

Super D. S 3141

Chapter 3141: exile

After a long time, in the hall of the old pavilion, the voice was heard again, but it was all about a strange meaning.

"That tower... really gone?"

"You kid can't play tricks. This tower is of extraordinary significance to the royal family and must not let you take it away!"

"Yes, even if you pass the test of collecting this tower, this thing is not allowed. The immortal inheritance tower is the foundation of the whole immortal royalty. I waited for the trial of the tower, and all of them got one or two wild blood heritages. It is with it that my immortal royal family is born in generations!"

"Hand over this tower, everything before it will be written off, let's do your old eighteen, as long as there is no disagreement, immortal royalty, keep you glory..."

Finally showdown!

Ye Xuan's heart suddenly sneered, and these old guys are considered to be shameless. Just now, it is also called the ancient tower. It's turned into an immortal ancestral tower, knowing that this tower and the immortal royalty have no relationship. And this matter is even clear that Ye Xuan, actually still kindly said this kind of words in person.

These old guys, the speed of turning their faces, and the ratio of Hongdu Lie, do not know that the muscles and nerves on the face have been broken!

Oh, yes, when it comes to this matter, it seems that Hongdu Lifeng has not yet cleaned up the goods. Although Ye Xuan is not a vengeful person, but he has offended him in such a face, Ye Xuan has not been too big to be able to do things. The degree of turning over the article, looking back at the opportunity, not to pick up the guy.

After a small gap, his thoughts quickly returned, frowning and spreading his hands.

I can't help but even the dead pig is not afraid of boiling water. "I can't find where it is. Anyway, it's a waste of treasure. Maybe there is something to avoid the exploration. Do you think I want to take this kind of thing?" Not afraid of thieves stealing, I am afraid that the thief will remember, this body with such a thing, is not a **** heritage of the magical powers, others can not take it, I am still afraid of it."

Although this is true, it is not very particular about it. If you don't say anything, you will say that the royal family members are thieves who remember him. There are some cold voices around them. Finally, some old guys are not resistant. Lived, already angry!

"Kid, you better know each other, otherwise the matter is not over!"

"Yes, if you don't hand over the ancestral tower, you are the sinner of the royal family. Although you can't kill it because of this, the death penalty can be saved, and the living sin can't escape!"

"Look at the old man, exile to the death star field, not to be summoned, never return to the dynasty!"

"Oh, this is how you will be the three major universes, how is the crown of the United States? The death star field has no aura of heaven and earth. When you go there, you will not even have the night clothes, the more the scenery is infinite. The more pain in your heart, the more you advise you to think twice, don't make your mistakes..."

Ok, it's not soft, it's hard!

This time, the fire of Ye Xuan's heart was also provoked. This old guy is really shameless.

However, he is not afraid, it is not good, if they really dare to do it, the headless baby will never stand by.

Besides, there are still a few Lei Yuanzhu in his hand. What about the old guys who have been repaired into realm far beyond the virtual environment?

Even if a Leiyuanzhu can't kill one, at least it will be completely ill-healed. Ye Xuan only needs to throw out four or five pieces. After a few injuries, these old guys will not dare to attack. So hard.

Who knows how this seemingly insignificant little jelly bean, Ye Xuan, in the end, how much.

In the unlikely event that a person grabs a handful of them, the entire royal family of the immortal dynasty must not be seriously injured. That's really a ruin, not Ye Xuan's breaking, but their own.

As the root of the royal family, once the deterrent power of the old club is lost, there will be a big change, and the consequences will be terrible!

These old guys are absolutely afraid to gamble.

In a word, I really want to turn my face. Ye Xuan has no fear at all. It is a big deal to kill the immortal imperial city and leave on its own. The name of this Laoshizi Xuanzizi, the original is cheaper, don't worry about it, nothing bad!

Thinking like this, Ye Xuan's tone suddenly became cold: "Since I said something you don't believe, then you can search for it yourself. Anyway, you have already searched twice. Hey, you are immortal." The royal family should be familiar with this kind of thing."

This is not a polite thing. It has clearly expressed a strong sense of dissatisfaction. No one wants to be searched in the body with the power of the gods. If you don't see that the dragon guard is a good intention, you want to help the leaves. Xuan chose to go out of this matter, Ye Xuan is afraid that it will not easily agree.

Now, although he has offered it, Ye Xuan's dissatisfaction is far better than before.

The emperors of the royal family were silent for a few moments, and then there was a force of knowledge that extended to Ye Xuan's body. Although there were dozens of people in the presence, it was only necessary to do it alone. There is no intrigue in the pavilion.

As the power of this sensation enters the body, the search is carried out, and after sweeping a circle, there is no fruit, and then it spreads toward the sea of Ye Xuan. At this moment, Ye Xuan's heartstrings are also stretched, for the crazy mosquito queen. The spirit of the eight spirits of the Tao can be blocked by the power of the royal family. Ye Xuan actually has no bottom in mind. The crazy mosquitoes are stronger. After all, they only leave a spiritual brand, not the deity. this.

Sure enough, as the other party's power of knowledge is approaching Ye Xuan's knowledge of the sea, Ye Xuan's knowledge of the edge of the sea is clearly burned, and the spiritual brand left by the crazy mosquito emperor is like an enemy.

It seems that it can't resist!

Just as Ye Xuan was nervous, his left chest suddenly followed a hot one. Then he saw that he was close to the edge of his knowledge of the sea. In a moment, he was like a frightened rabbit, and quickly retired. Going out, I left Ye Xuan's body in the blink of an eye, and in the distance from the old pavilion, there was a vague voice.

The headless baby was shot, although it was just a breath of breath, but it still caused the old man to be slightly injured.

"The pagoda is really in this kid's body, but it seems to be extremely resistant to the power of my exploration, and even warned that it is a brief demonstration of power!"

At this time, the old man who ate a small loss also spoke: "There is no such thing as the ability to control all of this. It seems that the pagoda's entry into the body does not matter to him, but... the pagoda is of great importance, still can't Waiting for it!"

"Do you have a death star field, nothing to say..."

"Seconded!"

"Seconded!"

.....

With the suggestion of another old man, the other old people have all been seconded, so it is a surprise to Ye Xuan. This old guy, knowing that the pagoda is in his body, actually dared to let him leave the immortal star?

What exactly is the death star field, can they make them so confident?

Chapter 3142: The gap between the two camps

Obviously, the old man in charge of the investigation, the breath of the headless baby corpse, became the breath of the ancient heritage tower.

This is also normal, headless baby corpse, this is the supreme existence of the ancient times, the atmosphere and the ancient towers are very similar, Ye Xuan has a wild heritage tower is a matter of common knowledge, but the existence of headless baby corpse, but No one knows.

Therefore, the old man subconsciously used this scent as a tower of the ancients, and it was very logical.

Since the investigation failed, and even tried the attitude of the towers of the ancients, then leaving Ye Xuan has no meaning.

Although the old people in the room are strong, but they can force the will to inherit the towers of the ancients, they are still self-aware, they can't do it!

So, Ye Xuan quickly retired from the old club. From the beginning to the end, he didn't even see a royal emperor's face. He made his heart feel uncomfortable. The old guy said it was good. It is clear that he still does not recognize the blood of the emperor in his body, otherwise it will not reveal it.

Of course, this matter was originally caused by Ye Xuan, who was a fake at the root. There is really no reason to ask people how to be kind.

With this in mind, Ye Xuan's heart was flattened, and his mind quickly fell into the so-called death star field. After all, the star field has become his place of distribution, and soon he will leave the immortal star. Going here.

