's estimate, the Flying Space Fortress originally only needs three days of distant stars. On the way, they have the Fengteng number, which can be reached in about four days.

As a result, there are still three days of surplus.

Even so, on this road, Zuo Hongwu still did not dare to relax, most of the time to stay in the Feng Teng ship's general control room sitting and supervision.

After all, this trial is about the position of the Son of the Black Mosquito tribe. Can it fall smoothly into the Zuofengtai system. Since then, it has not been as usual, and it has been held by the high priest Zuo Hongwu did not dare to take it lightly!

As for Zuo Licheng, Zhang Wuji was calculated from the heart of his heart. After falling into the black hole area, his whole person was instantly different, and he was proud of the spring breeze.

In the next few days of the voyage, Zuo Licheng had nothing to do with the other seven quasi-sacred scorpions. These seven guys obviously knew that they were only the bookboys who came to accompany the prince to read, and the heart was early. I recognized it, because almost all of my words and deeds are flattering. After four days, I almost didn't send Zuo Licheng, who is more and more sensational, directly to the sky!

Until the evening of the fourth day, Zuo Hongwu, who had been sitting in the general control room of Fengteng, personally came and said hello, saying that it would be possible to arrive at the Magic Emperor Star tomorrow morning, let them raise their spirits, so as not to be rude tomorrow. The three talents, such as Zuo Licheng, suddenly came to amazement. This time, they finally got together again. They all went back to their respective villas and the caves were properly prepared! ~

In fact, even Zuo Licheng, who is a young man of the black mosquito family, realized that after the arrival of the Emperor Star tomorrow morning, his heart also showed an inexplicable tension.

This magical star, even him, has never been here!

It is not that there is no such opportunity. After all, among the top ten tribes of the Devils, any one of the tribes has a space fortress. Although it is not used frequently, it is basically necessary to go to the Devil Star at least once a year. Zuo Licheng is willing to be a tribal master, he can follow the same sentence with almost one sentence.

The reason why he has never been here, in fact, there are also reasons. To put it bluntly, it is afraid of trouble.

As the emperor's main star of the devil's group, the devil's star also has a high priest in addition to the supreme demon. And there is more than one.

One of them just happened to be from the black mosquito tribe. This person is called Wen Xing. It was the former high priest of the black mosquito tribe. At that time, the high priest of today's high priest is still only the son of the tribe. .

With this relationship, the other black mosquitoes are better, but with the identity of the Zuo Licheng tribe, if you come to the magic star, but don't go to visit it, the matter will be greatly The ground lost the etiquette, and it is even more likely that it will be misunderstood by the high priest of Wen.

In the unlikely event that he caused a heart to the left-handedness of the black mosquito tribe, it would be a big joke.

For this reason, Zuo Fengtai has not allowed Zuo Licheng to go to the Magic Emperor at will, fearing his temper, in case he accidentally offended Wen Xing, I am afraid that he still does not know.

The latter is just as extremely repugnant to this boring appropriation, so that it gradually fades away to the magical star to open the eyes of the interest, and suddenly, unconsciously has passed for many years!

At this moment, Zuo Licheng's heart was slightly nervous, because it was because of the high priest's death. Although he did not see it for this person, it is rumored that his strength is quite terrifying. It has already broken through the original point and entered the tenth dimension of the world.

In addition, the level of the spiritual source core is reached the sixth level of terror, second only to the magic king with a seven-level source.

In the face of this level of existence, Zuo Licheng said that it is not nervous, it is absolutely deceptive...

Chapter 2894: Target magic star

After successfully integrating his first star-space coordinates into a corner of the black hole star field, Ye Xuan is offering a virtual shuttle, and after he has swept into it, when he is fully urging, he will quickly move at the limit. Returning to the road.

When the things in front of me were finished, the feeling of anxiety that had been suppressed by him in his heart was more and more uncontrollable.

For Ye Xuan, this time the black mosquito sacred trial machine, he must not miss it anyway.

After all, this is basically the only chance that will allow him to enter the forbidden place. If he misses it, he will not be able to make the corner of the intelligent center of his personal starry communication system immortal. Brain fragments quickly grew up.

If this is the case, Ye Xuan is afraid that the whole person will be depressed.

Obviously, it has an immortal quality and can have more powerful star-to-sky communication capabilities, but because it grows too slowly, it can only show the ability of ordinary starry sky and super brain. This is tantamount to pinching a dragon and dragon, but I can only lie in the backyard every day to smash the firewood, not to be depressed.

Calculating the time, it has been two and a half days since the collapse of the Space Fortress, and before that, the murderous mosquito has spent three days in the first half of the star.

For Ye Xuan, even if I am leaving now, the rest of the time is only four and a half days. If there are other small accidents on the way, the time will probably be tighter, even if it is a black mosquito. Or the Hurricane Space Fortress is on the way, and it may not be sure to arrive on time!

For this reason, after a hasty return, Ye Xuan stepped out of the hole, and then waved it, and immediately took it back to the immortal world. After all, the next thing, it is really inconvenient to let Haofangfang know the goods.

In front, the army of millions of soldiers has already been divided into two parts. The lesser one is the 100,000 soldiers who Ye Xuan had requested to take away. The forefront has an eight-star king with a body size of about three feet. Scoop, the comprehensive combat power is equivalent to the original point of the strong, ten out of ten than the **** have to force a large section of existence.

After all, the latter is only the first order!

After retracting his gaze, Ye Xuan even took out the two space bastions, the Black Mosquito and the Black Wind, from the immortal world, and directly connected the intelligent central super brains of the two fortresses with spiritual strength. His instructions were communicated to the top of the two slaves in the Battlestars, such as Buck.

Soon, the Devil's Powerhouse in the Blackwind Space Fortress quickly retired and directly transferred to the Black Mosquito, but the third layer of the Devil's Powerhouse did not move. After all, the computer room area and The warehouse area also needs people to manage.

