

Super D. S 3021

Chapter 3021: Star explorer

That piece of void, named Star Trek!

It is said that it is Lei Tomb. In fact, it is also a starry sky, and the area is half as wide as the black mosquito star. The only difference is that the vast void is more than the black hole of life called the black hole. More terrible.

In the vast expanse of the galaxy, countless years have passed, there are countless thunders and lightnings, raging!

Once the warship enters it, it will be smashed directly into the moment.

If the flesh is invaded, the result is not to say more, and the death is even worse.

This is not a thunder and lightning that evolved from natural meteorology in the atmosphere of a star. This is the natural lightning generated by the universe's void. The power cannot be said at the same time.

This starry sky, the tomb of the thunder, known as the thunder's tomb, even the Thunder can only be destroyed inside, can not escape, the consequences of the entry of souls or warships, it can be imagined.

At the moment, this piece of starry sky, the grave, but clearly is the only hope of Ye Xuanyuan after the fall of the elite elite fleet.

If there is a choice, he would rather enter any of the top ten Jedi, and he does not want to enter this starry sky grave with full of thunder and lightning.

The power of the Thunder is terrible, and it is often associated with Tianwei.

Since the last time I contacted the land of the cage in the forbidden land of the magical emperor, it is very likely that after a ray of artificial heaven or a sacred eye, Ye Xuan has long since refused to Any heaven, there is even a slight deal.

Unfortunately, this time he did not have a choice.

Among the top ten Jedi of the Devil's Star Field, the nearest one is the starry sky grave between the black mosquito star field and the black wind star field.

The other nine places are far away, and when they arrive, Ye Xuan's hole shuttle is surrounded!

Since there is no choice, there is no need to choose any more. Ye Xuan adjusts the direction even after the movement, according to the coordinates of the star map displayed on the screen of the virtual shuttle, turning into a purple flying rainbow, at a very fast speed, toward the black The starry sky between the mosquito star field and the black wind star field rushed over.

Of course, although this decision is helpless, the purpose of Ye Xuan is only to force the elite fleet of the human beings to retire after the death, but it is not a slap in the face and die.

Therefore, even if this starry sky is very sinister, but since he chose this place as a place to use it, then Ye Xuan's heart must be sure, and in the hands, it must be dependent.

He is not the kind of person who doesn't care about it. If he doesn't rely on it, Ye Xuan will definitely find another way.

And its dependence is another natural treasure in the hands that reaches the starry sky to the treasure level.

Named Lei Diyin! The level is the treasure of the source of the treasure!

Everything from the starry sky to the treasure level can be met and cannot be met.

Even the swallowing system is not a star to the treasure.

It is an artificial thing, and in the man-made, Ye Xuan only knows one thing from beginning to end, that is, the life fortress of Xingbo, now in the hands of Ye Xuan, but unfortunately has not found it to grow energy.

In addition, Ye Xuan has a total of two stars in the hands of the treasure, but they are naturally born in the universe of the galaxy, not artificial.

The other one is that the starry sky is not dead gold. It is a star-to-treaty mineral. It has been integrated into the trenches, and it has become an epic glass of the starry sky.

This Lei Di Yin, although it sounds like a magic weapon for artificial refining, in fact, it is born by nature, naturally bred by the universe void.

These two stars and treasures, Ye Xuan was originally found in the resource library of the main flagship Black Wind of the Devil Scouts. It can be seen that the Demon Scouts are in the funeral star field of the Third Universe of the Terran. A lot of good things.

But that time, it was also the accumulation of the entire Scouting Corps for several decades, and it was only two pieces of treasure-grade minerals, which shows the scarcity of such existence.

Lei Diyin, the phagocytic system on its identification results is the treasure of the starry sky to treasure level!

This sentence has two meanings, one is its order, and it is the star to the treasure.

The second layer means its property, which is the treasure of the source.

As for the origin of the power, think about its name, Lei Di Yin, naturally the source of the Thunder property.

Moreover, from this emperor in its name, it can basically be analyzed. This Lei Di Yin, most of them have immune power against Thunder lightning, and even control the power of lightning.

The emperor, the meaning of the world, is very understandable.

Although Ye Xuan has not had time to verify this, but now the situation is so, the crisis has reached its peak, he has not taken care of it.

More importantly, he has confidence in the phagocytic system. Since the identification result of the phagocytic system is the starry sky to the treasure, it is Lei Diyin, then there is absolutely no other possibility.

This Lei Di Yin is the reliance of Ye Xuan to enter the Starry Thunder!

At this moment, with Ye Xuan suddenly fine-tuning the direction of the forward movement, the ethnic elite fleet that was tightly biting behind the hole shuttle, did not see any abnormality, and immediately fine-tuned the direction. Still fully chasing.

This situation has been happening all the time. Under the control of Ye Xuan, Dong Xuan is not always a linear motion. It can be said that it is like a headless fly. It is everywhere, and it changes direction from time to time.

Therefore, this time again changing direction, no one feels any abnormality.

In addition to the tightest bite of the elite fleet of the Terran, all the large and small fleets of the First Cosmic servant and the Baizu were also far away.

Including the devil's royal fleet where Chanus is located.

Of course, now that the Devil's Royal Fleet has suffered heavy losses, now only half of the power is left, which is miserable.

The fleet of these slave servants has not dared to be too close, but it is obviously impossible to let them give up and stay away.

In their view, the fleet of the Tianzu nationality will soon arrive, and at that time there will be at least one small fortress of 50,000 meters in diameter. At that time, the rampant Terran elite fleet will be exhausted.

An hour later, when the elite fleet of the Terran team was close to a big one, according to this trend, at least three to four hours at a time, Ye Xuan's hole could be circled.

In the endless void of the front, there finally appeared a lot of endless stars filled with thunder and lightning, and Ye Xuan's mind suddenly sounded the familiar tone of the phagocytic system.

Listening to this sudden sound, Ye Xuan first stunned, and then instantly ecstasy, finally... wait!

"Hey, do you find the starry sky grave, do you explore? Tip: If the exploration is successful, there will be a chance to upgrade the system title!"

"The current title of the system: second level, Star Adventurer!"

"The next level of the system: third level, interstellar explorer!"

Chapter 3022: Fearless

"Interstellar Explorer: The title's own halo effect will add an interstellar coordinate jump ability based on the original two-level title of Star Trek and Interstellar Adventurer. Once the jump is successfully activated and turned on, it is only in the same Within the cosmic plane, you will be able to ignore the cosmic distance and arrive in an instant!"

"Hint: The position that the interstellar coordinate jumping ability can reach is only the coordinates of the cosmic wormhole that has been imprinted in advance! If it is not branded, the interstellar coordinate jumping ability cannot be expanded!"

"Hey, the system is finished, is it explored?"

At this point, the tone of the phagocytic system ends, waiting for, is the final reply of Ye Xuan.

And this reply obviously does not need to be considered. For Ye Xuan, since the last time the system title was upgraded from the first-class interstellar traveler to the second-level interstellar adventurer, the terrorist ability to brand the wormhole coordinates was obtained. after that.

He is already looking forward to another system title upgrade.

Unfortunately, this opportunity to upgrade the system title is like a hidden copy of the game, only triggered if certain conditions are met.

And Ye Xuan took the initiative to apply, but it has no effect, the system will not care.

At the moment, the general opportunity for this hidden copy has finally arrived.

As long as he successfully completed this exploration, he will officially upgrade the second-level Star Adventurer title to a third-level interstellar explorer.

Then, the wormhole coordinates that Ye Xuan had previously branded in the black hole of life are no longer a pity, and will become the last card that can be used in critical situations.

