

Super D. S 2961

Chapter 2961: Devils Donkey

"Oh, these are the pieces, the essence of the pure spirit of the inside, all absorbed by me..."

The heart secretly sneered, Ye Xuan talked and took out six gossip silver crystals, held in the palm of his hand, slowly handed out, spread out the palm.

These six gossip silver crystals were all prepared in advance, just in case they came out and then exposed, and then they could come up with them to deal with the differences. I didn't expect that they really came in handy at the moment.

At this moment, Ye Xuan handed out the six gossip silver crystals in his hand, while he said indifferently: "I got a lot of sorrowful crystals, which was discovered inadvertently into a cave. There are some silver sparkling comparisons. It's good-looking, so I picked them first and I didn't expect the results to be really good."

"One of them left a spiritual brand in my mind, which can protect my source core from being explored. Unfortunately, it has no effect, and I tried it. I can't actively drive it. ""

"Three of the other ones are only the power of pure high-level spiritual origin, and the other two, I have gained the inheritance of two spiritual strength skills. The skill of catching breath is one of them..."

"As for the other one... I gave it a name, called Spirit Thunderbolt!"

Said, Ye Xuan suddenly raised his left hand and swung awkwardly in the direction of the entrance to the forbidden valley...

"Card!"

A black lightning suddenly appeared in that position without warning. Before, although there were many devils and royals here, because of the outbreak of the war, they all retreated according to the instructions of the emperor Mo. At the office.

At this moment, because the war over the valley forbidden land ended, the thousands of demons gathered all over here, some of them just happened to go to the mouth of the valley, just past the corner and heading for the valley. .

Ye Xuan's spiritual thunder and lightning is a random wave. It happens to be the same, but it is like a deliberate aim. It is on the top of one of them. It is the three emperors.

"Hey..."

Ye Xuan is only the second largest realm in the meteorological environment, and it is not exerted forcefully. This black lightning can naturally not cause much damage to the Three Emperors.

However, after all, he has just been absorbed into the essence of blood and vitality, etc., at this moment is weak, coupled with this black lightning is too strange, suddenly fell cold, the three emperors even if the birds are terrible.

Even the body shape is soft under the legs, sitting directly on the ground, it is awkward!

"Oh..."

"Sorry, the Emperor, this...will not be your descendant of the royal family? I am in a meteor, this spiritual thunder and lightning has not exerted its full strength, not so powerful, so horrible? He is too vulnerable It must be teasing me!"

The spirit of thunder and lightning, so coincidentally fell on the head of one of the hundred descendants of the royal family, and this person seems to be the leader of the descendants of this group of royals, from other people waiting for the stars to bow the moon Can see it.

Therefore, while Ye Xuan's heart is under the melody, but also in the heart of the move, taking advantage of this opportunity, it is just that the guys who can still say things in the forbidden land in the future will be jealous, because Hesitant, but no longer speak for the time being.

Even if they turned back quickly, but Ye Xuan was afraid that he had already left the magic star!

At this moment, his seemingly casual words are actually trying to test the reaction of the emperor. At the same time, he also secretly excites his words. After he believes that the emperor has listened, he must have a good smile, plus he will spend a lot of time. The gang's bribery, the guys must be stunned. At this time, when they say their bad things in front of the emperor, will they feel a little bit boring?

As long as they have such an idea in their hearts, in a short period of time, they will never mention those things happening in the forbidden area.

Sure enough, after listening to Ye Xuan's words, the Emperor Mo's face immediately sank, and he squinted at the entrance direction of the valley, and his nose suddenly screamed.

Before the three emperors came out of the forbidden land, they did not report the situation in the first time, but the act of crying to him, so that the emperor Mo asked why Tianxin was not happy, and was greatly disappointed.

At the moment, the power of Ye Xuan's spirit thunder and lightning is natural. It is clear at a glance, but even so, the three emperors are still directly on the ground, and they have issued such a fierce wolverine, even he feels a little face. Can't hang up.

Although the sound of coldness was slight, it was clearly and incomparably introduced into the ears of everyone present, and the group of demons had already raised the three emperors and heard the provocative words of Ye Xuan, plus The reaction of the emperor, one by one, suddenly miserable, face to face, all in the middle of the show hesitant color.

"The breath of the spirit of thunder and lightning..."

It was also at this time that the imperial priest of the Imperial City was on the sidelines, but it looked like a change. He tried to ask Ye Xuan: "It's the priest's induction. It's a six-level mental power. The breath, your source core, has been transformed five times? How is this possible?"

"what?"

Ye Xuan stunned, and then shrugged his shoulders, pretending to say innocently: "My spiritual strength was originally the fourth order, but this time I entered the forbidden area, after getting these crystallizations, I finished the six silver crystallizations. However, it has changed twice, so now it should be the sixth-order mental power, let alone the effect of these silver crystals is really good!"

As soon as I heard this, several holes in the field were in the sky, and all of them suddenly twitched, and the line of sight was subconsciously reunited with the palms of Ye Xuan. The complexities of the mind were all words. Hard to describe.

This kid said that it is light, this is the gossip silver crystal, can the effect be bad?

You must know that there is only one demon royal family in the entire demonic group. I once hit the big fortune and inadvertently got a gossip silver crystal from the forbidden land.

With this, the gossip silver crystal was used as a treasure sacred object by the demon emperor, and was enshrined in the imperial city ancestral temple. He has not been willing to take advantage of the power, but intends to wait for the seventh nuclear catastrophe in the future. When the opportunity comes, it will be collected again. At that time, with the help of the high-level spiritual source power contained in the gossip silver crystal, his seven-level source nuclear has been successfully transformed, and the possibility of evolution to the eight-level source core will be greatly increased. Upgrade.

Even the devils are reluctant to use things, and their preciousness can be imagined.

This little boy in front of him used six pieces at a time, and his life raised his source core to the extent that he was only second to the magic king!

If these six gossip silver crystals can be collected by themselves, under the efforts of all, the current seven-level source nuclear will break through to the nine-level source core beyond the ancestral level eight, which is entirely possible!

As soon as I read this, his glimpse of the brilliance, and even the murderous heart has been...

Chapter 2962: Liu Yunhuaming another village

"As for why these beasts are afraid of me..."

Speaking of this, Ye Xuan turned to the first look of the devil, Mo Tiantian, just happened to have the cold smashing of his smashing into the eyes.

Under the whistle of the heart, Ye Xuan's words in the mouth were all a stagnation. After a short pause, he was pretending to be ignorant. He continued: "There was a catastrophe in these forbidden places. There are countless black electric rains falling from the sky, and I don't know how many beasts are killed."

"It is estimated that they have left a shadow in their hearts!"

"And I, when I escaped from the forbidden land, because I was attacked by some fierce beasts, I used a few thunderstorms under the urgency. However, although there was no such thing, the few beasts were scared. Turn around and escape."

"This is clearly the same as that of the dear friend, and it is also the psychological shadow of the scared bird."

Say, Ye Xuan once again glanced at the group of demons who had come to the valley at the moment. Among them, Zuo Licheng and Hao Fangfang were among them.

"So, they are not afraid of me, but the black lightning that I am showing!"

At the time of the fall of the voice, Ye Xuan had waved again, but this time it was not cast freely. His mental strength invisibly locked the body of the Demon Emperor, who was bound by Chanas, at the

moment because of the distance from Ye Xuan. Too close, it is a starry beast that is constantly shaking in shape.

"Card..."

A black lightning appeared again out of thin air, falling straight on the top of the beast.

Obviously, the power of this spiritual thunderbolt is also not strong, but even so, the starry beast is a tragic sound, even when it is turned to the ground and planted to the ground.

This is clearly the rhythm of being stunned by the living!

