

## Super D. S 3041

### Chapter 3041: Various concurrent duties

The whole magical star field, especially the black mosquito star field where the black mosquitoes are located, did not change to the tranquility of the elite fleet of the Neapolitan people.

After all, the slavish squadrons from the first universe, the large and small fleets, did not gather here because of the arrival of the Terran fleet. Their purpose was to search for and hunt down the ancestors of the Terran dynasty, as long as the Emperor Xuan was not arrested for a day. In order to please the heavenly family, it's a good thing to do it. It's OK to do it, but after all, you can't just let it go.

Ye Xuan has been in the Starry Thunder tomb for some time. Since this time, everything that happened in the black mosquito star has spread throughout the first universe, the complete destruction of the black mosquito tribe, and the largest in the Devil's ethnic group. The accidental fall of the priests, and the great loss of the slaves and the squadron...

These messages were extremely shocking to the servants of the first universe.

Especially on the other side of the Magic Emperor, it is turbulent. It is said that the high priest Wen Xing high priest was returned by the flagship of the elite elite fleet of the Terran Fleet, after the news of the slag, from the depths of the Magic City, the first time Then he sent out the madness of the Emperor Mo.

Wen Xing is the great red man in front of the demon emperor. The existence of the cave is nowhere to be repaired. It is so grievous and degrading. How can you not be angry?

However, if he is allowed to know that Wen Xing is under the true identity of the Imperial High Priest, there is another identity that cannot be seen, and the Terran is so fine that he does not know the Emperor and how to think.

All of this, Ye Xuan did not pay attention to this moment, he has taken the Son of the Son, from the edge of the Devil's Star Field, and rushed to the black mosquito star field.

On the way, Ye Xuan found a hidden void, and the two battleships, the Black Wind and the Black Mosquito, were sacrificed from the immortal world.

Including the hole shuttle.

The reason why this is done is to make up the strength of the manpower and settle in the Son.

In his current status, not only has he become the Son of the Black Mosquito tribe, but since Zuofengtai and Ashley have been hidden by him, Ye Xuan has already privately worn two temporary generals on his head. Temporary high priest's high hat, in short, is a variety of concurrent, the entire black mosquito, it is his biggest.

In this case, the Son of the Son basically belongs to his private fortress. There is no possibility of handing over the tribe. In this case, naturally, it is necessary to keep some strength in the fortress.

However, including the one of the Devil's Thousand People's Brigade, which is led by the returning sea, and the other five devils and thousands of people led by Cang Qingyu and others, a total of six thousand devils Scout, but he did not dare to move over, still in accordance with the original arrangements.

After all, these guys can all be the devil's scouts, and they can't be exposed.

A wretched mosquito swatter appears in the Devil's Star Field. In fact, it is already quite risky. If you come out a little more, you will definitely have an accident. Nebo Mountain, Ba Gua, Li Mo, and other high-ranking slaves can't show up.

In addition, he even sneaked into the hole and sneaked into the hole, and let them join the squadron of the sorcerer who had returned to the sea to guide the thousand battalion. As soon as possible, improve the cultivation and grow up.

In the future, there will be great use!

However, the dozens of devils who accompanied the two of them were confessed by Ye Xuan, and they were left in the saint. Anyway, they also planted slave prints, and there was no problem of seeing death.

With them in existence, the killing of the two people, the gray bones and the left Fengtai, can also be confirmed, no one does not believe, these guys are with their two people around the confidant team for many years.

The thousand mosquitoes and one thousand soldiers in the hole in the shuttle, Ye Xuan did not move.

However, from the black mosquitoes and the two squadrons of the Black Wind, they transferred a million mosquitoes and 10,000 soldiers to the Holy Son. At the same time, the Eight-Star King Scoop was also moved by him, all the mosquitoes and The soldiers' scoops are on the second floor of the Son.

In this way, the lower two layers of the Son of the Son are also distributed. The bottom layer is a mother's nest of the evil spirit Slime, and the second layer is the mosquito and beast army. On these two layers, Ye Xuan will not open at all. Channel permissions prohibit anyone from entering or leaving.

As for the top layer, it is naturally reserved for him.

On the third floor, there is also a living area of the devil, enough to accommodate two or three thousand people, to control the devil of the Son, Ye Xuan intends to arrange there.

Of course, these thousands of demons have to be temporarily compiled. Fortunately, there are still nine devil stars in the black mosquitoes. All the high-levels have been planted by him. Every devil star has compiled hundreds of demons, or completely No problem, Ye Xuan has turned around in the past, and all three thousand magic people have it.

After doing all this, when he even took the hole and the black mosquito into the immortal world, he was trying to put the black wind away. Ye Xuan's brain flashed and suddenly remembered the black wind. There are still some unresolved things that need him to deal with.

To be precise, there are two things.

First, the thousands of federal elites in the bottom of the Wanluo Prison, which did not escape at the time, including the Emperor Xuanzi.

Second, the black wind number guards World of Warcraft, the black wind beast!

The black wind beast is not in a hurry.

Although the Black Wind is the main flagship of the Devil's Front Scouting Corps, its strength in defending World of Warcraft is stronger than that of the Black Mosquito, and it has reached the black hole in the ninth order.

But the strength of Black Nine is really nothing for Ye Xuan, but the eight-star king or the \*\*\*\* prince is just one of them, and immediately suppresses.

And this beast should not show up, go back and take it out and solve it or get it. Anyway, it is now locked in the black wind's magic nest, and it will not come out at all.

It is the more than a thousand federal elites at the bottom of the Black Wind, and it seems that they should go and see life and death.

The black wind of Wanluo prison closed more than 10,000 people. After the original Ye Xuan refining the black wind, the reason why only the 10,000 is released, the remaining more than a thousand did not put it, in fact, because of Xuan's sake, it can't be alone. Leave him one? This is too obvious.

And these thousands of federal elites, Ye Xuan intends to return to the third universe and then let go, all reference to the black mosquito model, no need to worry.

The key is that the Emperor Xuanzi, although there is no hatred between Ye Xuan and him, but since he got the nine-stage genetic culture fluid from the immortal star, and found a drop of immortal ancestral blood in it, it is just speechless. After the land was swallowed in the Wanluo prison in front of the Emperor Xuanzi, the contradiction between the two could not be resolved.

It is destined to go to the opposite side!

This time, the Nebula elite fleet of Naples came to the first universe. It has already proved that the Xuan prince's affairs can't be dragged any more. The other thousand federal elites Ye Xuan can handle it one step at a time, but Xuan's emperor's side is suitable. It is not too late.

Just, let him personally kill the guy who is screaming at the mouth, Ye Xuan is really a bit tangled, after all, everyone is a human race. Ye Xuan believes that he has not reached the point of unscrupulous means...

Chapter 3042: Immortal blood crystal

"The bottom compartment of the black wind is still in the vicinity of 100,000 Void soldiers, I hope that the guy has been scared to death, lest I be more difficult to shoot..."

With a sigh, Ye Xuan whispered to himself and stepped into the bottom of the Black Wind.

100,000 soldiers, including the seven-star scoop with black hole strength, there are 5,000.

Ye Xuan brought in a thousand soldiers in the hole in the virtual shuttle, from the fourth realm to the eighth realm of two hundred.

In addition, the right to move away from the Black Wind, entered the 10,000 soldiers in the Shengzi, the strength of the black hole, there are two thousand!

That is to say, nowadays, there are nearly 90,000 hollow weapons in the bottom of the black wind, and there are nearly nine thousand hollow weapons. Among them, the seven stars of the black hole will be scooped, nearly three thousand!

The total number of federal elites who are still in custody in Wanluo prison is only a thousand, and there are black holes in these guys, but only six or seven, and they are only black to one to three. Initially repaired, otherwise it is impossible to get caught.