For example, now, if he is already a third-level star explorer, Ye Xuan wants to get rid of the elite fleet of the Terran behind him. It is a matter of thought.

As long as the interstellar coordinate jumping ability is turned on, no matter where he is, as long as he is in the first cosmic plane, then when the jumping ability is activated, he will disappear in the same place immediately, no matter how far, he can successfully Come to the black hole of life!

It is simply the only way to escape!

It is a pity that although this method is almost in sight, it does not belong to Ye Xuan. If you want to have it, he must successfully complete the exploration task assigned by this system.

In other words, the starry sky in front of the grave, still have to go.

Moreover, before he decided to accept the mission, Ye Xuan did not even know what the conditions for success were.

Shaking his head and smiling, Ye Xuan even gave a definite reply.

Then, the tone of the phagocytic system sounded again in his mind...

"Hey, the host confirms that he is accepting the mission!"

"Exploring the goal: making mines!"

"Exploration requirements: stay in Leiyuan for one month, and at the same time condense ten Leiyuan beads!"

"Failure penalty: erase the wormhole coordinates of the previous brand!"

what? This time, there are still failure punishments?

Ye Xuan was immediately shocked, although the punishment for exploring failure was just to erase the wormhole coordinates that had been branded before, but Ye Xuan had branded a whole?

Although after erasing, I can go back to the black hole of life and re-brand, but the pain of tearing the soul is not a common sin. Even Ye Xuan, I don't want to go through the second time.

In fact, in a cosmic plane, there is one place for this wormhole coordinate to be used as an escape card. Unless you encounter something particularly important, you must go through it again in the future. Ye Xuan will be the same again. In the cosmic plane, the second wormhole coordinates are imprinted.

Unfortunately, although the punishment is not light, but this is not the case that Ye Xuan can be changed by subjective will. If the system says that failure is to be punished, then he can't escape and can only accept his fate.

Unless you ensure success!

The success conditions of this exploration mission are simple. There are two items. One is to stay in the starry sky mine that is called the mine source for one month. The second is to condense ten mines. Source beads.

The first point is to understand, Ye Xuan also has confidence.

As for the second point, he doesn't even know what Lei Yuanzhu is. If he has to enter it, he can understand it based on other clues.

But in any case, there is one thing that is certain, that is, the task of exploration has been accepted at the moment, and it is impossible to repent. The dangerous area in front of it, the source of mine, or the grave of the sky, Ye Xuan There is no choice but to rush in.

And it has to be as soon as possible, because the elite elite fleet behind it has already approached a little.

"The place where the mine is buried, anyway, it is not the place where I am buried. If there is anything I am afraid of, go in and go in!"

In the mouth, muttering to himself, Ye Xuan flipped the hand from the immortal world of the body to the treasure of the star to the treasure of the Emperor.

This is a prismatic stone with only the size of the fist and the color of the whole body. The color of the green gold is scarce. This strange color reveals the mysterious color, only its color, it can be seen extraordinary.

In addition, it is clearly a natural natural thing, but it is coincidentally bred into the shape of this neem, which is another singularity, which is not surprising.

This Lei Di Yin, Ye Xuan also has refining and refining in the future. When it was obtained, Ye Xuan's refinement of the meteor was too weak to be refining. Perhaps it is now the third largest realm of satellites. A little bit, but at the moment there is really no time to try.

He can only hold it in his hands first, and then wait until he enters the starry sky behind the grave.

call out!

With a singularity, the stunned purple, which was made by the emptiness of the hole, is like a glimpse of a glimpse. One end will be plunged into the front. This piece has a lot of blue thunder blasting, and the golden lightning is raging.

Seeing this scene, a ship of the first cosmic slave servant fleet that was in the distance was in the distance, and suddenly a large sound of cool air was heard.

In particular, Chanas, in the top commanding cabin of the Devil's Royal Fleet, saw this scene at this moment, and the chin that was shocked fell to the ground.

Exclaimed: "Rely! Zhang Wuji that kid is crazy? That is the starry sky, the grave, even the thunder and lightning in the inside can only be buried in the desperate place, he actually drove the warship into the head? It's a rhythm of death and death! Crazy! It's definitely a madman..."

At the same time, the flagship of the elite elite fleet that had already been close to the enemy, the top command box, including the people of Naples and Xuanyuan Ziyang, also changed in this moment. The heart has sunk to the valley.

They are naturally aware of the top ten Jedi of the Devil's Star.

Even if I don't know, the big screen on the command cabin is showing the introduction...

"I actually prefer to enter this desperate land, and I will not go back to the general, Xuan Huangzi him..."

At this moment, the Admiral of Naples had already lost his mind, and his mouth whispered softly: "What is his plan? What is his plot? Can it be so important? Even life, no pity, This is... no brave fear!"

Chapter 3023: Real fortress

As Ye Xuan's hole was turned into a purple stunned rainbow, the blue thunder and golden lightning rushed into the front, and the raging starry sky, the graves, and the elite fleet that followed closely and looming around The first cosmic slave servant fleet in the distance was completely stupid in the first place.

The horror of the Star Trembling is unknown. In the top ten Jewels of the Devil's Star, it ranks first, far more than the empty black hole with a lot of empty beasts. It can be said that the name is resounding. The supremacy of the natural environment of the cave is not dare to step in.

The top commander of the elite fleet of the Terran, the Admiral Napoli, said that his personal cultivation has surpassed the tenth dimension of the world, but he is also afraid to get involved.

The strongest of the first cosmic slaves and hundreds of fleets in the distance, not to mention more.

One thing I have to mention here.

That is the top nine Jedi of the Devil's Star Field. Although it is nominally crowned with the Devil's Star Field, in fact, these ten Jedi can almost be said to be the top ten Jewels of the First Universe. .

The first universe is vast and boundless. Except for the area occupied by the tyrants who ruled this plane, most of the other voids are divided by the servants of the first universe.

The Devil's Star, located at the edge of the First Universe, is only a small part of the first cosmic edge.

However, in this small part of the area, there are a total of ten places that are called star-level dangerous places.

Such an area is not in the other slave servants of the First Universe.

It is to look at the entire first universe, the other dangerous places that can be found in other stars, and there are not enough places comparable to the top ten Jedi of the Devil's Star.

This clearly shows a strange.

It only occupies the devil's star field of the first universe, but it contains nearly 80% of the desperate dangers in the first universe. If there is no special reason for this, I am afraid that no one will believe it.

Someone once said that this is related to the most hidden source of the demon people. After all, the appearance of the devil is completely the same as that of human beings. It is just a spiritual source of nuclear in the brain. If you ignore this, the devil Seeing to be human, in fact, it is completely ok.

Among them, perhaps there is some kind of hidden existence before the ages.

According to this statement, this secret is obviously related to the top ten dangers of the Devil's Star Field, but the truth of it, no one can give a definitive statement, the specific truth, who can Said clear?

At this moment, with Ye Xuan's Dong Xuan rushed into the starry thunder cemetery, which was the head of the top ten Jedi, the fleet that followed closely or far behind all stopped, and fell into a dilemma. .

Especially this elite elite fleet!

Nowadays, in the top command post of the cutting sky, it is already dead.

Everyone's sights were gathered on the commander of the fleet's general commander, General Napoli, and waited for his orders.

In this situation, no one dares to say their opinions easily, it is too big!

Even Xuanyuan Ziyu closed her mouth, and Ye Xuan's attitude of not responding to his shouting always made her gnash her teeth. At the same time, there were countless suspicions in her heart. At this moment, she completely lost her mind. .

Admiral Napoli has already fallen into a sorrowful look.

In front of this piece of Qingleijindian raging land, it is based on his supreme cultivation of the eleventh state of the realm of Xuanguang, and he dare not dare to get involved in even one step. As for the idea of entering the small fortress with the Tiantian, then More unrealistic.