Poor beast, I thought that Ye Xuan had to shoot it. He had fallen with the **** knives and fell into the cage. The existence of a heaven and earth will have left countless beasts in the secret. Born a boundless fear.

This kind of psychological shadow, coupled with the moment of escaping the birth of the day, was immediately shackled, and the huge despair that was strangled immediately, has already brought the spirit and will of this starry beast to the brink of collapse.

Therefore, Ye Xuan shot, under the horror of the cross, this scene, unexpectedly appeared.

What's more, this starry beast reacts like the previous three emperors, and is even more unbearable than the three emperors.

"Look, this is a superb beast with the original point of view. With me, how can I just stun it directly..."

Seeing this fierce beast so cooperated, Ye Xuan's heart is also a big joy. When he shrugged his shoulders even innocently, he was too stunned in this matter for the fear of the emperor and others. The sound, but without the traces, the attention of the people to the three emperors.

Now, the three princes and other people with pale faces have already arrived in the valley, and they are not far away. Ye Xuan turned his head and smiled at him. Then he said: "The reaction of the dear friend and the beast is generally the same. In my opinion, it is estimated that it was also shocked by thunder and lightning. This is a heart disease, it is cured!"

Although this is deliberate, it does speak the idea.

Although these gangsters, including the Three Emperors, are not afraid of lightning, their deep fear of him is not weaker than those of the stars and beasts.

After all, the latter is only in the distance, and I have seen Ye Xuan's **** knives in the distance, and the scene of the heavenly will to be degraded.

But this group of demons, but more than half, had had close contact with Ye Xuan, and in a short period of time, they were almost sucked into people.

This is a big horror, it is even more chilling than cutting a head directly!

The reason why these guys dared to come together at the moment was only because of the presence of Mo Huang and other people.

But at this moment, watching the attitude of the Emperor Mo, he is afraid that they may not be able to support them. In addition, the words of Ye Xuan's heart disease fall in the ears of these demons, but He does not mean that.

Let them immediately think of the horror scene that was previously sucked into the adult by Ye Xuan in the forbidden place.

Therefore, these Devils first floated a smudged color on their faces, but then they suddenly thought of something, and immediately screamed and stunned.

This is especially true for the Three Emperors.

This is clearly the guilty conscience in the words of Ye Xuan.

Everything has not escaped the observations of the emperor Mo Motian and several other caves. Therefore, after a few people turned their eyes to look at each other, they basically believed in Ye Xuan's words.

Only the Emperor Mo asked the sky, but after a cold cry in the nose, his face suddenly sinks!

Even if Ye Xuan is no problem, and it is still a younger generation who seems to have a strong spiritual strength talent, even if this is the case, Mo Wen is the devil, if he has the heart to destroy him, it is still only a sentence. Only.

Nothing else, just the six gossip silver crystals, it is enough to make him killing Ye Xuan.

This feeling of envy and hatred makes Mo Wentian quite uncomfortable, especially when the object is a low-order demon who only has a meteor!

At this moment, his face is heavy, and it is clear that he is suddenly killing his heart, and he wants to turn his face!

Ye Xuan seems to be casual, but in fact, the corner of the eye has been paying attention to the Emperor Mo asked the day, at this moment to see the reaction of the other side, his heart suddenly jumped.

I didn't even think about it, and quickly made the last killer come out.

"For the high priest, is the trial finished? I not only got the inheritance of spiritual strength, but also a lot of mourning in my hands. Even if they found a lot, they should be able to win. There are still a lot of gossip silver crystals..."

Just said here, the magic king Mo asked the sky's eyelids suddenly jumped up!

In addition to the six blanks in the hand, this kid actually has gossip silver crystal? Looks like a lot? How can this be? When did the gossip sacred objects become the goods of the rotten streets?

These thoughts flashed in my heart. Although Mo Wentian did not believe it, but in the first time, I had a strong surprise in the first time. This is really another village!

"Bad boy, do you still have a gossip crystal?"

At this time, several other people were also surprised, and they all felt a shocked feeling.

Uncle Mo Qigong was directly squatting to Ye Xuan, and he was directly involved in him.

Ye Xuan's heart is moving, which is just another opportunity.

Therefore, he has a white-eyed look on his face, but his heart is already dark, so he is a ghost, biting the ears of Mo Qigong, but quietly said with a voice that everyone can hear: "Seven public, the black mosquito family is my dream of a small child, this matter, please ask more than seven more words, rest assured, I personally deducted ten gossip, dedicated to you!"

Saying, Ye Xuan turned his hand and took out the most simple space box that could not be explored with spiritual strength. He handed it to the foolish voice of Qi Qigong: "Seven Gong, this is me." If you hand over the things, please ask the seven public to check it out in public!"

Aside, the Emperor Mo asked that the sky had already been full of shocks, and even the nose was heavy and heavy...

There are as many as eight gossips that are used to bribe the bribes. How much has the gossip in the box?

Chapter 2963: Public bribery

This time, I entered the Forbidden City of the Magic Emperor's Forbidden Land. Ye Xuan was in the vast corpse of the huge crater mountain, not mentioning the headless baby corpse, only the sacred

crystallization of this aspect, he harvested seven and seven below There are more than eight million ordinary crystallizations.

In addition, the total number of gossip silver crystals owned by Ye Xuan is more than 800,000.

It can be said that even if he throws out nearly a hundred, it is only one in ten thousand, but obviously, he can't be so generous. Why? I didn't see just a gossip silver crystal. Has the day been so intensely valued?

Since people are so easy to satisfy, Ye Xuan gives too much, but it is a bad thing.

As for the top goods of Jiu Jin Jin Jing, there are more than 50,000 pieces in Ye Xuan's hands!

Moreover, in these more than 50,000 pieces of Jiu Jin Jin Jing, the perfect quality has been achieved, that is to say, in addition to containing a large number of high-level essences of crystallization, there is still a kind of wilderness and inheritance, and it is as high as one. One hundred and seven!

In addition, the one that has been taken away by Ye Xuanzhen, the perfect quality that he has harvested in this corpse, is exactly one hundred and eight.

Not to mention the remaining 107 perfect quality Jiu Jin Jin Jing, even the more than 50,000 ordinary quality Jiu Jin Jin Jing, Ye Xuan did not intend to pull out even one!

After all, these devils and royalty, I am afraid that I still don't know that there is such a thing as Jiu Jin Jin Jing. He really does not need to ask for trouble!

It is in consideration of these various factors that Ye Xuan, after deciding to grant it to seal his mouth, was quietly preparing for the immortal world in the first place.

In fact, it is also very simple, that is, three space boxes are taken. Of course, the ordinary space box that is refined in the quality of the devil's group is different from that of the human race.

The space box made by the latter, the items contained in it do not need to be dumped at all, and even do not need to open the lid, the power of the knowledge extends into it, and you can see everything.

Of course, the same quality space box, the devil also has refining here, but replaced with a mental power for exploration.

However, Ye Xuan deliberately took three such inferior qualities, and it is necessary to dump the contents inside, in order to explore in detail what is contained, and the number of space boxes, on the one hand and his ordinary bottom-level magic man. Identity is consistent, on the other hand, this is also purposeful.

The superficial point is that it is obvious, and the old-fashioned one is to shock the group of demons who were almost sucked by adults.

When they saw that they had sent such a horrible resource to the Emperor Mo, they used the savvy of these guys, and together with their identity as descendants of the demon royal group, they suffered losses, even if they finally Still decided to take the risk, but there must be a period of hesitation.

Ye Xuan wants this time difference, enough for him to leave the Magic King in a hurry!

In order to achieve this effect, then, the many chanting crystals that Ye Xuan took out could not be too small, otherwise it would not be enough to shock the demons.