In the distance from the old pavilion, the five emperors and several emperors all left a glance at the royal eyeliner. They waited for Ye Xuan to enter the cabinet. At this moment, he saw him safely out of the pavilion. These royal eyeliners showed their faces on the face. The color, hurried away from each other.

And the empty Bo and the dragon guard, Napoli and Xuanyuan Ziyang, returning to the sea, a few people, but a sigh of relief, all greeted.

Ye Xuan is also welcome, Shantou asked: "Where is the death star field?"

The wry of mosquitoes and the return of the sea is obviously unknown. It is like a fog, and like Ye Xuan, he turns to look at other people.

However, after the four words of the Death Star, after the words of the Death Star and the Dragon, and the Napoleon and the Xuanyuan Purple, they immediately changed their look.

Long Hao smacked his brow and snorted back: "Nothing to suddenly ask this?"

Napoli and Xuanyuan Ziyang exchanged a look, the color of worry.

Kong Bo was angry and roared: "The old ghosts dared to send you to the death star field? The old slave took the old cabinet to go..."

After that, the body has already surrendered a majestic retouching atmosphere. It is actually a little weaker than the old-fashioned old people who Ye Xuan had felt in the old pavilion, and even hidden.

As this repair was smothered, the air anger rushed to vacate, but it was greeted by Ye Xuan with a smile and stopped: "Empty, this thing is also afraid of others, the entire Zulong Tower They have all been

abducted, but they have only been sent to the death star field. It is already liberal. You still have to tell me what it is. It's going to go, I'm going to make some preparations first. It's really dead there..."

Hearing this word of consolation, the empty blog must have been in the heart and understand that Ye Xuan really took care of it, and sighed, the breath of the body rushed out, and then he frowned and said: "Although it is death. Star field, but the old guys should not kill you. After all, the ancestral tower is still in your body. If you fall there, the immortal royalty is really a huge loss!"

Although I understand this, but the indignation of the empty boss has not been reduced, still indignant: "But this old guy still has no good thoughts, this is to hide you and house arrest, death star, Located in the central domain of the Third Universe, it is a shard of stars between the immortal dynasty of the science and technology camp and the tenth century of the comprehension camp..."

"And that star field is not a funeral star field, there is no cosmic wormhole to other cosmic planes, so after entering the death star, you can't even leave the third universe."

"It can only be like the real snow and house arrest, and it has been left in the scarce star field that is like a black hole, even the heavens and the earth have no aura."

"In addition, I have to remind you that although the star field has the same number of stars as other stars, but since it is called the death star, you can guess it by this name. All the stars in the middle, all of them are real death stars, that is, the huge star is cut open, and I am afraid that I can not find a star nuclear source..."

"So, if they limit you to not leave the death star, then you will not have the resources for daily practice. Even if you can raise some money before entering the death star, you can eat the mountain and the time. There is a day of exhaustion... Who knows how old the old guys are going to keep you in the snow?"

"If it is thousands of tens of thousands of years, you will bring in more resources to cultivate, and fear that it will be used up too. At that time, your cultivation will be delayed, it will be talented, and if you are disguised They are abolished."

"And they just have to wait until the time is ripe, see you have become a waste, and most of them will not look at the immortal ancestral tower that voluntarily confessed to you, and then screw you out to

bring out the immortal ancestral tower in your body. And then... just dispose of it for you, it's just that killing is actually indifferent, anyway, it's a waste!"

Speaking of this, the indignation of the empty boss is no more, a look of sorrow, and even some downfall.

Regarding his position and his thoughts, Yu Xuan has always been a fan. Kong Boming knows that this dragon is not a dragon, but he still has great support for Ye Xuan. He has not had time to study it. At this moment, looking at the unparalleled look of Kong Bo, he is at least a little sure, that is, the empty Bo really treats him with sincerity, and now this kind of sadness from the heart can not be installed.

Not waiting for Ye Xuan to think about this matter, the side of Naples and Xuanyuan Ziyan and others have already changed their face. The situation of the death star field has long been known, but the words of the empty blog later, even the old man The calculations of the monsters have been analyzed. These are what they have not thought of.

At this time, I heard that Ye Xuan was almost completely killed by the other party, and I couldn't escape. I could only be under house arrest. In the end, it was basically a waste person, and a dead end, Napoli and Xuanyuan Ziyan were angry immediately!

However, before they expressed their emotions, Ye Xuan was already eccentrically asking questions again. Hearing his tone, he was not worried at all: "Hey, empty, I know a bit about the situation of the Death Star, but... Is there any merit in this star field? It's not scientific!"

Chapter 3143: Muffled

"A star field, even if it is called the death star, it is impossible to have nothing to do!"

Without waiting for the empty talker, the dragon guards on the side have already taken over the words, watching Ye Xuan continue to say: "This vast death star field, although not like the funeral star field, is rich in cultivation resources, but it is the source of cultivation resources. There are other mineral resources, so in the two camps of the Terran, there are quite a few strong people entering the death star field, collecting all kinds of minerals!"

"There is a mineral called phagocytic source crystal, which is an extremely scarce resource in the three universes. Once it is produced, it will be immediately acquired by the two camps and even other federal groups in the Second Universe."

"In order to acquire this phagocytic source crystal, the immortal dynasty and the Ten Heavenly Palaces, as well as the major federal communities of the Second Universe, even set up institutions in the death star field to be responsible for the acquisition of such crystals."

"It is said that even the celestial family of the first universe has a dark child there, and the purpose is to acquire this phagocytic source crystal. However, this resource is very popular in the three universes, and basically does not flow to Personally strong, so even me, I only saw it once."

"That was the time when the dynasty was responsible for the acquisition of this property in the Death Star. When the old man returned to the immortal star, he bought more than 20 pieces in ten years because of the acquisition. I am so lucky to have seen it once..."

Hearing this discourse, Kong Bo did not react, but Napoli and Xuanyuan Zixiao, but they looked awkward.

The immortal dynasty, specially arranged for an old man to be responsible for the acquisition of this object in the undead domain, and only acquired more than 20 pieces in ten years, actually still feel that the harvest is not small, come back to show off smugly... this thing, What is He Zhongbao?

Ye Xuan's eyelids were madly jumped up, swallowed and swallowed, and forced the heart's excitement. The tone calmly and casually asked: "What source crystal? Is it so precious? What looks like?"

Long Hao Shou did not think much, just described what he said as the devour of the source crystal, Ye Xuan heard, eyelids suddenly jumped more powerfully, but this time I did not ask again, afraid of words and losses, was seen What is not good.

That is what devours the source crystal, clearly is the source of engulfment!

The reason why Ye Xuan returned to the immortal dynasty as the Emperor Xuanzi was aimed at the convenience of looking for the source of engulfment.

Now, before he has taken action, there is news of the source of devouring, and it is still specific news. This is a big surprise. For Ye Xuan, this is definitely his entry into the starry environment. In addition to the headless baby, the biggest one is harvested!

Even the original harvest of a large number of sacred crystals in the corpse is not comparable to the news that has just been harvested.

Although it is also a rare resource, it is very likely that there will be no other areas in addition to the ancient cage of the Devil's Star Field.

After all, this thing is crystallized with the corpses of the ancients, but it is the crystallization of their legacy after their death.

Even so, compared with the source of devouring, in Ye Xuan's view, its importance is still quite inferior.

With the source of devouring, you can exchange a lot of treasures with the phagocytic system and open up various accessory systems to get more system functions.