In this case, in the face of a horrible army of numbers and strengths, the thousands of federal elites have been stationed in the military, and after they started living together, it is estimated that they are spent in horror every day. .

Fortunately, the columns of the cage were strong enough to give them a little sense of security. But with the good mouth of the hollow squad, whether the pillars of the cages can be smashed, Ye Xuan really couldn't be sure.

Until then, he realized that it seems that since he got the black wind, he is still the second time to enter the bottom of the Wanlu prison.

After the 10,000 federal elites were released, he never went back to see it. I don't know that Xuan Huangzi and others... are still alive!

Thinking of this, Ye Xuan's face suddenly became strange, and its figure, also appeared in this jail life area on the edge of the Black Wind.

Looking into the distance, there are vanity scoops everywhere. Although the space bastion of the Celestials uses space folding technology, the same is true of Wanluo Prison. The 100,000 soldiers are entering, and they are still somewhat crowded.

Seeing Ye Xuan, feeling the breath of the mother's marrow from his body, these hollow squadrons whispered with joy, all came together, followed by Ye Xuan, facing Wanluo Prison. The cage area went.

The original 10,000-plus cages, after Ye Xuan released the nearly 10,000 federal elites, the other cages have been taken away and disappeared.

This can be done by refining the Black Wind.

Today, the black wind of the Wanluo prison, only a thousand more cages are scattered, and there is a federal elite.

Seeing Ye Xuan again, the thousands of federal elites first glimpse together, and then they realized what they were, and they were shocked and shocked, but in the middle of it, they showed a joy of being suspicious.

At the beginning, Ye Xuan was mixed among the tens of thousands of escapers, and left, and the columns of the 10,000-seat cage were closed, and the opening of the Vandalor's main passage, he did it through the phagocytic system, and There is no obvious dew, so these guys simply don't know that Ye Xuan, the young man who was finally caught in the Black Wind, is actually the infamous maker.

But all this, they are now enlightened, and since Ye Xuan can appear again here, and nearly 100,000 terrorist black beetles around him, like pets, with the joy of following him...

There is no suspense in this matter. This young man, who has already mastered the Black Wind, has a strong and incomparable foundation... It is these black beetles that can sweep a small country.

This is also the reason why they are happy. After all, everyone is their own person. Maybe the other party's coming will represent their own freedom.

But the same, I thought that Ye Xuan had not appeared for so long. If I wanted to let people go, I was afraid that it would have been released long ago. Therefore, these guys will be delighted and incompetent. Suspicion.

For all this, Ye Xuan did not pay attention to it, his sight swept to the cage where Xuan Huangzi was located, and then his face changed abruptly!

More than a thousand cages, the other ones are intact, only the one of the Emperor Xuanzi, there are more than a dozen thick black columns, which have been cut off a large section, a large hole on the side of the cage, enough for a head The left and right black-hole soldiers drilled into it.

In the cage, in addition to some residual blood on the ground, the Emperor Xuan, has disappeared!

Was it eaten by the soldiers?

But... for Mao, he only eats him alone? The other thousand people are clearly well!

With such doubts, Ye Xuan subconsciously turned to look at the other cages around him, squatting, with the meaning of inquiry.

The faces of these guys are also weird, and they clearly understand the meaning of Ye Xuan, and then they carefully and vocally.

"That guy is a madman, it should be eaten by insects..."

"Playing is a game, since the day of the game, the goods have not stopped, it is rare to shut up, but also take a break, at most one hour, immediately to open. Not only we are annoying, these worms are annoying him, I was scared for a few times and it didn't work. I just smashed a hole, got in and swallowed him..."

"It is a neuropathy. It is said that he is the Emperor of Xuan, I am, the emperor of the immortal dynasty, I can be such a virtue? A shrew!"

.....

As these words were introduced into the ears, Ye Xuan slowly opened his mouth, first surprised, then laughed and laughed. At the end, the heart was even more emotional.

This is really a good day for people.

At the beginning, Ye Xuan was licked by his dog's blood, and he almost killed the kid on the spot. He didn't expect that he would die on his own mouth.

But then again, it's just this grin, and no one really believes that he can be the emperor of the immortal dynasty.

This is also true, so that at least the royal face of the immortal dynasty was preserved, otherwise the matter would pass through the other federal elites in the Wanluo prison, fearing that the entire royal family would be ashamed.

Just as Ye Xuan's mind was turning these thoughts, a black hole was repaired and the seven stars were suddenly scooped out from the squadrons behind Ye Xuan's body. The path was up to Ye Xuan's body and he screamed twice. After that, opening his mouth, he spit out a red crystal.

This red crystal is only the size of the pigeon egg, but it is crystal clear, vaguely emitting a breath like the immortal ancestral blood that has been refining by Ye Xuan...

Ye Xuan's face changed slightly, the condition was reflexive, and the shot was like electricity. He instantly gained income in the body. Fortunately, the size of the scoop was huge and blocked in front. Therefore, the federal elites in the thousands of cages did not see the appearance of the crystal.

Also at this moment, in his mind, the familiar system prompts sounded unexpectedly.

"Hey, congratulations to the host, and found the immortal blood crystal, inheriting the imprint of the royal blood of the immortal dynasty! Is it immediately collected..."

Chapter 3043: Magic variation

When Ye Xuan left the Black Wind, he left the thousands of federal elites who were still in the cage behind him, and did not pay attention to it. Anyway, he was safe, and he did not intend to explain anything. Why should he talk too much?

After waving the black wind to the immortal world, he even went back to the top command post of the Son, and after he continued to rush to the black mosquito field, he immediately closed his eyes and entered the state of cultivation.

The immortal blood crystal that I just got is obviously the crystallization of the blood of the imperial royal family. In the legend, the immortal royal family shed the blood of the immortal dragon. Since the immortal ancestral blood, Ye Xuan has confirmed This legend, and knows the dragon blood flowing in the immortal royal family, from the golden dragon of the ancient times.

After Xuan Huangzi was swallowed by the seven-star scoop, flesh and blood, clothing and even the treasures that were carried with him were estimated to have been digested. The void can be eaten by the universe, let alone these?

It is the blood of the golden dragon in the flesh and blood of the body, but it is purified and condensed into an immortal blood.

Perhaps, because this seven-star will know the blood of the dragon in the flesh and blood is a good thing, just too thin, so it is pure, to make this thing.

Moreover, the blood of the dragons that the immortal royal family did not know why, as they gradually became thinner, also branded the changes left by the royal family to the next generation.

Therefore, this immortal blood crystal has two meanings for Ye Xuan.

One: By collecting it, Ye Xuan's dragon blood will go further.

Second: because the blood crystal has imprinted the blood of the immortal royal family to the strong, once Ye Xuan will integrate it into his blood, then he will change into a real Xuan prince, although not the person. However, the blood is an absolutely authentic immortal royalty, and it is estimated that even the emperor of the immortal royal family can not deny this.

The former is also considered, the dragon in the blood crystal is not too strong, the evolution of the blood of Ye Xuan Shenlong, although the estimated effect is there, it is not much to go.

But the latter is amazing. As long as this is achieved, Ye Xuan does not have to avoid the search of the immortal royalty, and can return to the third universe with greatness, and since then, he is the real Xuan prince.

As for the appearance and appearance, in today's practice and prosperity, even the weakest meteor first-order, can hide the body shape at will, or change the appearance or something, no one will really entangle too much at this point.

After the ultimate trial, the royal identity can not be revealed, it is also natural to change the appearance.

It's just that this look is used to it, and it's lazy to change it back. After all, Xuan Huangzi is also famous for the three universes. In order to take care of the feelings of fans, it is reasonable to continue to use them.

Pretending, no, it should be a matter of replacing the Emperor Xuanzi. It is a very amazing idea, but because of the existence of this blood crystal, everything has become possible.

Ye Xuan is not greedy for wealth, but for growth, how big is the power of a prince, and imagination can know that this authority, he is only interested in the search for the source of devouring and other resources for cultivation. .