Taking all these considerations into consideration, he put ten gossip silver crystals and one hundred seven-inch and six-inch crystallizations in one of the space boxes.

This space box is reserved for Mo Qigong, in order to create a kind of appearance that he wants to get the position of the black mosquito. This is also one of Ye Xuan's own efforts to avoid being overly as skeptical as possible by the Emperor Mo Qiaotian and others.

As for the second space box, he put seven or eight gossip silver crystals, and a total of more than three hundred pieces of gossip. This space box, he specially prepared for himself, in case the other party Still looking at the bottom, Ye Xuan will take out this space box.

According to the total number of gossip silver crystals and other crystallizations contained in it, it is just right, so that people are not suspected of having a fake, nor will they lead the emperor Mo Wentian and other people to be jealous.

As for the other last space box, it is natural to take the bribe to the Emperor.

In this space box, Ye Xuan's singularity of no matter what grade is not the total number, at first glance, it feels that except for the two that are left to yourself and prepared for Mo Qigong, the rest of the rest In stock.

Forty-seven pieces of gossip silver crystal!

There are more than seven hundred and forty-three pieces of sacred crystals at all levels below seven and seven.

For the total number of crystallizations held by Ye Xuan, this is all together, and it's not even the roots, but for any one of the demonics, including the contemporary demon in front...

The number of chanting crystals in this space box is not only awesome, but the quality is completely sorrowful!

There are more than forty pieces of gossip silver crystals. What else is not satisfied? Before you know, there is only one whole demonic group, and it is enshrined in the temple hall.

At this moment, after the space box was taken over by Ye Xuan's hand, Mo Qigong saw that the quality of the space box was the lowest, and did not support the extension of spiritual power. Can fully understand the details of the items in it.

Therefore, he did not hesitate to open the lid directly, and then injected a spirit of strength, and then tilted the box mouth toward the ground.

"Oh la la..."

"Dangdang!"

.....

In the next moment, with the sound of a large piece of Fall to the ground.

From time to time, I often slid down a silver awn from the space box, which clearly represents a gossip.

In just two or three seconds, this silver mans has appeared seven or eight times!

In such a scene, Mo Qigong, who was holding a small box in his hand, was thoroughly petrified, and his mouth was wide open, and he stayed in the same place.

Next to the demon emperor Mo and Tian Wen, the high priest and others, even more instantly opened their eyes, the expression on their faces was a bit sorrowful.

As for the dozens of original powerhouses farther away, and just at this time, the descendants of the demons and Hao Fangfang, Zuo Licheng and others are even one after another. Breathing, many people were even shocked and exclaimed on the spot.

Ye Xuan even heard a few loud voices, and I don't know which few guys with poor psychological endurance were directly stunned.

"Hey, seven public, I can take it out, I will leave a little bit, the position of the son of the black mosquito... It should be a problem?"

With a smile on his face, Ye Xuan thief slammed his hand and pulled out a small box of space. Then, while deliberately suppressing the sound, he used a kind of ghost, but it was clearly visible to everyone. Covering the action, the space box was quietly stuffed into the pocket of Mo Qigong: "Seven public, it depends on you, I can't wait to fly back now and take office..."

Chapter 2964: Risk

Ye Xuan had previously said that he had specially reserved ten gossip silver crystals for Mo Qigong, and asked him to take care of it in the case of the black mosquito family. However, at the time, Mo Qigong was not so much going to the heart, how much is still a little bit not to believe.

On the other hand, the whole ten gossip silver crystals are indeed very different things. Although he is the elder of the contemporary demon emperor, the demon emperor is the demon emperor. If Mo Qigong is really greedy, the ten gossips are gone. Silver crystal, the magic emperor Mo asked if the surface does not say anything, but the heart will certainly have a must.

In this way, instead of giving birth to a barrier, it is not worth the candle.

Therefore, for the ten gossip silver crystals, the idea of Mo Qi's heart is that even if this kid can really come out, it is absolutely impossible to accept.

But at the moment, when he saw that he was holding his hand and was in the space box that was dumping on the ground, the cuddly crystals contained in it were like endless, and there were a lot of piles in front of his feet. The space box is still squatting down.

More importantly, from time to time, you can also see a silver light from the box and slipped off the ground, this is the gossip silver crystal.

Mo Qigong roughly estimated it, and for a while, the silver streamrayed by his sight was at least twenty.

That is to say, there are at least 20 pieces of gossip silver crystals on the ground in the number of horrific mourning crystals.

And the space box is not finished yet? There must be a back, conservative estimate, at least thirty!

In this case, the Emperor Mo asked that he had more than thirty gossips, even if he was a sealer and gave him a high priest, and the demon emperor led Chanas. Two pieces, the gossip silver crystal held in their hands, still has nearly thirty.

In this case, the ten gossip silver crystals that have been stuffed into the pockets will naturally be taken care of.

If you don't take it, don't you have to go back from the emperor's head? I am afraid that he is not willing to do it. If he wants to take it as an uncle, he is not a piece of two.

Therefore, in the current situation, the Emperor is eager to accept the ten gossip silver crystals.

As soon as I read this, Mo Qigong suddenly grinned and turned to look at Ye Xuan. I only felt how this kid looked pleasing to the eye. Not only did the child usually not eat softly, but he did not bow to power and was appetizing. Even in this crucial and important event, it is still so interesting. Knowing that these things remain in the hands is also a scourge. I still know the filial piety...

The more I thought, the more I felt that Ye Xuan's appetite for myself, and now she looked up and laughed. She turned to the side and looked at his high priest Wen Xing, and grinned. Wen Laotou, the matter of the Son has always been decided by you, but this time, the Son of the Black Mosquito has to give this kid a gift, don't give it, and I don't give you the ten gossips in my hand. Hit the mind..."

Said, Mo Qigong swept the Emperor Mo and asked Tiantian, and he snorted and said: "Go back and you want him to go. I will score half of the score to the fourth, and I will have five in my hand, though Quite a lot, but not much..."

"This is natural. Going back to the priests and Chadeng to come over to find the emperor."

The look on the face of the emperor is still serious, but the tone is clearly easing and I don't know how much. It's just that I don't even have to use it myself. At this moment, his heart is secretly stealing.

Save at least four or five!

When the heart was happy, when the Emperor looked at Ye Xuan again, he suddenly felt more pleasing to the eye. Moreover, from this kid's view, he looked at the saint of the black mosquito, even though he still had some stock in his hand. But it is definitely not possible too much.

In this case, the matter has been stopped, and they have already got the benefits of being a great man. If they are still not ruthless, they seem to have no royal power.

Of course, on the surface, though, in private, the details and secrets of this son must be carefully examined. If there is a problem... In this magical star, who can escape the devil Is the emperor accountable?

Not to mention that he still stayed in the black mosquito part of the top ten foreign tribes and served as the son of the Son!

As these thoughts flashed in my mind, the Emperor Mo asked Tian Dian to make a decision, first put Ye Xuan a horse, not in the face of his embarrassment, as for the hesitation in his heart, there are still some doubts. Go back and wait for this kid to leave the magic king to return to the black mosquito, and then go down in a secret, everything will soon come out!

Therefore, even if the demon emperor changed his attitude, the right should be seen in this pile of sorrowful crystals. It's rare to smile and say a few words to Ye Xuan, and on the spot, the black mosquitoes will be Attribution, the holy mouth is appointed, and finally the hand of the flower deciduous!

There is no suspense in this matter. After all, whether it is the acquisition of spiritual strength skills or the number of sacred crystals, Ye Xuan deserves to be deserved, that is, Zuo Licheng and others will not be able to accept it!