Although the phagocytic system was created by the emperor of the immortal dynasty, Ye Xuan knew it after he got the phagocytic system, but according to his estimation, the true creator of the phagocytic system should be the pioneer star of the Terran technology camp. Bo, representing the highest technology of the Terran, after all, this system is used to select the genius of the Terran, and its ranks are placed there, absolutely inferior.

Emperor II, should inherit the legacy of Xingbo, perfect the unfinished engulfing system, and then put it out.

Therefore, even if Emperor Er is still alive, Ye Xuan wants to pass his other functions as the back door general decoding system, it should be impossible.

Only when you get a lot of sources of devouring, can you achieve normal trading or permission decoding with the system, and make the system more powerful!

This is why Ye Xuan has always been so concerned about the source of engulfing.

Prior to this, the source of the devour was placed in the first place, and the energy needed to find the self-propagating group of the world was placed in the second place.

Now, the second thing has been solved. The only thing that Ye Xuan is worried about is the source of devouring.

Unexpectedly, this time the distribution has actually encountered such a good thing. In others' view, the death star field may be a Jedi. After that, once Ye Xuan enters, he will not be allowed to walk out of the death star without a command.

But for Ye Xuan, this restriction does not exist at all.

The cultivation resources in his hands are just like the mountains. A large number of star nucleus sources are calculated in cubes. There are also a lot of sacred crystals. The sacred beasts are tens of millions of giants, not to mention the supply. When he is alone, he is able to supply all the strengths of his majesty, and he can maintain it for a long time.

Besides, the Death Star claimed that all the stars are dead stars, and there is no star nuclear source, but this is not absolute. In other words, others may not go and have no way to try, but Ye Xuan has the starry sky to engulf the blood of the beast. Which star has the origin of the star nuclear, can be smelled out with the nose, to say that he can not find the origin of the star nuclear from the death star, it is absolutely impossible.

What's more, even if it is a match, Ye Xuan is a prince after all, and it is not an ordinary prince. The immortal dynasty here must have some resources to provide him, so that is enough.

In a word, for Ye Xuan, the death star field is not only a Jedi, but even a blessing to make a fortune. At this moment, Ye Xuan, I can't wait to fly there right away. .

At that time, whether it is a technology camp or a comprehension camp, it is the second universe of the various ethnic groups, or the first universe of the celestial family of spies, in short, who dare to rob the source of Lao Tzu, do not say, directly destroyed!

"This prince has decided that this death star must go, who can't stop, who will stop me and who is anxious..."

In the blink of an eye, Ye Xuan's heart was full of enthusiasm. The conversation was turned to the side of the empty air and looked over. He grinned and said: "Hey, empty, if you want me to help me walk the back door, remind me to stay old. The old things in the pavilion let them grab a little bit and immediately send out the embarrassment. I really don't die, death star, good place..."

This discourse directly shocked all the people. This time, even the empty and wretched mosquitoes both opened their mouths.

Everyone looked at each other and looked at them all at once. They cried and cried for death, and they were looking for a match. The place where the match was made was still the death star. They had never heard of it. At this moment, they almost suspected that Ye Xuan was too excited. The mind is not normal!

Chapter 3144: Triumphant Corps

Xuan Huangzi has lost the entire immortal ancestral tower, the royal family's old wrath, and sent it to the death star field, without being ordered, can not return to the dynasty for life!

As soon as the news came out, the entire dynasty was awkward, and countless fans of the emperor were even more stupid, and the look of the face was stunned.

Although many of the fans of the emperor were embarrassed, but when they figured out what the immortal ancestral tower was, they closed their mouths one by one, and they could only sigh and sigh, without words.

As for the emperors and emperors in the dynasty, after I heard the news, I was almost happy.

Without being ordered, you can't return to the dynasty for the rest of your life. This is basically the rhythm of exile. If you are outside the stream, where are you qualified to compete for the imperial power?

The threat of the Emperor Xuanzi has finally been exhausted!

Originally, they were worried that Ye Xuan would use the power of the empty army to move around in the dynasty. Even the force of force forced the embassy to change the order, and it would be possible to change the punishment method euphemistically. The empty man has this ability, and he also does this kind of thing. Come out.

He was originally a temperamental person. Otherwise, he is a man of sorrow...and now he will not always be in the emperor's house of the old eighteen, and he will be an old slave.

However, after some inquiries, this last worry was also thrown into the clouds.

Kong Bo was walking around the dynasty, but he was not talking about the old eighteen, but was running resources for him. He wanted to get some warships and cultivation resources from the hands of the emperor.

This is the posture that has already been accepted.

Upon receiving this news, several emperors and emperors were just like the festival. They didn't care about the resources. Even the old eighteen even in the death star, they don't care, as long as they don't die. Stars will compete with them for the imperial power.

The exile of the old pavilion is basically not changed. There are more than ten dynasties in the history of the dynasty. All of them are old and dead there.

In order to let the old 18 leave early, several emperors and emperors not only used their own contacts, secretly assisted the empty, helped him to get through the joints, more resources, and even sent as the emperor and the uncle. The people each sent a batch of resources to the 18th Emperor's House.

In name, it is condolence, but in fact, it is eyeing Ye Xuan, I can't wait for him to receive the gift immediately.

However, this did not happen to be awkward. Ye Xuan did not think of this nephew. When he saw that the emperor who saw him as the nail in his eyes, he jumped up and down the monkey and gave him a gift. He suddenly turned his eyes. I feel that I have found another way to make money.

The death star field does not produce cultivation resources, and he represents the dynasty to guard one of the areas. Although there will be a fleet of imperial dynasties, there will be supplies to the warships every year to deliver supplies, but basically just enough for daily consumption, no Will give more.

Even if the old things of the old clubs in the old club secretly engage in some hands and feet, maybe the annual quantitative supply will be deducted.

In this case, naturally, before you go, you can fish as much as you can!

Here, you have to talk about the details of the distribution.

The death star field is very vast, basically similar to the funeral star field. Because it is in the central domain of the third universe, it is in the gap between the forces of the comprehension camp and the science and technology camp, while the death star field does not produce cultivation resources, but there are The good thing that devours the source crystal is produced. Therefore, whether it is the ten-day palace of the comprehension camp or the immortal dynasty of the science and technology camp, there are stations in the death star field.

Although there is no life planet in the death star field, it is completely okay to transform a death star into an artificial life planet with today's technology.

In this half-star field belonging to the immortal dynasty of the scientific camp, the town is responsible for a royal family, of course, and is also stationed in turns.

In addition, there is also a fleet. In the past, it was the same as the rotation, but now Xuan Huangzi wants to ship to the dynasty. Therefore, this fleet defense is handed over to Ye Xuan.

That is to say, in addition to Ye Xuan, the fleet he brought with him is basically exiled as well!

As the emperor of the dynasty, he was sent to the death star field, and naturally it was impossible to throw it away. Who knows if he slipped out?

But giving him a different position is different. Every day someone stares at it. After a while, he has to report to the royal family who are sitting in the town. Therefore, it is basically possible to rule out the opportunity to take the opportunity to sneak out of the death star field.

For all of this, Ye Xuan has already understood it clearly in these two days, but it is for this reason that he will be in a hurry and decide to slap it before he leaves. go.

As for the fleet, the dynasty also allowed Ye Xuan's request. The generals of Naples led a fleet of immortal regiments. The fleet was all Neapolitan's cronies, and it's not painful to stay in the immortal star. Love, they have been branded as a sacred prince, so they can only follow Ye Xuan.

The entire fleet has two 100,000-meter-diameter star Fortresses, five 50,000-meter-diameter star-class small fortresses, ten thousand-meter-diameter large fortresses, and three thousand-star star-rated battleships!