Not to mention this kind of small fortress, but in fact it is not really a fortress, the star-class giant fortress, it is the 100,000-meter-diameter real starry sky fortress, and absolutely dare not enter even one step.

Both the Terran and the Celestial Warships and the Battlestars have more or less certain electronic equipment. Once inside, these electronic devices will be in a state of disorder under the influence of the amount of lightning power, and the malfunction will be small and out of control. In case, those electronic control attack systems blew themselves up, it is definitely a disaster.

It is impossible for itself to enter alone, and the small fortress in the sky is even more useless. Then, the choices placed in front of you are no suspense.

Naples has only two choices.

Either return immediately, temporarily return to the third universe, and then return to the other, and then seek another rescue strategy. Among the entire human race, even the immortal dynasty of the science and technology camp has a lot more powerful than Naples, among which With the power of his own body, he can enter the supremacy of this kind of starry sky.

Nowadays, the Emperor Xuan has entered the Starry Thunder. With the ability of Naples, there is no way to rescue it. It is also powerless. Returning to the immortal dynasty and asking for help is the best way to deal with it.

Another option besides this is to stay here and wait for the return of the Emperor Xuanzi.

In Naples's view, since Xuan Huangzi has the courage to enter the starry sky and graves in front of him, then he must rely on it, although this point can not even believe in Naples, but the stunning eyes of Xuan Huangzi are in front of you. It is not impossible.

However, if you choose to stay here, the crisis that the entire Terran elite fleet will face is obviously not negligible.

The fleet of the Celestial family is coming at any time, it is definitely a real crisis!

"boom....."

"boom!"

.....

Just as Napoli hesitated, the far right in front of the right side of the sky, at this moment, suddenly came a few earth-shattering sounds of the explosion, alarmed the whole piece of vast void, countless eyes, the conditioned reflexes generally gathered in the past!

Then, they have changed!

"That is....."

"A huge giant fortress is much more terrible than the small fortress of the Terran!"

"100,000 meters in diameter, that is, one hundred kilometers, hahaha... This is the real starry fortress, the fleet of the Tianzu people, finally arrived!"

"No, it's just a pioneer who is in the plug. There is only one distinct one. There should be other warships in the follow-up, but this fortress should be jumped first."

"This is enough, a real fortress of 100,000 meters in diameter is enough to crush the elite fleet of the Terran!"

That's right, the space fortress that is coming at this moment does have a horrific diameter of 100,000 meters. This is a true star fortress.

The 50,000-meter-diameter cutting sky, although known as the Little Fortress, is only a nickname. In fact, the 50,000-diameter space fortress, the real official collectively known as the Star-class Fortress, is not a Star Fortress. .

The bright silver color of the whole body that comes at this moment, exudes a strong metal chilly behemoth, is the real starry fortress, it comes from the heavenly family!

And as the strongmen in the slaves and hundreds of squadrons are exclaimed, this starry fortress is alone, but it is enough to crush the elite fleet of the celestial beings...

Chapter 3024: Escape

This star-studded fortress with a bright silver color is called the Butterfly. Its highest commander is two official Tianzu ethnic groups. From the outside, it is completely a man, a woman and two human beings.

Not only young, but also handsome and beautiful!

The male name is Shan Bo, and the female name is Ying Tai!

These two celestial tribes are obviously obsessed with the story of the ancient legend of the Terran, not only the name of their own characters, but even their star fortress, even named as the butterfly.

What is even more bizarre is that although they are just the same as human beings, they are only two robots who have born self-consciousness, but these two robots are commensurate with husband and wife, and they are the two. Man's husband and wife file.

All of this is in the study of the Terran. The Tianji people are created by the Terran. Although they have rebelled against the Terran, in the bones, the Tianji people have always been moving toward the Terran, and even thinking about replacing the Terran one day. Everything is beautiful and becomes their own.

Butterfly number!

Beautiful Yingtai, handsome Shanbo!

All of this, if it is unknown, the people of the strong people can see it, and even it may be touched. But in fact, if you give birth to the celestial family and take the initiative to approach, then the final result will definitely be Very tragic.

All the celestial people, for humans, have a resentment of engraving into the bone marrow.

The Terran created them, and there was nothing to owe. Instead, the Tianzu people rebelled against humanity. All these faults were originally the Tianji people, but they decided that it was because of the human race that they were burdened with rebellious charges. In the base camp, any formal ethnic group began to inculcate this idea when he first gave birth to self-awareness.

They hate human beings, but they also blame human creativity and great potential. This is the envy and hate of red fruit!

Just like the education that the human race* received from childhood, it has already penetrated into the depths of the soul and cannot be changed.

In this star-studded fortress of the Butterfly, there are not many real-world people, only Shanbo and Yingbo.

As a robot who gave birth to self-awareness, the people of the Tianzu nationality have a unique ability in the control of warships. They are powerful human races, and they can only hope that they will not be able to compete with them.

A huge starry fortress, even if the Terran improves its control system, and finally, in the case of the simultaneous operation of various systems such as kinetic energy, defense, and attack, the controllers that need to be invested, at least in thousands.

But the Tianji family only needs two ethnic groups.

Shanbo and Yingtai are the two active control centers. They are located in the Huadie, and they are enough to fully play out all the functions of the Butterfly Star Fortress.

Of course, in addition to the two of them, some semi-opening robots, or even no intelligent robots that have produced self-awareness, there are still many, and tens of thousands of giants in the butterfly.

They are basically responsible for some repairs, as well as the task of driving small combat landing ships.

At this moment, with the arrival of the Star Fortress of the Butterfly, a large number of First Cosmic servants and hundreds of fleets in the distance are thundering, but in this elite fleet of people outside the Star Treasure, it is a piece. Dead, all the people have changed their face, a very bad sense of life and death, hit the heart.

"Escape! Escape immediately! Distracted escape... Even if you only escaped one, you must report all the news of Xuan Huangzi to the Marshal!"

In the top command cabin of the felling sky, the three generals of Naples did not hesitate, and the opening was three escapes. At the same time as this order was issued, a clear rule was also made: "Other warships that cannot escape can only die." It must not be taken prisoner. Everything of Xuan Huangzi can't be known by the Tianji people. This is the highest order. Once trapped, it will blow itself!"

"Hey..."

"Hey!"

"Hey!"

The command of the Admiral of Naples was just issued, and in the eleventh space bastions including the ruins of the sky, there was a loud humming sound. This is the rhythm of the space hopping function that has been activated and is starting at full speed.

At the same time, the distant starry sky, the bright star of the silver butterfly, the starry sky fortress, clearly also sent a similar but strong voice of humming, the appearance of this voice, representing two layers of meaning .

Either the space jump is being started, or the main gun of the fortress is started.

The 20,000-meter star-class giant fort, its main gun is a five-meter-diameter annihilation comet.

The 50,000-meter-high star-class giant fort, its main gun is a super-annihilation cannon with a diameter of 20,000 meters.

And the 100,000-meter real starry sky fortress, its main gun, is a 50,000-meter-diameter dead light cannon, its light column, is black, is anti-material light energy, a cannon goes down, if the bombardment of the sky, the latter Will not be blown into a fireball, but will be erased silently, extremely horrible!

This is also why the Admiral Neapolitan did not even have a rebellious thought after seeing that the other party had dispatched a real starry fortress. The reason for the dismissal was ordered at the first time.

He is not afraid of death, but he must send all the news about the Emperor Xuan to the third universe.

At that time, as long as the Terran immortal dynasty also sent a few 100,000-meter-diameter starry fortresses, Xuan Huangzi may not be saved.