In addition, the demons of the demons all listened to the demon emperor, and they set Ye Xuan as the son of the black mosquito. They suddenly stupid in an instant, and the heart and the nest are cool and cool. .

There is no joke!

Since the Emperor has already announced this in public, then even if they pull out Ye Xuan's things in the Forbidden City, I am afraid that I will not change anything at the end, but it will also provoke the Emperor's dissatisfaction. I think they are deliberately embarrassing.

I am afraid that I will not have any good fruit to eat!

What's more, this kid is so willing to give up the blood, so a lot of sorrowful crystals, even the brows are not wrinkled, it is hard to sneak out of the devil.

It's just that on the piles of these mountains, the Emperor is afraid that it's hard to smear the face and start with him...

In thought of this, these Devils suddenly looked at each other and completely lost their words. The face was full of anger.

Everything was settled, and Ye Xuansheng was afraid to stay in this magical city for too long. In the event of a long night dream, it was troublesome. Therefore, the belonging of the black mosquito, the sacred son, finally fell to the head, and he was ecstatic. Excited machine...

He even proposed to the Emperor even if he wanted to return to the Black Mosquito. And also deliberately smashed some similar back, the first time will have to urge the high priest ash to hold the sacred son to succeed the ceremony, so that peace of mind and the like.

This trip has indeed been said in the past, and it is exactly the same as Ye Xuan's previous appearance. As a result, it has relieved the devil's suspicion of his eagerness to leave, even if he answered it.

With a big hand, he said very generously: "If this is the case, then you will go to the Star Warrior of the Devil's Star by Chad, pick a space fortress, and take it back as a stepping warship. The black mosquito is a big tribe. How can I not even have a space fortress..."

At this point, this time the crisis, temporarily, was finally successfully saved by Ye Xuan!

Chapter 2965: Starry sky to Baolong wild number

When the Emperor Mo asked the words of the heavens, the eyes of the inferior space box kept swaying to the ground and screaming at the Mo Qigong. At this moment, it was finally over.

The final statistics, after he swept the piles of mourning with spiritual power, had instant results.

The horror figures of more than forty gossip silver crystals even scared Mo Qi into a big jump, more than a dozen more than his previous estimate of thirty, a whole quarter.

Under this circumstance, if the Emperor only gave the high priest Wen Xing and the Demon Emperor Wei to lead two people, each of them, would he still have more than 40 pieces in his hand?

This is a lot more than the 30 predictions that I had previously estimated.

On the contrary, the number is too large to reach thousands of other tens of thousands of other levels of gossip, and at this moment has completely failed to attract his attention.

At this time, Mo Qigong, the heart of the repentant intestines are all green. As I know so, I just didn't feel it. So, I'm monopolizing ten gossips, and the old four Mo Sihai can't even get out of the hands of the emperor. Ten pieces, six or seven pieces are still completely ok.

One thought of this, Mo Qigong suddenly raised his face, and smiled and smiled to the devil, Mo Qiaotian, and the face was the best expression of the uncle's little feelings...

Even if the demon emperor was wary, the big sleeves directly collected all the chanting crystals, and then there was no chance for the singer to make a sound. Commanded two sentences, let him take the black mosquito, the son of Zhang Wuji, to pick up a space fortress in the star dock of the magic guard, and then hurriedly turned and left.

This is clearly worried that he was remembered by the thief, and he turned back the heavy loss of the rhythm. Mo Qigong immediately became unhappy. He turned back and said hello to Ye Xuan, let him go back to take the Son to take over the ceremony, and go back to the hollow. Come back to the Magic Emperor and play here for a while. ,

As for this time, since Ye Xuan is anxious to go back to do business, it happens that he has encountered a critical matter, so he is not much closer to Ye Xuan.

After that, I raised my hand to Mo Sihai, and when the two men chased up in the direction of the devil, it was clear that they had to go through the hard-hard foam and then touched a few pieces of gossip silver

from the hands of the emperor. Jing Jing's posture, seeing Ye Xuan can not be directly sucked by the eyelids, fear that this uncle will turn back in order to divide the unevenness, if he fights on the spot, then he is really guilty...

As the demon emperor and the guardians of the two forbidden valleys have left, the high priests of Wenhang can only carry a group of demon royals who are in the original spot, temporarily stationed in the forbidden valley. People look at it, and if it is a little trouble, it will be troublesome.

The high priest of Wenxing, as an older generation who came out from the black mosquito, was far away from this, whether it was Ye Xuan, or Zuo Licheng, Zuo Hongwu, and Hao Fangfang, and several other unsuccessful trials. All need to come and say hello, officially individual.

For Zuo Licheng and Zuo Hongwu, the high priest of Wenxing did not pay attention to it after a few words, but Ye Xuan said that he began to groan again and again, saying that it would be a while to go to the black mosquito. Ye Xuan told the high priest that he had a sneak peek. In the recent period, he should not let him go out and walk around.

After all, just succeeding the tribe of the tribe, in the personal realm of cultivation, and the use of spiritual strength skills, is still a lot of hard work.

Finally, the high priest of Wen Xing, even the former high priest of the black mosquito, said on the spot that he would go to the black mosquitoes in the near future and personally test the results of Ye Xuan's cultivation during this time to see if he was lazy and slack.

And now telling him about this in advance, is to first say the ugly words in the first place, then if you find that he has not used hard work, then it is necessary to slightly disciplinary punishment for stern!

In this regard, Ye Xuan smiled, but never answered, he naturally could not answer this question, telling his words to the gray bones, let the latter stare at himself... What is it?

Since he did not intend to do so, he would naturally not answer it casually. Otherwise, he would not believe in his words and would have an influence on his own heart.

However, Zuo Hongwu and Zuo Hongli, who have been looking for opportunities to intervene, have proved their sense of existence. Seeing that Ye Xuan has never made it clear, it is so that both sides have come together and patted the chest to the high priest. Guarantee, after going back, you must first pass the original words to the priest.

On the verge of dying, these two goods are still misunderstood, and they confessed to the words of Ye Xuan. They said that now he is the son of the tribe. His identity is different from the past. His cultivation is diligent, but it is about the tribe's major events. The words of the class.

It is clear that behind the small report, but it is so eloquent, it is better than singing.

Ye Xuan did not hear their words, but his face was not revealing any color, but his heart was already sneer, oh, slap on the chest and hit the ticket, you can do it? Then you have to keep a little life and return to the black mosquito star.

After saying goodbye to Yee, Ye Xuan chatted with the Emperor Wei to lead Chanas, while walking towards the moat east bridge leading to the outer city, it was necessary to go to the magic guard and naturally drive the battleship, but it is strictly forbidden in the magic city. The battleship appeared, and even the flight was not allowed. Even the Emperor Wei's commander Chanas was no exception, and he could not knowingly commit it.

Behind the duo, in addition to several Devil's guards, Zuo Hongwu and Zuo Licheng's uncles, as well as Hao Fangfang and several other unsuccessful trials, all followed closely, but they were full of faces. It's all depressed, it can only be followed by a screaming follower.

The current Ye Xuan and the original come to the magic star can be completely different, at least in this magical star is absolutely the same, even if Zuo Hongwu's repair is higher than him, it is the black mosquito demon commander Zuo Fengtai cell Brother, but in the face of Ye Xuan, who is now in front of the top of the Magic Emperor, he really dare not offend even a trace!

After the demon emperor's outer city, the demon emperor led Chanas when he waved a royal warship that was distributed by the demon emperor. The group quickly entered it and quickly rushed out of the atmosphere to the magic star. The magic guards in the two satellites near the track rushed away.

Although the magic guard is not as big as the magic star, it is not a small one. It is similar to the black mosquito star and the Tianhe star. It belongs to the normal life ball.