A large fleet of this size, with the ranks of the Admiral Samsung, is no longer enough to be its commander. In fact, a 100,000-meter-diameter star fortress needs a Samsung general.

Therefore, taking advantage of this opportunity, the Immortal Legion, under the impetus of the dynasty, raised the rank of Naples to a higher level. Today, he is already a four-star general, and it is considered that he has successfully passed the first universe from the first universe. Rescue the military merits that come back!

In addition, the other officers who had been to the First Universe at that time also adjusted their ranks. In this matter, the dynasty is still very generous, and it is all happy!

After the fleet was settled, Ye Xuan visited the five great emperors and the ten emperors' shrines and visited them. They said that they were individual. After all, I don't know if there is any meeting in this life...

The first one went to the Great Emperor's Mansion. After the result went, people didn't say it. Ye Xuan simply took the wretched mosquito and couldn't afford it. Finally, the Great Emperor finally realized it and gave him a smile. Resources, Ye Xuan, then grinned and started.

With this example, the latter is much smoother, and the fifteen families have come down, and it is a large resource.

At this point, together with the official resources that were generally negotiated from the royal dynasty, and the private resources that were swindled from the emperors, the resources of Ye Xuan's hands have reached a level where he has to be shocked. The timing is finally here!

As a result, before the departure, Ye Xuan waved his hand and directly changed the name of the fleet of Naples. The original immortal army was abandoned by him, and now it has been changed into a triumphant army!

Upon hearing the name of this fleet, several emperors were completely stupid, and they felt a feeling of being cheated.

Triumph?

This kid is still planning to come back for a long time...

Chapter 3145: Release prisoner

Finally, in the eyes of the public, the Triumph fleet set off and left the immortal star.

The time for the emperor's cabinet to give Ye Xuan is one month. Within one month, you must arrive at the death star field, and report to the old man who guards the place in the old club!

In fact, from the immortal star to the death star, rushing slowly, all the way to the wormhole jump, ten days is enough, if all are starry fortress, even faster.

Even if Ye Xuan's triumphant fleet has 50 3,000-kilometer captains' star-rated warships, it's possible to show up at 20 days.

More than ten days, let him adjust the state along the way, while looking at the scenery along the way, after all, this time into the death star field, it is difficult to come!

Of course, this is just the idea of the old man in the old club. Ye Xuan does not think so. The source of engulfing is enough. He will leave and leave the fleet of Naples at the same time. The emperor disagrees. The mountain is the king.

It is worth mentioning that the entire fleet that the imperial dynasty allocated to Ye Xuan this time was only two 100,000-meter-diameter star Fortresses on the surface list, five 30,000-meter-diameter star-class small fortresses, and a diameter of 10,000 meters. The Great Fortress is ten, and the three-star star-rated battleship is fifty!

But in fact, the entire Triumphal Fleet is not of this size.

First of all, any 100,000-meter-diameter starry sky fortress is actually a battleship group. The diameter of 100,000 meters, and the internal star-studded three-star-diameter star-rated battleships are like playing.

This time, Ye Xuan is almost a good seller. If the dynasty is deducted in this respect, he can't do it.

Inside the two star fortresses, each has 50 star-studded stars, plus five star-sized small fortifications of 50,000 meters in diameter, and a large number of star-rated starships. Inside the 10,000-meter-diameter fortress, there are hundreds of meters of patrol ships like small private warships...

Lin Lin always counted down, regardless of the size of the size, Ye Xuan's battleships are nearly a thousand ships!

Definitely a fully functional large fleet!

In addition, he has the Thunder Fortress in his own hands, as well as the Black Mosquito, the Black Wind and the Great Fortress. Even the Longye Life Battleship has a large number of resources to supply the population, and now it has The small 5,000-meter-diameter fortress grew to the point of the current 10,000-meter-old fort.

So together, the battleships held by Ye Xuan are absolutely enough to control a galaxy. Even if Zhanshan is the king's own door, there is absolutely no problem!

With the departure of the fleet, Ye Xuan left all the forces in the defense of the 18th Emperor's House. All of them were re-invested in the Black Mosquito and the Black Wind. The entire 18th Emperor's House was once again empty, only one empty. Keep it.

Before Ye Xuan was still worried about him, but now that he knows the mysterious identity of Kong Bo, he is not worried at all.

Before leaving, there was no other language in the empty blog. I just let Ye Xuan rest assured that although some guys sometimes came to harass, it was because he had not yet swayed, but this time because Ye Xuan made a deterrent, finally let Some people who have forgotten his identity have also remembered the past. Therefore, in the future, the 18th Emperor's Office will not be dared to come to the door.

In addition, it is the return of Yan Ye Xuan early!

For this point, the empty Bo said that it is extremely determined, it seems to be taken for granted, so that Ye Xuan, who was originally planning to start slipping, is very embarrassed, and my heart is not very tasteful.

In addition, Xuanyuan Zizhen had to follow, but then I did not know what to think of, and eventually returned to the Emperor of Heaven, but just before leaving, he said to Ye Xuan shortly afterwards.

In this way, with Ye Xuan leaving the immortal star, except for his original class, there is only Naples... and Yingtai!

This girl is now playing and not running, Ye Xuan also accepted the fate!

The only regret is that before I left, I couldn't find a chance to clean up the winds. However, after Ye Xuan also figured it out, let him stay in the immortal star. Right is a thought of Ye Xuan. Maybe you will come back next time, just to clean up this guy and make a knot of the previous grievances!

Anyway, for a month, Ye Xuan is not in a hurry, and he has just been promoted to a dozen or so small steps, and now it is already the sixth-order realm of the nebula. There is really no need to use this time to practice.

Therefore, on this road, Ye Xuan is almost watching the scenery, but it is also very pleasant.

Taking advantage of the boring time, Ye Xuan finally remembered that there was still a long-standing unresolved thing, that is, the thousand federal powerhouses in the bottom of the Fortress of the Black Wind Fortress are still closed.

It is also time to let people out, anyway, they have become a small climate, even if these guys go out to talk, there is no fear.

In fact, they don't know the identity of Ye Xuan at all, even even before they have been locked up with them. The madman is screaming that he is the dragon porch of Xuan's prince. Those words are not taken seriously by them, no one will take it. A madman and Xuan Huangzi are linked together.

After the decision, Ye Xuan waved out the Fortress of the Black Wind, letting it hang in the entire huge triumphant fleet, and did not delay anything, while Ye Xuan led the sea and the cockroach The two men went directly to the bottom of the Black Wind.

In Wanluo prison, the nearly 100,000 soldiers were still building their nests. After Ye Xuan arrived, even if he looked at the situation, there was no second example of a food hunger. The original Emperor Xuanzi was really doing it himself, no wonder others.

Thus, Ye Xuan remembered the grievances that came from the direction of the harem in the depths of the inner city of the imperial city when he left the immortal star. It was from Meimei.

Although she did not show up, she should have already known that Ye Xuan is not a real Xuan prince. Maybe she would, like other emperors, subconsciously use Ye Xuan as the culprit in the murder of Long Xuan.

In fact, if she really wants to come to the door, Ye Xuan may not be euphemistically telling her the truth. After all, she also got the favor of others. The immortal ancestral blood was the hand of Ye Xuan who fell into the hands of Ye Xuan. .

However, since people have chosen the default hatred, there is no such thing as a search for it. Ye Xuan can only accept it. The black pot is a black pot. With his current strength and heritage, it is not a treat!