But most of them have nothing to do with him. In the immortal army, you can qualify to control a starry fortress, at least four-star general!

After all, this real starry fortress is already the ultimate strategic weapon that is only used for deterrence!

"call out!"

A faint light whistling with a chilly meaning came out, and from the distant imaginary ship, a black horror beam was rushed out.

The diameter of 50,000 meters is enough to completely cover the flagship of the elite elite fleet.

What is even worse is that this black dead light cannon energy beam, the target aimed at this moment, is exactly the sky.

As the giant star-like level of the sky, it is necessary to take a few more seconds to expand the space. The ten star-level giants around it are already six. Jumping away, it is still in the final stage before the jump.

Once the energy beam of the dead light cannons, the sky will be undoubted.

It was also at this moment that the seventh humanoid star-class giant fort just finished the space jump, and it jumped directly into the void between the black light gun energy beam and the cutting sky.

Unfortunately, with its 20,000-meter-diameter hull, it is impossible to completely intercept the 50,000-meter dead light gun energy beam.

So, this star-class giant fort, burst into a self-destruction...

A huge fireball exploded, exceeding the diameter of 50,000 meters. Finally, it completely intercepted the energy light column of the dead light cannon, and fought for the jump of the sky.

Chapter 3025: Oath of the butterfly

"boom....."

The huge light ball exploded, and a 20,000-meter-diameter star-sized giant fort was transformed into a glorious ball of light.

Almost at the same instant, the black light bulb energy beam that came from the front of the void was just rushed over. Two kinds of light, one is the intense red light in the positive material category, and the other is antimatter. The black dead light, offset against each other, finally, when the red light ball produced by the self-explosion of this star-class giant castle disappeared, the black anti-matter dead light gun energy beam was also extremely weak, basically unable to cause anything. It hurts.

This is also the consistent practice on the battlefield to intercept the black energy beam of the dead light cannon.

After all, it is antimatter light energy. Although it is horrible, the only shortcoming is that it can be offset by positive material light energy.

In fact, this is not a shortcoming, because on the battlefield, unless you can know in advance that the other party is dispatching such a strategic deterrent weapon, and then prepare some unmanned fortress as a self-destructive interception.

Otherwise, once the death light cannon appears, the result must be either to let it go where to hit, to ravage the entire battlefield, or to pay a small price, use other warships to blow themselves, form an interception, and offset the black of the dead light cannon. Energy light column.

Just for example now!

But in fact, this so-called small price is also a 20,000-meter-diameter star-class giant fort, small, and where can it be small?

From this point of view, the so-called shortcomings of the death light can not be regarded as a shortcoming. Although it can be intercepted, every bombardment, even if the other party intercepts, it is necessary to pay a heavy price for a non-small warship. Absolutely The value is up.

For example, now, when this star-class giant fort is actively welcoming, launching a self-destruction, successfully achieving interception, offsetting the black light beam of the dead light cannon of the Star of the Star Fortress, the total command cabin on the top of the sky Inside, Samsung's distressed Naples is almost stunned.

The key to a star-sized giant fort is that there are more than 2,000 elite officers and men of the immortal army in this giant fort. They are all straightforward confidants of Naples.

In an instant, it will be turned into nothing!

"what....."

Seeing the crack, Napoli screamed and snarled: "The butterfly, the general swears that in the first year of life, he will definitely return to the first universe, and he will personally break you into pieces, ah..."

Whether it is the immortal dynasty of the Terran or the celestial universe of the First Universe, the number of star fortresses they control in their hands is limited. Everyone has played each other for so many years, basically this kind of strategic deterrent weapon against each other. There is a record.

Therefore, when the butterfly number appeared, Naples recognized it at a glance.

It is a pity that although he is the supreme existence of the mysterious light, even if the gap between the two sides of the warships is not mentioned, only with his own strength, even if the commander of the other side, Shan Bo and Yingtai, launches a personal meat war, Naples has no chance of winning.

The two guys are also the cultivation of the black light.

Although they are robots, the human monks of the immortal dynasty can use their genetic broth to develop their potential and enter the way of practice in a different way than comprehension.

Then, there are more tools that robots can carry out in this regard.

Although the real celestial people do not have the real flesh and blood, they are replaced by various materials. If you really want to cut off your body, then it's not just some wires, metal parts, etc., but many things are Special refiner material similar to flesh and blood.

Even some of the treasures of minerals and crystals can be found in the bodies of real heavenly people.

They are completely refining themselves as a magic weapon. They can not only use the genetic culture fluid like the human monks of the immortal dynasty, but also carry out various transformations drastically.

Therefore, the people of the Tianji nationality are generally extremely powerful in terms of individual strength!

Even in the Terran camp and the Federation of the Venezuelans, there is such a saying that if you can pick up the body of a celestial tribe, you will develop in an instant, just like the various minerals and materials in the body. Switched to a lot of cultivation resources.

But that kind of thing is basically impossible, at least, it has never happened before.

The body of the Tianzu ethnic group is not the cabbage in the street. Where can you get it?

With the roaring of the Napoleon's raging sky, the ruins finally succeeded in launching the space jump, and the huge hull disappeared instantly.

Just before it disappeared, the other stars and giants, which also completed the jump in advance, blinked, and the entire elite elite fleet was evacuated.

The only difference is that when you come, there are eleven, and when you return, there are only ten.

One of them turned into a cosmic dust and remained in the first universe forever. More than 2,000 immortal army officers and soldiers in the star-class giant castle became the heroes of the Terran...

Surprisingly, the entire Terran fleet has left, and after a second jump, it will gather in front of the cosmic wormhole leading to the Third Universe and then return.

However, the singular butterfly of the Tianji nationality did not follow the meaning of chasing it. It still hovered steadily in the void and did not move.

Butterfly No., in the top command cabin.

Unlike the Terran and other warships or giant forts of the first cosmic slaves, the starry fortress of this celestial family is empty and almost invisible.

Except for some intelligent robots, only two human figures are visible.

Of course, it's just the same shape as humans.

Two young people, one man and one woman, are the heavenly people of Xuanguangjing, Shanbo and Yingtai.

"Don't chase it?" The pretty face of Yingtai turned to the side of Shanbo. Although she used the interrogative sentence, she could clearly hear a certain decision from it. Obviously this is what she meant.

"They have paid the price, the purpose of the warning has been reached, and there is nothing to chase."

As he said, Shan Bo turned his head and looked at the star field where the starry sky was in the grave. The corner of his mouth was a very interesting smile: "Compared to the elite elite fleet, I am now more Interested, it is the son of the black mosquito that is called Zhang Wuji."

"Don't you be like this?"

Speaking of this, Shan Bo's words are a bit of a word, but the smile on the corner of his mouth is more distinct: "A little devil tribe, how can the elite fleet of a Terran dynasty be so poor? There is only one reasonable explanation. That is, this person is Xuan Huangzi, or, related to the whereabouts of Xuan Huangzi. You guess, the truth of the fact is the former, or the latter..."

"No, I am thinking about another problem..."

Yingtai shook his head and swept his gaze to the star field of the star-class giant fortune.

Chapter 3026: Command the world thunder

"The star-class giant fort was clearly a chance to escape, but it did not do this. Instead, it chose to intercept our dead-light cannon anti-material energy light column and eventually went to the destruction. You said... this is humanity. Emotion?"

In the middle of the fascination, the eyes of Yingtai still fall in that void, and the mouth is also muttering to himself. In the words, there is also a deep incomprehensible meaning.

"Damn human emotions?"

Shan Bo frowned, but his mouth floated with a sigh of disdain: "This is the greatest weakness of mankind. If it is not emotional, how many thousands of people in the star-class giant fort are now elite, how can they die? If it is not emotional, How could the original Xingbo be led by our emperor... Well, this thing will not be said, the leader is not allowed to mention!"