Only the blood of the pigeon egg size, quickly opened, blended into the flesh and blood of Ye Xuan's body, a tingling sensation, and it is from the bone marrow to the surface of the skin, which exists in every tiny cell. Stinging.

Just like the feeling of quenching the body in the corpse of the dragon in the corpse of the dragon, but with the previous foundation, plus the blood of the dragon in this blood crystal, it is not too rich. So, the sting is slightly too much compared to the last time.

Just somehow, this time, only his deep eyebrows, that is, Ye Xuan refining the enchanting spirit that turned into a small jade rabbit, thus activating the growing enchanting, but especially stinging, even Not inferior to the last time, but fortunately, the whole body only has such a strong sense of pain, and it is not unbearable.

The entire time of refining the blood crystals did not last long, and it ended in less than ten minutes, and Ye Xuan also opened his eyes.

At this moment, the system prompts in my mind have already sounded again.

"Hey, congratulations to the host, the realm of the realm! The current realm: the eighth level of the satellite!"

"Hey, congratulations to the host, the dragon's quenching level is improved! Current level: growth level!"

"Hey, congratulations to the host, the golden dragon's blood has changed back to ancient times! The direction of variation: the magic candle dragon!"

"Hey, congratulations to the host, get the mutated demon dragon \*\*\*\* magic --- magic dragon gaze!  
Current level: primary!"

With this series of system prompts sounding, Ye Xuan once again fell into a sluggish!

The improvement of cultivation is expected. He is only a little surprised. It is only this time that it is a double-education, but think about the blood of the dragon, not only the blood of the dragon, but also the generation of the immortal royal family. The \*\*\*\* imprint of the strongest person, after being absorbed into the body, is even normal.

In addition, the dragon's quenching technique has been promoted from the entry level to the growth level, which is also expected.

What really shocked him was the variation in the promotion of this dragon's blood.

Return to ancient variation?

It sounds benign, and the system's prompt tone is also a good fortune when it comes to mentioning this.

Reminiscent of the horrible anomalous pain in the eyebrows, in Ye Xuan's view, this time the so-called blood variability is mostly related to the enchanting, and his dragon's blood has been mutated into the dragon's blood. The magic dragon blood that was obtained, called the dragon dragon gaze, is just related to the eyes, so this point has basically been confirmed.

The magical candle dragon four words, let Ye Xuan think of a wild legend.

The dragon, in ancient legends, can be regarded as a kind of supreme level of the beast, and its variety is actually quite a lot, each has its own characteristics, each with different powers, such as "Yinglong", "Jilong", "Jilong" "虬龙" and so on!

The golden dragon is powerful, but in some ancient legends, there is still a dragon, which is more powerful than the golden dragon. It is called the dragon, or the dragon, the candle dragon!

Legend has it that the candle dragon is also known as the candle yin, also known as the dragon, or the candle nine yin!

Its image is said to be a human face dragon, the mouth of the candle, in the northwest nowhere to illuminate the gloom. Legend has it that it can be great, and when it is blinking, it is bright, that is, during the day, when the eyes are closed, it is dark and dark, that is, the night.

Its 瞑 is 晦, its vision is Ming!

The simple eight words show the momentum and prestige, but it is shocking!

The blink of an eye is white, and the closed eyes are the night...

The whole world, the vast world, is decided to stay up all night because of the simple curtain of a living creature. This kind of statement is almost exaggerated and too mysterious!

But now, with Ye Xuan's Dragon Blood, he has advanced to the growth level, and he is still a mutated growth level, thus obtaining a new variant of the Dragon Prodigy "Eye of the Dragon", since then, even in the era of the ancient times, The legendary dragon of the magical object, he finally completely believed...

Chapter 3044: Goodbye

This time, Ye Xuan is a huge harvest.

So that he has almost been surprised by the recent surprises, he is not at all stunned at this moment.

After repairing to the eighth order of the satellite, you only need to re-submit a small order, and you will be able to complete this situation, and then go down, it is the fourth realm of the planet.

It is estimated that the rocket is not so fast.

The acquisition of the immortal royal blood status has solved the immediate crisis, and Ye Xuan can return to the third universe at any time.

And after going back, it is even more beneficial. Using the identity of the Emperor Xuanzi, the source of the devour, I hope that it will take a long time to gain.

More important is the acquisition of the magic dragon blood!

When he returned to the inner view of the gods, he looked at the sea, the golden scales that represented the blood of the golden dragon, and it has turned into a black gold color, which is more mysterious and thick and simple.

Judging from its color of black gold, most of Ye Xuan now has the blood of the two dragons, the dragon dragon and the golden dragon. This point, he also has the dragon quenching technique and the dragon dragon stare. The blood of these two different dragons can be inferred.

This time, the adventures suddenly changed, and Ye Xuan's thoughts changed rapidly.

He had previously decided to stay in the first universe, the purpose is to find the source of phagocytosis and the energy source that can be absorbed by the world's self-propagating population.

The latter has now been resolved, and the former, after having the identity of the Emperor Xuanzi, returning to the third universe to find, obviously looking for it, will be faster.

Coupled with the identity of Xuan Huangzi, the problem no longer exists, so now, Ye Xuan, suddenly gave birth to the idea of leaving!

Of course, there are some things to do before leaving.

First of all, the first universe still has to try to search for information about the source of devouring. His personal starry communication system has been promoted to the growth level, entering the growing starry sky, and the search diameter has increased to a light-year. The scope, and the function is greatly increased, Ye Xuan can completely try to pass the main brain of the magic star star network, quietly ditching the upper level, that is, the star network of the Tianji family to see if there is any discovery.

In addition, the mosquito star must also go once before leaving.

Before, the crazy mosquito king gave Ye Xuan two conditions: repairing the realm before the original point! And the spiritual source has changed to the seventh level!

If both conditions can be met at the same time, Ye Xuan can return to the mosquito star. The crazy mosquito king once assured him that he would give Ye Xuan a great creation!

This past, although it is not because of this matter, but just as a farewell, let the \*\*\*\* prince and the crazy mosquito king see the other side, it is also appropriate.

There are still two places to go. One is the forbidden land, the other is the black hole of life, but the former is still too dangerous for him, so this matter can only be postponed.

As for the black hole of life, there are countless voids in the fire, and there is no need to rush to go. If there is any reason to go, you can enter the first universe from the wormhole at any time, and then expand the interstellar coordinates. Jumping is fine, it is very convenient.

In addition, there are some chores on the black mosquito side that need to be swept away. That is the dozens of black mosquitoes and nine stars who have been accepted as the slaves. This time, returning to the third universe, will they also Take it away, Ye Xuan is really embarrassed.

I really have to do this, the whole black mosquito is finished, and the dragons have no head.

Therefore, after some consideration, Ye Xuan finally gave up, the right to be inserted in the inner line of the first universe of the devil group, maybe it will not be known to play a big role in the future!

Finally, he decided to go to the mosquito star first, then go to the black mosquito nine stars, get four thousand demons into the saint, and plant the slaves, so that the demon slaves in his hands, from the previous six The number has increased to ten, and the entire 10,000 slaves are scary.

After finishing these two things, I will go to the magic star again in the distance, and then connect to the main brain of the star network in the distance. After a search, if there is no result, I will immediately return to the third universe...

After deciding on the itinerary, Ye Xuan even pointed to the mosquito star when he ordered the full speed.

After a small half day, Ye Xuan put away the Son in the distant sky, crossed the body and entered the atmosphere of the mosquito star. At that moment, he waved the \*\*\*\* emperor in the pet ring. After the people stepped forward, they rushed straight to the hinterland of the star land.

As the supreme existence of the cave, the whole mosquito star is under the spirit of the crazy mosquito king. He first sensed the arrival of Ye Xuan and bloody, and immediately appeared.