As for the fourth layer above, the devil waiters and guards are all there, including the magic man think tank responsible for the fourth-level intelligent central control room.

In addition, the following two layers are basically all vacant, and the second floor of the Devil's Cave House area is a demon powerhouse that has not been left, enough to accommodate tens of thousands of Void soldiers.

As for the other half, it is natural to settle in the first floor of the Wanluo prison.

Although there are still more than a thousand federal powerhouses there, it is estimated that so many strange insects have moved in and cohabited with them, and they have to be defamed on the spot.

But these are not things that Ye Xuan has thought about. Anyway, the cages are closed, and the hollow squad can't get in, so they won't be treated as meat.

Soon, the Devil's Powerhouse in the Battle of the Blackwind all moved away, and Ye Xuan even asked the phagocytic system to contact him in the brain to know the hollow crystals in the sea.

After the order was issued, the 100,000-strong Void Air Force army, like a black wave, quickly vacated into the air, and gradually fell into the main channel of the Black Wind's light film!

At this point, the strength of Ye Xuan's hands before and after the front and back, all temporarily arranged properly.

The lower two layers of the Black Wind are 100,000 soldiers, and the bottom of the black mosquito, Wan Luo Prison, is a million mosquitoes. The reason why it can hold so many mosquitoes is that the body of the mosquitoes is also not Big, and people are used to building nests in the air, and the whole space of Wan Luo Prison is simply being used to the fullest!

As for the upper three layers of the black mosquito, the top layer is still the same. The mosquitoes, Naibo Mountain, and Ba Gu, have been given the right to activate the space door leading to the top floor, including Du Wenxuan Du Laotou.

Later, Ye Xuan's confidants will basically settle in the third and fourth floors of the black mosquito.

The second layer below is composed of five demon slaves and a total of 5,000 demon slaves.

Among them, the four Devils and Thousands of Brigades have just been transferred from the Black Wind.

Only one is the original Devil's Thousand People's Brigade, and the captain is Cang Qingyu.

As for the other black slaves of the Black Mosquito, they are now being brought back to the sea, waiting for the huge expansion of the internal space.

The same is true of the guy who includes the wretched mosquito.

After properly arranging the two space bastions, Ye Xuan's last consideration was his hole.

At the moment, there is too much power in his hands, but basically it is not easy to expose. For example, the mosquitoes and beasts on the bottom of the black mosquitoes, although they are absolutely breathable, they are also instantly put Ye Xuan. Pushed to the cusp.

In addition, it is inconvenient to take out the Battlestar, and his hole shuttle has now been added to the perfect space folding technology by Lu Wenxuan. The internal space is expanded by a hundred times, and even divided into upper, middle and lower layers.

Like Hao Fangfang and Ye Xuan, they are usually at the top of the general control room, and the former obviously does not have the right to enter the next two layers, so he even has the second layer on the second floor with the magic slave The people's brigade, as well as the wretched mosquitoes, are completely ignorant.

In addition, the largest area, with a central square below the bottom of the hand, is basically empty.

After some hesitation, Ye Xuan decided to divide the first layer into three areas, with a square in the middle and one thousand mosquitoes and one thousand soldiers on each side.

After the decision, the mosquitoes and soldiers were quickly selected by Ye Xuan, from the third world of the planet to the eighth world of black holes, each with two hundred!

In this way, in different situations, Ye Xuan can call the power of different realms at any time for his own use!

Then Ye Xuan once again offered a hole in the hole. Of course, in order to prevent the top layer of Haofangfang from peeking, Ye Xuan directly closed some functions, and then let the thousand mosquitoes and one thousand soldiers scoop all enter the following. The first layer.

After everything was settled, Ye Xuan even took the black light film passages of the two space fortresses and waved them into the immortal world.

Later, Ye Xuan also confessed to the two eight-star kings who stayed in the black hole star field through the brain, and the two eight-star kings who stayed behind the black hole star field. It is motivated to turn into an invisible speed vector, going toward the entrance of the black hole of life in front of it, aiming at the magic star...

Chapter 2895: One emperor

Ye Xuan's Dong Xuan Shuttle, together with the imaginary ship with perfect internal folding space refining by Du Laotou, successfully completed the sixth fusion, and now he has his tears and tears, and the glass is not extinguished. Like a cockroach, it jumped into an epic starship.

Not to mention its function, in addition to the internal folding space and the upgraded version of the stellar gun, the light is the eternal array of engraving on the hull, there are several kinds: accelerated array, defensive array, hidden array Law, transmission array method, etc., is dazzling.

It can be said that this epic-class small private warship, after more than six times before and after Ye Xuan's careful creation, is definitely a rare collection that can be seen outside.

Oh, yes, it has also been incorporated into a small private warship called a black hole ship, which has the same solid hull as the large star warships that can withstand the emptiness of the wormhole jump. .

But even so, the ability to crush the wormhole jump does not mean that you have the ability to open the wormhole at any time.

The hole-snake shuttle has a transmission pattern, which is transmitted together with the ship, but this transmission and wormhole jumping are completely two concepts.

Simply put, the transmission, even if the distance is far away, is just that.

But the wormhole jump can be different, and it is usually a long distance directly across a galaxies, which is far from a simple transmission.

In fact, even the three-kilometer captain's star-rated large-scale warships do not have the ability to wormholes at any time and anywhere.

This type of star-rated battleship, in order to carry out a long-distance wormhole jump, must first rush to a natural cosmic wormhole that has already been identified, and then enter it to begin.

The left Hongwu ship is an exception. The ability in this respect is clearly added, just like Ye Xuan's hole-throttle, possessing all kinds of capabilities that are not available in small private warships of the same type.

However, it is obviously a shortcoming of the wormhole in the space space. Because of this, Ye Xuan can only choose to use the black wind number, otherwise it will be transmitted by the short-range starry sky. When I arrived at the Magic Emperor, the daylily was cold!