"But there is one thing that is unmistakable. Human beings, because of that **** emotion, become weak, Yingtai, don't make mistakes..."

"Maybe you are right, but I don't think so!"

Shaking his head, Yingtai seems to have some income, and the fascination in the shackles fades away. It reveals a clear-cut: "You and I have been attracted by the story of the humanized butterfly since they

gave birth to the ideology of the butterfly. I am fascinated, and therefore, I am famous for myself, you are named Shanbo, and even our fortress is named as the butterfly."

"But... all this is the appearance. The feeling you give me is no different from other tribes. Even the name of Shanbo can't make me have other associations with you."

"But the real Zhu Yingtai to Liang Shanbo, clearly should not be like this, in her eyes, no, in their mutual eyes, the other side, are unique, can prefer to accompany their butterfly... .."

"This is emotion, what a wonderful human emotion, why do you say it is a human weakness?"

"On the contrary, I think that human beings, because of their own emotions, the history of their ethnic groups, will be so brilliant, and they will leave a beautiful story like Huadie."

"Ugh....."

Speaking of this, Yingtai sighed with a sigh, and smiled: "Unfortunately, your stubbornness makes you unable to understand all of this. It seems that if you want to feel the real butterfly, I can only try and The human race has embarked on an emotional journey. Perhaps the so-called Emperor Xuanzi will be a good choice!"

Speaking of this, the Yingtai turn to the starry sky in front of the starry sky, and the corner of the mouth began to outline a very interesting smile: "Okay, I admit, I am also right now. The question you just mentioned is of interest. You guess, the devil of the devil's black mosquito is Zhang Wuji. Is he a Xuan prince? Or is it just related to the whereabouts of Xuan Huangzi?"

Aside, Shan Bo's face, because of this discourse, has completely gone down!

Not waiting for him to respond, this star-studded fortress, which was originally hovering, has been rushing toward the starry sky grave in front of the Yingtai.

In the top command cabin, the voice of Yingtai slowly sounded: "Since you and I are both interested in that Zhang Wuji, just as the Star Fortress has the ability to stay in the outer area of Leifen, then it is better to go in and see. Look, it's not working, just quit right away..."

In this regard, Shan Bo kept silent, but in his mind, he thought about it at this time, but how did he not pay attention to Yingtai, first killing the guy named Zhang Wuji.

Whether he is the Devil's Son or the Terran's Emperor, since he dares to let Yingtai give birth to this idea, then he must die.

In the distance, the fleet of the slaves of the first universe and the royal family of the devil, after seeing the elite fleet of the Terran being forced to leave, is now approaching.

After all, the top of the Celestial family came, and they must come to see them the first time.

However, before they approached, the bright silver fortress, like a small star, turned into a silver light and rushed into the horrible starry sky.

Although they also know that this starry fortress has the ability to stay in the outer area of Leifen, this scene still makes an exclamation.

"God! The fortress of the Tianji family actually rushed into the starry sky, and what happened?"

"In the purple small private battleship, isn't it just a new son of the Mosquito's black mosquito? What is this person coming to? Can the people of the elite elite and the top of the heavenly family pay attention to it?"

"There must be hidden in this, just waiting for me. I don't think I have the qualification to understand the inside..."

As these exclamations sounded, in the top command cabin of the demon, Chanas's chin, this time it really fell to the ground, with a dull color, muttered: "First, the guy It's a demon man, so he can't be a

prince, and then...and what should be explained about this? It's really a dog, how is this commander getting confused!"

.....

Star Trek!

Ye Xuan did not know anything about what happened outside Leifen.

At the moment of rushing down the starry sky, he entered the other cosmic plane. In the other world, everything in the surrounding environment has changed, and the outside world has completely lost all sense and perception!

This is a world of thunder and lightning.

Thunder, it is blue.

Lightning is golden.

Qinglei and Jindian are the main tone of the world. There is no star, no cosmic dust here. Even if it has been there, it has been turned into nothing by the infinite Qinglei and Jindian.

In this world, only Qinglei and Jindian are constantly raging, dying... reciprocating!

Ye Xuan did not dare to go too deep!

Although the virtual shuttle is an epic ship of the starry sky, with the foundation of a small private warship, it can expand the wormhole jump that a large warship can survive, because it has been integrated into a very wormhole ship with extremely strong materials.

But in this world of thunder and lightning raging, it is the shackles that can be stunned, but I am afraid that it will not last long.

In the depths, Ye Xuan's only chance is to refine the starry sky to Bao Leidi.

Therefore, shortly after entering the starry sky, Ye Xuan stopped in the peripheral area and transferred the hole shuttle to the automatic control mode. The only requirement was that the energy shield was fully opened.

Then, according to the faint green gold seal, he closed his eyes and entered the state of cultivation.

Lei Diyin, known as Lei Di, is the emperor in the Thunder, the meaning of supreme.

Whether this Lei Di Yin is as famous as it is, everything will soon be revealed. As long as Ye Xuan successfully refines and integrates it into the body, then all the information of this starry sky will be in the first place. Controlled by Ye Xuan.

And whether he can complete this system task, just look at this Lei Di Yin, can really ... command the world thunder!

Chapter 3027: Wild one gold lotus

"Booming..."

"Boom!"

.....

The sound of the thunder of the thunder, which was suddenly and abruptly introduced into Ye Xuan's ear, made him feel moved.

Pass the picture!

Actually it is a heritage picture?

Moreover, this is clearly a void filled with the scent of the sky, belonging to the void of the ancient times, the kind of breath, and Ye Xuan from the cave giant giant turtle, the golden dragon and the 陨天弓神通 and all the inheritance pictures have seen, The same.

In the same way, it is the same as the mysterious land of the ancient cages!

Distinctly belong to the same era, once in the same period of history and rivers, carrying a sinking...

At this moment, Ye Xuan's heart flashed through a clear understanding. It's no wonder that it is a treasure of the starry sky to the treasure level. It turned out that this Leidi seal was actually born in the era of ancient times, and it has already begun to breed!

At that time, the universe and the earth, Hongmeng opened, all things in the heavens and the earth brought their own innate temperament, and through the endless years of gestation, naturally have the opportunity to become a starry source of treasure.

This kind of opportunity and creation, the afterlife is no longer available, and it is difficult to reproduce!

Although Ye Xuan determined that the inheritance picture displayed in front of him at the moment must be derived from the ancient times of the same era as the cave giant turtle, in fact, this inheritance picture is different from the ones he has seen before. of.

The breath of the whole picture is more primitive, and there is no existence of any living beings. This shows that the picture may come from the early days of the ancient times and more long.

Although there are stars in the emptiness of the sky, there are not many, and almost all of them have never been enlightened.

At the same time, at the end of the void of this inheritance picture, a golden giant lotus is also blooming in full bloom, bursting with endless golden light, it seems that the entire universe is reflected.

This golden lotus is cultivated like a natural being, and it is born from the depths of the void. It is extremely large, and it is the star. In front of it, it is extremely weak and small.

On the lotus flower of Jinlian, there is only one lotus seed, but it is cyan. It is clearly a shape of a neem, and the golden lightning of the whole body is entangled and stretched.

When seeing this blue-gold indigo, Ye Xuan was shocked.

No matter how he opened his brain, he could never imagine it. The original Lei Di Yin was born from such a golden giant lotus that was almost overwhelming.

It is clearly the only lotus seed in the lotus seed of this giant lotus!

"Booming..."

"Boom!"

.....

The inheritance picture is still, not moving, but it is always thunderous, and it is introduced into Ye Xuan's ear, shocking his heart!