Then, after seeing Ye Xuan's first look, his face changed and he made a shocking whisper: "Rely! Are you kidnapped every day? Is it true that the satellite is full?" How many days?"

Ye Xuan also had some triumphs at first, but after sensing the breath of the crazy mosquito, he immediately turned his eyes: "I am only in the third realm, and there are more small steps, not as good as you in the cave." Once? The last time is still the first step in the hole, how long has it been? Actually, it's seven days in the hole, and it's the right thing to play the chicken blood every day!"

"Hey, stinky boy, this emperor is not a promotion, but a recovery. It's just that people are happy and happy, of course."

"Then what is your original cultivation, what is the realm? Is it true? Is it stronger?"

Taking advantage of this opportunity, Ye Xuan once again asked about this matter. He has been curious about the cultivation of the crazy mosquito king. This guy is too mysterious.

"Hey? Actually, even the eleventh state of the realm is known to Xuanguangjing. Could you have encountered the existence of Xuanguangjing during this time?"

Even if the madness of the mosquitoes stunned, they then said, while they shed a sigh of spiritual strength and probed Ye Xuan.

When the spiritual power touched Ye Xuan's body, he did not resist. For the crazy mosquito king, he still trusted. At least, the spiritual brand of the other party staying outside his knowledge of the sea did not always reflect the guardian. His ability to know the sea has never been more than one step, and he has entered his knowledge of the sea without authorization.

The next second, the exclamation of the crazy mosquito king suddenly sounded.

"Golden Dragon Blood?"

"Donglong Jiuyin blood?"

"Abandoned ancient night fork magic?"

"Six spirits?"

"There is still a \*\*\*\* atmosphere..."

"God, this tattoo is a heavenly baby... no, it is impossible!"

With the excitement of the crazy mosquito king, Ye Xuan is also a stunned figure, and his face shows an unbelievable look. The spiritual power of the crazy mosquito king has not entered his knowledge of the sea, even just touching his body, it is like seeing Ye Xuan in general, which is clearly revealed through the blood and the faint breath left by Ye Xuan on Ye Xuan, and has clearly detected everything.

This ability is that the top-ranking elite and the emperor's fiancée Yingtai, absolutely no, the two guys, all of them are the supremacy of the mysterious environment!

Crazy mosquitoes, he... how strong is it?

Chapter 3045: Turn

For what happened during this time, Ye Xuan did not hide much. In addition to the section of Xuan Huangzi, he basically told the crazy mosquito king. Of course, the most important secret to Ye Xuan about the devouring system and the immortal world, he It is impossible to say.

The reason why Ye Xuan did this was because of the trust of the crazy mosquito king. On the other hand, it is because he is also rich in the present, even if the crazy mosquito is beyond the existence of the black light, there is no head baby. The corpse is, if he really has a calculation, it is useless.

In addition, Ye Xuan's frankness, in fact, has another purpose, that is, I hope to get some feedback-like information from the crazy mosquito king.

It's not mentioned in this layer of cultivation. It's just that the crazy mosquito king recognizes the breath of the golden dragon and the dragon and the nine yin, including the \*\*\*\* soul, the wild night fork, etc. Mysterious.

He even saw the origins of the headless corpse tattoo that was branded by Ye Xuan's chest. He even glimpsed the words, and even said the words Tiandao Ying in exclamation.

Is it a heavenly baby?

Could it be that the headless baby corpse is actually the embodiment of the will of the heavens in the ancient times?

But why is it the form of a baby boy?

Whose head is it fallen?

Also, what was the truth about the ruin of the past? If the headless baby corpse is really the will of the ancient era, then how can it trigger such a battle of destruction?

The powerful creatures of the entire ancient era were divided into two camps. One camp claimed to be God, and one camp was accused of being a demon. As a natural will of that era, how could it be allowed to happen?

All of this, in the recent period, has been entangled in Ye Xuan's mind all the time, from time to time will be vacated, let him go to the general, subconsciously remember the ancient.

At this moment, with the abnormal performance of the crazy mosquito king, Ye Xuan seems to have found the hope to answer all of this. Therefore, even if he honestly admits most of the experience, he immediately launched a counter-inquiry against the crazy mosquito king. !

"You don't want to ask these things. The emperor will not say it. To be precise, you can't say it. Don't dare to say, at least, in your chest... you can never ask from the emperor before you allow it." Any relevant information."

During the speech, his face looked terrified, and the crazy mosquito that was still in extreme shock was swiftly swept away and took a look at Ye Xuan's chest position, and then sent a sigh.

Then he said: "Okay, stinky boy, since the existence has chosen you, then everything else does not need the Emperor to worry about it again. I said that I will give you a big fortune, you can forget, by then It will naturally guide you how to do it. The emperor's creation is bigger, and how can he get a random word?"

"Go back, everything that happened recently in the black mosquito star field, the emperor has also heard about it. I don't think your kid is actually the emperor of the Terran immortal dynasty."

"In this case, you can't wait any longer. Once the Emperor of the Heavenly Kingdom knows it... I chose you, I am afraid that I will not hesitate to pay all the price, even if it is the demise of the entire celestial

family, I will definitely take you down. This is not a long time, and I will leave without knowing, and leave immediately!"

"As for bloody..."

Having said that, the crazy mosquito king turned to the side and never said anything, but it was quieter than before, and it seemed to be a normal \*\*\*\* prince. The scorpion showed a soft, gratifying smile: "If you say His recovery is only a matter of hope. Then, the Emperor can definitely be sure now, my son will be able to recover his mind in the future, as long as he can follow you."

"Take him away, can you respect him as a brother, what else does the emperor have to worry about?"

"I can't think of it, the bizarre of the world, it can be surprisingly..."

"Everything is worth it! It turned out to be..."

"Ha ha ha..."

In the big laughter, the crazy mosquito king did not pay too much attention to Ye Xuan and the \*\*\*\* prince, turned and walked away from the depths of the mosquito star land, and the blink of an eye disappeared.

And the last thing he said, it is obviously a headless baby corpse, it can be seen that the origin of the baby corpse, the crazy mosquito king is indeed aware, which also proves that his coming is not small, can and without The head of the baby has been implicated, and can it be ordinary?

Ye Xuan fell into sinking.

The words of the crazy mosquito king made him even more confused. Even the crazy mosquito kings are so afraid of the headless baby body. Moreover, it seems that the emperor knows the existence of the headless baby body. What is the truth and the truth?

With confusion, Ye Xuan even left the mosquito star with the \*\*\*\* emperor, and then he turned around in the entire black mosquito field, and the surviving black mosquitoes and nine stars, he all went shopping.

In just three days, four thousand demons were turned into the Son of the Son.

In the meantime, Ye Xuan was fully condensed, and four thousand different succulents were also planted by him. At this point, the magic man in the Son of the Sun became all his magic slave.

Since it was decided to return to the third universe, it was considered that the black mosquitoes could not be led by the dragons. The tops of the black mosquitoes and nine stars were all his people. It has become the secret base camp left by Ye Xuan in the first universe.

It really can't let him fall.

Coupled with the fall of the emperor's high priest Wen, the gray bones have the opportunity to enter the magic king star, after all, it is a line of Wen Xing, the magic emperor Mo asked how many days will still read the old feelings.

Therefore, the black reptiles of the black worms, which were originally determined by him, and the dozens of confidants of the gray bones were all released by Ye Xuan and stayed in the Montenegro.

As for the general commander Zuo Fengtai, Ye Xuangang decided to take it away. It is also a good thing to leave a fourth-order demon powerhouse. The eight-star king and the \*\*\*\* emperor are also in the original point, but they return to the third universe. After the Terran, it is inconvenient to show up often, and Zuo Fengtai is no different from human beings, but there is no such concern.

After doing all this, the last thing Ye Xuan needs to do in this magical star field is to go to the magic star, invade its star network in the distance, and connect to the upper level of the main network. This search has swallowed the source of the news.