At this moment, after Ye Xuan entered the Black Wind No. Wan Luo Prison, he directly said that he was the identity of the Emperor Xuan, and actively released more than a thousand people, taking the black wind and entering the flagship triumphal of the Triumph. Fortress, let them check through the Fortress Star Network for what happened recently.

Since then, these guys have finally understood everything, the look on the face is wonderful, and in the enlightenment, the sound of exclamations sounds instantly, and it has been a long time since then...

Chapter 3146: We are pests

"God! I didn't expect this short period of less than half a year. So many soaring events happened. If the foot is a starry fortress of an immortal army, the old man can't believe this discourse. He must have thought of a liar..."

"Xuan Huangzi is really a **** man. It turns out that everything is done by him. Hey, not only the black wind number, but also the 10,000 prisoners are secretly placed by him. There is even a black mosquito in the bottom of the 10,000-meter prison. The federal powerhouse is also saved by the Emperor Xuan!"

"If this is not the case, how can the Emperor of the Emperor have such a stunning move? It is actually the eleventh one in the list of heavens... All of this, I have to participate in it, this is no glory, and I will be with my children and grandchildren in the future. I said that when I was on the list of the 11th, I also participated, and my face was glamorous, oh yeah..."

"Unbelievable! It's incredible. I didn't expect that in the past six months, we actually went to the first universe in the Wanluo, the bottom of the black wind, and almost went to the first universe with the Emperor Xuan. In the future, who would dare to say that Lao Tzu did not do anything?"

"Playing is a game. Although we didn't shoot, we didn't even show up, but we can be kept by the emperor. It must be of great use. The emperor is really in danger. We must be dispatched. In a sense. Say, we are as backup support forces, accompanying the emperor to marry a demon star!"

"Right right, this last time I said the idea. At that time, there was more than 10,000 prisoners in the Wanluo prison in the bottom of the black wind. The emperor's adult kept the hair for us. We are all elites, the emperor. This is specially left to be cultivated as a shackle!"

"Brothers, we must not let the emperor disappoint, this time to the death star, I am willing to go!"

"I want to go!"

"Count me, I willing to go..."

.....

Looking at the guys' passionate appearances, and listening to the thunderous words that they had said in their mouths, Ye Xuan was shocked on the spot.

It's no reaction to returning to the sea. Perhaps he and the guys are like this. They think that Ye Xuan has kept more than a thousand federal powerhouses. It really makes a big difference.

It's a wretched mosquito murder. It's obviously a clear person. At the moment, I heard these guys say a word to me. I ended up arguing myself as a federal elite who has great use for Xuan's son. After he stunned, his face Suddenly, there was a touch of admiration, and the squatting shot of Jingmeng, looking at this, and looking at that, the more you look at it, the more you feel, the more you feel.

In the face of Ye Xuan's embarrassment, these guys are even more interested. I feel that my mind is really good. I haven't lived up to the expectations of the Emperor Xuanzi. I haven't waited for him to say this truthfully, and I have already guessed it myself.

This performance is definitely worthy of the evaluation of the elite word!

So, I don't know which guy is licking the neck and we are the elite!

Then, all the other people seemed to have found a common voice, and all of them were stunned. They all had just a shot of chicken blood, and the rhythm was surprisingly close, less than ten seconds. The words in the mouth of more than a thousand people have become a voice!

We are elite!

We are elite...

This sentence is like a thunderous voice in the top commanding cabin of the Triumph. In the blink of an eye, all the fortress officers, including Naples, are thundered and stunned.

And Ye Xuan, even subconsciously stunned the spirits, this sentence was introduced into his ears, clearly changed the tone, as in the classic words of the :: we are pests! We are pests...

Especially when I saw the wretched mosquitoes, I found the companion. I quickly got a piece of it with the guys. I laughed and became a group, and sometimes it was impassioned, suddenly, His whole person feels bad...

However, since these guys have already made a sound, and they are still so excited, if they suddenly hit it, it is possible to kill a few on the spot. From the perspective of avoiding such a cup, Ye Xuan finally I could only bite my teeth and pinch my nose to recognize this.

It's just that he had planned to take root in the long-term development of the death star. After all, he said that the entire immortal dynasty had only got twenty sources of engulfment there in ten years. In

this way, the dynasty of the emperor, who returned to the immortal star with the source of engulfing it, became a dog, which shows how difficult it is to get this thing.

That is not the origin of the star nucleus. Ye Xuan devours the blood of the beast with the starry sky. He can smell the smell directly from the nose. Since this thing is so difficult to get, even if he is sitting in the death star field, the harvest can only be Sighed.

Under this circumstance, Ye Xuan's hands really need a large number of talents from all walks of life, and since the thousands of federal elites can be arrested and detained by the Devil's Brigade, they are not killed on the spot. Enough to explain their value.

With these guys assisting under the hands, it is still a little helpful for Ye Xuan to stand firm in the death star as soon as possible!

Thinking about it, Ye Xuan's heart was suddenly flattened. The only thing that needs to be guarded now is not to let the wretched mosquitoes and the thousands of federal elites go too close. Otherwise, it's hard to take people into a group of transit locusts. It's a disaster.

However, judging from the old wretchedness and the performance of the guys who are hooking their shoulders and shoulders, this is a bit difficult, and it is estimated to be small.

Thinking about it, Ye Xuan suddenly had a headache!

In the following month, the top command post of the entire Star Fortress was so lively, the thousands of federal elites were playing with blood every day, one idea, one development plan, often short. In the morning, there were a lot of copywriters and reports sent to Ye Xuan's desk. Looking at it slowly, he could directly bury his whole person.

Although most of them are nonsense, they are not operational at all. However, considering that people's enthusiasm is like fire, it is worthy of praise. It should not be against enthusiasm. Therefore, even if you see a copy of the reopening report, Ye Xuan is also holding his nose and disgusting himself. He has not sprinkled evil spirits.

But what I have to say is that there are indeed some people who have real talents in this group of guys. At least Ye Xuan has seen several extremely perfect developments. Even he appreciates it, and he does not know it. Ye Xuan is more looking forward to the death star field.

The last three days of the month will be the last time, the Triumph fleet finally entered the death star field, although it is only the edge zone, but everything seen in the eye, let Ye Xuan instantly sluggish, the whole heart, completely cool!

Where is this death star field, it is clearly a miner's paradise, a poor ghost paradise, everything in sight, it is too miserable...

Chapter 3147: Poor paradise

The death star field, as Ye Xuan had previously understood, is a dark star like a black hole, a ridiculous!

Although it is not a true black hole star field, after entering the edge of this star field, there are no stars in the vast star river in the line of sight. All the stars that can be seen from far and near are completely dead. The existence, a little bit of light and heat are not scattered, so that this vast starry sky is like a pool of stagnant water, even the energy fluctuations in the starry sky of the Galaxy, there is no need to say the weather aura!

In a word, this star field is like a real dead land. There is no light and heat. There is no natural energy fluctuation. The only thing is that there are only star powers on the dead star that are working hard and hardworking like coolies. .

These strong men are not prisoners. They all come spontaneously to the death star field, just like the star power strong people who spontaneously gather into the funeral star field to extract the origin of the star nuclear.

The only difference is that the star-studded strongmen who go to the funeral star field are basically the origin of the star nuclear. Although there are other mineral deposits, the former is the main trend.

The star-studded powerhouses that appear in this death star field, the targets they have explored are all kinds of rare and rare mineral deposits.

A star, completely dying into death, the light and heat in the star nucleus are all burned out, leaving only a black star like a clam shell, but in the interior of the star, there will be some essence of mineral residue. The mineral deposits have experienced the special effects that some other normal stars do not have due to the experience of the stars from birth to death, from radiance and heat to complete silence.