Surrounded by the blue gold seal that exists as a lotus seed on the lotus canopy, there are countless small golden lightnings that are stretched and swallowed, and if you open your eyes and open to the whole golden golden lotus body, you can see By the way, there are countless blue thunderballs around the entire Phnom Penh, and they are blasting one after another.

Endless life, endless!

Qinglei, Jindian!

All this, even let Ye Xuan give birth to an illusion, as if he has withdrawn from the inheritance of this Lei Di Yin, and returned to the reality, back to the starry sky and graves... If it is not in sight There is also a golden giant lotus standing in the sky!

Gradually, this inheritance picture began a new change.

Around the golden giant lotus, the blue thunder beads became denser and denser, and all of them exploded, turning into countless huge golden lightnings. Initially they only ravaged this void and blew up countless stars. Finally, these The golden lightning seemed to be inspired by some kind of inspiration, and gradually gathered in one direction.

It is the golden gold seal of the only one lotus seed that is on the top of the golden giant lotus dome.

Hundreds of millions of golden lightnings have completely shrouded the Qingjin Leiyin. Ye Xuan even has an illusion that it seems that the Qingjin Leiyin is completely annihilated under the guise of hundreds of millions of golden lightnings. In order to be nothing.

But in fact it is not the case.

The entire golden lotus canopy was shrouded in hundreds of millions of golden lightnings, but in it, it gave off a faint cyan glory, began to render, and gradually covered all the golden lightning. .

This awning shade of blue has a certain mysterious power. It is slowly condensing, condensing inward, and with hundreds of millions of golden lightnings that will be covered by it, it is also rapidly compressing. .

In the end, hundreds of millions of golden lightning disappeared, turning into a small golden ball, suspended on the blue gold seal, and then plunged into the blue gold seal, disappeared...

At this moment, Ye Xuan's heart once again gave birth to a touch of enlightenment, and seven characters were flashed in my mind!

Billion Thunderbolt source beads!

It turned out that the so-called Lei Yuanzhu, this is the case.

It is made up of hundreds of millions of golden lightnings, representing the source of the Thunder lightning. This thing can be said to be the original form of lightning in the world.

The Qingjin Lei Yin, which can condense the cost of the world, is not the respect of the Emperor of Lei, what is it?

Lei Di printed three words, the name is true!

It is enough to make the world thunder!

The evolution of this inheritance picture not only allowed Ye Xuan to know the origin of this Lei Di Yin, but also realized the truth of the so-called Lei Yuanzhu and its condensing method.

Thunder lightning, this is the thing between the heavens and the earth. If you want to compress hundreds of millions of Thunder and flash electrodes, it will eventually become a source of light and become a small source of lightning.

Not to mention that Ye Xuan is only the third realm of the satellite environment. It is the supreme existence of the eleventh state of the realm of the immortal army, such as the Samsung of the immortal army, Samsung. I am afraid that it cannot be done.

But with Lei Di Yin, who is able to make the world thunder, it is another matter.

As long as the Lei Di can be printed and controlled, and its power can be completely controlled, then it is possible to condense Lei Yuanzhu with hundreds of millions of golden lightnings.

However, even if it is only a Leiyuanzhu, it needs hundreds of millions of lightning to condense it. This time, Ye Xuan's Leiyuanzhu, which needs to be condensed to complete the system exploration mission, is ten.

The amount of thunder and lightning needed can be imagined.

Fortunately, here is the Starry Thunder, a vast expanse of stars, all of which are thunder and lightning. In terms of raw materials, it is not lacking.

In fact, it is only in this area that it is possible to condense ten Leiyuan beads, and it is impossible to change anything else.

However, for Ye Xuan, although all the time and place are available, whether he can successfully complete this system exploration mission is still unknown.

Because his time is only three months.

In ninety days, an average of nine days must condense a Leiyuanzhu.

Whether it can do this, Ye Xuan has no bottom, everything must wait until the first Leiyuan beads are condensed before they can know.

With such awkwardness, Ye Xuan's consciousness withdrew from the inheritance picture of Lei Diyin. At this time, in his mind, the familiar system prompt sounded again...

Chapter 3028: Fourth-order satellite

"Hey, congratulations to the host, the breakthrough of the realm! The current realm: the third level of the satellite!"

"Hey, congratulations to the host, the breakthrough of the realm! The current realm: the fourth level of the satellite!"

What is it that is broken? !

Ye Xuan, who just opened his eyes, immediately smashed!

Recently, this kind of breakthrough is a double-breaking situation. It seems to be a bit too much. Moreover, almost every time is an unexpected breakthrough, not the result of normal cultivation.

However, after a brief stunned, he quickly realized it.

This time, the breakthrough is obviously related to his successful printing of this Leidi. After all, it is the star of the sky, and after being retouched by Ye Xuan, all of it is integrated into Ye Xuan. In this case, It is also inevitable that the realm will be upgraded one after another.

This is still the true power of this Lei Di Yin, limited by Ye Xuan's cultivation as a realm, so that it can not be fully revealed, if it is fully displayed, it is only the foundation of its grade, let Ye Xuan rise Dozens of small steps are enough.

In fact, the ones he had harvested before, the golden dragon scales, and so on, which one is not the case?

Thinking about it, Ye Xuan suddenly relieved.

In any case, the realm unexpectedly ushered in two consecutive breaks, just entered the satellite environment, and this is the middle of the scene in the blink of an eye, which is a good thing!

With such a surprise, Ye Xuan's self-consciousness soon returned to God's internal vision and entered the sea of knowledge.

At a glance, his knowledge of the sea is really different.

Originally, in the whole piece of the sea that represents his imaginary and ruined pieces, he has a small crystal or treasure suspended in four directions.

One direction is the spiritual source core, which has evolved five times and reached the sixth level.

Opposite, it is the hollow medullary crystal from the emptiness of the myelin, exudes the mysterious mysterious atmosphere of the mysterious, and now, does not touch Ye Xuan's consciousness.

The other two directions are the golden dragon scales that represent the blood of the golden dragon. Today is still the entry level.

And the golden bow that represents the ancient magical power of the bow, although there is no grade description, it is estimated to be about entry level.

But now, Ye Xuan knows what is hanging in the sea, and it is more and more different.

That is the Lei Di Yin who was held in his hands before refining.

At this moment, Lei Di Yin has been transformed into a green gold seal of the size of a fingernail. It is suspended in the center of Ye Xuan's sea. It has a blue-green color. From time to time, it has a blue thunder and a golden lightning telescopic, inexplicably let the leaves In Xuan's sea of knowledge, there was a violent thunder.

This Lei Di Yin is not worthy of the name of Lei Di, not only has the power to command the thunder of the world, the Diwei is even more dazzling, at this moment sitting in the central area of Ye Xuan's knowledge of the sea, but also clearly revealed a point Jiangshan, the order of the world to come.

Whether it is the golden bow, the golden dragon scale, or the six-level source nucleus of Ye Xuan and the hollow medullary crystal, it seems to be faintly suppressed by its emperor.

I just don't know if the **** corner of the soul will be suppressed by it. It is estimated that it is inevitable. After all, the golden dragon represented by the blood and the golden dragon scale, and the ancient night fork represented by the golden bow are all belong to the same Level only.

As for the headless baby corpse, although the two have not been in positive contact, but Ye Xuan has always had an intuition, the mysterious and powerful of the headless baby corpse, this Lei Di Yin has no God, I am afraid it is not yet Put it in your eyes!

In addition, Ye Xuan's knowledge of the sea is also more astounding. After all, it is already in the middle of the satellite environment. Even the two small steps of Jin are far from being comparable.