On the back of the magic guard, there is a huge star dock, which is docked, and it is some important and strategically important for the demon community since the tens of thousands of years. High-end warships, such as the Battlestar, are among the most important components.

Just arrived at the entrance of the Star Dock, the system sounds in Ye Xuan's mind, and it suddenly screamed abruptly. It instantly made his face stiff, and the whole person almost smashed...

"Hey, congratulations to the host! Discover the treasure-class starry sky fortress! Ship name: Longye! Is it immediately forced to collect?"

Chapter 2966: Tattered little fortress

Just stepping out of the battleship of the demon Guardian led by Chanas, the sound of the phagocytic system suddenly sounded in his mind. From the words of the starry fortress mentioned in it, it is clear that the system refers to the Longye. In all likelihood, it is a space fortress in the front of the magic guard.

This is really not a normal speech. This is still on the site of others. I actually ask myself if I want to forcefully crawl.

That is a huge space bastion. When can the phagocytic system directly impose a forcible charge on this monster? When I encountered the black mosquito number and the black wind number, I didn't hear it have a similar inquiry.

Could it be that suddenly a space fortress that reached the starry sky to the treasure level was suddenly excited and completely calm?

According to what Ye Xuan currently knows, for the treasures in the starry environment, the phagocytic system is basically similar to the classification of the third universe of the human universe.

For example, the best, the super best, are still rare, although rare, but at least occasionally can see the treasures of the stars.

Later, it is legendary, epic, and finally the best!

Ye Xuan's three basic treasures, private warships, warriors and trenches, from the beginning to the end, can be said that he has spent a lot of painstaking efforts, invested a lot of resources and efforts, has been promoted to the present.

Even so, these three treasures are all epic only now. This can all be the result of five to six fusions.

Battleship: Cave! Epic level! Six times of integration!

Warfare: Devil Blood Star Tears! Epic level! Five times of integration!

Trenches: Do not destroy the glass! Epic level! Five times of integration!

Of course, Ye Xuan's hand was not originally a star-to-treaty thing. For example, the piece that has been integrated into the trenches and promoted it to the epic level of immortal glass, the level is dark. Starry to treasure minerals!

In addition, Ye Xuan also received a Lei Di Yin from the resources collected by the black mosquitoes, and its level is also the treasure of the treasure!

And the voided marrow that he got from the black hole of life can actually evolve a universe, and it is also a top treasure of the star to the treasure.

However, all of the above mentioned, no matter which one, are not forged from the day after tomorrow, either minerals, or the source of the treasure, or the natural condensed medullary crystal, they all have a characteristic, then It is a natural heaven, and it is the essence of the heaven and earth, not created by manpower!

Even the illusory piece of the hole that Ye Xuan got, and the immortal ancestral dragon of the starry dragon, although they are also the immortal things of the starry sky to the treasure level, but they are

not created by manpower, but belong to the starry sky. Turtles and starry dragons are two kinds of absurd congenital creatures, which are inherited in the blood!

It can be said that after reaching the supreme treasure of the starry sky to the treasure level, Ye Xuan has touched several pieces, but it is truly a man-made thing. Before he heard the system sounds in the brain, it was really all. No.

But now, this strange thing has appeared. It is called the Longye. It is estimated that it is the meaning of the dragon battle Longye. It is only this ship name, and only the space fortress that reaches the starry sky to the treasure level can match!

However, even though Ye Xuan is very excited about the space fortress named Longye, it is still impossible to get the phagocytic system directly by forcibly grasping it.

As for why the phagocytic system alone can exert a forcible grasp on this space bastion, it has not been possible to apply this trick to the Black Bass and the Black Wind Fortress.

In this regard, it will naturally be confessed afterwards. At the moment, even Ye Xuan is unclear. There is really no time to search the system database for this information.

Ye Xuan originally thought that the so-called Longye Space Fortress must be very mighty and domineering, otherwise it would be sorry for this inexplicable ship name!

However, after entering the Star Dock of Magic One, when Ye Xuan saw the true face of this Longye Space Fortress under the reminder of the phagocytic system, his whole heart was instantly cool!

If you don't know that the phagocytic system has never had such a bad prank, at this moment he almost doubts if he is being played!

Although the devils are not good at technology manufacturing, they are the slaves of the celestial family, and because of the extremely difficult distinction between the devil and the human being, it directly leads to even the celestial family. !

Therefore, like the important strategic killer of the Battlestar, the Celestials have unabashedly equipped the Devils with a lot!

And it's not necessary to equip them to the Ten Devils Tribes and the Devils Scouts, as well as the space bastions that are docked on the Devil's II, or are performing missions outside, just in front of this magical one's starry skyyard. The number of space bastions is quite large, and there are dozens of giants. Among them, there are several distinctly worn out ones. They are crowded in the deepest part of this huge star dock. At first glance, they know that they are obviously scrapped!

The Dragon Valley Battlestar, which is called the phagocytic system, happens to be one of them!

And the diameter of its hull is only five kilometers!

In this respect, the Tianji people are the same as the humans of the Third Universe. Basically, the battleship of the one-kilometer captain is a star, and the three-kilometer is a constant star.

And up to five kilometers, the hull will generally change into the shape of the space fortress, after all, this is stable!

The five-kilometer-diameter space fortress is a nebula, also known as the Little Fortress!

Ten thousand meters is the Star River level, also known as the Great Fortress!

In addition to these two kinds of magic guards in the front of the star, there are two Xingyu-class space fortresses with a diameter of 20,000 meters, which is extremely eye-catching, and even Ye Xuan can not help but look at it!

On the side, Chanus was obviously misunderstood, and smiled slyly and said: "The ship can't do it. The whole magical star field, the heavenly family gave them two! In fact, there is nothing, it is a little bigger, it is said that In addition to the 50,000-meter-class Star Fortress, which has already been mass-produced, even the 100,000-meter-diameter star-studded star fortress, it is about to enter the construction of the physical model. That is the real giant. Hege..."

When it comes to this, in the tone and expression of Chanas, there is a sense of fascination and pride that is unintentionally revealed. Ye Xuan's heart is moving, and suddenly a certain kind of thoughts are born in the bottom of my heart!

Inadvertently, I found a shocking secret, that is, I don't know if the demon lord's singer has already known it. It's not so simple because of his deity, and Ye Xuan's impression of him is not so good. It's really because I'm meeting for the first time, and the other side's face is so massive that it's hard to keep the dignity of his demon emperor...

Chapter 2967: Fall into the bag

Although the so-called Little Fortress of the Dragon Field looks ragged, it is clearly an old-fashioned space bastion that has entered the process of decommissioning, but Ye Xuan does not have much consideration for his trust in the phagocytic system. When even decided to pick it.

Of course, this time I came to pick the Space Fortress. In name, it was replenished to the Black Mosquito tribe. This matter should have been handled by Zuo Hongwu, but now Ye Xuan has become the Son of the Black Mosquito. And in the magic king star can be described as the sound of the wind, at least on the surface.

Therefore, Zuo Hongwu temporarily forbears, will be like the follow-up, followed by no words.

That is to say, even if the small fortress of the Longye is selected by him, then after returning to the black mosquito, Ye Xuan still has to hand it over!

This matter has already been considered by Ye Xuan, and this is absolutely impossible.

On the one hand, Zuo Hongwu and Zuo Licheng uncle, Ye Xuan did not intend to let them live alive. When they came to the road, they calculated Ye Xuan, which almost killed him. If Ye Xuan still let them return to the black mosquitoes safely. That would be too boring.

That being the case, then, this Longye is directly greedy, is it allowed to let his left Fengtai destroy a fierce mosquito space fortress belonging to the tribal assets, but he can't greet a 5,000-year-old sacred son. What is the small fortress of the diameter of rice?