After doing this, he will be able to return to the third universe and return to the human race as the son of Xuan!

By then, it will definitely be another brilliant experience.

With this expectation, Ye Xuan quickly rushed to the magic star field even if he left the black mosquito star field.

What he didn't know was that on the second day after the Holy Son left the black mosquito field, the star field suddenly began to rise again, and this time, it was several times more serious than the previous unrest situation. more than.

Even the top-ranking Yingtai, who has the eleventh-largest realm of Xuanguang, was shocked at the first time. From the black wind, he hurried back to the black mosquito field.

She has been pursuing the whereabouts of Ye Xuan, but she has always been slower. Ye Xuan has just left a magic star, and she will arrive soon...

Chapter 3046: Terran fortress is coming

The fleet of the Terran imperial dynasty is coming again!

However, this time, it is the English-Taiwan platform that has nothing to do with the mysterious light, and does not dare to act rashly.

Yes, there is indeed a 100,000-meter-diameter starry fortress in her body, but in the face of this elite fleet where the Terran is coming again, Yingtai has not chosen to sacrifice the Star Fortress to confront it because she If you do not grasp the battle and win, you can only choose to lurk in the dark and observe it from afar.

This time, the immortal army that the Terran came to has only five warships, the number is twice as small as the last time, but the combat power has turned over many times.

Five warships, all of which are 100,000-meter-diameter star fortress!

This level of starry sky fortress, in the past wars, is often used to sit behind the town as a strategic deterrent, but this time, the immortal dynasty once dispatched five starry fortresses, so big, just Even Ying Yingtai was shocked!

From this side, it also reflects the immortal dynasty of this time, the imperial prince must be found, Xuan prince must find, live to see people, die to see the corpse.

Perhaps this is also the five warships that the dynasty dispatched at one time, all of which are for the 100,000-meter starry fortress. Because in the Jedi, the only place in the starry sky, only this starry fortress can enter for a short time and exit safely. .

Others, even the 50,000-meter-diameter star-class warships, known as the existence of the small fortress, absolutely do not have this ability. If they enter, it means that the ship is destroyed.

The immortal dynasty military in the Terran Science and Technology camp is qualified to command a senior general of a 100,000-meter-diameter starry fortress, usually four stars last time, and even five-star generals.

But this time, with the five Star Fortresses coming to the first universe of the fleet commander in a short time, it is still Samsung Admiral.

This is also a hint that it will be dismissed.

After all, the last time Napoli did not bring Xuan Huangzi back to the Terran, but after all, he has already found him, but Xuan Zizi himself deliberately avoided it for some reason.

More importantly, after the fleet encountered the starry fortress of the Celestial family, Naples made a decision and dispersed the decision to disperse, and the last one left.

This effectively guarantees the news of Xuan Huangzi, and can successfully feedback back. Even if the starry fortress of the Tianzu nationality is chasing, there is a small fortress in Naples that resists in the back, and has already started the jumping of nine stars. It can also enter the wormhole in time.

In short, this matter showed the great responsibility and ability of Naples as a senior general of the immortal army.

After returning, the official of the dynasty officially informed the news of the Emperor Xuanzi. The fans and the countless princes of the other ethnic groups in the Federal Republic of Vanda learned that the dynasty military not only dispatched the fleet but also folded Loss of a star-level, thousands of immortal regiments of elite facts.

And the whereabouts of the Emperor Xuanzi have been confirmed, and it is still safe...

Therefore, the grievances of these emperor fans have gradually disappeared, and the pressure on the public opinion of the royal family has been greatly reduced. It is a great high-rise of the royal family who sits on the military. As a result, the transfer of Naples will naturally become a matter of course.

It can be said that even this time, Naples still failed to bring Xuan Huangzi back to the Terran, but as long as he makes a difference here, it is better to fight the tragic ones and destroy one or two Star Fortresses. Then, after going back, He will be regarded as a hero by the royal family.

Of course, he could not deliberately lead to the destruction of the Terran Star Fortress, but Naples did come with a heart-wrenching mind.

Only war, war, and the tragic he hopes can emerge.

With such an idea, the five Terran Star Fortresses came to the black mosquito star field, and immediately swept away more than ten first cosmic slave servants and hundreds of fleets in this star field. Then, on the third day, Straight out the space and jump to the magic star.

Since the collapse of a tribal master star does not hurt the devil's ethnic group, then this time, the magic king star is opened, and five starry fortresses can definitely smash the magical city. After all, the devil's group There is no starry sky fortress with a diameter of 100,000 meters!

As for the Emperor Xuanzi, Naples originally decided to go to the Starry Thunder to rescue, but in the three days of the raid, he harvested the news that Xuan Huangzi appeared again.

The matter made everyone sigh of relief, including a royalty member of the fleet's deputy command.

This member of the royal family is the younger brother of the immortal emperor today. Xuan Huangzi should call it the uncle, named Long Tianba. Among the imperial princes who are active in front of the dynasty, the second prince is supported. Must be Myanmar.

As for the Emperor Xuanzi, the name of the emperor is ranked 18th. In the weekdays, the Emperor and the Emperor's Dragon Tianba are not familiar with each other. It's not a good deal. The latter's reason is that the fleet of Naples came to the first universe. Of these, it is clear that some of the factors are the internal royal disputes of the immortal dynasty.

As for the truth, it is really secretive, the average person has no way of knowing it, and knowing something inside, it is impossible to talk about it...

For all of this, Ye Xuan is still ignorant. At this time, he is still on his way to the Magic Emperor.

It was only three days since I left the black mosquito star field. His Son is only an ordinary 10,000-meter fortress. Even if it is full speed, it will take a wormhole jump when encountering a cosmic wormhole. Days can reach the Magic King.

It is speechless that Ye Xuan walked for three days, but in the end, it fell behind the fortress fleet in Naples. On the seventh afternoon, when the Holy Son finally came to the Magic Emperor, Naples had already arrived for a long time.

After all, the entire fleet is a 100,000-meter-diameter star fortress, from the black mosquito star to the magic king, four days, enough.

So that Yingtai, who had been biting tightly behind the fleet, was smothered by Naples. Although she also had a fortress, it was really inconvenient to take it out. The supreme cultivation of Xuanguangjing was only crossed by the flesh, from the black mosquito field. It takes five days to go to the Magic Emperor, only two days faster than the Big Fortress.

In other words, the Yingtai, which flies across the void, will arrive tomorrow!

Because Naples has already known that the Emperor Xuan has left the black mosquito star field, it is coming to the magic king star, and most of them have arrived.

Therefore, before the five Terran fortresses entered the star field, they all opened up the concealment method. He must first collect intelligence to determine the place where the Emperor Xuanzi went, and then make a decision.

If you can find Xuan Zizi, naturally there is no need to fight again, and immediately take him back, the effect is better.

Therefore, the five Terran fortresses quietly crouched down in the void of the Devil's Star, secretly detecting intelligence.

It was at this time that Ye Xuan's Son of the Son finally arrived...

Chapter 3047: Root of all evil

Similarly, Ye Xuan also opened the concealed method into the Magic Emperor, and his personal star communication system can secretly invade within a light-year distance. Therefore, Ye Xuan's Son is also Stopped in the void from not far from the Magic King.

The distance between the two is not far away, but they don't know each other's existence. It's also speechless...

With the slow stop of the Son, Ye Xuan immediately issued an instruction to activate the personal starry communication system to the body's engulfment system, and ordered it to fully search for all the star network signals in the nearby virtual sky. Come out, for you to choose the object of the ditch.

The system responded quickly.

"Hey, personal star communication system is on!"

"Now start searching for starry sky signals, progress 1..."

"Hey, congratulations to the host, capture the star network signal, strength: weak!"

"Hey, congratulations to the host, capture the star brain wave frequency signal, intensity: general!"