"So soon in the medium term, there are five more small steps, you can enter the fourth realm of the planet, then, then, it is no longer a weaker downstream, it is really looking forward to..."

After withdrawing from the sea of knowledge, Ye Xuan opened his eyes again and looked at the right hand that had already been empty. While muttering to himself, he also took a touch of fine mans.

This instant, self-confidence, once again reached its peak!

In the whole process of refining this Lei Di Yin, Ye Xuan's figure is located in the top command cabin of Dong Xuan.

In addition to him, the gray bones, Zuofengtai and the wretched mosquitoes are all there.

However, before entering the state of cultivation, Ye Xuan placed a layer of protective energy cover in the outside of his body shape, so there is no need to worry too much.

At this moment, after getting up and removing this layer of energy shield, Ye Xuan turned to sweep the crowd and sneak a few words, and then stepped out of the hole.

At the same time, he also raised his hand and waved the hole in the body.

Although the hull shield of Dongxuan Shuttle is fully open, it can temporarily resist the thunder and lightning of the ship, but it consumes a lot of energy every moment. Ye Xuan has countless sources of star nuclear. It is very painful, in this case, it is still safe to the body.

As for Ye Xuan himself, even if it is placed in the starry sky of Lei Xing in the starry sky, it is completely innocent.

At the same time that his figure was taken from the hole in the hole, Ye Xuan's body clearly showed a faint cyan mist, and did not spread too broad space, but on the surface of his entire body. Covered by about three inches.

It's just the three layers of cyan fog, but it is enough to protect Ye Xuan in this starry sky.

Lei Di Yin has been refining him, and now, he can show the power of this starry sky to the treasure, and this attribute of ignoring Thunder lightning damage is only the most basic one.

At the moment, Ye Xuan, in this starry sky with only endless blue thunder and golden lightning, has a thin layer of light blue haze, so it stands quietly, but it is scattered invisibly. Out of this field, the emperor called the emperor, and ordered the whole scene of the starry sky tomb.

This kind of breath has nothing to do with his cultivation, pure nature is the nature of the suppression!

Around his body shape, the originally raging Qinglei and Jindian, with a sense of fear, subconsciously retreated to the distance, so that within a radius of his body, it became a vacuum, without any The Qing Lei and Jindian appeared.

These Qinglei and Jindian naturally have no consciousness. The reason why they are retreating is purely natural and it is only a reaction to the suppression of the emperor's emperor.

For all this, Ye Xuan is extremely satisfied.

At least, in this starry thunder, which is known as the top of the top ten Jedi, he has been able to walk horizontally and unimpeded. With this premise, he will be able to let go of the smelting of Leiyuanzhu, and it will be successful. Far from the basic conditions of this system exploration mission.

However, a Leiyuan bead needs to be condensed by billions of thunder and lightning. Although Ye Xuan refines Lei Diyin and masters the means and ability of refining, but time is still a question, let him No.

Just as he was preparing to show his means and try to condense the first Leiyuanzhu, a huge and almost horrible star fortress, suddenly rushed into the starry sky, and threw Ye Xuan a big jump...

Chapter 3029: It must be a dazzling

"Booming..."

"Boom!"

.....

The Star Fortress of the Butterfly has rushed into this starry sky, and it has attracted countless blue thunders and golden lightnings in an instant. It is like a foreign invader, and it has launched a full-scale bombardment.

Here is the world of Thunder, and all foreign objects will be rejected in the first place.

And this kind of exclusion, as a thunder between the heavens and the earth, is the means of unfolding!

For a moment, the huge hull of the butterfly was overwhelmed by countless cyan thunder and golden lightning.

At the same time, however, the surface of the ship's hull also showed a thick and nearly substantial black light energy shield.

The blue thunder and the golden lightning are quickly offset by the power of the dead light energy shield formed by the antimatter light energy, so as long as this layer of black dead light energy shield does not disappear, The hull of the Butterfly Star Fortress will not be harmed.

This is the 100,000-meter star fortress with the dead light energy shield. In exchange for the 50,000-meter-diameter star-class fortress, it is also unable to hold the thunder and lightning.

Black dead light energy shields and energy cannons, although not at the technical level, the Terran also has the same, but because the anti-material light energy generation equipment is too large, so only this 100,000 meters diameter real Star Fortress, can be equipped!

This is also the true starry sky fortress of 100,000 meters in diameter. In terms of attack ability and survivability, it is higher than the 50,000-meter-diameter star-class fortress.

Between the two, it is not the simple difference between the size of the hull and the size of the hull.

However, because of the special nature of this black light energy shield, the Butterfly Star Fortress can guarantee that it will not be injured by lightning and lightning after entering the Starry Thunder, but this is temporary and there is limited.

Because every moment, the numerous thunders and lightnings that hang over their huge hulls are consuming the black dead light of the dead light energy shield. This is a terrible energy consumption, that is, the real starry sky fortress is also resistant. Not too long.

In addition, when this consumption is in the peripheral area, the black death light of the energy shield of the Butterfly Star Fortress can produce a certain speed, but once it enters the depths of this starry sky, the thunder and lightning The amount of power is greatly increased, the power and the increase, the speed of the black shield of energy shield will fall to the weak, in that case, the death of the butterfly is coming.

Therefore, even if it is the Butterfly No., it does not dare to go deep into this starry sky, and at the same time, even if it is on the periphery, it is at least a little stranded, and it is impossible to stay here at any cost...

Ye Xuan did not know everything about it. He didn't even know where the butterfly was coming from!

However, after the other party entered the starry sky, he realized that it was wrong.

In this world of thunder and lightning, which blocks all the sight and the power of the gods, and the spiritual power to explore the secret world, Ye Xuan's knowledge and spiritual strength are not limited.

He has refining the Lei Di Yin, and he is like the thunder of the Thunder. Therefore, the gods that are sent out or the spiritual power of the devil, how can there be thunder and lightning to interfere?

Have you seen civilians who dare to rebel against Diwei?

Although the Xiaotian Fortress and the Butterfly Star Fortress are both giants, but a 50,000-meter-diameter diameter has been 100,000 meters, the color of the hull is different. Therefore, Ye Xuan has discerned it.

At this moment, his mind was in the middle of his mind and he realized that it was not good.

This is absolutely impossible for the Terran warship. From the size of its 100,000-meter diameter, it is clearly a true starry fortress. If there is no accident, it must be from the Tianzu.

In other words, the main fleet of the Tianzu people has finally arrived!

Realizing this, Ye Xuan could not help but worry about the safety of the Terran fleet. Although he could not follow the other side to return to the third universe, but after all, he was also a member of the Terran, not to mention the Xuanyuan in the cutting sky. The existence of purpura.

Unfortunately, this is not affected or changed by his subjective consciousness.

Not to mention that the Star Fortress of the Tianji Nationality has arrived. Even before this silver starry fortress has arrived, Ye Xuan faces the Terran Fleet. What else can he do besides fleeing?

Now that the situation has evolved to such an extent, the only thing he can do is to hope that the Terran fleet will be able to escape successfully.

Other than that, he can't do anything.

In fact, his own troubles are still big now, bigger than before.

After all, the silver starry fortress of this celestial family enters the starry sky, and it is impossible to have nothing to itch. Come in and wash a thunder bath. People are clearly directed at Ye Xuan.

This also illustrates a problem from one side. Either the Terran fleet has been destroyed, or it has already escaped. Otherwise, the Star Fortress of the Celestials cannot have time to free up their problems.

Given the short time, it is estimated that it is more likely to escape.

In thought of this, Ye Xuan was relieved, but at the same time, his whole heart was immediately hung up to the eyes of the blind man. It was very simple. He was only wanted to take him away. The 50,000-meter-tall fortress for protection is chasing after it.