After returning to the hole and rushing out of the black hole of life, Ye Xuan went on for more than an hour, and finally stopped in a very empty void. This time, it was still only he and Gu guessed the two people out of the hole. As for Hao Fangfang, Ye Xuan did not dare to let him know about the Battle of the Black Wind.

However, considering that the top layer of the hole is only one person left, and in the next few days, it is unlikely that he will sacrifice the hole from the immortal world of the body. Yes, Ye Xuan is at the hegemony. Guessing that before the two left, they also deliberately went to the second floor below, bringing the guy of the wretched mosquito to bring him away, lest he should shut down such a loving guy alone in the past few days. Don't be crazy about living!

The reason why I personally went to the middle level was because the access to the different floors of the hole in the shuttle was granted, and Ye Xuan was not open to the wretched mosquito.

Since the goods were actually accepted as a magic slave by Ye Xuan, although it is much better than before, it still shows some extremely unreliable actions from time to time. This point can only be attributed to the fact that it is difficult to move. The original reason.

But since then, it has left a lot of attention to this cargo, who knows what he is going back and tossing out what mess!

After waving the hole to the immortal world, Ye Xuan even opened the Battle of the Black Wind, and directly opened the hidden array, so as not to be seen on the way to the Magic Star, this is the magic One of the scouts of the top ten tribes of the human race, and the magician who knows it, it must be true.

Subsequently, Ye Xuan entered the Balewind with the Gu guess, and immediately issued full-speed driving, and at the same time opened the universe wormhole connection mode. Once the successful ditch was connected to the stable cosmic wormhole, the wormhole jump immediately!

In addition, Ye Xuan finally deliberately sighed, immediately after the arrival of the magic star in the star domain, immediately stopped, absolutely not trade, so as not to expose.

After confessing all this, Ye Xuan does not have to frequently ask questions about the itinerary. What are the accidents? Naturally, there will be a demon slave.

You must know that the magic man in this black wind has been conquered by Ye Xuan and become his magic slave, but their understanding of the magic star has not been erased, and the black wind Obviously it is impossible not to have come to the Magic Emperor, so for them, the next voyage is basically not much different from the light car, and Ye Xuan has too many questions, but it is superfluous.

Taking advantage of this time, he sat down directly on the animal skin sofa in the luxury hall in the core area of the top of the Black Wind, and then directly connected the internal wind network system of the Black Wind through the personal star communication system in the body. And the conditional search was released, and all the information about the magic star was collected for research.

With regard to these materials, there is obviously some in the Super Brain Intelligent Center of the Blackwind Fortress. After all, this is the top ten scouts under the Devil's Tribe, which can basically be regarded as an extremely important military institution. The necessary information and information must be kept in the database for recall.

Through the information in the database of the Black Wind, Ye Xuan soon had a certain understanding of the general situation of the Magic Star.

The Magic Emperor is located in the central area of the entire Devil's Star Field. Although it is customarily called the Magic Emperor, in fact, it is not just a single star, but a main star and two. A small satellite consisting of a small orbit around the main star.

These two smaller satellites are called Magic One and Magic Two, respectively. They are small, just for the Magic King. In fact, Magic One and Magic Two and Magic 10 The main star of the big tribe is similar, such as the black star of the star of the mosquito family.

The two main satellites orbiting the main star, the magic star, is a rather rare giant star. The diameter of the star has reached several times the size of the magic and the magic, and the surface of the star The area is much wider and wider, and naturally you can imagine it.

To make an image metaphor, three stars are put together, basically the difference between two apples and one watermelon!

On the two satellites, there are also a lot of magical strongmen, and the magic man on the magic star is obviously more.

Among the top ten tribes of the devil, there are ten devil stars. Although the scouts of each demon star are about 10,000, if you count other ordinary devil civilians, each devil's star The total population is hundreds of thousands, ranging from 30 to 50.

In other words, the total population of a demon tribe is basically between three and five million.

The top ten tribes add up to three to fifty million.

The total number of demons on the three main stars, two guards and three stars of the Magic Emperor is also more than 30 million.

That is to say, the entire group of devils has almost half of the devil, living on these three central domain stars...

Chapter 2896: Secret of the source core

As for the environment, the three emperors of the Emperor's Star are all beautiful and high-quality stars with comfortable climate, and the entire royal family of the devil's group is standing on two satellites. Inside the Central Magic King.

The magic emperor land accounts for two-thirds of the land, but the ocean is only one-third. The power core of the devil's group, the magic city, is located in a vast plain in the center of the whole continent.

The Emperor City is also not just a one-city city. It is also divided into two major areas. The inner inner city belongs to the imperial city area, and the wider city surrounded by the imperial city area is the outer city. !

Like other demons, the Magic Emperor has no defensive array of stars in the third world human race technology camp.

In other words, the atmosphere of these three stars can be entered at will, whether you are directly fleshing across the void, directly falling into the star's inland, or urging the ship to come, no one will stop you.

However, in the Magic City, it is absolutely impossible to vacate. As for the sacrifice of warships, let alone the case. Once this happens, the Magic Emperor in the city will shoot at the first time.

This kind of ban is not only for the upper part of the central imperial city area, but also for the wider outer city, even within a hundred miles of the outer city, it can only be sown in the low body, the battleship Class, the same is not allowed!

As for the power structure, it is similar to the feudal monarchy in the age of the human race. The demon emperor is supreme. There are civil and military officials under it, and the commanders of the top ten tribes are equivalent to the kings of different territories.

Different from the feudal monarchs of the ancient era, the demon emperor is not only respected, but his personal cultivation is the most powerful among the demons and even the entire devil.

It is said that in the three stars of the Emperor and the Second Emperor of the Emperor's Star, the supreme power of the tenth state of the world is at least close to the hands.