You must know that the Emperor Mo asked why the sky suddenly slammed on the matter, or looked at the many pieces of chanting that he had handed over. So, this Longye No. It's also a matter of peace of mind, nothing to be embarrassed about.

After he went back, he just found an excuse to perfuse it. Anyway, Zuo Hongwu and Zuo Licheng were detained. Zuofengtai must also worry about it. The scorpion is not afraid of itching. With Ye Xuan's current heritage, it's There is no fear that he will only be repaired in the fourth order of the ninth state.

However, compared with other space fortresses in Xingwu, the Longye is really ugly to sell. If you are a normal person, you will never choose it.

Therefore, in order to avoid letting the so-called demon emperor beside him, Ye Xuan must come up with an excuse to say the past.

He decided to open a breach from the name of the little fort.

I thought about it, Ye Xuan even slammed his mouth and smacked a bit, not too embarrassed to take the words of Chanas: "The leading adults laughed, hey, this 20,000-meter-diameter original is the Xingyu-class fortress. What? Long experience..."

"However, there are too many space fortresses in this star dock. This has just been picked up and it has already been spent blindly. Or, lead the adults to let them take a copy of the roster, I will see the ship directly. Name, which is mighty, I will pick which one!"

When I listened to this discourse, I was stunned when I was in Chanaston, but I quickly reacted to it. I couldn't help but be despised. This kid clearly wanted a 20,000-meter-diameter star, which was smuggled by himself. After getting rid of it, this is a comparison.

It's like a big man, but I'm still planning to take a look at the name of the ship and I'll just click on it. It's really ugly!

However, although my heart is despised, but Chanas has not dismantled Ye Xuan, but according to the words.

Behind him, Zuo Licheng and Zuo Hongwu, who stood not far away, frowned and turned to exchange a look, but after all, they still didn't say much. Since they had already endured, it doesn't matter. endure.

The so-called Fortress roster was quickly sent over, just a piece of paper, clearly or temporarily written, Ye Xuan did not mind, after receiving it, he looked down.

While watching, he whispered a name on the ship, but he seemed to be dissatisfied. After reading a dozen or so, his scream suddenly shook and shouted loudly: "Dragon? Dragon battle dragon field? Good! Great! This domineering ship name is like this son, it is it!"

"Hey... lead the adults, the name of such a domineering ship, this Longye is not one of the two stars. If that's the case, it would be a pity, and you have to re-elect. But I really like this domineering ship name!"

"Hey!"

In this case, even Chanas, who has always been unsmiling, can't help himself. He was directly amused and laughed out. It's still the Son of the Son. It seems that this kid is really a villain, and suddenly he goes to heaven. Immersed in it and enjoyed it.

With the strange color of his face, Chanas raised his hand and pointed to the little fortress that was the most ruined and most unbearable among the entire star-studded star docks: "Cough, Longye... that is One, is a small fortress! I see, you still choose another one!"

"Hey!"

"Hey!"

Chanas's words just fell, and there were two light screams coming from behind. Looking back, I saw that Zuo Licheng and Zuo Hongwu's uncles were crawling up from the ground with anger, apparently just being thundered. It's not light. If you really get such a ruined small space fortress to go back, can you live to reach the black mosquito star?

It was impossible to fall apart on the way.

For this reason, after the uncle and the two climbed up, they even screamed in anger.

"Zhang Wuji, what do you want to do? This is the fortress of our black mosquito. Do you think it is your own private property? Is it such a play?"

"Is it a play, how can the Battlestar be so picky? If you don't understand, don't pretend that you don't know how to do it."

Although I have already decided to bear it for the time being, this time, Ye Xuan's tossing is indeed too exaggerated. It's hard to bear, so the uncles and the princes still haven't stopped, and their dissatisfaction has all vented.

Ye Xuan secretly hid, even if he deliberately turned his face into a red, a look of shame, he was so angry that he pointed at the two uncles: "Children? You actually said that the Son is playing?" I, I... I am going to fix this Dragon Field today. The Son of the Son speaks a word and says that it is necessary to make a decision on the name of the ship. This is what the Emperor of the Emperor personally promised me. Could it be that you two? Still dare to stop?"

This is clearly the rhythm of anger and anger, but also lifted out the magic emperor Mo asked the sky, this directly shocked Zuo Licheng uncle, the face was angry but did not dare to speak again, and finally snorted, sleeves And go.

On the side, Chanas has long been boring. He can see it. This kid is a big-name nouveau riche. It is too unpredictable. It is simply a villain. It is estimated that it will not be a big climate in the future.

Thinking like this, Chanas even persuaded him to give a few words, giving the other side a step, so that Ye Xuan's interest in changing to a space fortress was gone, and a few words were given, and the responsibility of the Star Dock was called. People, face-to-face and Ye Xuan made some handover procedures.

After a short period of time, after Ye Xuan and Chanas said goodbye, they looked sullen, as if they were full of sullen expressions, and stepped into the dragon field of the ship's domineering side...

Chapter 2968: Star blog

Although the Longye is worn out, it is actually just like this. Its performance is completely ok. Of course, it is just a star-rated battleship of more than three kilometers, even with a normal five-kilometer diameter. Compared with the small fortress, it is also slightly inferior, after all, it is aging!

The space fortress can actually sail automatically. It only needs to start the self-propelled mode, and determine the star map. Enter the sailing destination.

At the moment, when Ye Xuan entered the Longye, he was only followed by a fragrant Fang. Even if he was, his face was very strange. After all, Ye Xuan's performance was too disappointing. The same is true of Fang.

It's just that a group of people on the left side of the court is not pleasing to the eye, so he is still behind Ye Xuan.

Although there are only two people, after starting the self-propelled mode, it is no problem to drive the small fort. Ye Xuan even entered the password in the top control room of the Longye, and soon won the Longye. The control, driving out of the star dock of the magic guard, straight in the direction of the black mosquito, rushed into the outer hollow.

As for Zuo Licheng and Zuo Hongwu's uncles, and the thousands of demons who have killed a life from the murderous mosquitoes, they came to the Magic Emperor and also took the special Hongxing warship of Zuo Hongwu and went back. Naturally, there is no problem, Ye Xuan is too lazy to pay attention.

After some tossing, I finally left the magic star in peace. Ye Xuan originally hung in the eyes of the blind man and finally fell back completely.

At the moment, after entering the Longye, Haofangfang, when he even picked a cabin and walked in, seemed to be too disappointed with Ye Xuan's previous performance. He did not intend to pay attention to him. The latter just happened to be idle. In the general control room of the Dragon Field, I began to study this so-called Star Sky to the treasure-class space fortress!

Ye Xuan's body phagocytic system has a feature.

That is for some treasures or items, before the contact, the number of the phagocytic system may not have any relevant information, and even the search name has no results.

However, once contacted, the system's number of database will be automatically updated, and the relevant information of this object will be included.

At this moment, Ye Xuan is searching through the database of the phagocytic system to find all the details of this little fortress of the Dragon.

Being able to be called the starry sky to the treasure by the phagocytic system, it is impossible to be too simple in the first place. Ye Xuan has already been psychologically prepared, but even then, when he transferred the data and information about the Longye. After reading it again, it was still shocked by the first time, with a dull face and no words for a long time.

Is it not easy to start?

It's scary to death!

This Longye is actually the legacy of the first human race!

For the name of Xingbo, although the first universe controlled by the Tianzu clan is a taboo, no one dares to mention it, but in the third universe, the human race hardly knows the existence of his name.

His status is equivalent to the great pioneer of human science and technology civilization. It has already been deified. Of course, this is also because Xingbo is dead.