This also makes their value rise a lot, often dig a little, trading to some refiners or forces in need, in exchange for a lot of cultivation resources.

In addition, among the voids of the Xingxing River, although there are countless stars, basically any star field has its power to rule and bury the star field, and there are Tianhe stars around it.

If there are problems with the Xinghe strong people in the vicinity of the Tianhe Star regardless of the survival of the stars, and completely exploiting the mining methods with destructive means, then the federal garrison of the Tianhe Star is unlikely to sit idly by.

Therefore, even in the funeral star field, the star-studded powerhouses who extract the origin of the star nuclear will not use some destructive means to carry out mining. Generally, they are all going through a vertical shaft and one is going to perish. Stars, see if there is a star nuclear source in its star nucleus.

Yes, it is received, no, leave is!

The destruction of the stars is basically not too obvious.

Even the stars in the funeral star that are heading for complete death are still the same when mining, and the normal stars of other stars are ignored.

No one dares to use the destructive means to extract, which limits the speed of the excavation and the efficiency of collecting minerals.

However, in the death star field, this star field is not known how it is formed. In a vast expanse of land, all the stars have gone to death, and even the starry sky has no light and heat. The natural energy that is free from the emptiness of the sky is not there. It seems that there is an invisible force here, which has swallowed up all this.

This may have been suspected, but no matter whether someone really explores the truth, whether or not there is a result, at least on the surface, there has never been any relevant information disclosure.

The only thing that is well known is that this star field, the vast expanse of the region, has completely lost its normal function. The only thing left is the value of the last dusk of mining.

Therefore, in this death star field, all the strong stars can be unscrupulously arbitrarily excavated. If it is determined that a certain star has a valuable mineral deposit and has that ability, it is about three. Five friends, working together, directly blasting the whole star into a pile of gravel and slag, no one will pay attention to it!

However, this has greatly improved the efficiency of mining various mineral deposits and the convenience of the operation level, but at the same time, it is inevitable that the entire death star field will be stirred into a black smoke barrier.

Although this star field is in the gap between the forces of the Terran Third Universe Science and Technology Camp and the comprehension camp, whether it is the immortal dynasty or the Ten Heavenly Palace on the side of the comprehension camp, all of them are stationed in the fleet and official high-level guards.

But these official forces, the only purpose of entering this star field, is to collect all kinds of mineral deposits, especially the phagocytic source crystals. Just for this purpose, they have already poured all their hearts into it, and who else will care? What did this death star field be destroyed like?

In the long run, due to the official strength of the two camps of the Ten Heavenly Palace and the Immortal Dynasty, the mining of this star field is indisputed. As long as the result, regardless of the process, it will lead to all the time, dreams. It's getting more and more unscrupulous to find a star-powered person who devours the source of the crystal and makes a fortune!

This situation has already lasted for a long time, and the entire death zone of the vast territory is also ruined, but everyone has long been accustomed to it. No one feels that there is anything wrong with it.

It is against this background that Ye Xuan came to the death star field.

Everything you see in the eye, in the distance, it is almost impossible to see a few complete stars. Even if there is, it is so huge that it is very difficult to completely destroy it. It is hard to be smashed into a pile of stars and dust. Star body.

Even with this giant star, the surface has basically been dug into unsightly, no giant star is still intact, all seem to have been cut off by a huge Tiangou, or a few pieces, it is shocking.

Contrasting with this desolate and horrible scene, there are a large number of star-studded powers. They are either physically standing in the void, using various techniques and magical powers, formed in pieces of varying sizes, formed by the smashing of stars. Among the gravel, look for mineral resources.

Either, they are squatting in their respective warships, aiming at a star, or a large fragment of stars, bombarding...

These guys are gray-faced, and a large number of stars and stars are shattered, causing overwhelming dust and dust. In this case, in order to keep the personal manners clean, it is absolutely a luxury level.

Therefore, the miners who saw the sights were all embarrassed, and let Ye Xuan think of the gold diggers in some of the former black gold mines, a group of poor people who have a rich dream!

For all of this, Naples is obviously not aware of it. After some stunned, even he could not be shocked by the face, just like being thundered, muttering to himself: "Rely! These guys Can it be regarded as a strong star? The general has been born from the womb, and he has never seen a star-studded person who is worse than this..."

"This broken place... It's really a legendary paradise!"

Chapter 3148:

If you think of the whole vast death star field as a whole, and then draw a Chuhe Hanjie in the middle, then the east of the boundary river is the sphere of influence of the Ten Terran Palace of the Terran Cultivation Camp, and the Ten Heavenly Palace in the Death Star. The resident base camp is in the central part of the eastern half of the star field.

To the west of the boundary river is the sphere of influence of the immortal dynasty of the Terran Science and Technology camp. The station base of the immortal dynasty in the Death Star is in the central part of the western star.

There is little exchange between the two sides, and they do not interfere with each other. They only dig their heads and mine, and they secretly compete for more gains.

Ye Xuan's huge fleet entered from the westernmost side of the entire death star, the edge of the immortal dynasty's sphere of influence.

Like this large fleet, it is also a high-level space fortress and a starry fortress. When it entered the edge of the western camp, it naturally attracted the attention of the first time.

However, when the countless miners looked at the immortal army logo branded on the outer wall of the ship, they quickly moved their eyes away and lived on their own.

Every ten years, there is a fleet of immortal stars coming over to change the defense. The supply fleet is once every two years. Therefore, in this case, the old fritters who have stayed in the death star are basically It is commonplace.

Although this time the Fleetguard seems to have come a few years earlier, it is only this point, obviously not enough to cause their abnormal attention. After all, everyone knows that the Ten Forces and the Immortal Dynasty are stationed in this death star. The official power is impossible to fight. It really wants to be like the civil strife of the Terran. No one can afford this responsibility!

These guys are afraid that no one realizes. In fact, even the party Ye Xuan at the moment is the same. I didn't realize that with his arrival, soon after, the Ten Heavenly Palace and the Immortal Dynasty were stationed. The official force of this death star field has really hit it up, which has led to the emergence of three major universes...

The initiator of all of this may not be said to be Ye Xuan, but he is definitely the most important promoter, and since that time, the name of the Emperor Xuan, once again resounded in the three universes, but since then, some people have mentioned Xuan Zizi In this name, many people except for shaking their heads and laughing, most of them have only a different look.

Even the hair distribution to the death star field is so unstoppable, it is really speechless... This is clearly a lonely worm in the dark night, wherever it is, it is bound to attract attention!

All this is still afterward!

At the moment, the entire fleet of the entire fleet was dead, and even the more than a thousand of the former elites who had just been released by Ye Xuan from the bottom of the black wind, Wan Luo, were all excited by the blood of the federal elite. They are all stupidly stupid.

Looking at the vast expanse of the sky, countless roads like the miners' heads and squeaky heads, they subconsciously all violently shuddered, they suddenly felt that they were locked in the bottom of the black wind, Wanluo prison for one year. Half a load for a few years, but compared to the bunch of poor people who are seen at the moment, they are really happy.

At least you don't have to work, although you can't practice it, you can lie on the ground at most, and how long you want to sleep.

In this way, in the dead silence, the entire Triumphalan fleet entered from the western edge of the Death Star, and all the way toward the Eastern Stars. The situation seen along the way was basically the same, only to the Western Stars. When it was close to the central zone, the dead stars that were still intact were gradually getting more.