As for the existence of the ninth state of the original environment under the cave, it is obviously more.

In the absence of this hole of less than ten people, the Emperor's cultivation is recognized as the most powerful, but it is not known in the cave, but the level of the spiritual core in the brain is As everyone knows.

The spiritual core of the Emperor has completed six evolutions, and now it has reached the seventh level. It is a unique existence among the entire group of demons.

In fact, the level of the spiritual source is slightly lower than that of the Devil. It reaches the sixth level of the Devil Power. In the whole Devil, it is absolutely a phoenix scale, even if it is the Emperor of the Devil's Star Field. All the six-level source nuclear owners on the three satellites are still together, and they still don't have enough hands. Ye Xuan learned from the database of the Black Wind that there are only two people.

However, before he seemed to have heard the mosquito king of the mosquito star mentioned, it is said that in the magic star, there are three generations of the royal family ancestors who are still above the contemporary demon, the level of their spiritual core. They are also the sixth level.

At the moment, Ye Xuan learned from the Batuary Valley database that the two six-level source nuclear owners, one is the demon emperor of the Emperor of the Emperor, and the chasing of the caves!

The other person went out from the black mosquito tribe and entered the magic king star with the appreciation of the emperor. He jumped from the high priest of the black mosquito to become the high priest of the emperor!

Regarding the fact that the latter's spiritual source is the sixth level, Ye Xuan has heard it before.

Wen Xing is also a supreme strongman who has been trained as a cave!

Both Wenxing and Chanas are currently the most prestigious of the emperor. In the entire Devil's domain, it is simply one person, above all ten thousand, the highest authority of status, in the whole devil In the ethnic group, there are no two!

The only difference is that the demon Guardian is responsible for the security guards inside and outside the magic city, and the high priests of Wenxing, on behalf of the emperor, are also located in the central city area. At the same time, the trial of the Son of the Ten Great Tribes was also carried out by the High Priest of Wen.

As for the entrance to the Forbidden City, it is also in the Imperial City area, not far from the Holy Devils Temple. However, all the people responsible for this place are the blood of the Emperor.

Only then can you see the devil's royal family, and pay attention to this sacred forbidden land.

It is said that the generation of the demon emperor who has grown up in the whole group of the devils before the endless years is the opportunity to get from this forbidden place.

Its spiritual origin is the highest level of existence in the entire history of the Devils. After seven evolutions, it reached the eighth level!

Seeing this, Ye Xuan suddenly remembered the crazy mosquito king.

The latter left a spiritual imprint in his knowledge of the sea, which can protect Ye Xuan's knowledge of the sea from being explored by the demon of the demon who is above the nuclear level.

Although this **** branded Ye Xuan is completely unaware of it, but wants to come to the crazy mosquito king should not deceive him in this kind of thing.

However, let Ye Xuan always have some doubts, the crazy mosquito king claimed to have the same nuclear level as the legendary generation of the emperor, but also reached the eighth level.

I even sighed that the source nuclear nucleus was not at the ninth level. After all, it was just a swearing ant, as if it were completely unfair to his own eight-level source nucleus...

Recalling this, Ye Xuan went to God without knowing it, and fell into the speculation of the mystery of the devil's source, and the information obtained from the Buffalo Super Brain Center database was also read.

Ye Xuan simply took out a small space tower with a large number of sacred beasts from the immortal world. Then he took some sorrowful beasts from the tower and began to learn the power of the spirit.

.....

Unconsciously, four days passed by.

In these four days, Ye Xuan, who has entered the state of cultivation, has long been obsessed with it, completely unaware of the passage of time!]

It was not until he came to him that he came to him, and he carefully extended it with his spiritual strength. After reminding Ye Xuan, he was suddenly amazed.

Just a few of the soul-stricken beasts that took out the space tower were also taken, so they immediately got up, and the black little horns scattered all over the place were collected in the body, and then they asked the black wind to sail in the sky. .

On one question, Ye Xuan even made a big jump.

Unknowingly, this time I have been smashing the soul of the beast, it has already passed for four days. It is no wonder that the black small corners of the ground will be a little bit dense.

Fortunately, although there was a small accident on the way, it was delayed for a lot of time. After four days of starry navigation, the Black Wind finally arrived at the Devil's Star Field. Now it has stopped at Ye Xuan's embarrassment. The secluded side of the dead star is abandoned, and the hidden array is always open.

This place, although not too close to the Magic Emperor Star, but at the speed of Ye Xuandong virtual shuttle, within a little half a day, will be able to arrive!

Calculate the time, just two hours before the trial starts, enter the magic king star...

Chapter 2897: a strange mosquito

Time has been rushed, and Ye Xuan did not dare to delay any more. When he and the Gu guessed together, he took out the Battle of the Black Wind, and then raised his hand to reap the weight of the

body after the immortal world. Xuan immediately immediately sacrificed the hole in the cave, and the stepped step entered the cabin with the tyrant.

Originally, I wanted to immediately spur the hole in the hole and drive to the magic star at a very fast speed. However, Ye Xuan's forefoot just entered the cabin, and everything he saw in his eyes was cold, but he was almost directly under the cold. Oh, even the idea of immediately hurrying and rushing to the road was instantly shocked.

In the line of sight, the two guys, Hao Fangfang and the wretched mosquito, obviously showed a strange and strange feeling. The wretched mosquito was actually like a big man, and he spread out and leaned against the animal skin sofa. Although Fang is also sitting aside, his hands are now clearly holding a pair of stinky scorpions.

Moreover, the shoes and socks were taken off, and the trouser legs were rolled up two layers!

This product is clearly helping the scorpion mosquitoes to pinch their feet, the face of the charming color, while the latter, the body shape lying on his back, his eyes slightly squatting, his face is happy to satisfy the expression of expression, the mouth and nose actually sighed back and forth Gently rubbing the ground.