And Ye Xuan, at the moment when the phagocytic system was automatically upgraded and officially entered the starry environment, he already knew the person of Xingbo and also knew the origin of the phagocytic system.

Xingbo, the great pioneer of the scientific and cultural civilization of the human race, had created two super-high intelligent robots, namely Emperor Yi and Emperor II.

Emperor Yi killed his own creator, Xingbo, rebelled against the Terran, and established the Tianji clan to dominate the First Universe. He also threatened to destroy the Terran and unify the three cosmic planes. It can be said that it is actually the human race. traitor.

Under the circumstance, the Terran and other cosmic races have established the Federation of the Bandar and competed with the Celestials!

Emperor II is also the robot invented by the first person of the Terran “Xingbo”. At present, his official identity is the national teacher of the immortal dynasty of the human race science and technology camp.

It is he who uses the wisdom of the mechanical family to invent the phagocytic system, distribute the universe, and select potential human geniuses. Therefore, it is obvious that there are other people who have the phagocytic system like Ye Xuan.

However, everyone's growth is different, and each phagocytic system is relatively independent. Growing up with the host, changes will obviously change.

This is a later story, and today is the Longye!

The Longye is the last work that Xingbo had just completed before it was killed by the Terran traitor. Therefore, it is no exaggeration to call it his legacy.

Even the high-intelligent robot Emperor II he created can invent the metamorphosis of the phagocytic system. Emperor Yi created the splendid civilization of the entire celestial family. Some of the technologies invented later have even surpassed the current human race. Technology camp.

From this, we can see the metamorphosis talent and strength of Xingbo in science and technology.

It is estimated that only him can make such a man-made starry sky to the treasure-class space fortress!

According to Ye Xuan's estimation, even today's Tianji or Terran technology camps are immortal dynasties. At all costs, they are forced to pile up with various resources and technologies, and I'm afraid that at most, there will be an epic-level space in the sky. fortress.

Stars and treasures are generally born in the world, but it is not so easy to artificially get out!

The reason why the Longye was flown to the Magic Emperor was because the news that the Star was not smashed to the treasure-level fortress before the murder was destroyed, so that after it fell into the hands of the Emperor, Mistaken as an ordinary small fortress, thrown to the majesty of the robot to use.

Later, after tens of thousands of years of age, this small fortress even witnessed several wars between the mechanical and the human race, and finally it was scarred.

Coupled with the rapid development of the Tianji family, there have been many breakthroughs in science and technology, and the ability to build a new type of space fortress with the perfect space superposition technology inside. Therefore, this scarred old fortress was abandoned by them and thrown. Tattered and thrown to the servant demon.

This has been more than 10,000 years ago. In this 10,000-year period, the Longye has been idle in the corner of the Star Warrior's Star Dock. It has never been used by people. It can be described as a bead dust. .

If this is not the case, Ye Xuan enters the Devil's Star Dock, and his body's phagocytic system discovers the Longye. This is the greatest work in the history of human science and technology. It is still unknown how long it will be abandoned by the world. What about the years?

As for the space bastion of the Longye as a star-to-the-horizon level, why has it not been discovered by anyone for a long time in tens of thousands of years? The reason is simple.

The reason why the Longye is able to enter the threshold of the starry sky is not because it has many abnormal terrorist attacks or defensive capabilities from the beginning. On the contrary, when Xingbo created it, the Longye is very weak. Compared with the general five-kilometer small fortress of the same level, it is slightly inferior, but it has the biggest feature, which is different from all the space fortresses known to the Terran and the Celestial.

It... is alive!

Chapter 2969: Life fortress

Whether it is the space fortress made by the Terran or the Celestial People, in the process of construction, the huge hulls need to consume a lot of materials, there are various alloys with different functions, some special minerals, and various energy spar. Even have to engrave various arrays.

So that the intelligent central control system of the Battlestar, even with the star network network of the administrative star, uses the starry sky between the living body and the non-living body!

Even so, this space fortress is still dead!

But the last legacy of Xingbo is the Longye, but it is alive. The life here refers to... the real life!

The construction of the entire Longye is not using any other materials, there is no so-called alloy, there is no bit of minerals, and there is no energy spar or branding method.

It is actually a simple way to use a natural world to grow and develop naturally in a way that a world worm grows!

World worm: a mysterious unknown living body. So far, only the great pioneer of the human race technology civilization, Xingbo has discovered and received one!

Its characteristics are not completely glimpsed at present, so one thing has been verified by Xingbo, that is, this mysterious life body, with super self-evolution ability, and the unique characteristics of plasticity, and loyalty is absolutely ... life Only one master!

The so-called plasticity is unique. It can be regarded as a domino. You only have one chance to reach out and push down the first domino. Once this instruction goes out, the whole domino will continue to react if the domino has no end. Then, this chain reaction, which is in turn pushed down by the previous dominoes, will last forever...

The uniqueness of the world's insects is basically the same.

After Star Bo got this world worm, he should have hesitated and embarrassed for a while, but in the end, his decision was to lead this world worm and eventually evolve into a powerful super fortress.

Therefore, he used the evolutionary pre-plastic right of this world insect only once in a lifetime, which is equivalent to reaching out and pushing the first one of the dominoes and gently pushing it down.

The process in the process, even if the phagocytic system passed through today's Longye, can't be known. It may be regarded as a way of writing similar to the program. It may be more complicated. Xingbo is a great pioneer of human technology. Who knows his means?

In short, Xingbo put all the ideas he had in his mind for a perfect and powerful super space fortress in an unknown way, almost data input, into the original world insect body. went.

This kind of injection determines the final end of the world's only plasticity. From then on, it will continue to evolve according to all the ideas of the perfect super space fortress in his mind, just like the chain reaction of the dragon. Generally, unless you die, you will never stop!

But in fact, according to Starbucks research, this kind of world worm basically has no death, not to say how strong its vitality is, but it is simply a special kind of life, using Xingbo The official statement should be called: single-core self-derived body group!

To put it simply, this so-called world worm is not a single bug. It is a group of people. It is made up of countless tiny world worms, just like the cells of the human body. There are old cells that die, but at the same time a large number of new cells are born.

This self-contained fixed self-reduction cycle, in the view of Xingbo, is immortal!

Therefore, once evolution begins, the perfect super space fortress, which originally existed only in the minds of Star Bo, will not stop its process of continuous evolution, at most because of some kind of accident, because it caused the world insects to fall asleep. Therefore, this evolution has temporarily stopped.

At the moment, this evolution is in a state of temporary suspension, because the overall state of this single-nuclear self-derived body group has been extremely pessimistic.

As early as tens of thousands of years ago, it has been unable to spawn more tiny world worm cells, to continue this evolutionary path in accordance with Xingbo's vision, constantly condensing new and more powerful fortress parts and Function.

Because the supply of energy is too much, it is equivalent to the insect nucleus of the internal commander of the world's self-propagating group, and he chose to sleep half.

Therefore, since the long years of the whole integer, this independent world of insect self-property system, although it has been continuously creating new members, but the number is very small, only can enter the decline and die Part of it is flat.

The only way to change this situation is to provide enough energy to supply the insect nucleus of this independent self-property system, a mysterious crystal that Starbucks calls the source of evolution.

And, after injecting energy and re-activating this source of evolution, Ye Xuan also has the opportunity to brand himself into a soul brand.

This opportunity is left by Xingbo, and it is also the biggest feature of this world insect except for its unique plasticity.

Once the soul mark is branded, then this world worm will be absolutely loyal to Ye Xuan, and this confession is the only one for each world worm self-proliferation group.

Only once, can't change unless the entire self-derivative group is completely destroyed and dying!

This is definitely a surprise!