It seems that although the official force of the immortal dynasty stationed in this star field, regardless of other affairs, only depends on the harvest of more and less minerals, but those strong stars from the dynasty, or the poor ghosts, Still quite acquainted with the immortal dynasty in the area of the base camp of this star field, did not dare to completely harm this star field!

After a full seven-day voyage, the Triumph Fleet finally arrived at the central area of the western star, and looked around. It was already very quiet, and the stars in the line of sight were still not a little bit light. And the heat, there is no slight energy fluctuation in the void, but at least, the scene of the dusty and smoky smog is not.

In fact, even if it is still a dusty place, it will not make much impact on the base camp of the immortal dynasty in the death star field. At most, it is visually full of flaws.

The star where the resident base camp is located is a huge star, which is much more than the extremely rare immortal star.

Such a huge and almost horrible giant star, like all the other stars in this star field, has completely entered death. It is hard to imagine what it has gone through. What kind of great power is there? Can make such a horrible star fall into such a miserable.

The skinny dead camel is bigger than the horse. This sentence is used on this superstar, but it has no meaning at all. It seems that in this starless field of light and heat, all the stars, even black holes, will Under the influence of certain forces, it is completely dead.

Looking at all of this, Ye Xuan's heart was shocked. At this moment, his mystery of this death star finally got a clearer cognition, and at the same time, his mind had a huge guess. ...will there be a relationship with the source of devouring?

Could it be that all the energy, whether it is the natural energy that is freed from the galaxy's emptiness, or the internal energy of countless stars, is all about what is being formed at the moment, where is it, and what method should be used to explore and discover the source of engulfment. Absorbed, plundered?

When the idea came out of his mind, Ye Xuan shuddered and shuddered. He didn't dare to think too much. He rubbed his head and looked at the vast plain on the huge star ahead.

A huge man-made transparent special alloy protective cover, like a large bowl of heaven and earth, covers the entire vast plains, with an estimated size of nearly 10,000 kilometers.

And this is just an ordinary plain on a huge star, and the star is vast.

In the center of this huge transparent alloy shield, there is a huge city, surrounded by other small cities.

This Xiongcheng city is called the Old City of Susie, because the headquarters of the immortal dynasty officially stationed in the western part of the Death Star is here.

The strongest of the imperial dynasties sitting here in this place are generally the old ones in the royal family's old cabinets. Every ten years, the entire royal family's old cabinets are dozens of old people, taking turns to sit in this city, waiting for ten years.

Right now, the royal family who used to change into the old city in the old city was named Longji. Before the departure, Ye Xuan had already explored the situation of the scorpion. It is.

Basically, this person's temperament is extremely arrogant and cold, and she is so direct to the superior. Ye Xuan's heart is also secretly complaining. For the next period of time, between him and the 梓 pattern, it is inevitable that there will be some Unpleasant broke out...

Chapter 3149: Mawei

Although the Triumph fleet changed the fleet number, the immortal army logo on the ship did not change. Therefore, with the arrival of the fleet, the old town shield in the plain area of the front of the huge star was slowly opened for the first time. Another fleet of immortal regiments came from outside the Xiongcheng in the protective cover and rushed directly to the starry sky. They did not face Ye Xuan and immediately left.

The fleet of defenses has arrived. The fleet that was stationed in the old city of Suzuki has been in the place where the birds are not squatting for five years. It is estimated that the commander of the fleet has already been tired. This is the wish to leave the wings immediately. Rhythm.

In this regard, Ye Xuan did not care, while leading the entire fleet to the quietly opened under the protective cover of the old mansion, while examining the entire Xiongcheng, nodded with satisfaction: "Yes, the protective cover actually green All come out, there should be a large oxygen machine, the environment and the life planet are no different, it will not be too hard!"

His words just fell, the original protective cover of the Xiongcheng that had been quietly opened, has begun to slowly close, which is clearly the rhythm of the triumphant fleet that Ye Xuan did not intend to enter.

Although the speed of the protective cover is slow, at the speed of the fleet, it can all enter the protective cover before it is completely closed. However, since the other party has already indicated that it refuses to enter, Ye Xuan cannot do this.

What's more, this kind of base-like Xiongcheng has a huge protective cover, but how can there be no star defense system? If it is tough, once the opponent opens the star defense system, Ye Xuan's triumphal fleet will always be somewhat damaged. At that time, people still have a rational word, and they are not looking for someone to say.

The whole fleet is Ye Xuan, and it is hard to get from the immortal dynasty to the hand. Even if he loses a star-rated warship of a kilometer captain, he will feel bad. How could he take this risk?

"Let the fleet stop, I will wait for the old ghosts to go out, hey, let's give down Mawei, and the old pavilion is so great!"

Ye Xuan's face immediately gloomy. When he spoke, Naples glanced at the correspondent of the side. The latter immediately issued Ye Xuan's instructions, and the entire huge triumphal fleet stopped outside the Xiongcheng protective cover. , suspended in the sky above the Xiongcheng, a large piece of black pressure.

In the next moment, Ye Xuan stepped out of the main channel of the fortress of the Triumph, followed by Yingtai, the wretched mosquito and the three of the Neapolitans, and two major generals, all of which existed in the ninth state of the realm. It is the same level as the Eight Star King Scoop and Zuo Fengtai.

Right now, the original point of the Ye Xuan side is so strong.

Of course, more than the original point of repair, even the empty space can be easily crushed, but the power is one more, that is, the magic dragon is caught by the headless baby, but this is not a card, but this is not a card, but It is by no means a force that can be easily used.

In addition, both Naples and Yingtai have the eleventh major realm of Xuanguangjing, and the wretched mosquitoes are at least the twelfth realm of void, even stronger.

This point, from the Emperor II to recognize its identity, and thus in the evaluation given by the immortal emperor, can be analyzed.

Just for his cultivation, including his true identity, Ye Xuan still doesn't know it. However, after several trials in the black mosquito star and the immortal star, Ye Xuan has basically confirmed one thing, that is, the slave in the source of the old guy's brain is not invalid as originally, it should happen Some kind of variation, which led to his words and deeds being different from other magic slaves.

It is precisely because of this point that the present Ye Xuan is still a bit uneasy about the wretched mosquitoes, but it is no longer worried that he is distracted, but worried that the old goods are not adjusted, causing him trouble, In essence, it is different!

At this moment, a group of six people walked out of the main channel of the flagship fortress of the Triumph, and did not use a small patrol ship, so they crossed the void in the flesh and fell to the Xiongcheng in the lower shield.

The other party seems to mean this too. The protective cover is closed to the gap passage of only one hundred meters or so. It has stopped. This width is that the small private warships can't pass, and they can only pass!

Although the area of Xiongcheng is only a hundred kilometers, there are some satellite-like small towns standing around it. The whole world under the protective cover has reached a total of a thousand miles, which shows that the immortal dynasty is also counted here. I have worked hard and worked hard.

Such a large area, thousands of miles away, not only has a protective cover to isolate cosmic rays and cosmic dust, but also the vegetation is green and green. In this vast death star, it is like an oasis in the desert, attracting a lot of entry. The strongest of the Death Stars stay here.

Therefore, after the leaves and leaves of Ye Xuan and the six people entered the interior through the passage of the protective cover of more than 100 meters, they looked around, and in the city, the crowds were crowded, and there were even shops, markets, restaurants and the like.

Everything is exactly the same as the scenes of other normal humanities, but here the area has been reduced a lot.

In addition, in the Bailixiong City, which was guarded by a dozen small towns in the center, although there are many royal guards, compared with other small cities around the city, it is obviously deserted.