The sound was introduced into Ye Xuan's ear, and in a moment he gave him a feeling of creepy hair, and the hair of the whole body was erected.

What makes him even more surprised is that the wretched mosquitoes in front of him seem to be more and more like the virtue that was originally intended to be accepted by slaves.

This kind of expression, this kind of expression, including the old cat's screaming sound of spring, etc.... All of this, anyone who saw it, can never think of the existence of the magic slave!

"Master, you are here..."

At this moment, the wretched mosquitoes on the sofa squinting at the eyes just saw the shape of Ye Xuan and Ba Gu's sudden appearance through the slight eyes. The guy immediately took the pair of stinky scorpions back and covered them. Sincere smile, nodded and rushed to the leaves and screamed.

On the other hand, Hao Fangfang's demeanor showed that there was no slight embarrassment and embarrassment. It was as if he had just called the **** to the sluggish mosquitoes and slaughtered the stinky scorpion. It was completely natural and reasonable.

There must be a problem here!

The thought flashed through the brain, and Ye Xuan's eyes looked at the wretched mosquitoes with a suspicious color, and then he let Gu guess to bring him back to the second floor below, and himself, the first time At the beginning, I started to push the hole in the hidden array method, and in the direction of the magic star, I started to fly at full speed!

As for the difference between Haofangfang and the wretched mosquito and insects, Ye Xuan is very suspicious, but now it is really not a matter of remembering this kind of thing, busy with the urgent things in front of me, then there is time to slowly explore!

With Ye Xuan unsuccessfully urging all the time, after a small half day, the starry sky in front of the cave of the virtual shuttle, finally appeared a large two small three eyes revealing the green color of life, it is clear that the magic star finally arrived. !

If the time is full, Ye Xuan will choose to stop after the long distance, and then take the hole shuttle, put it back, and then physically cross the void and enter the magic star.

However, at the moment, the official opening of the trial of the black mosquito tribe has been only two short hours, and there is actually a small space between the front and the magic star. In addition, after entering the interior of the magic star, due to this star The volume is unusually large, so the surface of the stars in the atmosphere is also particularly vast. If the body crosses the void in a flesh, as long as the last two hours are spent a little less.

In the event that other small accidents are regenerated, I am afraid I will miss this trial of the Black Mosquito.

Taking into account these, Ye Xuan hesitated for a few moments, and finally, after all, he was still a heart, so he directly spurred the hole and went to the speed.

Soon after, the hole-opening method of the hidden array method was opened, just like an invisible meteor electric vector, and it quickly rushed to the atmosphere of the magic star.

As a short burst of fog appeared in sight, the view to the front of the battleship instantly reflected a large expanse of green.

This is clearly the best livable life star. The green mountains and green waters are almost indistinguishable from the administrative stars of the third cosmic human race. Even the buildings are roughly similar, but the style is quite similar. It's different.

Ye Xuan only swept a few eyes at random, and then he took back his mind and directly issued instructions to the personal star communication system in the body, letting it connect and access the star network of the magic king star, and launch a conditional search to obtain the magic star. Geographical map material, and the location and other information of the Sanctuary forbidden where it is used for the test of the Son!

If it is in the territory of the science and technology camp of the third world human race, facing the land of the imperial city that is far from the ordinary administrative star, considering that the central super-brain of the personal starry sky system is only a state of a piece of debris, Ye Xuan Naturally, it will not be so big, and it will be directly integrated into the star network of others.

But if it is in the Magician, then there is nothing to worry about.

Although the devil's group is attached to the celestial family, it also has the application of science and technology in all aspects. For example, warships are basically products based on scientific and technological elements, which are extremely common in the devil's field.

However, all the demons in this star field, without exception, have no star defense system that exists in the third universe human race science and technology camp, so even if they actually have a star network, even if the star is still the whole The emperor's ethnic group is heavily grounded, but Ye Xuan can almost certainly determine without any analysis. In front of this star network, the starry sky network used by the star network is absolutely not high.

In this case, even though his personal starry communication system is based on a corner of the brain, but Ye Xuan believes that the other party can not find the invasion of the communication system!

The facts quickly confirmed his guess.

In just a few minutes, the information needed by Ye Xuan has been automatically imported into his mind by the communication system. At the same time, there is a result of the evaluation of the internal star network of the Magic King. The communication system gives the result very simple, but The conclusion is very uncertain.

Ordinary star network system: can be connected! Can be incorporated!

Risk probability: less than 0.01%!

The probability of risk is lower than one in case, which is clearly a rhythm that can arbitrarily ravage each other!

Ye Xuan even laughed and snorted, and quickly overturned the information received in the brain, determined the location of the Emperor City, and even when the warship was rushed, it swiftly swept away!

After a short period of time, on the vast expanse of plain at the end of the line of sight, there was finally a magnificent and magnificent city. Ye Xuan did not take a closer look, even when the cave was dropped to the jungle on the ground...

Chapter 2898: Trial opening

After falling into the forest, Ye Xuan even took out the cabin with Hao Fangfang, and then he took the hole in the body to the immortal world.

At this point, he has been somewhat hung up and finally finally let go.

After a short hurry, I finally arrived at the destination about a time before the trial was officially opened. It was the magical city just a hundred miles away. So, the distance was between Ye Xuan and Hao Fangfang. The cultivation is the strength, even if you walk, you can go to the city before the trial starts.

Under the slightest sigh of the heart, Ye Xuan suddenly remembered the problem of Haofangfang, but it did not refer to the one that was related to the wretched mosquito, but he had recently lived with Ye Xuan in recent days and accidentally discovered Ye Xuan. A lot of secret things.

Ye Xuan originally wanted to remind a few words, but after thinking about it, if the other party can really keep his mouth shut, in fact, he does not need to speak for himself. If it is the opposite, this is not a salty reminder, what is the use?