Imagine that once you let him recognize the Lord, then the space fortress, which is clearly a living thing, is completely loyal to himself. Even if the passage is wide open and the enemy enters its interior, no

change can be made. Instead, it is a Mindfulness can drive the Battlestars to take the initiative to kill them!

It is a pity that the reason why Xingbo left this unique confession is not used, not because of how great he is, but because he is injecting the idea of the perfect super fortress in his mind into the crystal of the evolutionary source of this world worm. Inside, it is found that there is not much life energy stored in the crystal when it is conceived.

At most, the world's insect population, which was only a large purple crystal volume at that time, grew to the extent of a small bastion of five kilometers in diameter. At that time, this evolution had to fall into a semi-dormant because of the source of evolution. stopped!

While Xingbo tried to provide all kinds of energy, it was useless.

In the end, for the dream of his perfect super space fortress to be hopeful in the future, Xingbo will retain the authority of this confession, hope that the Longye will be obtained in the future, and the person who discovers its secret can see it here. For a huge temptation, we are looking for the energy that can be absorbed by the source of the world's insect population, thus re-launching the evolutionary path of this life fortress.

In the end, the super-life bastion of the most perfect, powerful, and miraculous miracle that he envisioned in his mind became a real reality...

Chapter 2970: Dark murder

At this moment, Ye Xuan is really depressed!

The huge surprise that inadvertently got a starry sky to the treasure-level super life fortress has already quickly dissipated. Instead, it is a huge sense of loss, and a strong sorrow!

This is too hard for myself. It is clearly the rhythm of being a nanny.

I used to look for the corner of the starry sky super brain debris to find out how to grow and grow. Now I have to help the world's insect-derived group that has evolved into a small fortress of five kilometers in diameter. Restore the energy of the normal reproduction and evolution of the group.

The key is what this energy is, and Ye Xuan still doesn't know.

And he can be sure that all the resources in his hands are absolutely useless.

How does Xingbo exist? He had already tried all the resources he could find tens of thousands of years ago. Ye Xuan's hand, maybe it's just a few of the resources that people have tried.

In a word, if you want to find such a mysterious energy that you don't even know, it's even harder to find a needle, even more than Ye Xuan's search for the source of the system's currency.

The latter has at least one name, at least Ye Xuan has touched it, used it, and knows what it is, but what kind of energy is needed for the source of evolution of the world worm, what is the state of existence, all this, leaves Xuan is completely ignorant.

The only way is to get a new resource in the future and take it out and try it out!

It is clear that the right to death is a living horse doctor, purely a rhythm of hitting luck!

For this reason, even now through the phagocytic system, Ye Xuan has already known the core of the life fortress of the Dragon Field, that is, the crystal of the evolutionary source that is equivalent to the core of the whole world of the insect self-representation group, which is actually hidden in life. A hidden location on the second floor of the fortress.

But Ye Xuan did not immediately find out the interest to study.

After all, no matter how you study it, you can't wake it up from the semi-sleeping state, and then brand the soul of the soul to make it recognize the Lord. What else is it toss!

Thinking about it, after Ye Xuan was depressed, he quickly threw the matter into his mind. Then he began to ponder the matter, that is, the murder of Zuo Licheng and Zuo Hongwu.

This matter must be completed on the way back to the black mosquito star, otherwise it will be difficult to find another chance after returning. As for the other unsuccessful trials with them, and the surviving four on the murderous mosquito number More than a thousand devils are strong.

Hey, Ye Xuan also did not intend to let go, just in the hands of the devil's brain nucleus has been exhausted, he now draws spiritual strength, can only use the soul beast, but the soul beast is a long stream of water, despite this slow spirit The process of the source of the source is very comfortable, but the millet porridge is too much to drink, Ye Xuan has a little bit of nostalgia feeling.

The power of spiritual origin from the brain of the devil is like drinking spirits. A lot of spiritual origins instantly flow into his sea of knowledge, the taste...

Oh, don't say, I haven't tried it for a long time, and I still miss it occasionally!

However, to kill Zuo Licheng, naturally, this evolutionary process has been suspended, and it is still far from really growing up. Therefore, the performance is basically the same as the Longye. In fact, even if it is returning to the black mosquito star, Ye Xuan I did not expect to rely on it.

Therefore, even if he called out Haofangfang, after the two men walked out of the Longye, Ye Xuan even immediately smashed out the cave, and then smashed a misty fragrant Fangfang into it. With a wave, this temporary starry sky to the treasure-level super life fortress, earned the immortal world!

Although Ye Xuan, the small fortress of the Dragon Field, has not yet branded a soul to be imprinted on the crystal of the source of the world's insect evolution, so that it recognizes the Lord as a complete refining.

But before the phagocytic system has invaded this source of evolution, it was specifically revealed, for the purpose of confusion, and the same general control center as the ordinary space fortress, and initially won the ultimate authority of the total control center, which is equivalent to the completion of the preliminary refinement Chemical.

Therefore, Ye Xuan can directly use this black mosquito and black wind to directly inflict the immortal world in this body.

Later, Ye Xuan stepped into the hole shuttle, bringing out one thousand mosquito beasts and one thousand soldiers and scoops inside. Among the two thousand beast squads, from the fourth world boundary to the eighth largest The realm of the black hole in the realm is two hundred.

In addition, Ye Xuan also brought out the eight-star king's scoop that was repaired in the middle of the original point.

As for the returning to the sea and the next thousand demon slaves, Ye Xuan did not use it, but it was too weak to be used for this kind of starry sky war.

As for the wretched mosquitoes, it is naturally even more impossible. Since Xiaoxuan discovered that he still has something wrong, he has already faintly confessed. This kind of big event cannot make him participate, and he will take time out and return. Have to deal with his affairs well.

With the mosquitoes and squad squad and the eight-star king's scoop coming out of the hole, Ye Xuan quickly took the hole and retracted the immortal world. Then, the black mosquito and the black wind were directly Both space fortresses were sacrificed!

In the two space bastions of the Black Mosquito and the Black Wind, there are also thousands of mosquito and beast army and 100,000 soldiers and scouts. Among them, within the army of millions of mosquitoes and beasts, there are more than 10,000 mosquitoes in the black hole. .

And in the army of 100,000 soldiers, the seven stars of the black hole will have nearly a thousand.

These tens of thousands of murderous mosquitoes and nearly a thousand stars will be summoned, all of which have been summoned by Ye Xuan, together with the previous transfer from the hole, because they have to be mobilized frequently in the future. A thousand mosquito beasts of the refining squad and two squadrons of a thousand squadrons, according to the instructions of Ye Xuan, quickly spread away to the surrounding emptiness.

Moreover, the first time, the figure was concealed, the atmosphere was swayed, and it was quietly crouched down.

Later, Ye Xuan issued a command to the demon slave general, Buck, who was sitting in the black mosquito, and another demon slave who was selected by Buck in the Black Wind, including his entire combat plan and the final goal. .

In the end, the two space bastions also sailed to the location of Ye Xuan's command, and quickly began the charging process of the Super Stars. At the same time, they started the hidden array method and disappeared instantly.

In the blink of an eye, this piece of emptiness is once again in peace. Everything seems to be no different when it is peaceful, but in fact, the layout of Ye Xuan has already made this emptiness area an absolute place to sleep.

The reason why Ye Xuan chose to set up an ambush here is because here is the area where the natural cosmic wormhole closest to the magic star is on the way back to the black mosquito star, Zuo Licheng and Zuo Hongwu's uncle The special star-rated battleship, if you want to expand the long-distance space, you must come here and enter the wormhole!

At this time, they obviously do not know that this piece of film is about to arrive, and the surface seems to be infinitely empty. In fact, it is infinitely murderous...