If we compare the dozens of small cities around the city to civilian cities, then the central city of this city is obviously the official place of the immortal dynasty. The average person is not qualified to enter at will.

The royal family members who take turns sitting here every ten years will enjoy it, and make it like a small country outside the country. Within the entire base of thousands of miles away, it is a hundred miles away. The territory is extraordinary.

"Old 18 is it? Don't forget that you are being sent!"

Just as Ye Xuan's heart sneered, the voice of an old man's voice suddenly came out of the city of Bailixiong. The other side was clearly intentional, and its voice rang through the entire base, and the inside of the large protective cover was thousands of miles away. The corners are clearly audible.

"It's obviously a match, but it's such a battle. It seems that the old things in Longkong are not doing much for you!"

"Unfortunately, this set can't be eaten here in the old place of Benjang. If you have a match, you have to have a match. Otherwise, what is the order of my old cabinet? Is it not equivalent?"

"In the void in the east side of a million miles, you can pick a dead star as a place to stay. The old old town of Benjo is not for you."

"Remember, although you are the hero of the royal family, but also have the responsibility to shoulder the important mission of guarding the old city, the emperor gave you such a huge fleet, but it is not for you to sway the city to show off the prestige, If there is any decree in the old city, you must lead the fleet to arrive in the first time..."

Upon hearing this, Ye Xuan's fists were all shook and his face was completely gloomy!

Chapter 3150: The new official took up three fires

Inside the protective cover, inside and outside the city, a large number of star-studded powerhouses all looked up at the moment, and their sights gathered on the six people of Ye Xuan.

They are famous for their long history, but the news of the distribution has not yet reached the death star field. Looking at Ye Xuan's gaze, it's getting weird.

The legendary Emperor Xuanzi is just that!

What about Fiji? When I met the old emperor of the royal family, I was trained like a dog. This kind of Mawei is obviously in a dilemma, and it is extremely obvious. Otherwise, it is so special, so that the star-studded powerhouse inside and outside the old city is thousands of miles away. We all listened to it really?

This is clearly deliberately embarrassing him!

The key people are still old, and they all say that this legendary prince is a courageous first universe. It seems that it is somewhat rumored. Now it is not the same as the reprimand of the scorpion, the fart is not allowed to put one?

.....

Some of the words, some did not deliberately suppress the sound, obviously with the purpose of pleading for the smear of the old, while others have depressed the sound, but at this moment, the surroundings are dead and dead, if there is a heart, Anyone can listen to it.

At least, Ye Xuan heard it all, and the anger of his heart was completely ruined out!

Old things are really welcome, is it Mawei? Laozi also took the new officer to take on three fires!

Thinking like this, Ye Xuan immediately sneered, and clenched his fists in the direction of the old city of Susong. He said: "Is it a dragon? You are a good old man, this prince comes here, just to say hello to you." Just don't take yourself too seriously!"

"I don't want to live with this emperor. I don't want to be a broken city. The emperor built one himself, not necessarily worse than you."

"In addition, you just said that this prince is a match. Since all of them are distributed to this death star, they must not be ordered. They will not return to the dynasty for the rest of their lives. Where to go? This is the responsibility of the old town defense of the Laoszi. You are looking for someone else to go. The Emperor is not interested."

"As for the fleet that I brought... Sorry, you said it yourself. It was sneaked to me. The dynasty did not give any formal orders, indicating that the fleet was responsible for defense. In this case, it is the private army of the Emperor."

"Well, you are old, this prince has to build a fortune city, there is no time to talk with you here, you always think about the defense of the old city, it is said that this death star is not too flat, the second universe of the federal The tribes are often confined and robbed. The servants of the celestial family are not to mention more. If the defense of the old city is lacking, it is afraid that few people will be able to stay..."

At the end of the day, Ye Xuan once again swayed his hand and glanced behind him. A few people in Naples who had already heard the stupidity wanted to leave.

"presumptuous!"

The roar of the dragon's wrath is thrown out of the old city of Laoxiong. At the same time, a breath of breath and suffocating sighs, originally invisible, but instantly turned into a big palm, a hundred miles wide. Blinking in the sky, under the palm of his hand, it has been shot to the six people of Ye Xuan.

"The pressure of deformation? This is the means of the universe, the prince is retreating!"

Napoli was suddenly stunned, and he spoke to Ye Xuan's shoulder. He originally wanted to pull him behind him. The result was not moving. With his horror cultivation in the darkness, he couldn't shake Ye Xuan's shot.

Napoli's momentary glimpse, this reminds me of the fact that Xuan's emperor's appearance is the sixth largest realm of nebula, but in fact, even the same level of Xuanguang's powerhouse has been killed. Real cultivation has always been a mystery, fearing that it is not under him.

This time, I am worried about the Lord, but he has taken it for granted!

Ye Xuan naturally does not have that strength. However, just as Napoli's right hand hits his back and shoulders, he is equally majestic, not weaker than the power of the sky, but without any delay. Since his body suddenly emerged, how can Naples, nowadays, shake his body?

"Hey!"

This power has turned into a virtual shadow, and the giant is the energy of the headless baby.

Although at this moment, it was only released by the headless baby corpse, but it was enough to reveal this illusion of the dragon in the back of Ye Xuan.

The original body of the dragon, even in the form of energy, is also a giant of thousands of feet, and it is by no means the so-called strong champion of the universe can match.

"Booming..."

In the sky, the thunder and thunder blasted in an instant, and the big palm of the heavens, which was cultivated by the strong dynasty of the Zhou dynasty, instantly became like a snowball of the blazing sun, melted and disappeared with the naked eye. !

At the same time, there was also a sigh of noise in the old city of Susong, and then it was the sound of the scream of the old dragon scorpion: "The magic dragon shadow? Is it the world of ...? This is not you. The strength of itself, the Zulongta really in your body, actually still protect the Lord?"

The old guy is not stupid, and he sees the truth at a glance, but he can't know the existence of a headless baby in any case.

"Zhang Guangjing? What is the realm? What is the real prestige of the 梓宿 ,,,,,,,,,,,,,,,,,,,,,,
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

Ye Xuan sneered, although this statement turned to the words of Naples, but clearly pointed out that if the sang sang, the stars and the strong inside and outside the city, the look on the face is eccentric.

"Black hole is the eighth world of the sky, and after the black hole, it is the origin, the cave, the light, the void, the beginning of the field, the light of the universe, the Kun Kun..."

"Afterwards, the old minister will not know!"

Naples subconsciously looked up at the back of Ye Xuan's back, the magic dragon's shadow has disappeared, but his face is still full of shocking colors, arched his hand, this is called: "Zhou Guangjing, It is the 14th realm. Later, it is the last glory of the fifteenth place in the sky."

"The first fifteenth environment? So, after the Qiankun territory, there are other realms? And it looks like a lot of looks?"

Ye Xuan seems to have given birth to an interest, and if he asks no one else, it is like forgetting the immortal royal family in the old Xiongcheng city below.

This is the disregard of the red fruit!

However, in the old city of the following, it was silent in this time. Although the dragon scorpion pattern is strong, it is still not confident that he can kill the ancestors of the ancestral tower under the guardian of Ye Xuan. Silence is also a wise move.

But today it is obviously impossible for him to stop.

"A good old eighteen, enough arrogant, enough domineering, good! Good! Good!!!"

Under the anger and laughter, the voice of the dragon 梓 pattern finally came: "The magic dragon is strong, but the old man is nothing but a newcomer. It is repaired in the entire old pavilion, only the last! Eight, hello, don't think that you have a ancestral tower, no one can suppress you in the old cabinet..."