Thinking this way, Ye Xuan suddenly broke the idea. Anyway, what the other party knows is also something that is irrelevant. It is really a major secret. Ye Xuan is not afraid to be exposed to his sight.

"Nothing, you are not worried about turning back and talking about some of your little secrets?"

What surprised him was that this Ye Xuan had no plans to mention this matter again, but Hao Fangfang on the side, but instead actively asked, but in that tone, but clearly revealed a thick The meaning of resentment: "It was originally in your heart, Lunjia is such a person, it is really a hurtful family, you are too disappointed with the family..."

"Hold it!"

A few simple words, but let the leaves of Ye Xuan's body suddenly erect, his face changed a little, and quickly interrupted, then his shoulders shook, turned and plundered outside the jungle: "Hurry, let's only One hour, this magical city is not small, I am afraid that it will take some time to find the holy magic."

When the voice rang, Ye Xuan's figure was already out of the jungle, and it was turned into a low-altitude, turning into a shadowy shadow, and quickly went to the incomparably magnificent city in front!

The fragrant Fang in the woods licked his mouth, his face was unhappy, squatting and squatting, and then quickly rushed to catch up.

After a short while, the two fell in a distance from the majestic gates of the magic city, and walked quickly.

In the distance, I felt the extraordinary majesty of this magical city. At this moment, Ye Xuan and Hao Fangfang finally realized the hugeness and grandeur of this giant city. It's just that this huge gate in front of us is already amazing.

Standing in the near future, there is an inexplicable oppressive feeling that stands against the giant peak. It shows that the height is terrible, and it is not much different from the real giant peak. The gate of the city gate is called the cloud!

However, although the strength of the majestic city of this giant city is shocking, but the guards inside and outside the city gate can not see one at all. After entering this huge city gate, a very busy and bustling city weather suddenly It's basically the same as other demonic cities, but the scale is more impressive, and it's not a little stronger!

Ye Xuan and Hao Fangfang both remembered the trial of the Son, and they had no heart to enjoy. After sweeping a few eyes at random, they quickly rushed toward the inner city where the Imperial City is located.

With the magnificence and scale of this majestic city, from the outer city to the inner city, even if it is not bent, it will go straight, but I will have to spend a little time.

After all, no one is allowed to sneak in the imperial city. Even if things are urgent, they must be observed. Otherwise, there will be a demon emperor coming in, and he will kneel down and say it.

If this is the case, you have to delay more time!

In desperation, Ye Xuan and Hao Fangfang can only step up under their feet. This is so, all the way, but it still took nearly 20 minutes to finally see a wide river in front, the outer periphery of the inner city, finally arrived!

This wide-kilometer river is actually a moat that separates the outer city and the inner city. On the wide river surface, there is a huge black stone arch bridge connecting the two sides in the northeast and northwest, and now it is displayed in Ye Xuan. And the ones in front of Haofangfang are one of the four giant bridges. When you cross the bridge deck, you can reach the inner city!

However, there are almost no pedestrians on the bridge, but at the two ends of the bridge, there are some demon emperors guarded by black armor, and each of them is lined up, so that the armor is straight and straight. Standing there, although it does not move, it makes people feel inexplicably a sense of oppression.

Obviously, this inner city, not everyone can go there, think about this bridge, you have to have that qualification, at least come up with a proof of identity and the like.

This point really made Ye Xuan unexpected. Before he had never thought that this would happen, he finally arrived at the Imperial City, but it was the last bridge, but there was no way. Going forward!

"Lun family and you are the trial son of the black mosquito star, is it true that these magic emperors still dare to stop not letting go?"

After a few moments with Ye Xuan's big eyes and a small eye, Hao Fangfang suddenly sighed a little, and then squatted with a sigh of relief, while he had twisted his waist to the left side of the bridge. The devil was gone.

The four guys had no expression on their face, and their eyes were cold and frosty, but at the moment, they suddenly saw a man's style twisting his waist and coming to his side. The wide mouth is a kind of disgusting feeling.

In this case, the four cold emperor's original cold and serious face finally began to change, first stunned, and then puzzled, and finally, when Hao Fangfang stood outside their feet, the orchid pointed to When Zhang Mouth said a "Lunjia"... Ye Xuan clearly saw that the faces of these four guys were instantly green!

.....

At the same time, the west side of the inner city of the Magic City!

Although it is called the inner city, in fact, this area is surrounded by a circle of moats in the inner city area, the area is extremely wide.

And the weather between the inner city and the outer city is completely different!

The bustling outside city is a metropolis with a crowd of people and buildings.

The inner city, on the other hand, is like a wilderness suburb. In addition to the real imperial city area, it is an inner city with the same high walls. The streets inside the walls are also sloppy and outside the building. The rest of the whole area of the inner city is basically a big back with the green mountains and green waters and the natural environment of the wilderness.

Among them, in addition to the central area of the Great Imperial City, there are also some buildings with different shapes.

One of them is the Holy Devil's Temple, which includes the Devils.

At this moment, in a valley about dozens of miles away from the Temple of the Holy Deity, more than a dozen of the Devils from the Black Mosquito tribe, headed by Zuo Hongwu and Zuo Licheng, are respectful. The ground is waiting on the side of the valley. Although it is silent and silent, it is full of excitement and excitement!

At the end of this valley is the entrance to the forbidden land of the holy devil. The trial of the black mosquito star is about to open...

Chapter 2899: Bullying honest man

The whole valley is not very wide. It is entered by a valley mouth like a curved gourd mouth. It is surrounded by mountain peaks and walls. At the end of the valley at the bottom of the gourd, there is a huge mountain on the towering mountain wall. statue.

The height of the statue is more than 100 meters, the whole body is red, and there is no material, but it is definitely not a rock.

However, the strange thing is that the lower body of the whole statue is integrated with the wall of the mountain that is like a knife. The two kinds of materials that are not of the same material are in contact with each other. A natural feeling.