"Ding....."

As the system sounds in the mind of Ye Xuan, every time the phagocytic system searches for a star network signal or a star-wave super-wave frequency signal, it will be displayed on the search result list. Ye Xuan does not have too much delay. When you look at it all the time.

"Hey? How are these five star brainwave signals so strong?"

Soon, Ye Xuan found five highlighted objects on the list of search results, all of which are signals of the astrolabic wave frequency, and they are extremely strong.

The star network signal is actually a star brain wave frequency signal. After all, the total control center of the star network is the same as the starry sky.

But the two are still different, the nature of the property is different, this point, the starry sky super brain can clearly distinguish.

The star network signal is generally issued as an administrative star, or a star-shaped super-brain that constructs a large open network in a larger area.

Deliberately distinguished, the name of the star brain wave frequency signal is generally the battlefield, or the small local area network signal of the space fortress, non-open network, not any star network can access, otherwise It is an illegal invasion.

In other words, the five star brain wave frequency signals are either from five warships or space fortresses. This is also normal. The most indispensable in the galaxy is the stars, then the battleships.

The key signals are so strong. Basically, they must be very close, or the stars of the five warships are super-horse.

The latter is obviously impossible, and it can only be the former.

However, the leaves of Ye Xuan's Son are surrounded by a battleship, and a warship can't be seen. The other party is clearly hidden.

And the star-wave frequency signal in the general battleship and even the space fortress, with the immortal level of Ye Xuan's personal starry-sky communication system and the strength of the current childhood, even if the other party is hidden, it can roughly lock its position.

But these five-star brain wave frequency signals are not only strong and outrageous, but also erratic and impossible to lock.

This is at least five 50,000-meter-diameter star-class fortresses!

As this thought flashed through my mind, even if Ye Xuan was shocked, the first thing that came to mind was the ambush of the Tianji people!

Of course, there may be five fleets of the Emperor and other first cosmic servants and hundreds of stars.

But no matter which one, one thing is certain, that is, this matter must be with Ye Xuan and Guan.

Here is the first universe, the fleet of the devil and the servant and the sects of the sects have opened up the sneak sneak squatting here, setting trap traps, it is impossible to beat yourself.

They have to deal with it, only the Xuan prince!

Is it that your identity has been exposed?

Or, it was the case that the top of the celestial celestial celestial family was destroyed in the glory of the sky, and the silver starry fortress was taken.

In addition, Ye Xuan really can't think of any other reason, so that the other party can do so.

The five star-class small fortresses can easily sweep the entire black mosquito tribe!

"Fortunately, this time when I entered the Magic Emperor's Star Field, it was the first to open the hidden array method. In addition, because the starry sky super brain as the central control center of the Son is refining by my personal starry communication system, then The total control center is also an immortal super brain that has entered the early childhood!"

"Yes, at the same time as refining the central control center of the Shengzi, it has also improved its additional attributes. There is no fear of the super brain in this small fortress for signal search, otherwise the consequences will be unimaginable."

Surprisingly, Ye Xuan couldn't help but secretly rejoice: "I am afraid that I just entered the Magic Emperor's Star Field and I have to be discovered by the other party. At that time, the five small-scale fortresses at the same time will be fired at the same time, and they will not be able to detach themselves. Pippi!"

As soon as I read this, the white hair sweat on his back has a layer.

In that case, the Son of the Son must not be guaranteed, and he, in Cangjie, I am afraid that there may not be enough time to open the interstellar coordinate jump, that is, a dead end!

After some fear, Ye Xuan was even more cautious, and even specifically reminded the phagocytic system, let it inform the attached personal star communication system, try to keep the signal concealed.

However, this time it has come, and after the last thing, you can immediately return to the third universe. At that time, even if you reveal your identity and openly flee, it does not matter.

Therefore, even if he realized that the other side had an ambush, and that the five star-class small fortresses were in the void not far from the surrounding area, but Ye Xuan still did not dispel the ditch and invade the magic star network, through which it invaded the next level. The plan of the Tianji family star network.

Do not enter the tiger's den, do you have a tiger?

What's more, I haven't entered the Devil's Star yet, but in the Xinghe's emptiness in the distance of the Magic Star, if Ye Xuan even has no guts, there is no need to sway the Star River again, and ask for it!

At this point, the signal search of the communication system has been completed, and Ye Xuan quickly found out which signal of the Moss Star Network, and then immediately assigned to his personal communication system, and invaded, and then directly Through this network, log in to the next level of the main network, and expand the conditional search instructions.

This time, the search conditions he gave were the source of engulfing. Considering that the name may be different here, Ye Xuan even described in detail the characteristics of the source of phagocytosis, which is known to the phagocytic system. However, it will not be taken as a search condition and will be released to the affiliated communication system.

After the order was issued, the communication system was executed immediately, and it was easy to invade the star network of the magic king star, and then launched a leapfrog invasion.

The whole process was about ten minutes or so, and Ye Xuan had already received the search results from the back of the sky.

What inspired him was that this time it was originally a dead horse right as a living horse doctor. I didn't expect it to end up with an unexpected surprise. The origin of the suspected source of devouring really existed in the first universe.

Just listening to the name, you know that it is not good - the source of all evil!

Chapter 3048: Scared the prince

Although I found a place where the source of suspected production was swallowed, but Ye Xuan is temporarily unable to go to the field to explore and confirm!

The source of all evil is a Jedi, and it is the sinister Jedi in the first universe.

The life black hole and the starry sky grave that Ye Xuan had already visited before can only be regarded as the Jedi in the big star field. The source of all evils is higher than them. The degree of sinisterness can only be seen.

More importantly, the source of evil is not in or around the Devil's Star, far from here, in the vicinity of the central domain of the First Universe, where the base of the Tianji National Base Camp is located, even at a diameter of 100,000 meters. Star Fortress does not hesitate to use energy to carry out full-speed day and night, and continue to carry out wormhole jumps along the way, at least one month to arrive.

The reason why the former Star Fortress was so fast came to the magical star field, which was because it happened to be in the vicinity of the Devil's Star Field and received the starry sky of the first universe. The instructions issued by the main network arrived quickly.

If the butterfly was in the central domain of the first universe, it would be full speed, and now, I am afraid that it has not yet reached the devil's domain.

In addition, from the Devil's Star Field to the long-distance star way of the first universe, although there are many natural wormholes that can open wormholes, some of the important wormholes have higher strategic value. The local fleet of the Tianzu family has been guarded for years.

That is, you can forcibly break through a place, and the news will spread soon. At that time, not only will the next wormhole enter, but when you exit from the wormhole exit, you will only face a huge fleet of celestial bodies. Cofferdam.

That is to say, this trip to the source of the evil in the first universe of the universe, not only dangerous, time, but speechless, the speed of the next month is only for the starry fortress of the Tianzu or its slaves.

As a human race, Ye Xuan could not arrive within this time limit. The wormhole could not enter, and it was still hairy?

Of course, he can also carry out interstellar travel all the way, give up the wormhole jump, sail in the normal starry sky, and rush directly at full speed, but in that case, when it comes to the first universe, it only takes three or five years, the daylily It's all cool!

In addition, the things of the third universe science and technology camp in the immortal dynasty are also in urgent need of Ye Xuan to go back and deal with it, and it is obviously more convenient to carry out a search for the information on the whereabouts of the source of devouring.

Therefore, after some thoughts, Ye Xuan finally gave up the idea of rushing to the source of engulfment.

Everything, still have to go back to the third universe, determine if you can find the source of devouring, and then make the final decision based on the results!

In this case, all the affairs in this first universe have basically ended. Ye Xuan immediately has only one problem to consider, and that is the journey back to the third universe of the Terran!

He was originally planning to take advantage of the fact that the five stars and small fortresses that do not know where to hang in the vicinity of the Xinghe River are still not knowing how to come, and how to get there quickly. of.