But now it is different. The small fortress that follows is turned into a real starry fortress, and it has also become a enemy of the enemy. This degree of deterioration is simply speechless.

It's life!

"Fortunately, here is the starry sky grave. Fortunately, I have refining the Lei Diyin. In this world, I am the only emperor. I hope to use this advantage to successfully escape this robbery. !"

In the gloomy face, Ye Xuan whispered to himself, and his body shape has already entered a state of concealment, and he will go to the deepest core hinterland of this starry sky.

In this region where the fierce thunder and lightning are everywhere, and there is no pervasive area, only him can maintain this state of hiding.

It is impossible to change to anyone, even if it is the supreme existence of the mysterious light.

In an instant, it will be returned to the original shape by the Thunder and Lightning. There is no room for negotiation...

Just as Ye Xuan's figure entered a hidden state, disappeared instantly, and entered the deep moment in the deep hinterland of this starry sky, and was in the top command cabin of the Silver Star Butterfly Fortress, which was under the control of numerous blue and thunder and gold and electric bombardment. Shan Bo and Ying Tai, the two high-ranking elites, looked at each other at the same time, and their faces showed a suspicious color and muttered to themselves.

"Strange, I seem to have seen a figure, so I walked naked in the grave?"

"How is this possible? Is it beyond the existence of the eleventh state of the realm? It is even more impossible. It seems that we must be blind..."

Chapter 3030: Final wish

Because Ye Xuan's figure is reflected in the vision of Shanbo and Yingtai, it's just a short and short period of time. So, neither of them saw it, and after muttering, they will soon The matter was thrown behind the head.

After all, in this starry sky, the small fortress of 50,000 meters in diameter is not qualified to guarantee damage. Therefore, it is too ridiculous to cross the domain by the flesh. It cannot exist.

And the reason why they will enter here to find Ye Xuan's hole in the shuttle, it is because in their view, Ye Xuan is likely to be the Xuanhuangzi of the Terran.

If this is the case, the stunned character of the Emperor Xuanzi can unwittingly get rid of the two scouts of the Demon Scouts, and boldly enter the Devil's Field, then, It is absolutely impossible to say that he has no means of relying on his hands!

Maybe people can really survive in the harsh environment of this kind of starry sky.

Therefore, they will hold a trace of luck and enter the search for it. It is completely the meaning of the dead horse right as a living horse doctor.

"Expand the search and see if the purple small warship is still there. If it is not, it is estimated that it was bombarded by these blue mines and gold power..."

"I hope that the result will not be like this. Otherwise, I will start a love plan with humans or demons, and I will die in this way. It is rare to have a little interest in the guy named Zhang Wuji. It feels quite pleasing. This kind of opportunity is not much!"

"Hey..."

When Shan Bo's words were just finished, the English side of the side responded to such a speech in a self-speaking manner, and suddenly the former held tight fists, and almost all of them burst into flames.

After a short period of time, this starry sky fortress is slowly swaying in the outer area of the thunderstorm in the starry sky. Every moment, the energy consumption is terrible, that is, Shanbo and Yingtai. It's so painful...

.....

At the same time, deep in the grave!

Outside this area, the blue thunderball has grown to a hundred meters, the color is very rich, and the golden lightning, the diameter of the road is about ten meters, the golden light is more intense than the sun, directly burning the human eye .

Ye Xuan has no doubt that he is only a Qing Lei or a gold power, and can directly blast a three-kilometer-diameter star-rated battleship into slag.

However, he stood here so physically, but he was always safe.

All the Qinglei and Jindian are surrounded by its side, not touching, but with a sense of affinity, very happy.

After all, it is the deep hinterland of Leifen. The Qinglei and Jindian here are both too strong. The description of anthropomorphism is a lot of courage. It is no longer fearful and far away, but has been closely followed. about.

For this reason, Ye Xuan, wherever he goes, has the most Qing Lei and Jindian around him.

But it did not hurt him, nor did he have the ability. Under the influence of Lei Diyin, today's Ye Xuan, the whole body, has already been immune to the Thunder.

Don't say that there is no contact at all, even if you touch it, there will be no reaction!

In this case, it is also of great benefit to him to condense the Leiyuanzhu. At least there is no need to search for Thunder and lightning, and they will come together happily!

In three months, I had to condense ten Leiyuan beads. Ye Xuan did not dare to delay, and could not afford to wait, even if it started to condense.

The first refinement of Leiyuanzhu, his mood is embarrassing, after all, once it takes a month, or half a month to condense one, then this time the system exploration mission, it is necessary to completely stop the food!

The consequences, he does not want to bear, too much pain!

"Booming..."

"Card!"

"Card!"

.....

As Lei Di Yin was sacrificed by Ye Xuan, hanging over the top of the head, the depth of the whole thunder grave, for a moment, it seemed to be poured into a rolling water pan, and it was completely fried. pot.

Numerous cyan thunders were attracted and exploded on the head of Ye Xuan.

Massive golden lightnings slammed into the head of Ye Xuan...

But all this can't cause any damage to Ye Xuan. His body surface is always covered with a thin layer of blue haze, carrying his hands in the vain air of the thunder, exudes a thick Diwei, the humiliation is not shocked.

A large number of Qing Lei and Jindian gradually covered the Lei Di Yin, and even Ye Xuan's entire body.

At the end of the day, a huge thunder and a thunderous flash of gold and lightning were formed, and Ye Xuan, the head of Lei Diyin, was the core of the huge thunder of this star.

This moment, originally shrouded in his body's green mist, suddenly made a big fuss, spread out to the outside, shrouded the entire Qingjin Giant, and turned it into a green color.

Then, it began to condense inward...

The whole process is basically the same as that seen by Ye Xuan in the inheritance picture of Lei Di Yin.

Time does not know how long it has passed. In the end, this is like a small meteor, the green dragon python that was formed by hundreds of millions of Qinglei and Jindian, finally disappeared completely, and hung over the head of Ye Xuan. Above the Lei Di Yin, there was a golden Lei Yuanzhu.

Only the size of the pigeons, but the invisible pressure of the destruction of the earth.

This moment, Ye Xuan suddenly gave birth to a sigh of insight.

It seems that condensing this kind of Leiyuanzhu, the meaning to him is not only to complete this system exploration mission, the system's exploration mission is only a head, and the harvest of ten Leiyuanzhu, for Ye Xuan, It is a huge fortune.

This kind of Leiyuanzhu is obviously equivalent to the magic weapon of the one-time consumption, but its power is terrible.

According to Ye Xuan's estimate, a Leiyuanzhu was thrown out, and it is estimated that the supreme existence of the tenth largest boundary hole is estimated to have been wiped out.

A small Thunderbolt formed by the compression of hundreds of millions of Thunder and the flash electrode, its power, can be imagined with the toes.

Realizing this, Ye Xuan's enthusiasm has increased dramatically, and the whole person is excited. This kind of good thing is a rare event. For another place, it takes a lot of effort and energy to condense one. Here, almost Everything is in the water.

In this case, let alone ten Leiyuan beads, even if it is to condense a hundred, he is willing.

After passing this village, there is no such store!

Just as Ye Xuan was excited, the Leiyuanzhu, which had been condensed successfully, suddenly entered the Leidi Yin. This kind of Leiyuanzhu was too rigid. Except for Leidi, any storage magic weapon was included. No, once it is stored, there is a possibility of blasting at any time.

At this point, Ye Xuan finally succeeded in condensing the first Lei Yuanzhu.

After the Leiyuanzhu entered Leidi Yin, he took the time to look at the time, just three days...

In other words, as long as there is no problem in the follow-up, three months, just condense ten!