Moreover, there is a 100-meter behemoth with a blood red in this whole body. In fact, it is not a so-called statue. It is originally a real flesh-and-blood creature. It is just waiting for the lower body to break away when it is just drilled out of this mountain wall. The wall, the whole body, has been solidified for a moment, and turned into a statue. Since then, it has stood forever in this valley, seemingly silently warning what...

Although the size of this 100-meter behemoth is still invisible, most of the body revealed from it is clearly visible to the blood of its species.

This is clearly a huge sorcerer!

Almost the same shape as a normal common ape, it just has a slightly curved unicorn on top of the head.

Unfortunately, whether it is Zuo Hongwu or Zuo Licheng, or other black mosquitoes to test the Son, they entered the valley before and saw this strange and mysterious one-horned monkey carving, but no one showed it. Any unusual reaction, obviously, all of them have never seen the beast.

After all, this beast is only unique in the underground sacred cave of Montenegro. The strong outside of Montenegro is obviously not likely to enter that place.

The magician who saw or heard the sorrowful beast in the Montenegro star did not have the opportunity to come to the Valley of the Forbidden City.

Ye Xuan is the only exception!

If he is here at the moment, I am afraid that it will be shaken to the spot on this spot by the strange statue.

Because all the ordinary sacred beasts in the underground sacred caves disappeared after the illusory body was removed from the spiritual source of the spirit, the small horns left were all black.

The only horn that he got from the seal of the deepest part of the sacred cave is the blood red.

Although in the black hole of life in the past, this corner appeared again, actually changed the blood red to black, turned into a **** horn, but Ye Xuan had a feeling at that time, it seems to be deliberate, as if What to cover up in general.

At the moment, the single blood standing on the top of this giant statue of a sacred beast is like a blood red.

At a closer look, it is almost the same as Ye Xuan's **** corner in the underground cave of the Black Mountain Star.

In the valley, in addition to respectfully waiting for Zuo Hongwu and Zuo Licheng and other trials of the black mosquito star, there are still several figures.

One of the thin and dark-skinned old men of about 60 days is the most fascinating super priest of the current Emperor, with a six-level source nucleus, and the realm of the realm has also reached the original point of Wenxing.

Appropriate, Zuo Hongwu and others followed him to the valley to ban the land.

In addition, behind the high priest of Wenxing, he followed the two devils of the Holy Devil's Temple.

Finally, it is the two forbidden guardians who have just stepped out of their respective caves.

On the two sides of this strange statue at the bottom of the valley, there are two caves that are directly excavated on the stone wall. The two old men who guarded the forbidden land in the valley here, the right one is left and right from the two simple mountain caves.

Although these two people are a rag, but their identity is not the same, not only the devil's royal family, but also quite scary people, it is today's demon, see the two have to call an uncle!

As for the cultivation of the two people, although they were deliberately concealed, they could not perceive it. However, when the high priests of Wenxing saw the two men out of the guardian cave, they immediately greeted the warm attitude of coming to the cold. The cultivation of these two forbidden guardians must be equally good.

"Okay, if there is nothing else, you can enter now!"

After a few words with the high priest of Wenxing, one of the guardians swept away, and left Hongwu and others, and they were expressionless. The tone was also indifferent and cold: "The requirements for trials have always been in the same way, the ten entrants, after the expiration of the January period, were sent out, and the final number of the sacred sons was determined by the number of plaques obtained in the hand, and many won."

Having said that, this person paused a bit and then went on to say: "There is also a special case, that is, if someone can get some kind of spirit in the forbidden land in this short period of one month. If you use the skills or mystery of power, or even magical powers, then this person is better to win! If this lucky little guy is more than one person, then the number of people in the hands of each other will determine the final Son. Person selection!"

Very clear and fair!

Zuo Licheng and other eight black mosquitoes of the quasi-saints, after listening to him, all of them cleverly nodded and nodded. However, this guardian seems to be uncomfortable with this kind of obedience. Seeing that this is a frown, he snorted and turned to the left side of the house.

It was also at this time that the outside of the valley touched a certain direction dozens of miles away, but suddenly there was no sign of a fierce and fierce voice, and the Zuo Licheng in the valley was scared. A glimpse, the face is a little faint.

In the high priest, Wen Xing frowned directly, and looked at the direction in the direction of the sound of Li Xiao. He said to himself: "Listen to the static, it seems to be from the East Bridge. Could it be that someone is so bold and wants to be hard? What about the inner city of the emperor?"

At the same time, several other people also subconsciously turned their heads and turned to the past, including the forbidden guardian who turned to Dongfu.

It's just surprising that at the moment, after hearing the words of Wen Xing's soft voice, his face was not only annoyed, but actually he took out the fine mans in the middle of the battle, which seemed to be **** the East Bridge area. The existence of the inner city, the interest is extremely strong.

Such obvious performance, even the eight priests of the black mosquito star, such as Zuo Licheng, can be seen. For this reason, the look on the faces of the eight people is a bit strange at the moment, revealing a faint resentment. meaning.

Appropriate Zuo Licheng eight people should be so docile in his words, the result is a cold butt, but at the moment, Dongqiao's guy who is looking for death is arrogant to the inner city of the devil, this The guardian's cold buttocks have been replaced by hot faces, which is clearly the bully of the red fruit.

Chapter 2900: Close to the demon

This sound of fierceness and screaming is the masterpiece of the **** mosquito and beast, and of course, the person who instructs it to do so is Ye Xuan.

The reason why the latter released the **** blood from the ring of the pet's beast, is not because the Devil's guard at the East Bridge Bridge is too arrogant, wanting to deal with him and Hao Fangfang.

Not because Ye Xuan wants to force the East Bridge.

Here is the land of the imperial city of the devil, even if the strength of Ye Xuan's hand is extremely horrible, but here he is absolutely afraid to scatter wild, at least for now.