However, this idea is destined to be a idiotic dream, because just as he decided to return to the next moment, this originally quiet and incomparable star river void, has suddenly produced a shocking and huge change.

Everything was without warning. Under the circumstance, Ye Xuan even stunned the soul and flew halfway. The dark road almost scared the Emperor!

"call out!"

"call out!"

.....

In an instant, five black light bulbs with a diameter of about 20,000 meters are almost at the same instant, and five different virtual positions from far away appear instantly.

When the space seemed to be ruined by the trepidation of the tremble, the leaves of Ye Xuan's body were all erected. When the line of sight had not seen the five horror energy beams, he passed this unique extreme vibrato. The voice, realized the five big guys who crouched in the void around the Son of the Sun, what kind of existence.

So what is the star-class fortress?

It is clearly five star-shaped fortresses with a diameter of 100,000 meters. When the silver fortress of the Tianji nationality fired this kind of devastating light cannon, Ye Xuan recorded this unique trembling sound, and there is no possibility of error!

What is even more life-threatening is that the five horrible death light cannons are emitted from different directions. Although the targets are all superstars with a thousand miles away, Ye Xuan's Son is just one of them. The energy beam is stunned and goes in the middle.

In other words, if you can't avoid it in time, then the ending of the Son will be an instant ship crash.

The energy beam of the five dead light cannons is 20,000 meters in diameter, and the leaf of Ye Xuan is only a large fortress of 10,000 meters in diameter. It must be bombarded, and it must be instantly vaporized and disappeared. The space fortress and everything in it, including Ye Xuan, will be completely smouldering...

At this time, he still does not know the starry sky fortress that emits these five horror energy beams. In the end, it comes from which camp.

If it comes from the celestial family, once the sacred child is exposed, Ye Xuan's end is actually not as big as being smashed by the other party.

However, he obviously has not considered this point.

The crisis of life and death has come, and it is approaching at a very fast speed. It must be evaded in any case. Even if it is exposed, there is no way, or it will die immediately!

Under this coincidence, it just happened to blast the energy beam of the sacred sacred guns to a diameter of 20,000 meters, and the diameter of the sacred hull is 10,000 meters. That is to say, if you want to dodge, the sacred child needs The distance moved is only 10,000 meters, whether it is left or right...

Under the background of the starry sky, the distance of 10,000 meters is really insignificant, but if a condition is added in front, that is, the energy beam of the dead light cannon is approaching the speed... then the matter is instantaneous. Not simple.

It can even be said that it is exciting and can be successfully achieved. It depends on the speed of the Son's reaction, plus a little bit of luck.

All of this, in an instant, was analyzed in Ye Xuan's mind and the results were obtained.

Almost at the same moment, his screams suddenly came out loud and resounded through the entire command cabin space on the top floor of the Son. The urgency of the heart was shocked: "Dod away, Immediately..."

"Hey..."

Not waiting for his words to fall, a frequency of reaching the ultimate faint tremble has been drilled into the ear, clearly that the dead light gun energy beam appeared on the side of the hull.

At this moment, the death almost passed, and Ye Xuan realized that the swallowing system had already issued instructions to the intelligent master control center of the Son in the first time, and he suddenly avoided the catastrophe. I found that my whole body, up and down, inside and outside, has been completely soaked by cold sweat...

## Chapter 3049: Arrest

"Booming..."

"boom!"

.....

Not waiting for Ye Xuan to return to the gods, within the magic star of the sky thousands of miles away, there have been no suspense to the sound of five earth-shattering sounds.

As the emperor's seat of the demon group, the magic star's star network is weak, and at least, the star defense system and the remote warning system are still available.

Although the energy beam of the dead light cannon is coming to an extreme, after all, after a few thousand miles of virtual space, I am afraid that it will just be in the middle of the road, the magic king has already warned in advance, and launched the star defense system.

Simply put, it is actually a defensive mask that covers the entire magic star, including its atmosphere.

This defensive mask is made up of numerous micro-energy base stations arranged outside the atmosphere of the Emperor and the inside of the star body. It instantly bursts with the horror energy and is formed by the first time ditch. .

The five blasting sounds that came at this moment were the energy beams of the five dead light cannons, and the bombardment came out on this defensive mask.

Generally speaking, when it is necessary to use this ultimate astronomical defense system, it is basically waiting for the crisis of surviving, so all such defensive masks are all arranged in a big way.

And once the defensive mask is activated, the wear and tear is also at all costs. In one sentence, pay all, and strive to achieve the ultimate effect!

For this reason, the five energy beams were not able to penetrate them in an instant after bombarding the defensive mask that had been successfully activated.

After the huge blasting rumbling came out, the entire defensive mask was pressed for about two seconds, and then it collapsed. There were countless energy nodes that were arranged by the terror of manpower and material resources. After three seconds, it was turned into waste. !

However, this is less than three seconds, but in the case of the Magic King, it is enough.

A huge disaster, success was resolved.

The Death Light Gun of the Star Fortress is extremely special. Since the energy beam is made by the antimatter light energy generator in the fortress, its greatest characteristic is to devour all positive substances, even light is no exception.

Everything that is in front of it will be wiped out in an instant, and the same has never existed before.

But this is also the biggest weakness of the dead light cannon.

This ability to devour all positive matter is actually achieved by mutual hedging and ablation between positive and negative matter and energy.

That is to say, if the positive material energy in front exceeds the overall power of the dead light gun energy beam, then this energy beam will eventually be offset, quietly dissipated, and can no longer cause any damage and lethality.

Although the ultimate star defense system of the Devil's Star was destroyed in one fell swoop, it lasted for less than three seconds, but it was these three seconds, which also offset the anti-material light energy of the five dead light cannons by nearly 80%.

The next moment the defensive reticle collapses, although the five energy beams are still lasing toward the atmosphere of the Magic Emperor in the reticle, and instantly penetrate into the interior of the star, but its original black to nearly bright beam color, It has faded to almost disappear.

Only 20% of the power left, even if it hit the sky above the Emperor City, I am afraid that there is no way to break through the city defense system of the Magic City.

For all of this, the commander of the Terran Fortress fleet, General Napoli, has already been expected.

In his view, it is a big deal to start a round of volleys. The magical star's star defense system has been completely destroyed. The second shot of the dead light can directly blast into the interior of the star, and there is no third... ..

In a word, today, you have to sneak a field here.

Of course, this is also because he has already collected intelligence and analysis, and determined that Xuan Huangzi, who came from the black mosquito star, did not dare to do so without entering the magic king.

It is a pity that the second round of volley re-expansion has not yet been issued, and Napoli has seen a demon fortress suddenly appeared in the sky from the huge holographic stereo screen in front of him.

The other party is also a fortune-telling. It was originally in front of the path of the dead light gun beam that was shot from the flagship fortress at his foot. But in the end, at the most critical moment, he gave up the maintenance of the hidden array method and launched the full force. He also avoided the devastating kiss of the energy beam of the dead light cannon.

Then, Naples recognized the Devil's Bastion. He had earlier explored it. Although there is no logo on his hull, he is sure that this is the Son.

"Damn, the general almost murdered the Emperor Xuan..."

Under the fascination, the Admiral Napoli stunned and then stunned and immediately issued new instructions.

Nearly roaring like thunder: "All the fortresses are listening, immediately encircle, and at the same time open the fortress level space shock, power to get the biggest to Laozi, this time, be sure to live Xuan Xuan... Hey, be sure to take our emperor Adults, take it safely!"

"After success, return immediately, don't delay for a second!"

With the release of this latest order, the previous combat instructions have been automatically cancelled.

Xuan Huangzi unexpectedly appeared, and it seems to be in the center of the five starry fortresses. This is clearly the rhythm of the fish actively drilling into the net.

Surprisingly, all of the entire Terran fortress fleet, including Naples, at this moment, completely forgot the magic star.

The only thing in my heart is to catch the Emperor Xuan and take him away.

Only Huang Shulong Tianba in the top command cabin of the flagship fortress with the same side of Naples, the face is gloomy, deep in the bottom, and from time to time there is a haze of awnings flashing quickly, clearly shocked, and extremely unpleasant.

As for the Xuanyuan Ziyang standing on the side of Naples, it was already nervously lifting the jade hand and covering it on the pretty lips. Just then, the shocking soul of her was coming out.

Soon, including the flagship fortress where Naples is located, the five star fortresses of the Terran have quickly roared in different directions, and at the same time brought a burst of whistling sounds.

The Son of the Son also responded in the future, and he was already dumpling dumplings and fell into the siege of five fortresses.

The space oscillator at the Star Fortress level, that is not the general effect. Ye Xuan in the Son of the Sun found that his fortress could not move in an instant, not only could not expand the space jump, even the wave that swayed in the cusp Sailing is no longer possible.

This is a real space ban. It is formed by five 100,000-meter-diameter star fortresses and a full-scale launch of the ship's giant space oscillator. In general, the kilometer-class planetary warships are estimated to have been shocked. The body broke and ruined...

In the face of all this, Ye Xuan's face instantly gloomy.

He decided to return to the third universe, and even he was already ready to leave, but now it is a ghost that is blocked by his own people.

Is this prince a street mouse or a net fish?

It's just that...

Chapter 3050: return

"Booming..."

"boom!"

.....

Just as the Son of the Sun was driven by the five Terran Star Fortresses to the maximum power of the ship's space, it seemed to be caught in the mud in an instant, and when it was completely unable to move, thousands of miles away from the direction of the magic star, the road roared. The sound, also instantly came, and it rang through the whole piece of the void!

The devil is not a soft persimmon that is arbitrarily squeezed. What's more, it is still blocked at the door of the emperor's star, and launched a round of sneak volley?

The starry sky defense system, which has been spent on endless financial and material resources, has been completely ruined. The color of the whole demonic and demonic royalties is great.

In this matter, the Emperor Mo asked that it would never be easy to stop.

In fact, the counterattack, the first time has come...

It is true that there are no 100,000-meter-diameter star Fortresses in the Devil's group. Not to mention five, none of them. They are not good at research and development of science and technology. They are not keen on this.

All the warships are almost all transferred by the celestial family. The devil's scouts are no different from those of human beings. The use of the celestial family is still very large.

However, it is still not enough for the Tianji people to open the strategically-oriented ultimate killer of the Star Fortress to them. If the devil has a rebellious attitude, the matter will become the elbow of the Tianji.

Even so, the Tianzu-class and the Xingyu-class giant fortress below 100,000 meters in diameter have been allocated a lot.

The top ten foreign tribes naturally do not have it, but in the two satellites that guard the magic city, namely the inner stars of the magic guards and the magic guards, the giant fortresses of 20,000 meters and 50,000 meters. The number is actually quite a lot, and it is always in a state of readiness.

Especially in the case that the Devil's Star Field is not too flat recently.

Last time Ye Xuan saw a few 50,000-meter-class stars in the star dock of Magic One, which was only one of the star docks of Magic One.

There are five large-scale star docks of the same class, and each of the magic guards and the magic guards.

The star-class level in each star dock is three, and the 20,000-meter star-class is five.

Calculated, the Magic King can enter the battlefield's 50,000-meter star class at any time, which is 30, and the 20,000-meter star-class is 50.

As for the ordinary fortress with a diameter of 10,000 meters, the number has exceeded 100...

At this moment, with the moment of the wrath of the Emperor Mo, the roar of the roar, the ten large star docks in the two magical satellites of the Emperor are almost in the nest.

Nearly 300 space fortresses, the last one is a large fortress of 10,000 meters in diameter. It is densely populated. It is like a locust. It is drawn from different directions of two satellites and gathered together to form a huge fortress army. The five Terran fortresses here are forced to come over!

When still far away, some 50,000-meter-high star-class giant fort, which has a long range, has already launched a bombardment. A five-kilometer-diameter super-comet gun energy beam has been volleyed like a volley. coming.

At the same moment, going to the other direction of the black mosquito star field, a figure of the strong figure who was shaped to the ultimate streamer, suddenly stopped suddenly, and then quickly slid all the breath, all in one That piece of emptiness, look strangely to this side to pay close attention to.

It was the tail that was inadvertently smashed by Naples a few days ago. It has been pursuing the high-level elites of Ye Xuan's footprints.

According to the normal speed of the strong black spot, the black mosquito star arrived in the way of the physical body crossing the void, originally had to arrive in a day, but Yingtai arrived in advance, clearly on the way to develop some kind of secret law or means.

At this moment, this scene in front of her eyes is even shocked by her.

But very quickly, her attention was drawn to the sacred son who was trapped in the encirclement, and in the middle of it, she took out an unexpected gloom.

Xuan Huangzi was actually wrapped in dumplings?

This is too unexpected, the kid is very slippery, it is estimated that the muddy reincarnation, the last time I do not know what means, actually disappeared instantly, escaped her range of sensing, but it is a very wide starry sky distance, explain He definitely has special means.

Unfortunately, this time it was planted.

It is estimated that it will be forcibly brought back to the third universe of the Terran!

As soon as I read this, Yingtai's eyes immediately turned up, and after two seconds, it seemed to have income. The lips were slightly smirked and smirked softly: "Giggle...returned to the Terran, it should not It's going to run around like this. It seems that Miss's love of the butterfly is destined to miss the first universe."

"Not only the object is the Terran, even the place where the romance is unfolding, but also the third universe of the Terran. However, suddenly appearing in his good position, I am afraid that there are still some details that need to be arranged in advance, so The oath of the immortal dynasty, the vows are indispensable!"

"Dear, hurry home, go back first, wait for you..."

"It's really hard to imagine what it would be like when you got home and saw that you had been waiting for a long time, and when you were still playing hot with your royal family relatives."

"It's really looking forward to..."

"Giggle... more and more interesting!"

In the laughter, Yingtai quietly turned around and walked in the direction of the wormhole that is on the edge of the black mosquito field and leads to the third universe of the Terran...

Ye Xuan did not know about the plans for the influx of Yingtai.

At this moment, it has already been frightened by the large devil fortress that has been bombarded in the sky thousands of miles away.

Hundreds of space fortresses have gathered together, nearly half of which are 20,000 and 50,000 stars and stars, and the scene is truly spectacular.

The reason why Ye Xuan was shocked was not to fear anything, but to not expose the Son.

Since the five star fortresses ambushed here are not the celestial beings, it means that his identity has not yet been revealed. If so, it must be concealed.

This identity, if you want to use it later?

Once the Son of the Sun is seen by the Demon Legion and then taken away, the eyes of doubt will come together in an instant.

Fortunately, on Friday, the Star Fortress is a giant, and the surrounding is tight. The middle of the Son is covered with a strict, as long as the Demon Legion is put away before the arrival of the Devils, his black mosquito status is mostly Can be preserved.

Out of this kind of thinking, I originally planned to be sensational, shake the glory of the emperor, and give the commander of this Terran fleet a little Ma Weixe's Ye Xuan. When one step took the Son, and then waved it, it would It earns the immortal world of the body.

At the same time, one of the Star Fortresses on Friday, the outer wall of the flagship fortress where Naples is located, also has a passage entrance, which clearly opened the passage to welcome the rhythm of the return of the Emperor.

"Humph!"

Ye Xuan snorted and concealed his figure. He stepped into the entrance of the passage. At the next moment, his figure appeared in the top command post of the flagship fortress. All the people, all of them enthusiastically gathered their sights. Come over.

Including Xuanyuan Zijing.

Seeing the same moment of this girl, Ye Xuan's face suddenly changed wildly, and her heart mourned: Broken...