Everyone can come to a hole in the sky, and those under the leaves of Ye Xuan will be wiped out in an instant!

The reason why he took a chance to excuse, released the **** ring out of the pet beast ring, and secretly indicated that it made a long shout, Ye Xuan's purpose was just to let the people in the imperial city manage things, or The head of the demon emperor was alarmed and then led to him.

In front of these few demon emperors, it's just a janitor. Ye Xuan's interest and this kind of master's arrogance are too much, and the time for trial opening is getting closer and closer. No such time.

But people can't let the past, but they can't be forced, so the only way is that...

Soon, a small commander of the Devil's Guardian quickly rushed over with a few squats, and Ye Xuan was dumbfounded. This guy is clearly an official, but he is even more confused than the guards. Ask a few words to understand the specific situation, there is no meaning, the foot has not yet stood, they have slammed the few demon emperors, so that they immediately took Ye Xuan and Hao Fangfang on the spot.

Fortunately, another figure from the opposite side of the bridge rushed over. When I saw this person, the Emperor Weiwei did not continue to sneak his official prestige, politely greeted him and took the initiative to chill.

This person is one of the two sacred ancestors who went to the valley of the forbidden land along with the great priests of Wenxing. At the moment, he was enshrined in the will of the high priest of Weng, and came to ask why the screaming screaming!

He naturally wouldn't say that the real thing that allowed him to come over and see the situation was actually the forbidden guardian who left Zuo Licheng and others to be full of grievances!

However, for Ye Xuan, it is not important for him to let him come. The key is that his purpose has finally been reached. With the words of the other party just falling, Ye Xuan even explained his hand. The situation, of course, the emphasis is on the intention of him and Hao Fangfang.

"What? Are you coming to participate in the trial of the Black Mosquito?"

Not to mention this okay, mentioning this matter, the ancestral temple service was directly stunned, and even the demon emperor's small commander on the side was full of strange colors.

Originally, they thought that they dared to come here to make trouble. Even if they were not the emperor, they were some people who had been afflicted with this kind of existence. In this case, they only disputed with several Devils, and turned back to privately. In a word, it was directly changed.

Who wants these two guys to be just the saints who are coming from the black mosquito tribe.

When did the quasi-sons from the top ten foreign tribes, who had not yet been tried by the Son, dare to be so arrogant?

The thought flashed through my mind, and the face of the ancestral temple was suddenly weird, and I didn't say anything more, and I'm a little cold with the demon emperor's little commander, and I'm going to signal Ye Xuan and Hao Fangfang. On, with two people walking straight across the bridge...

.....

In the forbidden valley, two high-profile scary forbidden guardians and the demon emperor, the high priest, and the three priests, are sitting on the knees at a distance of about 100 meters from the ground. Facing the head position of the 100-meter statue, it seems to be a combination of some secret techniques, all with closed eyes and serious face!

Ye Xuan and Hao Fangfang, two people, also entered the forbidden valley behind the service of the demon ancestral temple.

When looking up, Ye Xuan saw the giant sacred beast statue on the wall of the gourd at the end of the valley. In particular, the familiar blood of the soul, almost instantly made him unable to prevent, his face has changed.

At this moment, Ye Xuan clearly felt that there was a kind of aura flashing in his mind, which made him feel the kind of truth in his vagueness. Unfortunately, this aura was still too concealed, until he was careful to pursue it. But nothing can be captured.

However, this incident gave Ye Xuan a strong sense of vigilance in his heart. Since this sacred forbidden land has a relationship with the **** corner of the soul, then this trip must have a few more eyes, all this. In case it is not a coincidence?

As soon as I read this, Ye Xuan, who was in a very small heart, quickly recovered her calmness, and the stunned color on her face quickly dispersed.

"Hey..."

It was also at this time that the end of the valley in front of the valley suddenly came a very sad and sad sound of the tsunami, listening to the silence, this is clearly not the voice of the devil strong, even World of Warcraft, may not be able to scream The breath is so strange and screaming.

Clearly reveals a thick enchanting atmosphere!

What makes Ye Xuan strange is that this strange and enchanting voice of the whistling sound is actually transmitted from the head of the 100-meter statue of the **** scorpion beast at the bottom of the valley.

Ye Xuan subconsciously followed the sound and looked away. In the next moment, he saw the forehead area of the skull and beast of the statue. At this moment, it was completely transformed into a gray-black light film, just like the space door in the space fortress. The black transmission light film that appears after the start is the same, but the color is different, and the same is slightly shimmering.

Obviously, this layer of light film on the forehead of the statue should be the entrance to the virtual passage into the forbidden place of the holy demon. It was just successfully opened by the three high-ranking priests, and there was immediately such a secret, close to the demon. The sound of the whistling sound came out, this...clear is not a good sign!

The thought flashed through my mind, and Ye Xuan walked to the depths of the valley opposite the sacred ancestral temple in front, and frowned at the other side. He suddenly had an intuition... This time the Son Trial, I am afraid that it is very difficult to be normal with the usual times!

"Zhang Wuji? You, you... why are you still not dead?"

Just as he was a little distracted, the right side of the valley was not far ahead, a familiar exclamation was suddenly passed over at this time, and the words were full of shock and unwillingness.

Ye Xuan turned to the first sight, and it was the face of Zuo Licheng who was desperate to look like a dead relative.

As for the trial of the other seven black mosquitoes, the sacred sons are clearly in his body shape. At the same time, they also looked at Ye Xuan and Hao Fangfang. They opened their mouths and looked dull. It also reveals a very obvious color of fear!

Did not wait for Ye Xuan to respond, the direction of the end of the valley, but suddenly came a laughter.

"Zhang Wuji? Good, good!"

"Not only does the style of the work have a taste for the old man, but I don't even think that the name is very good, hahaha..."

"Bad boy, the trick has a fate..."
